NOTE

Section 112 of the Loan and Trust Corporations Act (R.S.O. 1914, Chap. 184) provides as follows:—

112.—(1) No corporation shall, under the penalty of becoming disentitled to registry or of having its registry suspended or cancelled, make, print, publish, circulate, authorize, or be a party or privy to the making, printing, publishing, or circulating of any statement or representation that its solvency or financial standing is vouched for by the Registrar or that the publication of its statement in his report is a warranty or representation of the solvency of the corporation, or of the truth or accuracy of such statement in any particular.

DEPARTMENT OF INSURANCE

TO THE HONORABLE W. H. PRICE, K.C., M.P.P.,
Minister in Charge of the Department.

Sir,—

I have the honour to submit herewith the Thirtieth Annual Report of the Registrar of Loan Corporations for the year 1927 (business for the year ended 31st December, 1926).

The statements included in this report are arranged alphabetically according to the classes of corporations defined by the Act, namely, Loan Corporations, Loaning Land Corporations and Trust Companies. In addition there are certain statistical tables tabulated summaries and comparative statements more fully described in the Table of Contents.

The preliminary text submitted with the abstract of this report under date of July 1st, 1927, outlining registry changes during the year and important features of 1926 business is included herewith on the next following page. The publication and distribution of an abstract of this report early in July should relieve any embarrassment occasioned by the delayed publication owing to circumstances beyond the control of the Department, of the present detailed report.

ADDITIONAL REGISTRY CHANGES

Since the publication of the abstract I have the following registry changes to report.

By an agreement dated the 17th day of May, 1927, the Canada Permanent Trust Company of Toronto acquired by purchase the assets and liabilities, business, rights, property and good will, etc., of the Brantford Trust Company of Brantford, Ontario. The agreement was ratified and confirmed by the shareholders of both companies and subsequently approved by His Honour the Lieutenant-Governor in Council. The transfer became effective as of the 31st day of August, 1927.

All of which is respectfully submitted.

R. LEIGHTON FOSTER,

Registrar of Loan Corporations.

Parliament Buildings,
December 30th, 1927.

PRELIMINARY TEXT SUBMITTING ABSTRACT REPORT, JULY 1st, 1927.

TO THE HONOURABLE WILLIAM H. PRICE, K.C., M.P.P.,
Minister in Charge of the Department.

SIR:—

I have the honour to submit herewith an abstract of the Thirtieth Annual Report of the Registrar of Loan Corporations of Ontario upon the affairs of all registered loan corporations, loaning land corporations and trust companies doing business in Ontario during the year ended 31st December, 1926.

This report shows in tabulated summaries the financial condition of these corporations as taken from their annual statements filed with the Department on or before the last day of February, 1927, in respect to their business for the preceding calendar year, subject in some cases to certain adjustments and corrections necessary to secure uniformity and comply with the provisions of the Act. It is to be distinctly understood, however, that subsequent to the annual inspection now proceeding, the statements herein contained are subject to such further changes or modifications, as may, in the opinion of the Registrar, be necessary to show the true and correct financial condition of each corporation. The Department does not assume responsibility for the correctness of the figures submitted or for the valuation of the securities which compose the assets of the corporations.

The report is arranged alphabetically according to the class of corporations defined by the Act, namely loan corporations, including loaning land corporations and trust companies.

REGISTRY CHANGES

Since the publication of last year's report, I have the following registry changes to report.

By an agreement dated the 20th day of December, 1926, the Canada Permanent Mortgage Corporation of Toronto acquired by purchase the assets, and liabilities, business, rights, property and good will, etc., of the Royal Loan and Savings Company, with head office in Brantford, Ontario. The agreement was ratified and confirmed by the shareholders of both companies and subsequently approved by His Honour the Lieutenant-Governor in Council. The transfer became effective as of the 4th day of March, 1927.

By an agreement dated the 12th day of April, 1927, the Huron and Erie Mortgage Corporation of London, Ontario, acquired by purchase the assets and liabilities, business, rights, property and good will, etc., of the Southern Loan and Savings Company of St. Thomas, Ontario. The agreement was ratified and confirmed by the shareholders of both companies and subsequently approved by His Honour the Lieutenant-Governor in Council. The transfer became effective as of the 13th day of May, 1927.

OUTSTANDING FEATURES OF 1926 BUSINESS

A comparison of the summaries found in this report with those of the previous year shows an increase of more than \$16,400,000 in the total assets of loan and trust corporations registered in Ontario.

Trust companies contribute about \$18,100,000 of an increase, while loan corporations show a decrease of approximately \$1,700,000. The increase shown in trust company business was due to a number of loan corporations cancelling their registry as such, and registering as trust companies, also to the general increase in assets, particularly in guaranteed investment receipts and deposits. The decrease, as shown by loan corporations, is further attributed to one company cancelling their registry. Apart from these deflections the loan corporations show a steady increase of business over last year. Comparative summaries of the assets and liabilities of companies for the past six years will be found on pages 36 to 43.

Mortgage investments, amounting to more than \$216,000,000 constituted 64.6 per cent. of the total assets of all corporations. At the end of 1925 the total mortgage investments amounted to more than \$202,000,000 and constituted 63.5 per cent. of the total assets. The tendency to increase mortgage holdings is again apparent. The increase this year amounts to nearly \$14,000,000. The statement of mortgage investments of each of the corporations, classified as to provinces, is shown on pages 30 to 35. A schedule of like nature was included in last year's annual report, with which detailed comparisons may be made. A comparison of total mortgage investments held would indicate that both loan corporations and trust companies have been decreasing their holdings in western mortgages and increasing their Ontario and Quebec holdings. Corporations report a continued improvement in interest collections on western mortgages during the past year.

Real estate held for sale by all corporations amounted at the end of the year to slightly more than \$9,400,000, or 2.8 per cent. of the total assets. This marks an increase of approximately \$948,000 over the preceding year. It is to be noted that loan corporations show an increase of \$254,000, loaning land corporations, an increase of \$832,000, and trust companies a decrease of more than \$138,000. It was noted a year ago that the amount represented by this class of asset had increased in 1923 by 16 per cent. in 1924 by 12 per cent., and in 1925 by 5½ per cent. This year's figures mark a further increase of more than 11 per cent., indicating that foreclosures are continuing to be more rapid than sales.

Investments in government bonds by all corporations increased during the year by \$411,000, the holding of this class of security by loan corporations increasing by more than \$187,000. Trust companies by \$1,287,000, while the holdings of loaning land corporations were increased by \$1,063,000. The total investments in Canadian municipal securities show a decrease of approximately \$199,000. Investments in other bonds and stocks amount at the end of 1926 to nearly \$22,000,000 as compared with \$26,000,000 at the end of the preceding year.

There has been a substantial increase, \$4,100,000, in the amount of outstanding debentures of loan corporations payable in Canada. A year ago the increase noted was \$5,350,000. The following table shows the amount of debentures, both domestic and foreign, issued and outstanding at the end of each of the last eleven years. The remarkable reduction which occurred in 1924 in the amount of debentures payable abroad shows no sign of recovery:

	Payable in Canada	Payable abroad
*1915.....	\$28,435,263	\$77,675,532
*1916.....	28,169,467	73,784,756
*1917.....	28,805,785	69,094,057
1918.....	27,438,420	69,663,965
1919.....	26,224,619	69,991,837
1920.....	29,037,935	64,355,393
1921.....	29,982,858	62,814,676
1922.....	32,394,820	65,197,496
1923.....	34,290,528	68,350,622
1924.....	38,568,404	48,081,643
1925.....	43,927,864	48,045,898
1926.....	49,421,907	46,651,452

*Interest not included.

The amount on deposit with loan and trust corporations amounts to \$48,773,000, an increase of almost \$4,498,000 over the preceding year. Deposits with loan corporations increased by \$443,000, and deposits with trust companies by \$4,055,000. Funds placed with trust companies for guaranteed investment increased in 1926 by more than \$11,423,000. The total increase in public funds placed with loan and trust corporations in Ontario, amounting to nearly \$22,000,000 in 1926, indicates the continued and increasing confidence of the public in these institutions. The total public funds held by loan and trust corporations on December 31st, 1926, for savings and investment amounted to more than two hundred and two million dollars.

The total amount of estates, trust and agency funds administered by trust companies shows a further substantial increase during the past year, the amount under administration at the end of the year being \$934,000,000 as compared with \$871,000,000 at the end of 1925.

The total net profit of loan corporations for the year 1926 amounted to \$6,158,283.50. The total profit of trust companies for the same period was \$2,668,308.28. Expenses of administration, as reported by the companies, amounted in the case of loan corporations to \$2,245,781.58, and in the case of trust companies to \$4,157,376.40. A statement including these figures is set out on page 4.

The value of shareholders' investment in these corporations as represented by paid-in capital, reserves, surplus and profit and loss accounts, showed in 1925 as \$125,142.00, and in 1926 as \$118,259,000, a decrease of more than \$6,882,000.

All of which is respectfully submitted,

R. LEIGHTON FOSTER,

Registrar of Loan Corporations.

Parliament Buildings,
Toronto, Ont., 1st July, 1927.

CHAPTER 60.

An Act to amend The Loan and Trust Corporations Act.

Assented to 5th April, 1927.

HIS MAJESTY, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:—

1. This Act may be cited as *The Loan and Trust Corporations Act, 1927*. Short title.

2. Subsection 2 of section 18 of *The Loan and Trust Corporations Act*, as enacted by section 4 of *The Loan and Trust Corporations Act, 1921*, is amended by adding at the end thereof the words "or upon first mortgages or hypothecs upon real estate in any province in which the company is authorized to carry on business," so that the subsection will now read as follows: Rev. Stat. c. 184, s. 18, subs. 2 (1921, c. 61, s. 4), amended.

(2) A trust company may invest or loan any money held by it other than trust money in or upon any of the securities authorized by section 27 of this Act or *The Trustee Act*, and may loan any trust money held by it upon any securities authorized by *The Trustee Act*, or upon first mortgages or hypothecs upon real estate in any province in which the company is authorized to carry on business. Investment of funds.

3. Subsection 2 of section 41 of *The Loan and Trust Corporations Act*, as enacted by subsection 1 of section 9 of *The Loan and Trust Corporations Act, 1921*, is amended by adding at the end thereof the words, "provided that the Lieutenant-Governor in Council may, on the report of the Registrar, and upon such terms and conditions as may be prescribed, increase the amount which may be borrowed, to a sum not exceeding eight times the aggregate amount from time to time of such permanent capital, reserve fund and cash," so that the subsection will now read as follows: Rev. Stat. c. 184, s. 41, subs. 2 (1921, c. 61, s. 9, subs. 1), amended.

(2) The total amount borrowed by a corporation on debentures and other securities and by way of Limit of borrowing powers of loan corporations.

deposits shall not exceed four times the aggregate amount of the then actually paid in and unimpaired permanent capital and of the then actual reserve fund of the corporation, plus the amount of its cash actually on hand or in any chartered bank of Canada, to the credit of the corporation and beneficially owned by the corporation and not included in either the permanent capital or reserve fund; provided that the Lieutenant-Governor in Council may, on the report of the Registrar, and upon such terms and conditions as may be prescribed, increase the amount which may be borrowed, to a sum not exceeding eight times the aggregate amount from time to time of such permanent capital, reserve fund and cash.

Commence-
ment of
Act.

4. This Act shall come into force on the day upon which it receives the Royal Assent.

- Amount of interest permanently capitalized during the year, \$100.

CONSTATING INSTRUMENTS

This Company was in 1891 constituted by an amalgamation of (1) The Canada Landed Credit Company with (2) The National Investment Company of Canada (Limited), and the re-incorporation of the amalgamated Company. Of the two companies so amalgamated:

1. The Canada Landed Credit Company had been incorporated in 1858 by special Act of the Province of Canada, 22 V., c. 133; a special Act of 1859, 22 V., c. 105, increased the capital; the two foregoing Acts were amended by 29-30 V. (1866-7), c. 125. In 1873, an Act of Ontario, 36 V., c. 122, amended 22 V., c. 133, supra; in 1874 the powers of the Company were extended by 38 V., c. 73 (O); in 1875-6 the capital was further increased by 39 V., c. 97 (O); in 1882 the special Acts of 1858 and 1859 supra were amended by 45 V., c. 72 (O). In 1882 the special Act of Canada, 45 V., c. 110, extended the Company's operations to Manitoba and the Northwest Territories. In 1890 the special Act of Ontario, 53 V., c. 128, authorized the Company to issue debenture stock to become amalgamated with other companies, etc. In 1891, Letters Patent of Canada, dated January, 1891, authorized the amalgamation of the Company with the National Investment Company of Canada. In 1891, Letters Patent of Ontario, dated 12th February, authorized the same amalgamation.

2. The National Investment Company of Canada had been incorporated by Letters Patent of Canada, dated 21st August, 1882, issued under 40 V., c. 43 (D).

For the powers of the amalgamated Company, see the Letters Patent above cited; see also R.S.C., 1886, chap. 119; see also the Loan and Trust Corporations Act, R.S.O. 1914, chap. 184.

	<u>\$ 3,408,356 70</u>

CONSTATING INSTRUMENTS

This Company was incorporated under Special Act of the Dominion of Canada 62-63 Victoria (1899), c. 101, under the name of "The Canada Permanent and Western Canada Mortgage Corporation," for the purpose of acquiring the assets and business of the Canada Permanent Loan and Savings Company, the Western Canada Loan and Savings Company, the Freehold Loan and Savings Company, and The London and Ontario Investment Company, Limited, which several purchases were confirmed by Special Act of Ontario, 63 Victoria, 1900, c. 129. The name was changed to the "Canada Permanent Mortgage Corporation" by 3 Edward VII (1903), c. 94 (D), which Act also amended its lending powers. By 3-4 George V (1913), c. 86 (D) further amendments were made to the Incorporating Act.

Of the constituent companies, the Canada Permanent Loan and Savings Company was incorporated by declaration filed under the Building Societies Act (Cons. Stat. U.C., cap. 53) in 1855 under the name of the Canada Permanent Building and Savings Society, which name was changed to the Canada Permanent Loan and Savings Company by 37 Victoria (Ontario), 1874, cap. 100.

The Western Canada Loan and Savings Company was also incorporated by declaration filed under the Building Societies Act in 1863, under the name of the Western Canada Permanent Building and Savings Society, and its name was changed to the Western Canada Loan and Savings Company by 37 Victoria (Ontario), 1874, c. 79.

The Freehold Loan and Savings Company was also incorporated by declaration filed under the Building Societies Act in 1859 under the name of the Freehold Permanent Building and Savings Society; the name being changed to the Freehold Loan and Savings Company by 36 Victoria (Ontario) (1873), c. 104.

The London and Ontario Investment Company was incorporated by the Act of Ontario, 39 Victoria, 1876, c. 62.

In 1918 the Company purchased the assets and business of The Oxford Permanent Loan and Savings Society, which purchase was ratified by Order-in-Council of Ontario, dated July 31st, 1918, pursuant to The Loan and Trust Corporations Act.

CANADA PERMANENT MORTGAGE CORPORATION—Continued

In 1921, the Company also purchased the assets and business of The London and Canadian Loan and Agency Company, Limited, which purchase was ratified by Order-in-Council of Ontario, dated September 23rd, 1921, pursuant to The Loan and Trust Corporations Act.

In 1927, the Company purchased the assets and business of The Royal Loan and Savings Company which purchase was ratified by Order-in-Council of Ontario, dated March 4th, 1927, pursuant to The Loan and Trust Corporations Act.

CONSTATING INSTRUMENTS

This Company was, under the provisions of The Loan Corporations Act (R.S.O. 1897, c. 205), formed by the amalgamation of The Huron and Erie Loan and Savings Company with the Canadian Savings and Loan Company of London, Canada. See also 6 Edward VII (1906), c. 110 (D).

Of the above-mentioned constituent Companies The Huron and Erie Loan and Savings Company was incorporated by declaration filed under the Building Societies Act (Consol. Stat. U.C., c. 53) with the Clerk of the Peace for the County of Middlesex, 18th March, 1864 (Dec. Book, p. 65). The original corporate name was The Huron and Erie Savings and Loan Society. Under 28 Vict., c. 41, the London Permanent Building and Savings Society, and under 29-30 Vict., c. 132, the Western Counties Permanent Building and Savings Society amalgamated with The Huron and Erie Savings and Loan Society. The corporate name was changed to The Huron and Erie Loan and Savings Company by the Act of Ontario, 39 Vict., c. 95. The lending and borrowing powers of the Company were governed by 59-60 Vict. (1896), c. 49 (D), as amended by 62-3 Vict. (1899), c. 115 (D), and by 4-5 Edw. VII (1905), c. 105 (D).

The Canadian Savings and Loan Company of London, Canada, was incorporated under The Building Society's Act (Consolidated Stat. U.C., c. 53) by declaration filed with the Clerk of the Peace for the County of Middlesex on the 2nd of September, 1875 (Decl. Book I, p. 57). This Company's lending and borrowing powers were governed by The Loan Corporations Act, R.S.O. 1897, c. 205, and amending Acts.

THE HURON AND ERIE MORTGAGE CORPORATION—Continued

The agreement for the amalgamation of these Companies under the corporate name of The Huron and Erie Loan and Savings Company was executed by both Companies on the 24th October, 1905; was ratified by the shareholders of the respective Companies on the 7th December, 1905; and was assented to by the Lieutenant-Governor of the Province of Ontario by Order-in-Council, dated 29th day of December, 1905, and was further ratified and confirmed by the Act of the Legislature of the Province of Ontario, 6 Edw. VII, chapter 130. See also Special Act of Dominion of Canada, 6 Edw. VII (1906), c. 110 (D).

See Special Acts (Dominion and Ontario), 1915.

This Company acquired by purchase the assets, etc., of the Hamilton Provident and Loan Corporation by agreement, dated July 15th, 1926. The transfer became effective as of January 1st, 1926.

CONSTATING INSTRUMENTS

Incorporated under the Building Societies Act, 9 Vict., c. 90 (Province of Canada), by declaration filed on 27th March, 1847, with the Clerk of the Peace for the Western District. The original corporate name was "The Port Sarnia Building Society." The Society was re-organized as "The Lambton Permanent Building and Investment Society" under the said Act and other Acts, all of which became consolidated as chapter 53 of the Consolidated Statutes of Upper Canada, by declaration filed 19th June, 1855, with the Clerk of the Peace for the County of Lambton. This latter corporate name was changed by Order-in-Council, 4th June, 1880, to The Lambton Loan and Investment Company.

The lending and the borrowing powers are governed by the Loan and Trust Corporations Act, R.S.O. 1914, chap. 184.

CONSTATING INSTRUMENTS

Incorporated under the Building Societies Act, Consol. Stat. U.C., Chap. 53, by declaration filed with the Clerk of the Peace for the United Counties of Northumberland and Durham, 5th July, 1872. (Decl. Book, II, 127.)

The corporate name was, by Order-in-Council of Ontario, 21st June, 1876 (Ibid.), changed to the Midland Loan and Savings Company.

A by-law altering the amount of the capital stock and par value of the share was, pursuant to the Loan Corporations Act, approved by Order-in-Council of Ontario, 3rd October, 1900.

The borrowing and lending powers are governed by the Loan and Trust Corporations Act, R.S.O. 1914, Chap. 184.

CONSTATING INSTRUMENTS

Incorporated under Building Societies Act, Con. Statutes of Upper Canada, c. 53, by declaration filed in the office of the Clerk of the Peace for the County of Middlesex, 26th September, 1870. The original corporate name was The Ontario Savings and Investment Society.

By Order-in-Council of Ontario, dated 4th October, 1879, and also by Order-in-Council of Canada dated 29th October, 1879, the corporate name was changed to The Ontario Loan and Debenture Company.

The Company as now constituted was formed under the provisions of The Loan Corporations Act of Ontario by the amalgamation of The Ontario Loan and Debenture Company with the Agricultural Savings and Loan Company by virtue of Order-in-Council, dated 10th November, 1911, and operates under The Loan and Trust Corporations Act, R.S.O. 1914, Chapter 134 and its amendments.

NOTE.—By By-law No. 14, passed at a Special General Meeting of the Shareholders on June 30th, 1924, the paid-up capital of the Company was reduced to \$234,320.00, this sum being the estimated value of the assets of \$303,913.32, less the paid-up debenture capital of \$69,593.32. Subsequently, however, there was a change in the control of the Company and the by-law was repealed on 31st January, 1925.

The Company went into voluntary liquidation on 1st October, 1926.

CONSTATING INSTRUMENTS

Incorporated under the Building Society's Act (R.S.O. 1877, c. 164), by declaration filed with the Clerk of the Peace for the County of York, 17th September, 1879, with the corporate name of the Real Estate Loan and Debenture Company. Decl. Book II, p. 57.

Letters Patent of Canada (6th April, 1883) incorporating the Company under the Canada Joint Stock Companies Act, 1877, with the corporate name of The Real Estate Loan Company of Canada, Limited.—Lib. 85, folio 282, Office of the Registrar-General of Canada. The capital authorized by this instrument was \$2,000,000, being the capital of the said The Real Estate Loan and Debenture Company, with the same powers throughout Canada as now possessed by the said The Real Estate Loan and Debenture Company, and for the same purposes and objects, subject always to the provisions of the said last mentioned Act (Canada J.S. Co's. Act, 1877), and with all such further powers, purposes and objects as are conferred upon Loan Companies incorporated under the provisions of the said last mentioned Act.

1884. Act of the Dominion of Canada, 47 V., c. 101 (D), respecting sales of assets.

Supplementary Letters Patent of Canada, 20th June, 1892, reciting By-law No. 62 of the Company, and (as therein provided), reducing the capital stock from \$2,000,000 to \$1,600,000.

1913. Act of the Dominion of Canada, 3-4 George V., c. 184, increasing capital stock to \$2,000,000 in shares of \$100 each par value.

CONSTATING INSTRUMENTS

Incorporated under the Building Societies Act (Consol. Stat. U.C., c. 53) by declaration dated 12th March, 1870, and filed with the Clerk of the Peace for the County of Lincoln on the 21st March, 1870. The original corporate name was The Security Permanent Building and Savings Society of St. Catharines.

The Corporate name was changed to The Security Loan and Savings Company, St. Catharines, in 1876, by 39 V., c. 64 (D); and also by Order in Council of Ontario, dated 18th August, 1876.

The lending and the borrowing powers of the Company are governed by the Loan and Trust Corporations Act, R.S.O. 1914, chap. 184.

THE HOME BUILDING AND SAVINGS ASSOCIATION—Continued

CONSTATING INSTRUMENTS

Incorporated under the Building Societies Act (R.S.O. 1887, c. 169), by declaration filed with the Clerk of the Peace for the County of Carleton, on the 24th June, 1890. (Decl. Book II, 119.) The Company, for purposes of distinction, ordinarily uses the words "of Ottawa" as part of its corporate name, but these words do not appear in the declaration of incorporation.

The lending and the borrowing powers are governed by the Loan and Trust Corporations Act, R.S.O. 1914, c. 184.

THE PROVIDENT INVESTMENT COMPANY—Continued

CONSTATING INSTRUMENTS

Incorporated on 3rd November, 1893, by Letters Patent of Ontario, issued under the Ontario Joint Stock Companies Act (R.S.O., 1887, c. 157), as "The Provident Investment and Mortgage Guarantee Company of Ontario, Limited."

By Order-in-Council dated 2nd day of November, 1899, the corporate name of the Company was changed to "The Provident Investment Company."

By Order-in-Council, dated 31st day of March, 1903, the capital stock of the Company was reduced \$700,000.00 under By-law No. 27.

For the lending and borrowing powers see the Letters Patent (which contain special limitations).

By Letters Patent of Ontario, dated January 9th, 1912, the Company renounced its borrowing powers and accepted those provided in the Loan Corporations Act (R.S.O., 1897, c. 205), and amending Acts.

By Order-in-Council, dated 12th day of March, 1925, the capital stock of the Company was reduced \$400,000.00 under By-law No. 32.

CONSTATING INSTRUMENTS

Incorporated as "The Toronto Real Estate Investment Company" by Letters Patent of Ontario (June 15th, 1885), issued under the Ontario Joint Stock Companies' Letters Patent Act, R.S.O. 1877, c. 150. Supplementary Letters Patent of Ontario (29th December, 1887), were issued under R.S.O. 1887, c. 157, defining the borrowing powers, etc. Further Supplementary Letters Patent of Ontario (25th September, 1889) were issued under the last mentioned Act, increasing the capital stock from \$400,000 to \$2,000,000. Further Supplementary Letters Patent of Ontario (30th March, 1891) were issued under the same Act, conferring agency powers on the Company. The Corporate name was by Order-in-Council (2nd April, 1891) changed to "The Toronto Savings and Loan Company."

For the lending and borrowing powers, see the Letters Patent and the Acts, R.S.O. 1877, c. 150; R.S.O. 1887, c. 157; R.S.O. 1914, chap. 184.

CONSTATING INSTRUMENTS

The British Mortgage and Loan Corporation of Ontario was incorporated by Letters Patent of Ontario, dated October 5th, 1877 (Lib. 5, No. 52), issued under R.S.O. 1877, c. 150, which Act was continued by R.S.O. 1887, c. 157, and was as to Loan Corporations superseded by 60 V, c. 38 (O), now R.S.O., c. 184.

By 16 George V, c. 121, the Company was given trust company powers and its name changed to the British Mortgage and Trust Corporation of Ontario.

The lending and the borrowing powers of the company are derived from its Letters Patent and the above public general statute.

Total.....	\$	127,941	<u><u>25</u></u>

MISCELLANEOUS

- Officers of the Corporation who are under bond for the following amounts, respectively: Bond of \$100,000.00 covers entire staff up to \$100,000.00 default of any individual member. This includes employees of both Huron & Erie Mortgage Corporation and Canada Trust Co., all being covered under one bond, as many members are employed by both institutions.
- Dividend-days of the Corporation in 1926 and rates of dividends declared payable on those days, respectively: January 2nd, 1926, $4\frac{1}{2}\%$; July 2nd, 1926, $4\frac{1}{2}\%$.
- Date appointed for the Annual Meeting, February 8th, 1927. Date of last Annual Meeting, February 9th, 1926.
- Amount of actual cash receipts during the year (excluding Trust Account receipts) for:

(a) Interest on mortgage investments.....	\$	111,333	45
(b) Interest on bonds and debentures.....		4,532	21
(c) Interest on loans on collateral security.....		4,977	18
(d) Agency fees and commissions.....		86,552	51
(e) Revenue from bank balances.....		2,803	86
			<u>\$ 210,199 21</u>
- Amount of interest permanently capitalized during the year (Company Funds) 1,211 55

CONSTATING INSTRUMENTS

Incorporated on the 23rd July, 1894, by special Act of the Dominion of Canada, 57-8 Vict. (1894), chap. 115, under the name of The General Trusts Corporation of Canada.

By a subsequent special Act, 62-3 Vict., chap. 111 (D), passed on the 11th August, 1899, the corporate name was changed to The Canada Trust Company, and certain other amendments were made in the incorporating Act.

The powers of the Company are defined by sections of the incorporating Act, which powers are (section 4) to be deemed subject to the laws of the Province.

MISCELLANEOUS

1. Dividend-days of the Corporation in 1926 and rates of dividends declared payable on those days, respectively: January 1st, April 1st, July 1st, October 1st, $1\frac{1}{4}\% = 5\%$ per annum.
2. Date appointed for the Annual Meeting, February 19th, 1927. Date of last Annual Meeting, February 27th, 1926.
3. In the case of any Company whose stocks, bonds or debentures are held by the Corporation either directly or indirectly, if such Company is otherwise indebted to the Corporation upon loans either secured by mortgages or other security, or unsecured, the aggregate amount of such loan is \$5,625.00.
The amount of interest on such loans taken credit for in the Profit and Loss Account during the year, \$368.00.
4. Amount of contingent liability not shown as direct debts in the foregoing statement. The Company has a certain contingent liability under its Guarantee of Titles to Land given when the Company was issuing Guarantee of Titles. This business was discontinued eleven years ago and no claim has been made during that time, and the outstanding Guarantees of Titles are constantly diminishing in number through expiration. The liability at the worst is only nominal.
5. Amount of actual cash receipts during the year (excluding Trust Account receipts) for:

(a) Interest on mortgage investments.....	\$ 11,630 80
(b) Interest on bonds and debentures.....	7,630 92
(c) Dividends on stocks.....	548 00
(d) Interest on loans on collateral security.....	8,879 52
(e) Agency fees and commissions.....	85,198 02
(f) Revenue from bank balances.....	366 55
	\$ 114,253 81
6. Amount of interest permanently capitalized during the year, \$248.20.
7. Give dates and amounts of any sums loaned or advanced to Guaranteed Account:

CONSTATING INSTRUMENTS

The Title and Trust Company was incorporated in 1905, by Special Act of the Parliament of Canada, 4-5 Edward VII, chap. 162 (Royal Assent 20th July, 1905). By Section 19 of this Act the Company was required to make an initial deposit with the Receiver-General of Canada to carry on the business of Title Insurance, the said deposit to be increased to \$75,000.00 within two years from the date of the issue of such license, and to be further increased as the Treasury Board may from time to time require.

In 1907, by Special Act of the Province of Ontario, 7 Edward VII, chap. 118, the Company was, upon the conditions therein specified, made admissible to registry under The Loan Corporations Act, and initial registry was granted on the 30th August, 1907.

CONSTATING INSTRUMENTS

The Montreal Trust Company was incorporated on the 21st day of March, 1889, by special Act of the Province of Quebec, 52 Vic., c. 72 (Q.) and subsequent special amending Act, under the name of the Montreal Safe Deposit Company.

By special Acts the name was changed in 1895 to the Montreal Trust and Deposit Company (59 Vic., c. 70 (Q.)), and again in 1909 to the Montreal Trust Company (9 Edw. VII, c. 115 (Q.)).

Authorized by Order-in-Council to carry on business in the Province of Ontario as from the 11th day of March, 1909, subject to certain conditions and limitations.

Registered on the Trust Companies Register, 21st January, 1913.

The Company has a deposit with the Province of Ontario, amounting to \$200,000.00.

CONSTATING INSTRUMENTS

The Royal Trust Company was incorporated in 1892, by Special Act of the Province of Quebec, 55-56 Vict., chap. 79, which was amended by 55-56 Vict. (1892), chap. 80 (Q), and by 59 Vict. (1895), chap. 67 (Q), and by 63 Vict. (1900), chap. 76 (Q), 6 Ed. VII, chap. 73.

Authorized by Special Act of the Legislature of Ontario, 2 Edw. VII, chap. 103, to transact business therein as specified in section 1 (5) of the said Act, which enacts as follows:

"(5) The Company shall be limited in respect to all business relating to property, rights or interests in the Province of Ontario, to the powers mentioned in the schedule to the Ontario Trusts Companies' Act, and shall be subject to the general provisions of the said Act and of the general public law of the said Province relating to trust companies and trusts."

The Company has a deposit in the Province of Ontario amounting to \$200,000.

CONSTATING INSTRUMENTS

The Toronto General Trusts Corporation was constituted on the 1st April, 1899, by special Act of Ontario, 62 Vict. (2), chap. 109, amalgamating into one Company under the above name: (1) The Toronto General Trusts Company, and (2) The Trusts Corporation of Ontario.

By an agreement made under the Loan Corporations Act in two indentures dated respectively 13th and 30th July, 1903, approved by Order-in-Council (Ontario), 11th September, 1903, The Toronto General Trusts Corporation acquired the assets and assumed the liabilities and duties of the Ottawa Trusts and Deposit Company. See also special Act of the Province of Quebec (2nd June, 1904), 4 Edw. VII, chap. 93.

- 10,575 40

CONSTATING INSTRUMENTS

Incorporated under the Building Societies Act, 1887, c. 169, as amended by 56 V, c. 31 (O), by declaration filed with the Clerk of the Peace for the County of Victoria, on the 4th September, 1897.

The operations of the Company were for a time by law restricted to the County of Victoria (56 V., c. 31), continued by R.S.O. 1897, c. 205, s. 8 (4); but the Company, having fulfilled the statutory requirements, was by Letters Patent of Ontario, bearing date 11th November, 1898, relieved from the above restriction of its operations.

By a special Act of the Legislature of Ontario, 13-14 Geo. V, c. 107, the Company was granted the powers of a trust company and the name was changed to The Victoria Trust and Savings Company. (See also Loan and Trust Corporations Act, R.S.O. 1914, chap. 184.)

CONSTATING INSTRUMENTS

Originally incorporated as a Loan Corporation by Letters Patent, 7th April, 1913, under the Loan and Trust Corporations Act, 2 George V, 1912, chap. 34, now R.S.O. 1914, chap. 184. The original corporate name was The Waterloo County Loan and Savings Company.

By a special Act of the Legislature of Ontario, 12-13 Geo. V, c. 148, the Company was granted the powers of a trust company and the name was changed to the Waterloo Trust and Savings Company.

FILED BY

Loan and Trust Corporations

JUNE 30th, 1926, TO MARCH 31st, 1927, INCLUSIVE

Pursuant to Sections 40a and 18 (2c) of the Loan and Trust Corporations Act.

Sec. 40a. Every loan company receiving deposits shall make a sworn return to the Registrar quarterly on the 15th days of January, April, July and October in each year, drawn in accordance with the form prescribed from time to time by the Registrar, showing the amount of such deposits and showing the amount of cash on hand and on deposit with any chartered bank of Canada and the amount of debentures, bonds, stock or other securities of or guaranteed by the Dominion of Canada, and of or guaranteed by any province of Canada less any incumbrances thereon, and the amount of bonds, debentures and other securities of any municipal corporation in Ontario, less any incumbrances thereon, and the principal amount of any moneys payable to the company on demand, the payment of which is secured by the mortgage or pledge of any of the securities hereinbefore in this section mentioned as the said amounts stood at the end of the last preceding month and stating that the same were at the date mentioned in such return on hand and available for depositors. 11 Geo. V, c. 61, s. 8.

Sec. 18.—(2c). Every trust company receiving deposits in the manner authorized by subsection 2a shall make a sworn return to the Registrar quarterly on the 15th days of January, April, July and October in each year, drawn in accordance with the form prescribed from time to time by the Registrar, showing the amount of such deposits and showing all securities and cash ear-marked and definitely set aside as provided in subsection 2b and stating that the same were at the date mentioned in such return so ear-marked and definitely set aside and showing the amount of cash on hand and on deposit with any chartered bank of Canada and the amount of debentures, bonds, stock or other securities of or guaranteed by the Dominion of Canada and of or guaranteed by any province of Canada, less any incumbrances thereon, and the amount of bonds, debentures and other securities of any municipal corporation in Ontario, less any incumbrances thereon, and the principal amount of any moneys payable to the company on demand, the payment of which is secured by the mortgage or pledge of any of the Government, Government guaranteed or municipal securities, hereinbefore in this sub-section mentioned, as the said amounts stood at the end of the last preceding month and stating that the same were at the date mentioned in such return, on hand and available for depositors.

TRUST COMPANIES

JUNE 30th, 1926, TO MARCH 31st, 1927, INCLUSIVE

Pursuant to Section 17a (3) of the Loan and Trust Corporations Act.

Sec. 17a.—(3). A sworn return shall be made to the Registrar quarterly on the 15th days of January, April, July and October in each year, drawn in accordance with the form prescribed from time to time by the Registrar, showing all such securities, loans upon securities and cash, if any, as the same stood at the end of the last preceding month and stating that the same have been ear-marked and definitely set aside in respect of moneys received by the company for guaranteed investment as set out in subsection 1 of section 17. 11 Geo. V, c. 61, s. 3.

REPORT

OF THE

Minister of Public Works

FOR THE

PROVINCE OF ONTARIO

FOR THE

TWELVE MONTHS ENDING 31st OCTOBER

1926

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO

ONTARIO

TORONTO

Printed and Published by the Printer to the King's Most Excellent Majesty
1927

TO HIS HONOUR WILLIAM D. ROSS, ESQ.,
Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

As required by law, I submit for the information of Your Honour and the Legislative Assembly, the Annual Report of the works under the control of the Public Works Department, comprising the reports of the Deputy Minister, the Architect and the Engineers for the twelve months ending the 31st of October, 1926.

Respectfully submitted,

GEO. S. HENRY,
Minister Public Works and Highways.

Department of Public Works, Ontario,
Toronto, March 1st, 1927.

REPORT

OF THE

Deputy Minister of Public Works

I have the honour to submit a summary of the works performed by the Department of Public Works during the fiscal year ending October 31st, 1926.

The statue of Sir James Whitney was completed on the site chosen in front of the Parliament Buildings.

The Ontario Government Building for exhibiting the resources of Ontario at Exhibition Park, Toronto, was completed before the close of the year. This building was erected under agreement with the City of Toronto. During the period of the Exhibition construction was sufficiently advanced to permit of the building being used by the Departments of the Government.

Maintenance and Repairs of Government Buildings.—Repairs and renewals required on Government Buildings were promptly executed. Redecorating of corridors in the Parliament Buildings was carried out and the use of lighter colours was very effective.

East Block, Parliament Buildings.—Contracts were entered into for the completion of interior finishing, glazing and elevators, and such progress was made that the building will shortly be occupied. Ontario birch was used for interior doors and trim and has given splendid satisfaction. Elevator fronts, Ontario made and of the latest metal construction, are being installed. Marble from Bancroft quarries and a buff limestone from Shelburne is being used in the first floor corridors and Exhibit Hall and elsewhere for interior finish. To provide convenient access between the Parliament Buildings and the East Block a tunnel was completed which will provide for pedestrian traffic. Part of the tunnel is partitioned off and serves as a service tunnel for heating pipes and telephone cables and other services between the two buildings. A seven-position telephone switchboard has been installed and when in operation will take care of all telephone service in the two buildings.

Public Institution Buildings.—At the Boys' Training School, Bowmanville, a workshop, store building, pumphouse, superintendent's residence and sewage disposal plant were erected.

Educational Buildings.—Maintenance and repairs to the schools under the authority of the Department were carefully attended to.

Agricultural Buildings.—The School of Baking at Guelph was completed and arrangements made for use of the building. Vimy Ridge Farm, west of Guelph, was prepared for the reception of British boys. This work involved the installation of waterworks, the remodelling of the farm house, the fitting up of a comfortable dormitory and the completion of a covered passageway in order to bring all parts of the structure under one roof for convenience and proper supervision. At Ridgetown a combined Agricultural School and Community

Hall was completed. At Ontario Agricultural College, Guelph, a steam pipe was laid to connect Macdonald Hall to the central heating plant, and improvements made at the swimming tank in the gymnasium.

District Buildings.—At Fort Frances the construction of a new Registry Office and Land Titles Office was undertaken. At Port Arthur the new gaol was completed and occupied.

Engineers' Branch.—Bridge construction during the year amounted to 134 structures of which two are steel, seventy reinforced concrete and sixty-two of timber.

Storage Dams.—One storage dam at Crane Lake in Parry Sound District was completed.

Navigation.—Repairs to locks, dams and swing bridges on inland navigation under control of the Department were carried out.

Secretary's Report.—The Secretary's report gives list of contracts entered into for materials and works during the year.

The following is a summary of the Departmental expenditure during the fiscal year ending October 31st, 1926.

Civil Government:		
Salaries, contingencies, etc.....		\$74,851 82
Government Buildings:		
Maintenance and repairs.....		666,133 83

DIGNY HORRELL,
Secretary and Purchasing Agent.

ARCHITECT'S BRANCH

Report of work done by the Architect's Branch during the year ending October 31st, 1926.

REPAIRS AND MAINTENANCE

Government House.—Repairs were made to the buildings as usual, including the residence, lodge, garage and greenhouses; the latter were painted on the outside. Repairs were also made to the roads and walks. The grounds and gardens received proper attention of the gardener and staff.

Parliament Buildings.—The Buildings, generally, have been kept in good repair, only such painting was done as was absolutely necessary, in view of the removal of some of the Departments to the new East Block.

Departmental buildings in the City of Toronto, including No. 5 Queen's Park Crescent, in which are located the chemical and assay laboratories in connection with the Department of Mines; No. 15 Queen's Park Crescent, offices of the Director of the Ontario Savings Bank and offices of the Farm Loans, Department of Agriculture; No. 17 Queen's Park Crescent, offices of the Forestry Branch in connection with the Department of Lands and Forests; No. 47 Queen's Park Crescent, offices of the Ontario Railway and Municipal Board; No. 71 Grenville Street, occupied by the Board of Ontario Liquor Commissioners; No. 110 University Avenue, occupied by the Department of Highways and officials of the Childrens' Aid Branch of the Provincial Secretary's Department have their offices in this building; No. 46 Richmond Street West, in which are located the Moving Picture and Amusement Tax Branches of the Treasury Department; the offices of the Mother's Allowance and Employment Bureau; branches of the Labour Department and offices of the Parole Board; the Garage and repair shop in Surrey Place in the rear of No. 15 Queen's Park Crescent, and Provincial Police Garage, Surrey Place and Grosvenor Street; Experimental Station, Board of Health, Stanley Park. All the buildings have been kept in good repair, the work being done by the mechanical staff of the Department.

East Block.—Tenders were called for in the public press and contracts awarded as follows:—

Interior finishing—Jackson-Lewis Company, Limited, including tile partitions, concrete, finished floor, etc., marble tile and terrazzo work, plaster work, carpenter and joiner work and painting. The glazing of outside windows was awarded to the Consolidated Plate Glass Co. For elevators, including four passenger and one freight elevator and one dumb waiter, The Canadian Otis Fensom Elevator Co. For elevator fronts and bronze doors to north, east and west entrances, the Canadian Otis Fensom Elevator Co. For steel window frames and sashes, The Architectural Bronze & Iron Works Co. The lowest tender being accepted in each case.

The marble in connection with the contract for interior finish is being supplied by the Government from the Bancroft Quarries, in the County of Hastings, the quarrying being done by men employed by the Government. The quarry tile used in floors of vaults and lavatories and the hollow tile used in construction of the partitions and walls, were manufactured at the Government Clay Plant in Mimico. Stone from the Shelbourne Quarries in the County of Dufferin for lining the walls and columns in the Exhibit Hall, and the entrances to north, south, east and west entrances of building, is also being quarried and supplied by the Government, the work being carried on same as at Bancroft.

The work on this building is nearing completion, so much so that it will be possible to move some of the Departments in the beginning of the year. Owing to the difficulty in obtaining materials, it will, probably, be about May 1st, before the building will be completed.

The Tunnel.—Plans and specifications were prepared for a tunnel connecting the East Block with the Parliament Buildings and the contract awarded to Messrs. Jackson-Lewis Co. This necessitated considerable work in the basement of the Parliament Buildings, including the lowering of the foundation walls to the level of the tunnel and cutting through same for entrance to the tunnel and forming a hall with a stairway leading up to the first floor of the Parliament Buildings. The elevator and entrance to the elevator has been provided for and the elevator will be carried down to this level to serve the tunnel. The tunnel is 251 feet in length, extending from the Parliament Buildings and entering the East Block under the main entrance steps and connecting with a wide corridor leading directly to the elevators. The tunnel is divided into two apartments, one for the public, 9 feet wide and 8 feet six inches high, the other for steam mains, electric cables, 4 feet in width. The outer walls, floor and ceiling are constructed with reinforced concrete. The dividing wall between the main tunnel and pipe tunnel of brick, the floor, roof and walls are waterproofed with an asphalt membrane on the outside. The ceiling is insulated with cork, plastered with cement and lime. The inside of the walls of the main tunnel are lined with glazed white tile with a coved base of terrazzo extending 12 inches on each side, forming border to the floor of red quarry tile, from the Government Clay Plant. Will be heated by steam and electrically lighted.

Whitney Monument.—A contract was awarded to Messrs. McIntosh Granite Co., for the erection of a pedestal to receive the statue of the Whitney Monument, on a site selected by the Government on the grounds in front of the Parliament Buildings. The pedestal is built of stone from the Queenston Quarries, the work has been completed and the statue placed in position. The monument was designed by the well-known sculptor, Hamilton McCarthy, R.C.A.

Osgoode Hall.—This building has been kept in the usual good repair, including the replacing of old plaster, which had fallen from the walls and ceilings in some of the offices and corridors. The painting of walls and ceilings of some of the corridors and offices and washing off the stone work and painting walls and ceilings of the main entrance and grand hall. An improvement was made in the heating plant by running a steam main to increase the supply to the Law Society's section of the building.

PUBLIC INSTITUTIONS

Boys' Training School, Bowmanville.—A workshop to be used for mechanical training has been erected; is constructed of brick from the Government Clay Plant, on cement foundations; is two stories in height, heated with hot water, will be fully equipped with the necessary machinery.

A residence for the Medical Superintendent has been erected and occupied for some time. It is built of brick on cement foundations.

Fire hall and pump house have also been erected and a 75-gallon tank in connection with same. A well for water supply has been sunk and a reservoir erected around same, the water being pumped to the tank overhead. An additional reservoir has also been placed on the flat ground close to the creek.

A sewage disposal plant has been constructed consisting of septic tank, and sewage beds about one acre in extent.

All the work has been done under the direction of Mr. S. J. Spall, Clerk of Works. Considerable grading has been done to the roads by the Department of Highways.

Preliminary sketches have been made for a school house, in compliance with the requirements of the Institution.

Mowat Sanitarium, Kingston, for Treatment of Tuberculosis.—This institution is located in the Township of Frontenac, just outside of the city limits, on 31½ acres of land. It was used by the D.S.C.R. as a military hospital during the war and I understand your Government propose to take over and use it as an annex to the Hospital, Kingston. This Institution is comprised of the following buildings: The main and administration building, with accommodation for patients, nurses' home, four pavilions for patients, one recreation building, power house, housing steam and electric plants and ice machinery; three small cottages, store building and garage; with the exception of the nurses' home, these buildings are heated by hot water with forced circulation. The nurses' home is heated by a local hot water system. Water is supplied from the Ontario Hospital and is pumped to an elevated storage tank, having a capacity of 80,000 gallons and from there distributed to the various buildings and hydrants on the grounds. The sewage is disposed of through septic tanks, and after being chemically treated is carried through a tile drain to the creek some considerable distance away. I am informed the system is working satisfactorily. Should the Government decide to take over this institution, considerable alterations will be necessary to the buildings to adapt them to the conditions required for a mental hospital.

EDUCATIONAL BUILDINGS

The following schools and institutions are under the Department of Education, the repairs and alterations to same being under the care of this Department. The Normal and Model Schools, Toronto and Ottawa; the Normal Schools, Peterborough, London, Stratford, Hamilton, North Bay; English-French Schools, Sturgeon Falls and Sandwich; School for Deaf, Belleville; School for Blind, Brantford. Ordinary repairs were made to these buildings, with the exception of the Normal and Model Schools at Ottawa, where considerable repairs had to be made to the roofs. Five of the deck roofs covered with galvanized iron had worn out beyond repair and were renewed. The work was done under contract by Messrs. McKinley & Northwood, Limited, of Ottawa. Some repairs were also made to the slating and flashing of all the roofs in connection with these schools. The stone work in front and east end of the Normal School had to be re-pointed with cement, the mortar having fallen from the joints. This work was done under contract by Messrs. Taylor & Lackey.

English-French School at Embrun.—This school was completed in December and has been occupied throughout the year. The walks and fences were built and the grounds put in good condition.

Teachers' Training School, Hamilton.—Preliminary sketches have been made for a Teachers' Training School proposed to be erected in connection with the Technical School in Hamilton.

Public, Separate, Continuation and High Schools.—The work done by this Department in co-operation with the Department of Education, is as follows:—

Sketch plans, standardized as far as possible, have been made and prints issued to School Boards and County Inspectors, as follows:—

No. 1 Harrow, S.S. No. 1 Dalhousie, Garson, Hilton Beach, No. 2 Lorne, No. 10 Mono, No. 9 Mulmur, No. 4 Amaranth, Port Arthur, Port Hope, No. 1 Pauchaud, No. 2 Tisdale, Simcoe, Thornton, No. 2 Warwick, Whitchurch, Separate School, Whitby, Alexandria, No. 1 Atwood, No. 1 Burgess, No. 1 Carrick and Culross, Clarksburg, Car. High School, Cobalt, Chatham, Ferris, Gowgama, Separate School, Rainy River, No. 1 Sibley, No. 2 Jaffrey and Melock, Parry Sound, No. 5 Sandwich East.

The following plans for new schools, or alterations to existing buildings have been submitted to this Department to be reported upon and in several instances, amended sketches have been made, suggesting improvements to the plans submitted: Capreol, Continuation School, Fenwick; Islington, Kirkland Lake, Laurel, Summertown, Consolidated School, Apsley; Consecon, Fenwick Continuation School, Orono, Ilderton, Continuation School, Sparta; Thedford, Thamesford, Separate School, Cobalt; High School, Cochrane; Consolidated School, Quibelle and Lucknow; and Technical School, Belleville.

The following places have been visited and meeting held with School Board, with a view to improvements on school building and these sketch plans have been prepared: Continuation School, Lefroy; High School, Plantagenet; S.S. No. 1, Warwick; Consolidated School, Gooderham; S.S. No. 3, Charlottenburg and Summertown; S.S. No. 14, Medonte, Gowganda.

School for Blind.—The painting work in the main building commenced last year was completed. This work was done under contract by W. J. Kickley. Linoleum has been laid on the floors of the main corridors which has greatly improved the appearance of them, as the floors were badly worn and had not been renewed since the erection of the building. Tenders were called for remodelling the girls' toilet room, plans for which were, prepared last year and the contract was awarded to R. H. Ballantyne of Brantford. All of the above work has been satisfactorily completed.

AGRICULTURAL BUILDINGS

Vimy Ridge Farm Hostel for Receiving Boys from Britain.—The farm house has been remodelled and repaired and furnished and is being occupied as an administration building and residence for the Superintendent and employees.

The implement shed, connected by a passageway with the farm house, has been converted into a dormitory, giving accommodation for forty boys. It is comfortably heated from the heating plant in the farm house. A basement has been erected under the end of the building for store room and coal vault.

An addition has been built between the farm house and dormitory for a lavatory, which has been fitted up with sanitary fixtures as required. A septic tank was constructed not far from the buildings to receive the sewage and drains laid to same from the lavatory.

As the water supply, including two wells on the premises, was found to be insufficient, the supply was increased by sinking an artesian well conveniently located to the building and a supply obtained sufficient for all purposes. The water is pumped from the well to two 1,000-gallon tanks, one in the farm house and the other in the horse barn.

Western Experimental Farm, Ridgetown.—Plans and specifications were prepared for an Agricultural School and Community Hall to be erected at Ridgetown. Tenders were called for in the public press and the contract was awarded to the Ponsford Construction Co., of St. Thomas. This building is nearing completion and will be ready for occupancy in a short time. Considerable difficulty has been encountered in getting proper drainage for same, owing to the nature of the soil which is quicksand. Septic tank and cess pools have been built adjoining the building and an 8-inch tile drain laid from this tank, a distance of 1,300 feet to the creek. The contract for laying the main sewer has been awarded to the Ponsford Construction Co., and will also be completed in a short time.

The building has a frontage of 81 feet 8 inches by a depth of 61 feet, is two stories in height, constructed of red brick from the Clay Plant at Mimico. The roof is of flat construction, covered with felt and gravel. Conductor and rain water pipes are continued down the inside. The lower floor is divided into an assembly hall, with seating capacity of 250; boiler room and girls' and boys' locker room and lavatories. The upper floor is divided into four class rooms for physics, chemistry, natural science and domestic science, with store rooms adjoining each class room. The corridor extends throughout the upper floor with staircase at each end and vestibule and separate entrances for boys' and girls. The heating (steam) is being done under contract by Purdy Mansell, Limited, of Toronto; their contract also included the plumbing.

Ontario Agricultural College, Guelph.—Considerable repairs were made to the coal vault, including removal of wooden posts and replacing them with concrete columns, a new felt and gravel roof over the entire building, the old roof being worn out.

Steam mains were laid from the main boiler house to Macdonald Hall, coupling up the heating plant in that building with the central heating plant of the Institution. All this work was done by day labour, under the supervision of Mr. A. Green, Chief Engineer of the College. It has been completed and is working satisfactorily.

Considerable repairs will have to be made to the heating plant in the horticultural building, including the greenhouses. It is proposed to abandon the present hot water boilers and lay a steam main to the central boiler house and operate the plant from that point. Sufficient repairs only have been made to the present plant in the greenhouse to enable them to operate through the coming winter.

An addition has been built to the rear of the dairy building to be used as a workshop. The work was done under contract by Geo. C. Walker, of Guelph.

School of Baking.—This building has been completed and the machinery is being placed in position. I understand instructional work will be commenced at next session of the school. The grounds around the building have been graded and concrete walks laid.

A tile floor has been laid to the platform surrounding the swimming tank in the gymnasium and a water filter installed, which has greatly improved the sanitary condition and the appearance of the tank.

Agricultural School, Kemptville.—A contract has been awarded to Robert Beggs, of Hallville, for constructing a vegetable storage in the basement of the students' dormitory building. A contract was also awarded to Mr. Beggs for the erection of a piggery on the premises.

Sketch plans were prepared for a residence for teacher.

A large amount of painting has been done to the exterior wood and iron work on all the buildings on the campus, with the exception of the students' residence. This work was done by day labour under Mr. Hopcraft, one of our painting staff, as foreman. This work has been satisfactorily done at a moderate cost.

Government Building, Canadian National Exhibition.—The new Government Building is completed. Sufficient work was done in time to permit it being put into commission by the opening of the Exhibition on August 28th. This building was designed by Messrs. Chapman & Oxley, architects, of Toronto, and the work carried out under their supervision. The outer walls are faced with Queenstone stone, the trimmings and sculpture being of cement. Messrs. Sullivan & Fried, of Toronto, are the contractors.

Horticultural Experimental Station, Vinelands.—Ordinary repairs have been attended to and an artesian well sunk close to the boiler house to improve the water supply, which is being taken from the lake at present. Considerable work was done in redecorating the interior of the residence, lodge, boarding house and four cottages. This work was all done under the supervision of the Director of the Station.

Eastern Dairy School, Kingston.—Ordinary repairs were made to this building, including the steam heating and plumbing.

DISTRICT BUILDINGS

General repairs have been made to all the buildings throughout the districts, including court houses, gaols, lock-ups, registry offices and land titles offices in Algoma, Cochrane, Kenora, Manitoulin, Muskoka, Nipissing, Parry Sound, Rainy River, Sudbury, Temiskaming and Thunder Bay.

Rainy River.—Plans and specifications were prepared for a new Registry Office and Land Titles Office to be erected in Fort Frances, the present building being inadequate and too small to carry on the increased volume of business. The old building, I understand, has been handed over to the city to be converted by them into a lock-up. The new Registry Office is located on the south-west corner of the Government grounds on a line with the Court House. The building is 45 feet by 32 feet, one storey and basement in height. The foundations are constructed of concrete, faced with dressed stone. The superstructure being of red brick with cut stone dressings to windows and entrances surmounted by galvanized iron cornices. The roof is of felt and gravel. The building is of fireproof construction throughout. Provision is made for a large vault, public space and offices for the Registrar. Store rooms, lavatories and boiler room are located in the basement with stairway leading to same. The windows are provided with revolving steel shutters of the latest design.

Tenders were called in the public press and the contract awarded to M. H. Braden, whose tender was the lowest. Good progress has been made with the work and the building will be completed and ready for occupation by June 1st. The building is heated with steam carried through a tunnel from the boiler plant in the Court House. This work is being done by the Corrin Plumbing and Heating Co.

Thunder Bay.—The new gaol, Port Arthur, was completed and occupied early in the season.

Plans and specifications were prepared for tearing down the old gaol and the erection of a gaoler's house on the grounds of the new gaol. The stone from the old gaol was used in the construction of the walls of the gaoler's house. The

building is about completed and will be ready for occupancy next month. This work was done under contract by Messrs. Macaw & Macdonald, of Port Arthur. A large amount of work has been done in grading of grounds and building of roads and entrances by prison labour.

All of the buildings under the charge of the Public Works Department are inspected by the officials of the Department as may be necessary. All steam boilers and machinery in these buildings and in connection with the Public Institutions under the Provincial Secretary's Department are inspected by the Boiler Inspector at least twice a year.

Toronto, October 31st, 1926.

F. R. HEAKES,
Architect.

ENGINEER'S BRANCH

CONSTRUCTION AND MAINTENANCE

Report on the construction and maintenance of Public Works during the fiscal year ending October 31st, 1926.

The expenditure on construction and maintenance of bridges and other public works under the control of this Department varied but little from the expenditure during the preceeding year.

All work was performed by day labour under our regular staff of foremen. The only contracts given out were for steel for highway bridges.

The work on bridges embraced the completion of 134 structures, two steel on concrete, seventy of reinforced concrete and sixty-two of timber. Of the timber bridges, a number consists of cedar decks on abutments of rubble masonry, set in cement mortar. The most important bridges constructed were the Waubashene bridge in East Simcoe; the Indian River bridge in Alice, North Renfrew; and the Ingoldsby bridge in Haliburton.

One storage dam was constructed, the Crane Lake dam in the Parry Sound District.

The provincial dredge operated during the entire season in the Huntsville waters. The navigation channels are nearly all fully restored and it is expected that the dredge will be transferred to other waters about June 1st, 1927.

The lockmasters reported on business at the different locks as follows:

	Steamers	Small Boats	Scows	Rafts
Port Carling Lock	1,897	906	329	83
Huntsville Lock	55	522	24	17
Magnetawan Lock	458	102	117	289

On district drainage work carried out under the direction of the Department, the expenditure amounted to \$24,564.86, a slight advance over the expenditure of the former year.

Under the Provincial Aid to Drainage Act, 1921, seven large drainage schemes under the Municipal Drainage Act, and for which petitions for aid had been duly filed, were reported completed. The different schemes were examined. On reports to the Executive Council, grants amounting to 20 per cent. of the cost of the work were directed to be paid. The total of grants so paid amounted to \$27,369.00.

The expenditure from the fund for maintenance of public works and bridges was very light, the cost of the operation of the provincial dredge being the only item of any importance.

OPERATION OF PROVINCIAL DREDGE

The dredge was dry-docked at the entrance to the Huntsville locks on December 4th, 1925. During the winter the hull of the dredge was overhauled, and new timbers installed where necessary. The dump scows were also overhauled and the decks, pockets, and rollers were put in proper working condition.

On May 22nd, the dredge fleet was moved to Peninsula Canal and the season's work was started. The channel from the high bridge over the canal, to Fairy Lake, 1950 feet long and 100 feet wide, was cleaned out to a depth of 11 feet; at the east end of the canal, the channel for a distance of 300 feet was cleaned out to a width of 75 feet and a depth of 11 feet. At the bend east of the high bridge, the channel was cleaned out to a width of 40 feet and a depth of 11 feet. The lighthouse at the east end of the canal was rebuilt above low water level.

HUNTSVILLE DAM

At the north end of the dam, a new timber crib was placed. A concrete core wall was placed in the crib up to high water level and extending from the dam into the solid bank. The worn out stop log gains were replaced and ten new stop logs supplied.

MAGNETAWAN LOCK

The old lock at the upper entrance to the Magnetawan lock was rebuilt. The dock is 103 feet long and 12 feet wide. It was formerly supported by two timber cribs, two frame bents and the concrete lock. The frame bents would not stand up against the ice pressure. Two timber cribs were built to replace the bents. These cribs are 12 feet square and 17 feet in height. The old timber in the top of the cribs was removed to low water level and replaced with new timber. The entire deck was renewed. New 10 by 10 corbels and stringers, and a three-inch plank floor were put on. A two by six waling was placed for the full length of the dock. The cribs were all filled with stone. T. J. Paget, Public Works foreman, was in charge of the work.

PORT CARLING LOCKS

A new electric pump was installed at Port Carling Locks to operate the sprinkling system for the lawns and grounds. The electric lighting system was extended to the small locks. Poles were erected and wiring installed. Five lights of 200 watts each were placed on the small lock and approaches. Red signal lights were also placed on the swing bridge.

BRIDGES CONSTRUCTED UNDER DISTRICT APPROPRIATIONS

NIPISSING DISTRICT

Graham Creek bridge, lot 7, 13th line, Chisholm.—A concrete beam bridge on timber pile foundations. It has a clear span of 25 feet. The abutments are 11 feet 6 inches from the foundation to the floor level. The railing consists of concrete posts and handrail. The bridge is built on a skew to bring the abutments in line with the stream. The approaches were well graded and gravelled. Cost, \$2,878.00.

A small concrete culvert was built on the 13th line in the vicinity of this bridge, opposite lot 5. Cost, \$345.66.

Graham Creek bridge, lot 3, 9th line, Chisholm.—A concrete beam bridge built from the same plan as the 13th line bridge, above described. Cost, \$2,223.00

Corbeil Bridge, South Branch Lavase Creek, 15 sideline, concession 11, East Ferris.—A concrete beam bridge with a clear span of 20 feet. The bottom is very soft and concrete piles were used in preference to abutments. The concrete piles, reinforced with three-quarter-inch square bars are 12 feet long. Four piles are used in each end bent. The deck is of reinforced concrete. The railing consists of three 12-inch square posts on each side, with 3-inch slab reinforced with expanded metal. The top rail is a 9-inch beam, reinforced with two $\frac{5}{8}$ -inch steel bars. The ends of the bridge are filled with rock, which is allowed to fall to a natural slope around the piles. The bottom around the piles is excavated, so that the toe of the stone fill will be below the bottom of the channel. The approaches were well graded and gravelled. Total cost, \$1,466.00.

W. J. Cole, Public Works foreman, had charge of the construction of the concrete bridges.

TIMBER BRIDGES

J. O. Rochefort, Road Inspector, was supervising foreman over a number of timber bridges in the Nipissing District. Wherever the bottom is solid enough to warrant the practice, the abutments are built of rubble masonry, set in cement mortar. Such work is permanent and costs but little more than the standard timber crib filled with stone. The decks, railing, etc., are built of flatted cedar. The following bridges were constructed:

Marter Creek bridge, lot 5, concession 10, Bonfield.....	\$578 17
Schryse Creek bridge, 5 sideline, concession 10, Bonfield.....	379 43
La Mable Creek bridge, lot 31, concession 2, Airy.....	126 00
Trout Creek bridge, lot 18, concession 12, Boulter.....	535 40
Beckett Creek bridge, lot 30, concession 3, Calvin.....	110 00
Eau Claire bridge, concrete floor.....	399 55
Mill Creek bridge, lot 23, concession 5, Chisholm.....	335 91
Boom Creek bridge, 10 sideline, concession 11, Chisholm.....	454 71
Clement Creek bridge, 20 sideline, concession 11, Chisholm.....	614 11
Roy Creek bridge, lot 25, concession 12, Chisholm.....	365 00
Gauthier Creek bridge, lot 13, concession 4, East Ferris.....	617 44
Boulaire Creek bridge, lot 5, 9th line, East Ferris.....	674 03
Lavase Creek bridge, lot 19 and 20, concession 12, East Ferris.....	864 55
Boucher Creek bridge, lot 6, concession 13.....	510 27
Lauder-Calvin townline bridge, concession 7.....	583 36
Boom Creek bridge, lot 6, concession 8, Papineau.....	560 19

PARRY SOUND DISTRICT

Bernard Lake bridge, lot 28, concession 9, Strong.—A concrete beam bridge with a clear span of 25 feet. Roadway 16 feet clear. The bottom at this site was very soft and the bridge was moved to the south to secure better foundations, and a new channel was cut about 50 feet south of the old channel. The line of the road was moved to the east to ease off curves in the old road. The abutments are 16 feet in height to the floor level, and are carried on timber pile foundations. Twenty-three piles to each abutment. 1,600 cubic yards of fill were required to properly build up the approaches.

The railings of the bridge consist of 3-inch concrete slabs reinforced with expanded metal. The railing on the approaches consists of half-inch steel wire cables supported by cedar posts.

T. J. Paget was foreman in charge. Cost, \$4,023.53.

Gough's bridge, 20 sideline, concession 14, Himsworth.—The old bridge, constructed in 1915, consisted of an 80-foot steel span on timber pile piers, with a timber trestle approach at each end. The steel span was supplied with steel stringers, but a plank floor was supplied. All timber had decayed to such an extent that it had to be replaced. It was decided to make permanent repairs.

The timber trestle approaches were replaced with concrete trestles and a concrete floor placed on the steel span. The concrete trestles have clear spans of 25 feet. Double bents of 30-foot concrete piles are driven under each bridge seat, 9 piles in each pier. The shore bents, driven in the natural bank, consist of 4 piles each. The concrete beams in the trestle are 12 inches wide and 24 inches deep, reinforced with 5 bars of 1-inch square steel. The approaches at each end are filled with rock and are protected with guard rails of wire cable. J. R. Harrop was foreman in charge. Cost, \$5,557.56.

Jordan Creek bridge, lot 20, concession 11, Hagerman.—A concrete pile bridge with a clear span of 20 feet, roadway 16 feet in clear width. Four concrete piles 20 feet long are driven at each end. Rock fills are placed at each end, the rock falling to a natural slope around the piles. The railing is a concrete slab, reinforced with expanded metal. The guard rails on the approaches consist of cedar posts, with two lines of half-inch wire cable. T. J. Paget was foreman in charge. Cost, 1,402.72.

South River bridge, west boundary of Himsworth, Concession 9.—A 60-foot steel span on concrete abutments and roadway 16 feet clear. The south abutment is 10 feet in height to floor level and has a solid rock foundation. The north abutment is 15 feet in height to floor level and rests on a gravel and boulder foundation. The floor is a 6-inch concrete slab, reinforced with expanded metal. Extensive fills are required at each end of the bridge. J. R. Harrop was foreman in charge. Cost, \$6,230.74.

Young Street bridge, Magnetawan River, Burks Falls.—A concrete trestle bridge on concrete piles. The structure has a total length of 94 feet 6 inches and has 3 spans of 30 feet in clear width. The roadway has a clear width of 16 feet and a 5-foot sidewalk is provided on the north side of the bridge. The two centre pile bents consist of 9 piles each. These piles are 39 feet long. The upstream piles are protected with 8-inch steel angles. The east shore bent has five 26-foot piles and the west shore bent has five 36-foot piles. The floor slab is supported by five lines of concrete girder beams. These beams are 12 inches wide and 24 inches deep, reinforced with six 1-inch steel bars. The railing is a concrete slab, reinforced with expanded metal and supported by 10 main posts 12 inches square, reinforced with five-eighth-inch steel bars. A heavy stone fill is placed at each end of the bridge. The stone drops to a natural slope around the supporting piles. The approaches are top-dressed with gravel and are protected with a guard rail of wire cable supported by strong cedar posts. At the north-west corner, the street drain was filled in and an 18-inch covered drain provided. A 5-foot concrete walk was constructed across this fill to connect the bridge sidewalk with the sidewalk on the north side of the street.

T. J. Paget was foreman in charge. Cost, \$6,622.03.

At the end of the season work was proceeding on four other bridges in this district.

MUSKOKA DISTRICT

Axe Creek bridge, lots 10 and 11, concession 13, Stisted.—A concrete beam bridge with a clear span of 26 feet, roadway 16 feet clear, solid concrete abutments. Cost, \$1,161.38.

Bass Creek bridge, lot 12, concession 8, Medora. A concrete beam bridge with a clear span of 12 feet. Roadway 16 feet in clear width. The abutments of solid concrete are 8½ feet in height to floor level. Cost, \$894.51.

Bennett Creek bridge, lot 5, concession 6, Watt.—A concrete box culvert, 22 feet long, 7 feet wide and 6 feet high, inside measurements. Cost, \$886.48.

Bray's bridge, lot 31, concession 8, Stisted.—A concrete beam bridge with a clear span of 16 feet. The abutments are 10 feet in height to the floor level. Roadway 16 feet in clear width. Cost, \$957.61.

Black Creek bridge, lot 16, concession 12, Monck.—A concrete beam bridge with a clear span of 18 feet. Roadway 16 feet in clear width. The abutments are 11 feet in height to the floor level. Cost, \$1,058.76.

Cardwell bridge, lot 4, concession 4.—A concrete culvert with a clear span of 12 feet. Roadway 18 feet in clear width. The cover is a 12-inch slab reinforced with three-quarter-inch steel bars at 6-inch centres. The abutments are eight feet in height to floor level. Cost, \$871.90.

Cardwell bridge, lot 16, concession 7.—A concrete beam bridge with a clear span of 20 feet. Roadway 16 feet in clear width. The abutments are 14 feet in height to the floor level and are supported on pile foundations. Cost, \$1,501.17.

Draper-Macaulay townline bridge, lot 16.—This is a concrete culvert with a clear span of 12 feet. Roadway 16 feet in clear width. The cover is a 12-inch slab, reinforced with three-quarter-inch steel bars at 6-inch centres. Cost, \$917.75.

Mathiasville bridge, lot 18, concession 7, Draper.—At this point the old road crossed a creek and ran along the north bank of the south branch of the Muskoka River, making a short turn onto the steel bridge across the river. To improve conditions, the road was diverted to the north bank of the creek over a distance of 200 feet. An 8-foot concrete culvert with a 16-foot roadway was built on the creek opposite the entrance to the steel bridge. The new road line has an easy turn to the steel bridge. Total cost, \$1,266.50.

King Creek bridge, 20 sideline, concession 12, Stephenson.—A timber culvert with a clear span of 16 feet. Pine timber abutments, with tamarac floor and stringers. Cost, \$295.84.

McNee Creek bridge, Parry Sound Road, Watt.—A concrete culvert with a clear span of 10 feet. Roadway 16 feet in clear width. The abutments are 8 feet in height to the floor level. Cost, \$976.48.

Morrison Creek bridge, lot 11, concession 17, Wood.—A concrete beam bridge with a clear span of 26 feet. Roadway 16 feet in clear width. The abutments are 9 feet in height to the floor level. Cost, \$1,240.00.

Port Sydney Culvert.—Located on the turn in the road into the Village of Port Sydney. A concrete culvert 26 feet long, 5 feet wide and 4 feet 3 inches high, inside measurements. Cost, \$547.09.

Tenth Concession bridge, lots 27 and 28, Draper.—A concrete beam bridge with a clear span of 18 feet. Roadway 16 feet in clear width. The abutments are 9 feet in height to floor level. Cost, \$853.65.

Utterson Culvert, Muskoka Road, Stephenson.—This culvert is located just north of the Village of Utterson on the old Muskoka Road. It is a concrete culvert 5 feet wide and 4 feet high, inside measurements. The length is 26 feet. Cost, \$309.61.

All the bridges in the Muskoka district were built under the direction of Wm. Lowe, supervising foreman.

CENTRE SIMCOE DISTRICT

Swaley Creek bridge, lot 10, 10th line, Vespra. A concrete pile bridge with a clear span of 20 feet and a roadway 16 feet in clear width. The concrete piles are 25 feet in length. Rock fills are placed at each end to take the place of abutments. Cost, \$1,438.00.

Willow Creek bridge, lot 10, 10th line, Vespra. A concrete trestle bridge with a clear span of 25 feet and a roadway 16 feet in clear width. The concrete piles are 25 feet in length. Rock fills are placed at the ends to take the place of abutments. Cost, \$1,539.00.

EAST SIMCOE DISTRICT

Deer Creek bridges, 6 and 7 sideroad, concession 3, Matchedash and lot 7, 4th line, Matchedash.—These are concrete pile bridges, with a clear span of 16 feet each. Roadway 16 feet in clear width. Rock fills are placed at each end to take the place of abutments. The cost of the two bridges was \$2,672.00.

Amos Train was foreman in charge.

Willow Creek bridge, lot 20, 3rd line, Oro.—A concrete beam bridge, with a clear span of 25 feet 6 inches, roadway 16 feet in clear width. The bridge site was changed to straighten a bad curve in the creek that threatened to destroy the roadbed. The bridge is built on a skew to bring the abutments in line with the channel, giving a perpendicular width of 24 feet. The abutments are 11 feet in height to floor level. Cost, \$2,269.05.

A small concrete culvert was built on the 4th line of Oro. The township supplied all the material and the department paid for the labour, amounting to \$300.00.

Amos Train was foreman in charge of the work in East Simcoe.

A large bridge across the narrows at Waubaushene was under construction at the end of the season, but it will not be completed until the spring of 1927.

HALIBURTON DISTRICT

Dillman bridge, Burnt River, lot 33, concession 12, Monmouth.—A concrete bridge with a clear span of 40 feet, roadway 16 feet in clear width. The abutments are of heavy mass concrete and are 14 feet in height to floor level. The deck consists of a 6-inch floor slab, supported by two side concrete girder beams, with two cross floor beams and two longitudinal floor beams. The girder beams are 6 feet in depth, 16 inches wide below floor level, and 12 inches wide above floor level. They are reinforced with 10 lines of 1-inch square steel bars at the bottom and 4 lines of 1-inch bars at the top. Stirrups of three-eighth-inch steel are used in the beams. The cross floor beams are 18 inches deep and 12 inches wide, and the long floor beams are 12 inches deep and 12 inches wide, all reinforced with 1-inch square bars. Very heavy fills were required for the approaches. Cost, \$3,524.62.

Dunford's bridge, Burnt River, lot 28, concession 11, Monmouth.—This bridge is the same throughout as the Dillman bridge above described, with the exception that the grading of approaches was much lighter in this case. Cost, \$3,041.90.

Eagle Lake bridge, lot 20, concession 4, Guilford.—Located near the entrance to Cranberry Lake. This bridge is also a 40-foot span and follows the same plan as the Dillman bridge above described. Cost, \$3,082.00.

Fox Creek bridge, lot 13, concession 10, Snowdon.—A concrete culvert with a clear span of 10 feet. Roadway 16 feet in clear width. The abutments are 9 feet in height to floor level. The cover is a 12-inch slab, reinforced with three-quarter-inch square steel bars at 6-inch centres. Cost, \$712.00.

Ingoldsby bridge, lot 19, concession 2, Minden.—An 80-foot steel span on concrete abutments. Roadway 16 feet in clear width. The abutments are 17 feet in height to floor level. The steel span was supplied by the Sarnia Bridge Company at a contract price of \$2,925.00. The steel was erected by the foreman in charge. The concrete floor has not yet been laid. Cost to date, \$6,569.00.

Miner's Bay bridge, lot 17, between concessions 6 and 7, Lutterworth.—A culvert 20 feet long and 10 feet in clear width. The abutments and wing walls are of rubble masonry, set in cement mortar and are 10 feet in height to floor level. The bridge site was moved down stream 18 feet to ease a curve in the road. The new road line necessitated a heavy rock fill at each end of the bridge. A strong guard rail of wire cable 80 feet in length is placed at each side of the fill. Cost, \$1,822.19.

Sedgwick's bridge, lot 17, 11th line, Snowdon.—Located over the north branch of Burnt River, about one mile south from Gelert. A concrete girder beam bridge with a clear span of 50 feet. The two girder beams are 6 feet in length, 18 inches wide below floor level, and 12 inches wide above floor level. These beams are reinforced with twelve 1-inch square steel bars at the bottom and four 1-inch bars at the top. Stirrups of three-eighth-inch steel are supplies. Two cross floor beams are used. These beams are 22 inches deep and 15 inches wide, reinforced with 6 inches square steel bars. Two longitudinal beams support the floor. These beams are 16 inches deep and 12 inches wide, reinforced with three 1-inch bars. The floor slab is 7½ inches thick at the centre, and 6 inches at the sides, reinforced with five-eighth-inch square bars. The abutments are of mass concrete, 12 feet in height to floor level and rest on a secure gravel boulder bottom. A very heavy rock fill was required at each end of the bridge. Cost, \$2,600.00.

P. R. Switzer was foreman in charge of the foregoing bridges.

Perch Creek bridge, lots 3 and 4, concession 6, Laxton.—A timber bridge with a clear span of 10 feet. The approaches were rock filled and top dressed with gravel. Cost, \$232.77.

A. J. Southern was supervising foreman.

Tough bridge, lot 24, concession 8, Eldon.—A concrete bridge with a clear span of 14 feet, roadway 20 feet in clear width. The abutments are 11 feet in height to floor level. The structure is reinforced throughout. The bridge was constructed by the Township of Eldon and the Department paid a grant of \$800.00 to the township.

EAST PETERBORO DISTRICT

Ranch Turn bridge, Burleigh Road, lot 2 concession 9, Burleigh.—A concrete culvert with a clear span of 10 feet, roadway 16 feet in clear width. The abutments are 9 feet in height. Wire cable guard rail over bridge and approaches, supported with steel posts on bridge and cedar posts on approaches.

McIlmoyle bridge, lot 19, concession 12, Burleigh.—A concrete culvert built after the same plan as the Ranch Turn bridge above described. The cost of the two bridges was \$1,781.91.

Cordova bridge, lot 13, concession 1, Belmont.—A concrete culvert with a clear span of 10 feet built according to the plan of the Ranch Turn bridge above described. Cost, \$988.70.

Cook's bridge, lot 15, concession 7, Belmont.—A small concrete bridge with a clear span of 10 feet, abutments 7 feet in height to floor level and roadway 16 feet in clear width. Cedar railing. Cost, \$503.25.

Dafoe bridge, lot 9, 6th line, Belmont.—A concrete beam bridge with a clear span of 20 feet and roadway 16 feet in clear width. The abutments are $10\frac{1}{2}$ feet in height to floor level. Slab railing, reinforced with expanded metal. Wire cable guard rails on approaches. Cost, \$982.60.

Fountain bridge, lot 20, 15th line, Harvey.—A concrete culvert with a clear span of 14 feet, and roadway 16 feet in clear width. Twelve inch slab top, reinforced with three-quarter-inch square steel bars. Slab railing reinforced with expanded metal. Wire cable guard rail on approaches. Cost, \$648.63.

Wm. Anderson, road inspector, was the supervising foreman on the bridge work in this district.

NORTH HASTINGS DISTRICT

Alder Creek bridge, lot 13, concession 13, Carlow.—A timber bridge with a clear span of 20 feet. Crib abutments, stone filled. Cedar timber throughout. Cost, \$200.00.

Bass Creek bridges, Limerick.—Two timber bridges with clear spans of 20 feet. The abutments are timber cribs, filled with rock. Approaches well graded. The two bridges cost \$782.74.

Brule Hill bridge, lot 19, concession 6, Monteagle.—A timber bridge with a clear span of 20 feet. Cost, \$341.12.

Davey Creek bridge, lot 20, concession 6, McClure.—A timber bridge, clear span 20 feet, abutments are crib construction and stone filled. Pine timber throughout. Cost, \$533.75.

Detlor bridge, lot 20, 10th line, Dungannon.—A concrete culvert with a clear span of 8 feet. Cost, \$804.62.

Hamilton bridge, lot 19, concession 7, Marmora.—A concrete culvert with a clear span of 10 feet. Cost, \$837.78.

Madoc Float bridge, lots 18 and 19, concession 6.—This work comprised placing a new cover and a new railing on the old floating bridge at this point. The old bridge was covered with 5-inch sawn cedar. The sound timber from the old cover was used to provide four lines of stringers, which were laid on top of and spiked to the old floor. A new floor of 5-inch sawn cedar, 16 feet long, was laid on these stringers. A substantial guard rail of 4 by 4 posts, 4 by 4 braces and top rail, with a 2 by 6 hub rail, was placed at each side of the bridge. The structure is 325 feet long. Cost, \$1,443.00.

Maynooth bridge, Monteagle-Wicklow townline.—Located over a small creek on the townline about 40 rods east of Maynooth Village. It is a concrete culvert 36 feet long, 8 feet wide and 6 feet in height, inside measurements. It is well reinforced throughout. The side walls are carried down three feet below the bottom of the stream. A 9-foot fill is placed over the top of the culvert, providing a roadway 18 feet in width.

Maynooth Station bridge.—A concrete culvert with a clear span of 10 feet, roadway 16 feet in clear width. This bridge is also on the townline about 20 rods east of the station and about $1\frac{1}{4}$ miles east of the village. The two bridges were built from the same camp. Cost of the two bridges, \$2,560.25.

McArthur Mills bridge, Mississippi Station, Mayo Township.—This bridge is a 32-foot Queen truss span and was repaired. A new truss rod was provided. New plank floor and railing. The approaches were also built up in proper shape. Cost, \$202.15.

Moira River bridge, lot 12, concession 2, Tudor.—A concrete bridge, with two spans of 30 feet in clear width, roadway 16 feet in clear width. The abutments and centre pier rest on solid rock foundations and are 10 feet 6 inches in height to floor level. The bridge railings are concrete slabs, reinforced with expanded metal and supported by 12-inch by 12-inch concrete posts, set at 11-foot centres. The approaches are filled with rock, top-dressed with gravel and protected with wire cable guards, supported by cedar posts. Cost complete, \$2,923.48.

Papineau Creek bridge, lot 4, concession 16, Monteagle.—A timber bridge with a clear span of 16 feet. Cost, \$300.15.

Park's bridge, lot 27, concession 5, Madoc.—A concrete culvert with a clear span of 12 feet, roadway 16 feet in clear width. Steel posts on culvert, cedar posts on approaches. Wire cable guards, extending over culvert and approaches. Cost, \$610.77.

Pettiford's bridge, Wollaston.—A timber bridge with a clear span of 20 feet, roadway 16 feet clear. Cost, \$232.15.

Post's bridge, lot 22, concession 10, Marmora.—A concrete beam bridge with a clear span of 20 feet, roadway 16 feet in clear width. The abutments are 8 feet in height to floor level. Rock foundations. Wire cable guard rails. Cost, \$748.49.

Price bridge, lot 10, concession 6, Monteagle.—A timber bridge with a clear span of 20 feet, roadway 16 feet clear, built throughout of cedar. The abutments are rock filled cribs. The approaches were raised and widened for a distance of 10 rods at each end of the bridge. Cost, \$315.00.

Stoney Creek bridge, lot 9, concession 11, Elzevir.—A concrete beam bridge with a clear span of 25 feet, roadway 16 feet in clear width. The abutments are 11 feet in height to floor level. Concrete slab railing reinforced with expanded metal and supported with 12-inch by 12-inch posts on each side of bridge. Wire cable guard rails on approaches. Cost, \$1,682.91.

Tanner's bridge, lot 13, 11th line, Madoc.—A concrete culvert with a clear span of 12 feet, roadway 16 feet in clear width. Flat slab top reinforced with three-quarter-inch square bars at 6-inch centres. Steel T posts on culvert and cedar posts on approaches. Cost, \$622.89.

All bridges in North Hastings were constructed under the direction of W. E. Wiggins, supervising foreman.

ADDINGTON DISTRICT

Babcock bridge, lot 4, concession 2, Olden.—A steel beam bridge with a clear span of 20 feet, roadway 16 feet in clear width. Concrete abutments 6 feet in height to floor level. The base on which the abutments rest is a stone fill up to low water level. The deck consists of 6 lines of 12-inch 31½ pound steel I beams. Steel posts, T section, are provided for railing. The guard railing consists of wire cable supported by cedar posts on the approaches and passing through the steel posts on the bridge. The approaches are rock filled, top dressed with gravel. Cost, \$1,507.87.

Bear Creek bridge, lot 2, concession 9, Effingham.—A concrete bridge with a clear span of 14 feet, roadway 16 feet in clear width. The abutments are 9 feet in height to floor level. The cover is a 14-inch concrete slab reinforced with three-quarter-inch square steel bars at 8-inch centres. The approaches are protected with wire cable guard rails. Cost, \$1,656.62.

Bell Rock bridge, lot 19, concession 11, Portland.—The timber deck on this bridge was decayed and it was decided to place a permanent deck on the bridge. The span is 19 feet clear and the roadway is 14 feet in clear width. The new deck consists of five lines of 12-inch 31½ pound I beams, with a concrete floor, reinforced with expanded metal. Steel posts of T section are supplied on the bridge and cedar posts on the approaches. The wire cable guards 70 feet long are attached to the cedar posts and pass through holes in the steel posts. It was found necessary to underpin the abutments with concrete. Rock was blasted from the approach to the bridge to straighten the road. Cost, \$728.64.

Black Creek bridge, Mississippi Station, lot 7, concession 10, Palmerston.—A concrete beam bridge with a clear span of 20 feet. The abutments are built on a skew to line with the stream. The abutments are 9 feet 6 inches in height to floor level. The railings are concrete slabs extending over wing walls and bridge, 30 feet, reinforced with expanded metal and supported on each side of bridge with five main posts 12 inches by 12 inches square. Wire cable guards are supplied on the approaches. Cost, \$1,657.46.

Carmen Creek bridge, lot 44, 7th line, Camden.—This work consisted of placing a new deck on the old concrete abutments. The span is 26 feet 6 inches clear, and the roadway is 16 feet clear. The deck consists of five lines of 15-inch 42 pound I beams, 29 feet 6 inches long. The floor is a 6-inch concrete slab reinforced with expanded metal. The guard rails consist of five steel posts T section, with three lines of galvanized pipe. The approaches are protected with wire cable guards. The approaches were properly graded. Cost, \$1,090.81.

Cedar Creek bridge, Denbigh.—A timber bridge with a clear span of 25 feet, roadway 16 feet clear and timber crib abutments rock filled. Heavy rock fills were required for the approaches. Cost, \$1,229.00.

Cedar Creek bridge, lot 17, concession 10, Loborough.—A concrete bridge with a clear span of 10 feet, roadway 16 feet clear. The floor is a 12-inch concrete slab reinforced with sections of old steel rails. The abutments rest on solid rock and are 11 feet in height to floor level. Heavy rock fills totalling 101 feet in length were required for the approaches. The approaches are 24 feet wide on top, and from 4 to 8 feet in height. Strong guard rails are in place on each side of the approaches.

Sucker Creek bridge, lot 19, concession 10, Loborough.—This is a concrete bridge of the same size and general description as the Cedar Creek bridge in Loborough above described. The cost of the two bridges was \$1,497.79.

Clyde River bridge, lot 34, 3rd line, Canonto.—A concrete beam bridge with a clear span of 24 feet and roadway 16 feet in clear width. The abutments rest on solid rock and are 10 feet in height to floor level. The railing is a concrete slab reinforced with expanded metal and supported on each side of bridge by five concrete posts 12 inches by 12 inches. The approaches are rock filled and top dressed with gravel. The guards on the approaches consist of wire cable supported by concrete posts. Cost, \$1,918.22.

Horseshoe Lake bridge, lot 7, concession 5, Kennebec.—A steel beam bridge with a clear span of 35 feet, roadway 16 feet in clear width. The old concrete

abutments were built up 2 feet and were lengthened 6 feet. The deck consists of two lines of 24-inch 80-pound steel I beams, 38 feet long; 2 floor beams of 15-inch 60-pound section and five lines of 8-inch steel floor joist. The floor is a 6-inch concrete slab reinforced with expanded metal. The guard rails on each side of bridge consist of five steel posts T section and three lines of 1½-inch galvanized pipe. The approaches are protected with wire cable guards, supported by cedar posts and are rock filled and top dressed with gravel. Cost, \$3,390.63.

Howell Creek bridge, Turnleigh Road, Clarendon.—A timber bridge with a clear span of 12 feet, and roadway 16 feet clear. The approaches to the bridge, 48 rods on east side and 80 rods on west wide, were improved, brush cleared, grade widened and raised and two side hill cuts made. Cost, \$1,000.50.

Louise Creek bridge, lot 2, concession 9, Effingham.—A concrete bridge, clear span of 14 feet, roadway 16 feet in clear width. The abutments are 8 feet 6 inches in height to floor level. The cover is a 14-inch slab reinforced with three-quarter-inch square steel bars at 8-inch centres. Approaches are rock filled. Cost, \$1,229.79.

McDonald bridge, Clare River, lot 16, concession 2, Sheffield.—A concrete beam bridge with a clear span of 40 feet, roadway 16 feet in clear width. The 6-inch concrete floor is supported by four lines of concrete beams 12 inches wide and 40 inches deep, reinforced with 8 steel bars 1 inch square. The abutments are 12 feet in height to floor level. The railing is a concrete slab reinforced with expanded metal and supported by five 12-inch by 12-inch posts. The approaches are rock filled, top dressed with gravel. Wire cable guards protect the approaches. Cost, \$2,649.00.

Scugog Creek bridge, lot 15, concession 12, Hinchinbrooke.—A concrete culvert with a clear span of 8 feet, roadway 16 feet in clear width. The abutments rest on rock bottom and are 11 feet in height to floor level. The cover is a 10-inch concrete slab, reinforced with sections of old steel rails set at two-foot centres. Steel posts on culvert and cedar posts on approaches carry the wire cable guards. Cost, \$1,091.09.

Steele bridge, lot 29, concession 2, Bedford.—A concrete culvert 5½ feet in clear width, roadway 16 feet in clear width. The 12-inch floor slab is reinforced with sections of steel rails. The abutments are 8 feet in height. Cost, \$429.39.

All bridges in Addington were built under the direction of W. W. Pringle, supervising foreman.

SOUTH RENFREW

A number of timber bridges were constructed in this district under the direction of H. N. Moss, supervising foreman. Rubble masonry abutments were constructed where good foundations were found. The decks of all bridges are of cedar timber. The following is the list of bridges constructed:

Powers Creek bridge, lot 23, concession 6, Admaston.....	cost	\$421 46
Powers Creek bridge, lot 23, concession 8, Admaston.....	"	158 42
Bromley Creek bridge, lot 30, concession 4, Bagot.....	"	252 25
McHugh Creek bridge, lot 13, concession 4, Bagot.....	"	304 40
Ingles Creek bridge, lot 24, concession 4, Bagot.....	"	210 10
Consta Creek bridge, lot 3, concession 11, Brougham.....	"	280 11
Kennelly Creek bridge, lot 6, concession 8, Brougham.....	"	221 80
Feibeck Creek bridge, lot 12, concession 3, Grattan.....	"	202 50
Dooley's Creek bridge, lot 21, concession 4, Griffith.....	"	337 50
Wadsworth Creek bridge, lot 17, concession 12, Radcliffe.....	"	332 65
Diamond Lake bridge, lot 21, concession 2, Raglan.....	"	101 25
Schutt Creek bridge, lot 21, concession 2, Raglan.....	"	104 76
Beaudoin Creek bridge, lot 23, concession 2, Raglan.....	"	102 99
Little Mississippi bridge, lot 4, 11th line, Raglan.....	"	1,265 70

The district of North Hastings supplied timber for the Little Mississippi bridge at a cost of \$564.50, which is not included in the cost given above. The bridge is 162 feet long and has five stone-filled piers. The deck, railing, etc., are all of hewn cedar. The approaches, 150 feet in total length, are rock-filled, top-dressed with gravel.

NORTH RENFREW

Black Creek bridge, lot 21, 18th line, Bromley.—A steel beam deck bridge on concrete abutments, with a clear span of 22 feet, roadway 16 feet in clear width. The deck consists of five lines of 15-inch steel I beams, 42 pounds per foot. The railing consists of three lines of galvanized pipe, supported by steel posts, T section. The abutments are of concrete and are 10 feet in height to floor level. The approaches are rock-filled, top-dressed with gravel. The floor is a 6-inch concrete slab, reinforced with expanded metal. Cost, \$1,668.05.

Indian River bridge, lots 21 and 22, concession 8, Alice.—A steel span 68 feet 6 inches clear, 16 foot roadway, concrete abutments 14 feet in height to floor level. The approaches are very heavy rock fills. The floor is a 6-inch concrete slab reinforced with expanded metal. The steel span was supplied by the Hamilton Bridge Works at a cost (f.o.b. site) of \$1,613.00. The steel was erected by the foreman in charge. Cost, \$5,654.71.

Ritchie Creek bridge, lots 3 and 4, concession 9, Bromley.—A concrete bridge with a clear span of 10 feet, roadway 16 feet, in clear width. The abutments and wing walls are 11 feet in height to floor level, and rest on pile foundations. The floor is a 12-inch concrete slab, reinforced with three-quarter-inch square steel bars. The guard rails consist of wire cables supported by steel posts on the bridge and cedar posts on the approaches. The site of the bridge was moved to the north to remove a bad curve in the road. Heavy rock fills were required at the new site. Cost, \$2,273.07.

Snake Creek bridge, lots 15 and 16, concession 7, Bromley.—A concrete pile bridge with a clear span of 30 feet and a roadway 16 feet in clear width. Four concrete piles, 25 feet long are driven in each bank. The cap over the piles is 18 inches in width and 4½ feet in depth. The four concrete beams are 12 inches wide and 30 inches deep, reinforced with six lines of 1-inch square steel bars. The 6-inch floor slab is reinforced with five-eighth-inch square bars. The railing is a 3-inch slab, reinforced with expanded metal and supported by four main posts, 12 inches by 12 inches square, on each side of bridge. The approaches are rock-filled. The rock is allowed to fall to a natural slope around the piles. The approaches are protected on each side by wire cable guards, supported by heavy cedar posts. Cost, \$2,550.34. The concrete bridges in North Renfrew were built by J. W. Davis, Public Works foreman.

A number of timber bridges were built in this district under the direction of H. N. Moss, supervising foreman. The list is as follows:

Bonnechere Creek bridge, lot 21, concession 11, North Algoma.....	cost	\$374 90
Shirley Creek bridge, lot 21, concession 1, South Algona.....	"	355 75
Gibson Creek bridge, lot 14, concession 2, Ross.....	"	421 00
Jeffries Creek bridge, lot 19, concession 3, Ross.....	"	570 80
Mud Creek bridge, lot 8, concession 1, Stafford.....	"	303 75
Clark's bridge, lot 2, concessino 3, Stafford.....	"	354 50
Marsh Creek fill, lots 1 and 2, concession 5, Stafford.....	"	699 15
Rankin Creek bridge, lots 10 and 11, concession 2, Wilberforce.....	"	514 10
McDowell Creek bridge, lot 3, in concession 8, Wilberforce.....	"	312 12
Segil Creek bridge, lot 24, concession 22, Wilberforce.....	"	193 30

PARRY SOUND DISTRICT

Callendar Village drain.—A drain 150 rods in length and 2½ feet in depth was constructed to drain the main street of the village.

Carling drain.—A drain 106 rods in length was constructed on lot 69, concession 12, in the Township of Carling. The creek that forms the outlet was cleared and improved for a distance of 50 rods. The work provides drainage for the Snug Harbor road and the adjoining lands.

Christie-Monteith drain, concession 12.—Located on lot 35, concession 12, Monteith and extending on lots 1 and 2, Christie. The creek bed was cleared of logs and brush for a distance of 320 rods. At the lower end a rock ledge 45 feet was blasted to form a channel 6 feet wide and 2½ feet deep.

Foley drain, lot 11, concession 3.—To drain the road at this point, a drain 340 rods long was constructed. The drain averages $2\frac{1}{2}$ feet in depth. The brush was cleared from each side for a width of 8 feet.

Joly drain, lot 1, concessions 11 and 12.—Last year, a rock cut was opened on lot 1, concession 11, of Joly. This year a drain 480 rods long was constructed from the rock cut north through the 11 and 12 concessions to an outlet. The drain is $2\frac{1}{2}$ feet deep and it has lowered the water level of Peacock Lake 2 feet.

Nipissing drain, lot 7, concession 3.—This drain is 20 rods long and 3 feet deep and was constructed to relieve a flooded section of road at this point.

Restoule River drainage.—When the new bridge was constructed at Restoule, the river bed was deepened and widened to provide a better outlet from the lake. High water in the lake continued to flood the roads in the vicinity of the lake. This year the outlet was further improved. One section 100 feet in length was blasted to a depth of $2\frac{1}{2}$ feet and a width of 20 feet. Another section 200 feet in length was blasted to a depth of 18 inches and a width of 40 feet. 200 cubic yards of earth were removed to cut off a point that checked the flow of water. The work has lowered the lake level 18 inches.

John Orr was supervising foreman on the work in this district.

MUSKOKA DRAINAGE

The following drains were opened up under the direction of Wm. Lowe, supervising foreman:

Draper Township, lots 22 and 23, concession 7	40 rods
Draper-Ryde Townships, lots 14 and 15, concessions 12 and 13	260 "
Franklin Township, lots 21 and 22, concession 10	120 "
" " lots 16, 17 and 18	70 "
Macaulay Township, lot 16, concession 8—2 rods of rock	20 "
Medora Township, lot 21, concession 4	23 "
" " lot 22, concession 4	165 "
Muskoka Township, lots 7 and 8, concession 2	151 "
" " lot 12, concession 11	126 "
" " lots 20 and 21, concession 7	160 "
Oakley Township, lots 28 and 29, concession 7	90 "
Stephenson Township, lots 15 and 16, concession 11	160 "

EAST SIMCOE DRAINAGE

Under the direction of C. H. Jerney, the following drains were opened up in the district of East Simcoe:

Matchedash Township, lot 10, concession 1	65 rods
" " Black River, lot 11, concession 4—rock	3 "
" " lot 14, concession 2	38 "
" " lots 9 and 10, concession 1	95 "

" " lots 20 and 21, concession 12	60 "
" " lots 10 and 11, concession 12	80 "
" " lot 7, 9th line	70 "
" " lot 68, concession 1	45 "
Orillia Township, lots 14 and 15, 4th line	180 "
" " lots 15 and 16, concessions 3 and 4	80 "
" " lot 12, 2nd line	79 "
Oro Township, lots 2 and 3, 13th line	100 "
" " lot 16, concession 5	80 "
" " lot 23, concession 12	150 "
Tay Township, lots 2 and 3, 14th line	55 "
" " lot 10, 4th line	100 "
" " lot 5, concession 4	200 "

CENTRE SIMCOE DRAINAGE

Mud Creek drain, Vespra.—The Swaley Creek municipal drain passes through the middle of the big swamp in Vespra. To the north of the Swaley Creek lies a large section of this swamp. A wide swale runs through this north swamp in a northwesterly direction, to the Nottawasaga River. The Mud Creek drain is designed to drain this swale and provide an outlet for the overflow from the Swaley drain. The work commences at the river near the south-east corner of lot 4, in the 13th concession and runs south-east a distance of 180 rods. The drain as opened up is 12 feet wide and from 2 to 3 feet in depth.

Tiny drain, lot 11, concession 1.—A drain 50 rods in length was opened up on lot 99, to provide an outlet for water for a section of the Penetang Road.

The work in Centre Simcoe was done under the direction of C. H. Jermey, supervising foreman.

NORTH ONTARIO DRAINAGE

The following drains were opened up under the direction of C. H. Jermey, supervising foreman:

Mara Township, lots 22 and 23, concession 10.....	125 rods
“ “ lots 24 and 25, concession 10.....	170 “
“ “ lots 26, 27 and 28, concession 11.....	250 “
“ “ lots 24, 25, and 26, concessions 11 and 12.....	360 “
“ “ lot 29, concession 10.....	100 “
Rame Township, lots 1 and 2, concession C.....	240 ft. rock
“ “ lot 8, concession E.....	80 rods

HALIBURTON DRAINAGE

The following drains were opened up in the district of North Victoria and Haliburton, under the direction of A. J. Southern, supervising foreman:

Carden Township, lots 17 and 18, concession 1.....	90 rods
“ “ lots 21 and 22, concession 5.....	110 “
“ “ lot 10, concession 8.....	71 “
Dalton Township, lot 14, 2nd line.....	69 “
“ “ lot 1, concession 4.....	180 “
“ “ lots 24 and 25, concession 10.....	310 “
Digby Township, lot 31, concession 2.....	26 “
Laxton Township, lot 6, 9th line.....	140 “
Somerville Township, lots 6 and 7, concession 12.....	250 “

Coboconk Village drain.—This work consisted in placing tile drains under a poorly-drained section of the main street of the village, 180 feet of 9-inch tile was placed at a depth of 3 feet, and at the same depth, 102 feet of 12-inch tile was placed.

NORTH HASTINGS DRAINAGE

Bancroft Village drains.—This work consisted of the construction of covered drains in the north end of the village, from Main Street to the York River. The first drain north of Station Street is made of 14-inch metal culvert pipe. It is 462 feet long. A culvert 24 feet long was placed across Main Street at the head of the drain.

The second drain is through the mill yard. It consists of 16-inch metal pipe, and is 406 feet long. A metal pipe culvert is also placed across Main Street at the head of this drain. Two other culverts were also constructed to allow the water from the east side of the street to reach the drains.

Carlow Drainage.—This work was an extension of the work done in May Swamp in the 9th concession of Carlow. One hundred and sixty rods of new ditch were constructed.

Madoc Township drainage, lots 18 and 19, concession 6.—This work consisted of opening up a creek across above lots. A rock ledge $2\frac{1}{2}$ feet high was blasted from the creek bottom. This work was done to relieve flooding of roads and to lower the water in the marsh where the floating bridge was reconstructed during the year.

Monteagle Township drainage, lots 10 and 11, concession 4.—This work is designed to drain a swamp where roads are subject to periodical flooding. The work consisted of clearing out a creek bed on above lots, of rock and debris and blasting of rock ledges that obstructed the creek.

W. E. Wiggins, road inspector, was supervising foreman on the drainage work in North Hastings.

ADDINGTON AND FRONTENAC DRAINAGE

Arden-Harlow road drain, Kennebec.—Located on lot 22 in the 8th concession. A drain 181 rods long and a rock cut 13 rods long and 4 feet deep to drain a section of road subject to flooding at every heavy rainfall.

McCoy's Swamp drain, Oso.—Located on the Clarendon-Arlock road. A drain 250 rods long and a rock cut 26 feet long and 3 feet deep to drain a very bad section of road.

Parham-Tichborne road drain, Hinchinbrooke.—Located at lot 24, concession 2. A drain 40 rods long and a rock cut 1,200 feet long, to drain a section of this road subject to periodical flooding. W. W. Pringle, road inspector, was director on this work.

Napanee River Improvement, Portland.—The work this season was done between Bellrock and the Petworth dam. Cameron's cut was lowered 3 feet and all logs and brush removed from the channel between Cameron's cut and the Bellrock bridge. A cut was made through the grass beds above Petworth dam, and 2 feet of earth and stone removed from above the rock to form a channel. Thos. McCumber was foreman in charge of this work.

RENFREW DRAINAGE

The following drains were opened up in Renfrew County, under the direction of H. N. Moss, supervising foreman:

Admaston Township, lot 22, concession 1.....	42 rods
Algona North Township, lot 5, concession 1.....	80 "
Bagot Township, lot 17, concession 7.....	25 "
Bromley Township, lot 3, concession 1.....	40 "
" " lot 10, 7th line.....	31 "
" " lots 17 and 18, concession 5.....	57 "
Brougham Township, lot 5, concession 14.....	40 "
Gratan Township, lot 9, concession 1.....	20 "
" " lot 24, concession 4.....	49 "
Hagarty Township, lots 1, 2 and 5, concession 5.....	80 "
Radcliffe Township, lot 7, concession 2.....	64 "
Raglan Township, lot 5, concession 11.....	30 "
Wilberforce Township, lot 3, concession 18.....	40 "
" " lot 22, concession 9.....	19 "
" " lot 6, concession 22.....	64 "
" " lots 25, 26 and 27, concession 1.....	50 "

DRAINAGE AID GRANTS IN 1926, UNDER THE PROVISIONS OF THE PROVINCIAL AID TO DRAINAGE ACT, 1921

CATHER'S DRAIN IN THE TOWNSHIP OF HOWICK, HURON COUNTY

This drain was constructed by the Township of Howick under the provisions of the "Municipal Drainage Act," and in accordance with the report and plans of Fred A. Edgar, civil engineer. The engineer's report was adopted by the council of Howick on the 14th of March, 1924, and the petition for aid was filed in this department on the 26th of February, 1925.

The drain commences at the east limit of lot 14 in the 5th concession of Howick and runs west through this concession to the B line. Thence in a northerly direction through concession "B" to the Maitland River at Wroxeter, lot 26, concession "B." The total length of the drain is 39,200 feet, about $7\frac{1}{2}$ miles. The drain has a bottom width of two feet at the head and gradually widens out to six feet at the outlet. The depth varies from three to six feet, but will average better than four feet. Side slopes one to one throughout.

The cost of the drain exclusive of tile and branch drains, but including a pro rata share of the incidental expenses was \$14,031.20.

The total estimated cost of the work was \$21,318.00, which was assessed by the engineer as follows:

On lands and roads in Turnberry.....	\$63 15
On lands and roads in Howick.....	21,254 85

I examined the drain in July, 1926, and found the work completed in a satisfactory manner, and properly performing the work it was designed to accomplish.

This drain is a trunk channel within the meaning of the "Provincial Aid to Drainage Act, 1921," and is entitled to aid.

On report, a grant of \$2,806.00 was paid to the Township of Howick, the initiating municipality.

JARVIS DRAIN, IN THE TOWNSHIP OF MOORE, WEST LAMBTON

This drain was constructed by the Township of Moore under by-law No. 2, of 1924, and according to plans, etc., prepared by Geo. A. McCubbin, O.L.S. and C.E. The engineer's report was adopted on the 21st of April, 1924, and the petition for aid was filed in this department on the 17th of April, 1925.

This drain commences at the line between concessions 9 and 10 of Moore, and runs south on the west side of the 18-19, or Jarvis side road, to the front of the 7th concession. Thence south on the east side of the Jarvis side road to a water course near the centre of the first concession. Thence south-east along this water-course to a sufficient outlet which is reached near the centre of the 15th concession of Sombra, about half a mile south of the Moore-Sombra town-line. The total length of the drain is 44,060 feet, or about $8\frac{1}{2}$ miles. The drain has a bottom width of one foot six inches at the head, which gradually widens out to six feet at the outlet. The drainage area is extremely flat and the drain is unusually deep. The depth of cut varies from three feet at the head to fourteen feet through the height of land. In the heavy work the old drain was deepened four feet. The side slopes are one to one throughout. The drainage area is restricted, averaging about one mile in width and the individual assessments are heavy.

The original estimated cost was \$14,502.00. The total cost of the drain as reported by the township treasurer was \$12,880.33.

I examined the drain on June 17th of this year and found the work completed in a very satisfactory manner.

This drain is a trunk channel within the meaning of section 3 of the "Provincial Aid to Drainage Act, 1921."

On report, a grant of \$2,576.00 was paid to the Township of Moore.

KELLS OR MUNICIPAL DRAIN NO. 1 IN THE TOWNSHIP OF WALLACE, NORTH PERTH

This drain was constructed by the Township of Wallace, under the provisions of the "Municipal Drainage Act," under by-law No. 498 and according to plans prepared by E. D. Bolton, O.L.S. and C.E. The engineer's report was adopted on September 7th, 1923, and the petition for aid was filed in this department on February 21st, 1924.

The drain commences at the line between lots 4 and 5 in the 11th concession of Wallace, and extends westerly through the 11th, 10th, 9th and 8th concessions of Wallace, reaching a sufficient outlet at the line between lots 31 and 32 in the 8th concession. The length of the drain is 40,200 feet, or nearly 8 miles. The bottom width is one foot six inches at the head of the drain and gradually widens out to 12 feet at the outlet. The depth of cut varies from three to seven feet, and the side slopes are each one to one.

The estimated cost of the drain was \$20,685.80, which was assessed by the engineer as follows:

On lands and roads in Wallace.....	\$17,022 05
On lands and roads in Maryborough.....	2,573 10
On lands and roads in Minto.....	337 30
On lands and roads in Town of Palmerston.....	753 35

The total cost of the drain including all incidental expenses was \$18,472.87. This drain is a trunk channel within the meaning of section 3 of the "Provincial Aid to Drainage Act, 1921," and is entitled to aid under the provisions of the said act.

On report a grant of \$3,694.00 was paid to the Township of Wallace, the initiating municipality.

MCKILLOP SWAMP DRAIN, MCKILLOP TOWNSHIP, HURON COUNTY

This drain was constructed by the Township of McKillop, under the provisions of the "Municipal Drainage Act," and according to plans prepared by C. A. Jones, civil engineer. It was designed to drain a large area of swamp land in the north-east corner of the township.

The drain commences at the front of lot 1 in the 13th concession, and runs north and west through the swamp, passing into the township of Grey at the rear of lot 6 in the 14th concession of McKillop. It extends north and west into the Township of Grey a distance of 104 rods, discharging into the Beauchamp Creek drain. The total length of the drain is 1,144 rods.

The bottom width of the drain varies from three feet at the head to 4½ feet at the outlet. The depth varies from three to eight feet, but will average about six feet. The drainage area comprises about 2,500 acres and the local assessment for the work runs as high as \$8.70 per acre.

I examined the drain in the month of June of this year and found the work completed in a very satisfactory manner.

At the last session of the Legislature, a grant of \$2,000 was voted for this drainage work.

On report, a grant of \$2,000.00 was paid to the Township of McKillop, the initiating municipality.

O'BRIAN DRAIN IN THE TOWNSHIP OF CALEDONIA

This drain was constructed by the Township of Caledonia under the provisions of the "Municipal Drainage Act," according to the report of W. H. Magwood, civil engineer. The engineer's report was adopted by the township council on February 4th, 1920, and the petition for aid was filed with the government on March 22nd, 1920.

This is an ambitious scheme, launched for the purpose of draining a large area south of Caledonia Springs, known as the Caledonia Bog. The natural drainage for this area was through Horse Creek, which discharges into the Nation River. Owing to extreme flood conditions in the Nation River, which backed the water up Horse Creek, the bog was periodically flooded and proper drainage to the Nation was out of the question. Investigation proved that a good safe outlet for the waters from Horse Creek could be secured to the north, through a stream known as the Des Anticats Creek. The distance between the two creeks was but two miles and the available fall was twelve feet. It was decided to divert Horse Creek into the Des Anticats Creek and with a system of lateral drains, completely drain the bog.

The main drain or outlet commences in the Des Anticats Creek near the C.P. Ry., and extends south along the line between lots 20 and 21 to the rear of the 1st concession. Thence south along the west side of the Duncan Springs road to Horse Creek near the rear of the 2nd concession. Total length, 11,500 feet. The work on Horse Creek commences in the 3rd concession at the centre of lot 15 and extends west along the creek to the Alfred boundary, a distance of 14,500 feet. From this point, the work extends south along the boundary a distance of 11,500 feet to the road between the 11th and 12th concessions of Alfred. Thence south-west along this concession line a distance of 4,500 feet. Another section of the main drain extends east from Horse Creek along the road in rear of the 2nd concession from the centre of lot 17 to the line between lots 11 and 12, a distance of 8,000 feet. Total length of what may be classed as main drain, 50,000 feet, or nearly 10 miles.

The main drain has a bottom width of 11 feet with side slopes one-quarter to 1, while the depth runs from six to twenty feet.

On Horse Creek, the bottom width runs from four to seven feet, depth four to ten feet, side slopes half to 1. The extensions were narrow trenches from three to six feet wide and from four to eight feet in depth.

The estimated cost of the entire work was \$55,200. The total cost reported by the township treasurer was \$59,744.67. Incidental expenses amounted to 10.86 per cent. The cost of lateral drains with their proportion of the incidental expenses eliminated amounted to \$7,161.20. The total cost of the trunk channels amounts to \$52,183.67.

I examined this drain in October, 1925. This drainage work is a trunk channel within the meaning of the "Provincial Aid to Drainage Act, 1921."

On report, a grant of \$10,436.00 was paid to the Township of Caledonia, the initiating municipality.

SAVAGE DRAINAGE SCHEME IN THE TOWNSHIP OF CUMBERLAND, RUSSELL COUNTY

This drainage work was constructed under the provision of the "Municipal Drainage Act," under the authority of by-law No. 830 and in accordance with plans prepared by Sydney E. Farley, civil engineer.

The engineer's report was adopted November 5th, 1923, and the petition for aid was made November 3rd, 1924.

This drainage work comprises a trunk outlet and two trunk channels, one channel designated as the main drain, commences on lot 1 in the 5th concession of Gloucester. It extends south on the east side of the Gloucester-Cumberland townline 11,500 feet to lot 13. Thence south-east along a water-course to the south-east part of lot 17, in the 10th concession of Cumberland, where it discharges into Bear Brook Creek. The total length is 24,000 feet. The bottom width varies from three to twelve feet. Depth of cut is two to 5½ feet, with side slopes of one to one throughout.

Branch No. 1 commences on lot 8 in the 11th concession of Cumberland, and extends south-east to the road in front of concession 11 at lot 11. Thence south along the west limit of this road to the main drain. Total length, 20,800 feet. Bottom width three to eight feet. Depth of cut three to three and one-half feet. Side slopes one to one.

The drainage area comprises some 4,365 acres, 2,205 acres in Cumberland, and 2,160 acres in Gloucester. The total estimated cost of the work was \$15,679.00, which was assessed against the properties affected as follows:

On lands and roads in Cumberland.....	\$8,801 00
On lands and roads in Gloucester.....	6,878 00

I examined the drain August, 1925, and found the work completed in a satisfactory manner. The final total cost of this work as reported by the township treasurer is \$17,483.04.

This drain is a trunk channel within the meaning of the "Provincial Aid to Drainage Act, 1921," and is entitled to aid.

On report, a grant of \$3,469.00 was paid to the Township of Cumberland, the initiating municipality.

SHAW CREEK DRAIN, IN THE TOWNSHIP OF CUMBERLAND, RUSSELL COUNTY.

This drain was constructed under the provisions of the "Municipal Drainage Act, according to plans, etc., prepared by W. H. Magwood, civil engineer. The engineer's report was adopted by the township council on March 13th, 1922, and the petition for aid was filed on July 21st, 1922.

The work comprises the main drain and a branch drain extension in the 10th and 11th concessions. The cost of the branch drain is excluded from the grant.

The main drain commences near the townline between Osgoode and Cumberland on the south half of lot 26, and extends east to the road between concessions 9 and 10, where it enters Shaw Creek. Thence east following the course of Shaw Creek to lot 24, in the 7th concession. Thence along the creek to lot 20 in the 8th concession. No work is required. The work then extends from lot 20 along the creek north to the northerly part of lot 17, in the 8th concession, where a sufficient outlet is reached.

The bottom width of the drain is two feet at the head, gradually widening to eight feet at the lower end of the work. The depth of cut varies from two and one-half feet to six feet, with side slopes from one to one, to one and one-half to one. The total length of the improved drain is 28,600 feet.

The drainage area comprises 8,165 acres, 6,954 acres in Cumberland; 717 acres in Russell; 381 acres in Osgoode, and 113 acres in Gloucester. The estimated cost of the work was \$19,700, which amount was assessed by the engineer against lands and roads in Cumberland, Russell and Gloucester and Osgoode. The final cost of the work as reported by the township treasurer was \$13,871.67, but this includes the cost of the branch drain with its proportion of incidental expenses, which amounts to \$1,927.00.

The cost of the main drain with its proportion of incidental expenses is \$11,944.67.

I examined the drain in September, 1925, and found the work completed in a satisfactory manner.

On report, a grant of \$2,388.00 was paid to the Township of Cumberland, the initiating municipality.

A. J. HALFORD,
Engineer, Public Works.

Toronto, October 31st, 1927.

Twentieth Annual Report

OF THE

GAME AND FISHERIES DEPARTMENT

1926

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO

ONTARIO

TORONTO

Printed and Published by the Printer to the King's Most Excellent Majesty

1927

To His Honour W. D. Ross, Esq.,

Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

I have the honour to submit herewith, for the information of Your Honour and the Legislative Assembly, the Twentieth Annual Report of the Game and Fisheries Department of this Province.

I have the honour to be

Your Honour's most obedient servant,

CHARLES MCCAIG,

Minister of Mines.

Toronto, 1927.

TWENTIETH ANNUAL REPORT

OF THE

Game and Fisheries Department of Ontario

TO THE HONOURABLE CHARLES MCCREA,
Minister of Mines.

SIR:—I have the honour of placing before you the Twentieth Annual Report of the work of the Game and Fisheries Department for the fiscal year ending on October 31st, 1926.

REVENUE

A net revenue of \$682,063.32 was received, and a total expenditure made of \$399,744.24, leaving a net surplus for the year of \$282,319.08.

In addition to the general expenditures, the administration of the Wolf Bounty Act comes under the Department's control, and bounties and expenses in connection therewith were paid for the year as follows:

Wolf bounties and expenses in connection therewith. \$51,994 42

COMPARATIVE STATEMENT OF WOLF SKINS RECEIVED AND BOUNTIES PAID

	Timber	Brush	Pups	Total	Bounties
For fiscal year ending October 31st, 1925.	831	1,066	21	1,918	\$25,465 62
For fiscal year ending October 31st, 1926.	1,022	2,690	107	3,819	51,994 42

STATISTICS

The statistics accompanying this report will show in detail the kinds, quantities and values of commercial fish, also the varieties, quantities and locations of fry and fingerlings distributed from Provincial Hatcheries, together with other statistics pertaining to the fur trade, as well as other branches of the Department. All of which has been carefully prepared and affords interesting and valuable information.

FISH

The statistics of the commercial fisheries of the Province are shown as follows:—

	1924	1925	1926
Gill nets licensed (yards)	6,502,736	6,877,398	7,001,130
Seines "	208	139	131
Pound nets "	1,323	1,334	1,306
Hoop nets "	1,256	1,195	1,134
Dip and roll nets licensed.	70	43	44
Spears licensed.	126	144	140
Hooks "	78,685	98,607	124,023
Number of men employed.	4,267	4,263	4,145
Number of tugs.	103	112	119
Number of gasoline boats.	975	1,018	1,003
Number of sail or row boats.	1,177	1,086	1,022
Value of boats, ice-houses, wharves and twine.	\$2,995,362 00	\$3,235,510 00	\$3,337,737 00
Aggregate catch in pounds.	41,732,664	34,385,335	32,261,019
Values to fishermen.	\$3,139,279 03	\$2,858,854 79	\$2,643,686 28

ANGLING

The demand for non-resident angling licenses is increasing yearly, and the revenue received from this source forms no mean part of the total revenue received from the fisheries of the Province. The heavy demand on the game fish may best be shown by a comparison of the revenues received from the sale of non-resident angling licenses as follows:—

	1923	1924	1925	1926
Revenues from Angling Licenses...	\$77,856 75	\$105,862 50	\$128,115 00	\$145,913 50

To cope with the heavy demand made by the anglers for game fish, it will be necessary for the Department to use the existing hatcheries to their utmost capacity, as well as to use every means within its power towards conservation by the prevention of the pollution of waters, and the taking of fish illegally and during the time prohibited by law.

HATCHERIES

Elsewhere in this report will be found in detail the quantities and varieties of fry and fingerlings placed in various waters of the Province from hatcheries located at Mount Pleasant, Glenora, Sault Ste. Marie, Normandale, Port Carling, Port Arthur and Fort Frances, and for comparative purposes with previous years, the following figures show a summary of total distribution:—

	1924	1925	1926
Whitefish Fry.....	437,469,000	246,125,500	260,575,000
Pickeral Fry.....	89,250,000	49,015,000	13,820,000
Salmon Trout Fingerlings and Fry.....	7,801,000	7,320,425	8,501,000
Herring Fry.....	32,475,000	45,050,500	11,225,000
Rainbow Trout Fry and Fingerlings.....	15,000	3,000	1,800
Speckled Trout Fry and Fingerlings.....	1,898,500	676,700	1,085,300
Black Bass Fry and Fingerlings.....	338,000	12,500
Parent Black Bass.....	1,111	611	1,569
Parent Speckled Trout.....	300
	<u>560,247,611</u>	<u>348,191,736</u>	<u>295,222,469</u>

On July 1st, 1926, the Federal Government discontinued the propagation of fish in eight hatcheries located at:—

Collingwood	Sarnia
Warton	Southampton
Port Arthur	Kingsville
Kenora	Belleville

The operation of same, however, was continuous, as the Province of Ontario assumed control as soon as operations were discontinued by the Federal Government and after the distribution of fry and fingerlings was made. The collection of speckled trout spawn from the Normandale Creek ponds still continues to be of a satisfactory nature, and the undertaking has been so successful that it is now advisable to have further ponds established, in order that an increased quantity of speckled trout, fry and fingerlings may be distributed throughout the Province; the demand for which far exceeds the present production.

BIOLOGICAL INVESTIGATIONS

The Department of Game and Fisheries receives annually hundreds of applications for fish in various stages of development (fry, fingerlings and adults), and before distribution is made from the Provincial Hatcheries each

application must be considered on its merits. As it was impossible to make a thorough study during the past two summers of all the waters requested to be restocked, before making recommendations many applications were disposed of on the strength of the information given by the applicants, and also on the basis of a knowledge of existing conditions in the neighbouring waters of the same system.

Limnobiological studies were carried out on twenty-one inland waters during the summer of 1925, and on fifty-eight during the summer of 1926, with a view to determining their possibilities for fish production. The programme of the studies carried out on these waters with certain modifications for streams, included three fairly well-defined, and yet correlated lines of investigation:—

- (1) Fish fauna of the waters and their relative abundance.
- (2) Plankton on which either directly or indirectly fish depend for their food supply was collected from various depths for quantitative and qualitative studies in the laboratory. The quantity and character of the plankton are good indications of the productivity of any body of water. (Observations were made on the available macroscopic food supply, for example, molluscs, crustaceans, insects and insect larvae.)
- (3) A study of the physical and chemical properties of the water.
 - (a) Physical properties, namely, depths, colour, transparency and temperatures.
 - (b) Chemical properties, namely, dissolved gases (oxygen and carbon dioxide), bicarbonate, alkalinity and hydrogen ion concentration.

The above factors determine very largely the abundance of the plankton.

The biology of the fishes of Lake Simcoe was gone into more intensively, and to this end eleven gill-nets, each fifty yards long and five feet deep, and with mesh ranging from one and one-half inches to five inches were employed. By this means data were obtained on the relative abundance, distribution, rate of growth, food and spawning conditions of the various fishes inhabiting the lake. Extensive seine hauls were made over ecologically different areas in order to obtain data on the young fry and minnow population.

By means of an Ekmann dredge covering an area of eighty-one square inches the life on the bottom of the lake was collected and preserved. Mr. Donald S. Rawson, B.A. is making a special study of this material in the Department of Biology, University of Toronto.

Determining the suitability of any body of water, in advance of stocking, and in the light of the present day knowledge of the criteria to employ for the purpose, is one means of preventing undue loss in planting fish. However, applicants may render most important service by following the instructions issued with each lot of fish sent to them. The most important points to remember in this regard are—firstly, to plant where the natural food supply is adequate, and secondly, to plant out of the reach of enemies. Instructions are issued to applicants having these two important principles in view. It should be borne in mind that planting points vary according to the life history and habits of the species planted, and the life history and habits of its enemies. By means of propaganda these facts may be driven home to applicants.

By biological surveys, legislation and education, steps are being taken by the Department to preserve the game fish in waters not already depleted for the perpetual use of the public, compatible with changing conditions in nature.

This is the ultimate aim of all our biological endeavours. When waters cannot be reclaimed by native species the policy is to substitute other species more suitable to the existing conditions.

GAME PRESERVES

During the year a number of Crown Game Preserves were established throughout the Province, so that at present there are between five and six million acres of territory set aside in which hunting and trapping is forbidden for the sole purpose of conservation.

The Crown Game Preserve at Eugenia, which is utilized for the purpose of propagating English Ring-necked Pheasants, commenced operations in 1922. Seven hundred and eighty-seven live birds and 33,000 eggs were distributed last year, as compared with 606 birds and 29,460 eggs for the previous year. The demand for settings of pheasant eggs still continues to be in excess of the available supply.

GAME

Big Game continues to be plentiful, and the majority of hunting parties report a successful season. For comparative purposes, the following figures show the number of hunting licenses issued for the past five years:—

	1922	1923	1924	1925	1926
Resident Moose.....	1,584	1,098	1,385	1,291	1,359
Resident Deer.....	20,504	17,677	19,517	17,034	23,392
Non-resident Hunting.	1,256	1,247	1,651	1,581	1,347

In explanation of the increased number of resident deer licenses sold it may be stated that for the first time, farmers in the northern parts of the Province were obliged to pay the sum of \$1.00 for a deer license, whereas heretofore resident farmers in certain districts could secure one deer for their personal use without securing a license.

Ruffed Grouse (Partridge).—The scarcity of these game birds continues and warranted the continued close season, which should be maintained until they become re-established in fair quantities.

Sharp-tailed Grouse or Prairie Hen are confined to the northwestern part of the Province, and are to be found there in considerable numbers.

Quail are mainly confined to the southwestern part of the Province, and in the Counties of Essex and Kent, they are thriving to such an extent that a short open season of three days was permitted.

Pheasants have, for a number of years, been plentiful in the Niagara Peninsula, and an open season for two days for a limited number of male birds was permitted. In other parts of the Province, owing to the general distribution of settings of eggs from the Eugenia Crown Game Preserve, they are reported as becoming well established, particularly in the southeastern part of the Province.

Ducks and Geese were obtained in goodly numbers, and afforded the usual excellent hunting.

FURS

The total number of pelts on which royalty was paid during the year is somewhat lower than for the preceding year, although the value to the trapper is slightly greater.

Beaver show a decided decline, although the drop in the number taken is practically accounted for by the restricted period in which same may be legally taken, and further, they can only be legally trapped by resident Indians.

Otter still continue to be caught in approximately the same numbers over a period of years.

Mink show a slightly smaller catch than for the preceding year.

Fisher are quite plentiful, and the catch for this year is greater than in any period since 1922.

Marten were taken in approximately the same quantity as for the preceding year, although much lower in number than formerly.

Muskrat show a much lower catch than in former years, although it may be accounted for from the fact that weather conditions were not favourable during the open season.

Red Fox have increased rapidly, and the catch for the year exceeds that of any former similar period.

Skunk shows a steady catch for a number of years; the year's catch being slightly in excess of the previous year.

COMPARISON OF PELTS EXPORTED AND TANNED FOR FIVE YEARS

	1922	1923	1924	1925	1926
Beaver.....	93,971	70,684	50,233	48,364	27,597
Otter.....	5,309	3,997	5,096	4,622	4,304

Mink.....	78,487	58,634	82,466	68,138	65,299
Muskrat.....	554,888	478,820	533,256	534,739	387,022
Bear.....	2,137	1,447	1,399	2,014	1,635
Fox (Cross).....	469	1,154	1,082	2,801	4,175
Fox (Red).....	11,272	12,329	14,695	22,198	30,535
Fox (Silver or Black).....	87	205	167	433	620
Fox (White).....	1,765	1,501	362	974	226
Fox (not specified).....	170	34	28	61	165
Lynx.....	836	1,177	2,332	2,200	3,884
Raccoon.....	20,344	15,752	21,976	22,157	21,002
Skunk.....	73,219	54,770	58,130	67,100	75,503
Weasel.....	94,399	61,603	51,163	34,365	63,599
Wolverine.....	6	20	12	8	11
Total.....	947,343	769,070	827,948	814,935	691,372

To be added to the above are 1,367 ranch-raised fox pelts which were tanned or exported without payment of royalty, under the terms of Fur Farmers' Licenses.

The value of pelts, as shown in the above list, to the trapper, is \$3,391,012.69, which places this Province far in the lead in the production of fur-bearing animals.

FUR FARMING

Fur farming still continues to receive a great deal of attention from the public, and while formerly it was largely confined to fox farming, inquiries are now being received concerning the possibilities of farming every species of fur-bearing animals native to the Province.

Realizing that it is the duty of the Province to conserve our fur-bearing animals from depletion or extinction as it is to preserve any other natural resource, the Department has recently undertaken to conduct an Experimental Fur Ranch in the vicinity of Balsam Lake, where it is aimed to furnish the public with economical methods by which the various species can be raised

profitably and produce good fur; to develop by selective breeding improved strains of promising species; and to investigate diseases and parasites for the purpose of determining methods of prevention and treatment.

The production of fur-bearing animals in captivity is comparatively a recent enterprise, and is, therefore, not supported by the exhaustive experimental and research data enjoyed by similar industries.

	1923	1924	1925	1926
Fur Farmers' Licenses issued.....	284	392	624	783

*Exclusive of Muskrat.

ENFORCEMENT OF THE ACT

The district wardens and officers in the outside service have enforced the provisions of the Act and the Regulations to the best of their ability, and during the year seasonal overseers have been engaged for the better protection of fish during the spawning period and for the protection of big game during the hunting season.

SUMMARY OF CONVICTIONS AND FINES

Convictions reported.....	588
Fines collected.....	\$11,563.00

A great many articles were confiscated during the year, including:—

1,483 Pelts	38 Spears	4 Motor cars
34 Deer and Moose hides	84 Rods and lines	17 Jack-lights and lanterns
5 Live animals	488 Traps	27 Deer
6,791 Pounds fish	145 Fire-arms	40 Pounds venison
506 Pieces gill nets	5 Gasoline boats	7 Moose
23 Dip nets	6 Row boats	28 Pounds Moose meat
17 Hoop nets	4 Canoes	54 Partridge
14 Seine nets	1 Steam tug	35 Ducks
3 Roll nets	7 Punts	4 Pheasants
6 Trap nets	2 Trucks	81 Decoys

All confiscations are sold at advertised sales by tender, other than such articles as are sold by the Department to the former owner, when circumstances warrant.

ACKNOWLEDGMENTS

In conclusion, I desire to publicly express my appreciation for the assistance and support rendered to the Department throughout the year, not only for the loyalty of the staff of both the inside and outside service but for the assistance of the transportation companies and the Fish and Game Protective Associations, whose officials and employees assisted our officers in the performance of their duties.

All statistics referred to will be found elsewhere in this report, together with many other statistics in detail.

All of which is respectfully submitted.

I am, Sir,

Your obedient servant,

D. McDONALD,
Deputy Minister of Game and Fisheries.

REPORT OF THE DEPARTMENT OF LABOUR

TO HIS HONOUR W. D. ROSS,
Lieutenant-Governor of the Province of Ontario.

I beg to submit herewith for your consideration the Seventh Annual Report of the Department of Labour for the year 1926.

Respectfully submitted,

FORBES GODFREY,
Minister of Labour.

HON. DR. FORBES GODFREY,
Minister of Health and Labour.

Sir:

I have the honour to submit for your approval the Seventh Annual Report of the Department of Labour for the fiscal year 1926. Included in this report is a résumé of the activities of the various branches of the Department, together with a brief survey of industrial conditions in the Province and data relating to unemployment relief work during the year.

INDUSTRIAL CONDITIONS

The volume of employment in Ontario was considerably larger for the fiscal year 1926 than for either of the two preceding years, according to reports supplied by employers to the Dominion Bureau of Statistics. Approximately 2,700 firms were covered by these reports with a working force of 304,907 to 350,841. Taking the index number for January, 1920, as 100 the volume of employment for the fiscal year 1926 will be indicated by 93.1 as compared with 88.6 for 1925 and 90.1 for 1924.

The improvement in conditions indicated by this advance of 4.5 points in the index number was general throughout the year, the index number for each month being higher than for the corresponding month of the previous year. The customary declines reported for December affected fewer workers than last year, being approximately 21,500 as compared with 25,000 in 1925, and the contraction in employment was most marked in construction, lumber products, iron and steel, transportation and textile industries. Steady improvement in conditions in the manufacturing division soon repaired the December losses but recovery was slower in construction and transportation, employment in these two groups fluctuating during the next five months. The increase over the preceding month reported for May in the industries as a whole, was greater than for any other month of the year and more than double the increase recorded at the same time last year, due to the pronounced expansion in the volume of employment in construction, logging, transportation, lumber products and iron and steel.

All industries, with the exception of logging and mining, showed a net gain for the year which was most marked in the manufacturing division, with an advance of 6.7 points. In this division the greatest increase was recorded for iron and steel plants, as indicated by an increase of 11.7 points in the index number. The lesser gains recorded in the pulp and paper and textile industries were, however, general throughout the year, as were those already noted in the manufacturing division as a whole and in iron and steel plants, the index number standing higher each month of 1926 than in the corresponding month of 1925. On the other hand, contractions in logging and mining were indicated by declines of 11.2 and 3.4 points respectively, as compared with the previous year.

INDUSTRIAL UNREST

During the fiscal year the industrial disputes recorded which involved a cessation of work numbered seventeen, as compared with twenty-one in 1925 and nineteen in 1924. The number of persons affected, 1,839, was the smallest in the past ten years and 26 per cent. below that of last year. On the other hand, the aggregate duration in working days, 46,402, was approximately 68 per cent. greater than last year, but decidedly smaller than any other year in the past ten. A strike among bush workers for increased wages, affecting 700 men, was responsible for approximately 56 per cent. of the time loss, one in the boot and shoe industry for 17 per cent., six in the clothing industry for 13 per cent., three in the metals and machinery group for 10 per cent. and six strikes divided among the building trades, paper products, rubber industry and personal group were responsible for the remaining 4 per cent. Two strikes, causing a time loss of 1,374 days, had been carried over from the previous year.

Dissatisfaction over wage rates or over wage rates and certain working conditions caused twelve of these seventeen strikes, which affected 1,694 workers. In six of these strikes, involving 851 employees, the strikers were successful or partially successful in obtaining their demands; in five, involving 143, the workers were either replaced or resumed work without gaining concessions, and in case of the bush workers, the 700 strikers were still holding out for their demands for increased wages at the end of the fiscal year. Questions of unionism gave rise to four strikes, one of which was settled in favour of the thirty-two employees affected, one affecting sixty workers remained unterminated at the end of the year, in one case the twenty-five strikers were replaced and in the other, employment conditions were no longer affected. One strike arose over the demand of the eighteen employees for the removal of the superintendent, but after negotiations they were not upheld in their demand and resumed work without any change in conditions.

WAGES AND HOURS

In the building trades wage rates and hours of labour were reported unchanged in Toronto during the year. In the metal trades the wages for sheet metal workers changed from 50-80 to 50-90 cents per hour and the hours remained the same. In Hamilton the wage rate for builders' labourers increased from 35-40 to 40-45 cents per hour and the hours from 50-60 to 55-60 per week. The hours of labour for iron moulders increased from 45-48 to 48-50 with no change in wages. In Ottawa a change was recorded in wages for electrical workers from 70-80 to 80 cents per hour and for sheet metal workers an increase of three cents per hour.

EMPLOYMENT SERVICE

The work of the twenty-five Ontario offices of the Employment Service of Canada indicates that the Service is retaining the confidence of the communities in which it is operated. Statistical data collected through the Service can be of value as a complete record of unemployment in the Province only to the extent to which all employers and all workers register their need of workers and of work with the Service. In practically all centres there were indications of an improvement in industrial conditions during the past year, with steadier employment for a greater number of persons and a low labour turnover.

Applications for work numbered 190,586, as compared with 200,068 the previous year and the opportunities for employment reported to the various offices totalled 156,995, a decrease of less than one per cent. A significant fact with regard to the placements is that, while the number, 135,331, is practically the same as the previous year, 5,880 more than last year were "regular" or placements which might be considered permanent. More work of a normal industrial character was available and therefore less temporary relief work was necessary. Eighty-six per cent. of all vacancies were filled and seventy-one per cent. of the applicants were placed.

A conference of the Ontario Office Superintendents of the Employment Service of Canada was held in Toronto during the second week of May. Interesting and instructive papers and addresses were delivered dealing with various phases of employment office work, from the point of view of employers as well as of officials of the Service. The discussions of ways and means of promoting the efficiency of the Employment Service were of distinct benefit to those present.

BOARD OF STATIONARY AND HOISTING ENGINEERS

In meeting the demand for certificates which power plant engineers must hold before operating in Ontario, the Board of Stationary and Hoisting Engineers accomplished a considerable volume of work. During the fiscal year 15,820 certificates were issued as compared with 14,529 in 1925, an increase of 1,291. Of this number 1,276 were granted by examination, 25 were provisional, 16 duplicate certificates, 104 plant owners' registration certificates and 14,399 by renewal, an increase of 11 per cent. over the number of renewals last year. No certificates were cancelled or suspended by the Board and 104 stationary steam plants were registered during the year.

One thousand, seven hundred and forty-six candidates came before the Board of Examiners, of whom 169 wrote examinations for hoisting engineers' certificates, 196 for portable engineers' certificates, 910 for fourth class certificates, 348 for third, 92 for second and 31 for first class certificates. The increasing number of engineers holding certificates of lower grades and qualifying for higher grades each year indicates a growing demand on the part of owners of steam plants for high grade engineers, in order to secure efficiency and economy in the operation of these plants and is ample proof of the value of the graded certificates. Of the 1,746 candidates for examination, 329 were refused certificates owing to their inability to meet the requirements of the test. In order to afford an opportunity to engineers to sit for examination without any undue loss of time, 103 visits by members of the Board were made to outside examining centres fairly well distributed throughout the Province and 1,117 candidates wrote at these centres. The balance, 629, were examined at the Toronto office of the Board.

STEAM BOILER BRANCH

An expansion in the volume of business transacted by the Steam Boiler Branch was reported for the fiscal year. A total of 443 drawings and specifications were surveyed and registered, as compared with 384 in 1925, and 58 were returned to manufacturers for revision. New pressure vessels inspected numbered 346, which required 816 first, second or final inspections and of these pressure vessels, 19 more than last year were constructed in Ontario. The number of pressure vessels inspected when repaired, sold or exchanged, as well as those given annual inspection, totalled 1,304.

One feature of the development in inspection work is the increasing number of steam boilers and pressure vessels in operation, that were inspected. Under Section 57 of the Factory, Shop and Office Building Act, all uninsured boilers are required to be inspected at least once in each calendar year and many owners and users of such boilers request that such inspection be carried out by representatives of this Branch. In practically every instance the owners of boilers inspected have co-operated with our inspectors in following out any recommendations made, so that boilers being operated are brought to a high standard of efficiency and safety. Five hundred and fifty inspections of boilers in operation were made during the year and it is interesting to record that boilers in schools under the jurisdiction of Toronto, Fort William and Port Arthur Boards of Education were included in this number.

There was an increase in the number of installations of tanks and steam boilers for use in garages and service stations and of boilers installed for heating purposes for which certificates were issued. Six explosions of pressure vessels were investigated.

FACTORY INSPECTION BRANCH

The report of the Factory Inspection Branch contains interesting data concerning plans of proposed buildings submitted to the Branch for approval during the fiscal year. The following is quoted as illustrating the improvement of conditions in industry already mentioned.

"An analysis of the records of plans submitted to this Branch for approval during the past year discloses striking differences from last year's records. The number of plans submitted has been 32 per cent. less, but the estimated value of the buildings represented by these plans has been 87.8 per cent. greater than last year and is substantially in excess of any of the seven years during which the records have been kept in their present form.

"Other encouraging deductions can be drawn from this year's figures. The value of factory buildings, as compared with shop and office buildings, accounts for 70.7 per cent. of the total value, as against 42.4 per cent. last year, indicating that the manufacturing industry in the Province is making healthy progress. It may also be noted that additions to existing plants account for 20 per cent. of the total amount of building. This percentage last year was only 7.6 and the very substantial increase this year shows that the established industries of the Province are on a solid basis and are expanding satisfactorily. These increases have not been confined to any particular industry or class of industry, but have been well distributed among the various lines of manufacture."

The records show an expansion in the volume of work accomplished by the Branch during the fiscal year; 18,419 visits of inspection were made by

members of the Factory Inspectorate in the discharge of their duties in connection with the regulation of accident prevention, hours and conditions of employment of females and youths, health, sanitation, fire prevention and other matters pertaining to the general welfare of employees. In the firms visited, 276,649 persons were employed, an increase of 16,377 over the number for the previous year and 1,140 permits were issued, or 367 more than last year. The great majority of these were overtime and contract clothing permits.

GENERAL

To meet the need of safeguarding the health of caisson workers, Regulations respecting the Protection of Persons working in Compressed Air were drafted by officials of the Department of Health and Labour and passed by the Provincial Board of Health, under Section 8 of the Public Health Act. These regulations were approved by His Honour the Lieutenant-Governor in Council on August 31, 1926, and by an order-in-council on the same date were assigned to the Department of Labour for administrative purposes. The Regulations govern such matters as the maximum number of hours of each of the two shifts and the minimum open air interval required between shifts for the various air pressures up to 50 pounds; the schedule time of decompression after work in compressed air of various pressures; locks and working chamber, gauges, lighting, communication, wash and rest room, sanitation, ventilation and medical attendance. The inspector appointed to administer the Regulations is granted the right of access to any place where men are employed in compressed air.

JAS. H. H. BALLANTYNE,
Deputy Minister of Labour.

Labour Legislation, 1926

The Statutes of Ontario, 1926, contain the following amendment which is of special interest to labour:—

An Act to amend the Workmen's Compensation Act:—

By this Act silicosis was added to the list of diseases that are compensable when resulting from employment. It provides that a person is deemed to have or have had, silicosis “(1) In the anteprimary stage, when it is found by the Board that the earliest detectable specific physical signs of silicosis are or have been present, whether or not capacity for work is or has been impaired by such silicosis; (2) In the primary stage, when it is found by the Board that definite and specific physical signs of silicosis are or have been present, and that capacity for work is or has been impaired by that disease, though not seriously and permanently; (3) In the secondary stage, when it is found by the Board that definite and specific physical signs of silicosis are or have been present, and that capacity for work is or has been seriously and permanently impaired by that disease or when it is found by the Board that tuberculosis with silicosis is or has been present. Nothing in this Act shall entitle a workman or his dependants to compensation, medical aid or burial expenses for disability or death from silicosis unless the workman has actually been exposed to silica dust in his employment in Ontario for periods amounting in all to at least five years preceding his disablement.”

Ontario Offices, Employment Service of Canada

GENERAL SUPERINTENDENT—H. C. HUDSON
PARLIAMENT BUILDINGS, TORONTO

INTRODUCTION

In preparing the annual report covering the operations of the Ontario Government Offices of the Employment Service of Canada for the twelve months ending October 31, 1926, a different policy has been adopted from that followed in previous years. The material has been greatly condensed, the reason being that the previous reports have purposely gone into considerable detail regarding the methods, the operations and the functions of the Service. There is ample evidence to indicate that the Service is now so firmly established that material of this nature is unnecessary, the employment offices being now largely regarded as an integral part of the communities in which they function.

As will be seen by the tables elsewhere in this report, there has been a decrease of 4.8 per cent. in the applications for employment during the year. This is probably explained by the fact that work was more plentiful and consequently the workers did not need to use the Service to the same extent in looking for employment. The decrease, however, is extremely low and the number of applicants using the offices, 190,586, is evidence of the fact stated in the preceding paragraph, viz., the workers in the Province have come very largely to depend upon the assistance of the twenty-five offices of the Employment Service.

In 1926, 156,995 vacancies were listed with the Service as compared with 158,341 in 1925, a decrease of 1,346. This plainly indicates that the service is maintaining the confidence of the employers who are continuing year after year to call upon the offices for their help, both skilled and unskilled.

It is somewhat of a coincidence that the total placements for 1926 come within 123 of the figure for the previous year, the total in the two years being 135,331 and 135,454 respectively. The most significant fact about the placements, however, is that the regular placements show an increase of 5,880 over the regular placements in the previous twelve months, while the casual placements show a decrease of 6,003. This may be interpreted as indicating an improvement in the industrial conditions during the year under examination.

SUMMARY OF EMPLOYMENT OFFICE REPORTS

A substantial increase in the applications, vacancies and placements listed with the Belleville office provides evidence that the service rendered has shown an improvement over previous years and also reflects an improvement in industrial conditions in the district. Detailed statistics for this and the other offices will be found in the above table.

In Brantford, during 1925, conditions necessitated an extensive programme of relief work which was handled through the employment office and resulted in an increase in the applications, vacancies and placements, as compared with the previous year. In 1926 conditions improved considerably but the work available, which was fortunately of a normal industrial character rather than relief work, did not provide as many placements for the office as had been the case in 1925. As a consequence the figures for Brantford are lower than last year.

The placements made by the Chatham office are lower by 200 than during 1925, which is largely explained by the fact that a sufficient number of men was not available to fill the orders for agricultural employment listed with the office during the months of July, August and September. The efficiency of the clearance system operating throughout the entire London zone greatly assisted the local superintendent in Chatham in meeting the demand for workers in the sugar-beet and tobacco fields. In summarizing conditions for the year the Chatham superintendent reports that a larger number of industries and employers were served than during 1925. The significant feature of the registration of applicants is the large percentage of foreigners applying for work. These were mostly Dutch, Belgians and Russians who in most instances were very satisfactory labourers, in spite of their inability to speak English.

In every column, excepting that indicating casual placements, the Cobalt office figures show an increase over 1925; an increase of 609 in the number of vacancies is the most significant difference between the figures for the two years indicating as it does an improvement in employment conditions throughout the Cobalt district. It is also interesting to note that there were 175 more men transferred out of the Cobalt district and 333 more men transferred in, than in 1925, through the operations of the clearance system. The main construction projects carried on in this area were the building of a highway connecting Cobalt and North Bay, repairs to power dams, transmission lines and other smaller construction work which has absorbed a comparatively large number of men during the year.

The second largest increase in the business of any of the Ontario offices during the year is that shown by the figures for Fort William. There were 1,257 more applicants; 1,674 more vacancies; 1,989 more regular placements; and 185 more casual placements than in 1925. This is partially explained by the extensive operations carried on in connection with the cutting of pulpwood in the district but it is also a tribute to the efficiency of the staff of the employment office.

The annual report for 1925 registered an increase in the business of the Guelph office as compared with the previous year and it is interesting to note that the figures for 1926 have passed the high mark established in the previous twelve months. More farm hands have been placed than during any year since the office opened and it is plainly evident that the change of the office to a more central location, from Upper Wyndham Street to Quebec Street has been advantageous.

The substantial increase in the applications, vacancies and placements directly indicates the extent to which employment conditions in Hamilton have improved during the year just ended. In the Women's Department there was a slight falling off in the number of "regular" placements which was offset, however, by an increase of 66 per cent. in the placement of casual workers. The superintendent in the Hamilton office comments as follows, on certain phases of the work of the office:

"It is always gratifying when making up a report of the year's work to be able to say that there has been an improvement over the previous year. This year there was an increase of 1,368 in the number of placements of men and boys made by this office and of the total, 6,989, the regular placements numbered 3,770, an increase of 761 as compared with the previous year. This increase is an indication that there has been a considerable improvement in conditions in this part of Ontario. Had weather during the past summer been better, there is every reason to believe that the placements

would have been even greater, as wet weather during the summer and fall is always a drawback to the work of an employment office."

"The report of the Women's Section of the Hamilton office shows some improvement in employment conditions during the past year, the number of placements made showing an increase of 1,732. This difference was in the casual section. While there were more orders they were for shorter time, some being only for a few hours where most jobs used to be for the day. The general feeling with employers is that casual workers are asking too much (30 cents per hour) but the worker who comes and waits in the Bureau refuses less than 30 cents. The woman who is willing to go at 25 cents per hour is almost sure of getting fairly steady employment. There were 528 domestics placed during the year which is considerably lower than last year, although at all times the demand has been greater than the supply. The factory orders have been very few during the year, the majority of plants having employment agents of their own but those who do use this office report very satisfactory service. One east end employment agent reported spending three hours telephoning and sending messengers for girls on his register. He then called here and in one-half hour had a girl working on the machine. Considerable difficulty has been experienced in placing the foreign applicant who cannot speak English, nor yet understand it, such as Hungarian, Polish, Swedish and German girls. Where placements can be made, always at housework, the reports are that they make excellent workers, clean and willing but it is very trying to make them understand."

In examining the report of the Kingston office for the year ending October 31, 1926, a decrease in the number of applications, vacancies and placements is at once apparent. As in the case of Brantford, however, the number of placements made as a direct result of the unemployment relief work carried on during the winter 1925, is responsible for this decrease which may be described as "healthy" because no one will question the advantage of legitimate industrial activity as compared with work which has been created by the municipality to meet an emergency situation. Previous annual reports have commented upon the close co-operation which has existed in the past between the local office of the Employment Service and the local civic officials. The effect of this co-operation is seen in the prompt action of the Kingston City Council in acceding to the request of the superintendent for space to be used by applicants waiting for employment, in order to relieve the congestion at the office.

An increase of approximately 100 in the number of placements made by the Kitchener office as compared with the previous year is an evidence that industrial conditions are slightly better than in 1925. If farm placements had been as high as one would reasonably expect from an office located in a farming community, the figures for the year would have been much higher but the same situation described in last year's report, viz., an influx of large numbers of German, Hungarian, and Ukrainian farm workers has met the local demand in this connection. Very few of this type of immigrant have been placed through the office, the majority going direct from the port of entry to friends or relatives already established in the district.

Extracts given below outline in some detail the employment situation in London as reported by the superintendent of the office at that point:—

"The year opened with the number of applicants down to 246 men. This number gradually increased until it reached 360, the highest number for the year, during January 1926. This number again showed gradual

decrease until towards the end of July, it reached 153 men. These figures did not vary materially until October, when there was the lowest registration for the year, viz., 132 men. Ninety-six per cent. of the total men applicants were placed in employment. A comparison of the number of applicants in 1926 as against those of 1925 shows that the year 1926 had 1,120 less than in 1925, an indication of healthier industrial conditions for the year. The farm section was kept busy with a heavy call for experienced hands. The fact that other lines of employment were active made it necessary for the farmer to offer a higher wage than has prevailed for several years. Even with the advanced wages this class of labour was hard to supply when other work was available, one of the principal reasons being the lack of continuity of the work. Farm work spreads over the summer months but turns its workers loose for the winter to take what the cities might offer.

Manufacturing all round has been busy during the year and factories gradually increased their workers during the summer. General indications are that this increased number will be kept in employment all winter. A bulletin issued from this office inviting manufacturing and business firms to consider seriously taking on more apprentices to their business, brought forth a number of replies agreeing with the move and promising future support. Six young men have already been indentured. A survey of the handicaps who have been on the applicant lists during the year, shows that the extent of disability ranged between ten per cent. and twenty-five per cent. The highest number on the lists during any month was in December, 1925, which showed twenty-two. This gradually reduced to nine in March and further reduced to two or three during the summer and fall months. The number of the above class placed in employment during the year was sixteen, mostly at work of a permanent character.

The number of applicants in the Women's Section of the London office has not shown much variation, the highest number at any one time was about seventy, and the lowest fifty-five. Close touch with the factories employing female labour shows that biscuit and confectionery, textile, shoe, clothing and box factories have remained consistently busy during the year. The class of help sought to fill up vacancies caused by business expansion has invariably called for experienced hands. The turnover of labour has been small, with help generally keeping their positions. An effort is being made to get the management to interest themselves in teaching the girls who are just out of school a useful occupation.

The placements made by the Niagara Falls office show a decrease of 470, as compared with 1925. This is explained by the superintendent as follows:—

“The general industrial situation compares very favourably with 1925 and had it not been for adverse weather conditions during the fall employment for outside workers would have been available in greater volume.”

The demand for experienced farm hands, exceeded the supply although winter wages averaged from \$25.00 to \$35.00 per month, and summer wages from \$35.00 to \$45.00 per month. During the harvest and fruit picking season large numbers of orders were received from fruit growers, which necessitated the Toronto and Hamilton offices supplying the demand. The wages for fruit pickers remained about the same as last year, peach pickers receiving 5½ cents for eleven quarts, or from \$2 to \$2.50 per day with board and room for work on the day labour basis. Factory employment showed a slight increase over 1925, with the majority of the local firms working on full time practically

throughout the year. Two new industries located in the city, one firm manufacturing glass signs and the other fruit and vegetable sprayers. An extensive building programme carried on throughout the year provided employment for an unusually large number of building and construction workers.

From the point of view of an increase in the year's business as compared with 1925, the record made in North Bay surpasses that of any other office, the placements being 85 per cent. higher than in the previous twelve months. This highly creditable showing was partly due to an improvement in the volume of employment available but is also an evidence of the energy shown by the superintendent. An aggressive policy of canvassing throughout the district combined with a careful selection of workers to fill the various orders listed with the office explains the success attained by him. Because of the "key" position of North Bay as one of the gates to Northern Ontario, the following extracts from the report of the superintendent in that city will be of interest:

"In comparing the figures for the year past, November, 1925, to October, 1926, with the same twelve months earlier, the placements show a very marked increase. Without doubt, the better conditions prevailing in industry generally account for the great part of this increase, but it may be remarked that no stone has been left unturned, whereby new ground could be uncovered, new firms approached and new source of man supply tapped. The Canadian National Railway has sent many men to this office right off the boats and to a less extent, the Canadian Pacific Railway as well. Both these transporting companies have supplied good men from Overseas and it is hoped that the placing of all these men has been of some benefit to both the companies mentioned. It would be of great assistance to many of these Europeans who arrive without guidance and with no one to speak their tongue or give them advice, to have the words "Employment Service of Canada—FREE SERVICE" affixed to or painted on the office window, in the following languages, Norwegian, Finnish and Russian, or if this cannot be done, then only the words "FREE SERVICE" treated in this manner."

In submitting his report the Oshawa superintendent has tabulated the placements for the seven and a half years since the office was opened and it is interesting to note that each year's business, with the exception of 1924-5, shows an increase over the previous year, and in the latter case the placements were only eight below the number necessary to indicate an increase. Probably no better evidence can be given than this as to the manner in which the office has earned and is maintaining the confidence of the local employers and workers. As in many other offices the Superintendent at Oshawa has received numerous unsolicited letters commending the service he is rendering. Extracts from a few of these letters are given below:—

"Your office has been a source of supply, not only of local, but also of outside help."

"The service rendered has been excellent and without your close co-operation it would have been a hard task to have obtained the class of men you were successful in finding."

"If I had the selecting of a chap myself, I do not think I could have done any better."

"They are a much better class of men compared to those received from other points."

The figures for both the men's and women's sections of the Ottawa office, show an increase in the applications, vacancies and placements over 1925.

Commenting upon various features of the work of the men's section, the superintendent records the fact that more experienced farm hands are being kept on during the winter months than in previous years. In connection with the placements in the logging industry which show a marked decrease as compared with previous years, the report reads as below:—

“This was owing to several factors, decrease in the cut of about one-third, question of transportation, shortage of suitable men and men willing to accept this class of work, inherent dislike of lumbermen for signing certificates which they do not understand and largely the fact that lumber companies are sending out their own agents into rural districts gathering parties of men from small farms and those who have been working on construction. Wages averaged the same as last year.”

Early in the year the publicity given the operations of the paper company which is constructing dams and power houses at Chelsea and East Templeton resulted in a large influx of men to Ottawa in search of employment. Co-operative effort on the part of the Quebec Employment Service and the Ottawa branch of the Ontario Government Offices, resulted in the placement of large numbers of men and when, in June, a request was made by the company for permission to bring in 650 workers from Central Europe, a special effort was made to supply the men requested locally with the result that in July the Service was notified that enough men were available and the question of importation was dropped. As employment on this particular project is largely of a seasonal nature it will be seen that the office rendered a real service to the municipality directly involved by filling the orders from the ranks of men already in the country.

A comparison will show that the placements in the Handicap Section of the Ottawa office are approximately the same as last year and in the work of this section it must be borne in mind that for eight years efforts have been made to find satisfactory employment for men who came under this category. It therefore follows that those especially gifted and the more adaptable were found employment first and during the years that followed, work was found for many of the more difficult and diffident but there will be always the chronic problem cases who will not or cannot fit and these form at least fifty per cent. of the present applicants in the Handicap Section, the following being an instance chosen at random:—

Various disabilities — Age 50, married, born in Canada, three dependants, ex-soldier. Education poor, personality fair. Pre-war occupation, stone-mason. Nine months' vocational course—shoemaking.

Employment record—Placed 12-12-21, shoe repairer.
 “ 16- 3-22, elevator operator.
 “ 28- 4-22, fireman.
 “ 14- 6-22, charman.
 “ 12- 1-23, shoe repairing.
 “ 12- 9-25, office cleaner.
 “ 17-12-25, watchman.
 “ 17- 4-26, watchman.
 “ 17- 7-26, park labourer.
 “ 23- 7-26, office cleaner.
 “ 18- 9-26, fireman, still employed.

The above list of jobs does not include various casual ones to which he was sent; these were all of a permanent nature. It is found that the Government Departments are only too glad to co-operate and though many of the employers will give a man a chance they are inclined to ask for a higher standard of efficiency. This office is fortunately situated as regards industrial handicap cases as there

are few of them and those who have registered, have been placed. It is hoped in the course of time that all handicap cases will be placed in positions where they will give satisfaction to their employers and be satisfied themselves. Altogether 520 applicants registered in the Handicap Section and 503 placements were made, eight being at casual employment.

In order that a picture may be presented of the importance of the work done by a typical women's section in a local branch of the Ontario Government Employment Offices, the following extracts are quoted from the report of the director of that section of the office in Ottawa:—

"It is interesting to note that the work in this office has steadily increased in volume each year. This year the permanent applications, orders and placements remained about the same as last year and there was an increase of 55.5 per cent. in the number of casual placements. This office has appreciated the excellent co-operation which it has always received from the Immigration Department in their efforts to bring as many maids to Ottawa as possible. About 200 Old Country girls and women have come during the past year, the majority of whom were experienced in general housework and had at least a knowledge of cooking. This is the type of person who is encouraged to immigrate as they may be sure of being placed, the wage ranging from \$25.00 to \$35.00 per month.

Farmers seldom offer \$25.00 per month, as it is their contention that they can engage a "hired man" for very little more. An interesting feature of the work, as in all employment offices, is the tremendous volume of work done by telephone. As an experiment, the number of telephone calls for one month were counted and from May 11th to June 11th, there were 1,290 incoming calls and 700 calls sent from the offices to outsiders, which meant 1,990 actual telephone conversations."

Industrial conditions in the Pembroke zone having shown an improvement over the previous two or three years, the employment office at that point was able to find employment for more men and women than in 1925. The records show 1,988 permanent and 475 casual placements, a total of 2,463, while the employers' orders for the same period total 2,674. An analysis of the employers' orders show that 1,309 were for bush employment, 361 for highway construction jobs, farm 263, local factories and mills 132, and the balance divided amongst casual jobs, survey work, hotel and institutional employment with a few placements as guides for tourists' parties. In April the Pembroke office was moved to a much more satisfactory type of office building. The result has been not only an increase in the volume of business transacted in the new office but it is observed that a higher standard of placement has been possible.

While manufacturing and other industrial conditions were somewhat better in Peterborough in 1926 than in 1925, the placements made by the local office are slightly below those for the previous year. A very low rate of labour turnover is the explanation given by the superintendent for this situation and he quotes as an example the case of one firm with a working staff of 187 who had only three changes in the personnel between January 1st and March 31. While an employment office superintendent is naturally anxious to show results in his placements, it is even more gratifying for him to know that workers are continuously employed in permanent work as has been the case in Peterborough. Unfavourable weather was responsible for the delay in commencing the usual construction and building programme in the district but later in the season work was carried on at several points on the Trent Valley and some highway construction on the Port Hope Road. There were also some dwelling houses erected and

the Trent Canal employed the usual number of ex-service men as bridge and lock tenders, painters and labourers.

Because of the fact that the number of placements of men made by the Port Arthur office for the fifth year in succession ranks second highest in the Province, the following extracts from the report of the superintendent at that point are given to illustrate in some detail, the methods used in carrying on the business of an office in the North Western portion of the Province:—

“The Employment Service of Canada in this district has had a very busy year from November 1 to October 31, 1926. The placement of men and women in positions in the city and district compares favourably with last year and would have been far better, had not a strike of bushmen been inaugurated in the second week in September and continued throughout that month and the whole of October. Construction work throughout the district has been busy during the year, the largest camps being the Hydro-Electric on the Nipigon and Carkus-Brooks at Atikokan. At the end of October it was reported that there were 420 workmen on the payroll of the Hydro, 92 per cent. of whom were from Port Arthur and Fort William. The building trades have been busier in the city than in many years past. The large mill in course of construction being erected by the Thunder Bay Pulp and Paper Company has called for many skilled tradesmen and scores of teamsters, labourers and handy men and there will be a large gang employed all winter. The Port Arthur Board of Education has erected a new six-roomed school in the neighbourhood of the new mill at a cost of \$65,000 which has employed about twenty-five men from May 15th to October 31. The Port Arthur Ship Building Company has had a busier year than for the past few years and this office was called upon to secure mechanics through the clearance system to fill positions. Valuable assistance was received from the offices at Toronto, Niagara Falls, Hamilton, St. Catharines, Sault Ste. Marie, London and other points, and the employers of Port Arthur, especially the Ship Yard and Thunder Bay Paper Mill have appreciated the service rendered them through the clearance system.

The Port Arthur office acting as the Inter-Provincial Zone Office for this district is pleased to report continued pleasant conditions of inter-provincial work and co-operation between this part of Ontario and the Province of Manitoba through the Winnipeg zone office. All these placements, about 5,000 this year, the necessary transfers of men, order numbers and correspondence involved have been accomplished without friction. It is a pleasure to work under such conditions of courtesy and efficiency as experienced from the employment officials at Winnipeg.

It is sometimes mentioned that the Northern and Western Ontario offices ship large numbers of men in gangs, thereby giving them large placements, and there is usually an inference that shipping large gangs of men is easy of accomplishment. As a matter of fact, it is the most strenuous work such offices have to perform, and to make it thoroughly efficient the staff of any office working under these conditions, must have exact knowledge of all railway lines, names of places, mileage and fares to answer immediately and correctly the questions of the men. Such information given quietly but definitely secures the confidence of the men in the office. Then there is always the anxiety of securing the right men, for on this the confidence of the employer chiefly rests. While all employers recognize that mistakes can easily be made and are willing to allow for same, those mistakes must not occur too often or the service will be considered careless and this will

be fatal to efficiency. On the whole, the employment staff that sends large gangs of men out to the bush and railways and retains the continued confidence of the men and employer is entitled to the fullest credit as the effort has required unbounded patience, great tact, ceaseless industry and that alertness that appreciates the smallest details for the comfort of the men and getting them away on time and reporting to the camp to which they are destined to arrive. This requires an absolute indifference to office hours for train time, boat time and tugs leaving early in the morning take no account of office hours."

Factories located in the St. Catharines district report business as having been much better in 1926 than the previous twelve months. This activity has been reflected in the year's business of the St. Catharines office. The gain in this direction was more than offset, however, by a reduction of approximately 1,000 in the number of men employed on the nearby sections of the Welland Ship Canal. The greatest volume of employment at present available on the Canal has accordingly been transferred from St. Catharines to the Niagara Falls zone. A shortage of domestic and farm workers is reported by the superintendent, a condition which also made the placements in St. Catharines lower than they would otherwise have been.

Employment opportunities in St. Thomas and district are so well established that there is little variation from year to year in the volume of business transacted by the St. Thomas office of the Service. The figures show an increase, however, over 1925, which indicates a healthy condition in the industrial and agricultural affairs of the territory covered by that office. The three railroads running through St. Thomas have been extremely busy and there has also been a volume of highway and railroad construction work in and near the city. A new factory opening in St. Thomas is expected to provide employment for approximately twenty men and eighty women.

The list of employers making use of the facilities of the Sarnia office covers practically all of the larger industries in the city. As at all border points, Sarnia is a centre for a large volume of transient labour. This type of worker is generally difficult to place in employment and the local superintendent's difficulties are further increased by the large number of men deported from the United States as a result of having gained admission into the country illegally. In some cases these men have been established for three or four years and when they find themselves deported to Canada, they are frequently without funds and find it extremely difficult to re-establish themselves in Canada.

The Sault Ste. Marie office made approximately the same number of placements in 1926 as in the previous year. An analysis of these placements is as follows:—

Logging.....	1,173
Casual jobs.....	509
Power transmission line construction.....	221
Miscellaneous.....	103
Railway, maintenance and construction.....	187
Domestic and personal.....	100
Highway construction.....	80
Manufacture of lumber.....	74
Farming.....	53
Transportation.....	43
Mining.....	36
Manufacturing.....	36
Total.....	<u>2,615</u>

In connection with the placement of bush workers the superintendent reports that there was an acute shortage of pulpwood cutters and general bushmen during the month of August, September and October when employment could easily have been found for another 1,000 men in this occupation. An important industrial development in the Sault Ste. Marie district was the installation of power lines to supply electricity to the Michipicoten and Goudreau gold area ; all the men used in this work were recruited through the Employment Service and the contractor addressed a very enthusiastic letter of appreciation to the superintendent.

The logging industry called for over 4,000 men and railroad track work was responsible for about 2,500 orders being listed with the Sudbury office during the year. Mining, the second largest industry in the district, called for less than 100 men; this was due to the steadiness of the employment furnished by the mines and also due to the low labour turnover in the industry. Some of the reasons for this low turnover are the pensions for long service, group life insurance and the provision of company houses for the workers at low rentals. The following wages were paid to workers in the district during the past year:—

Farming.....	\$20.00 to \$40.00 per month.
Logging.....	\$28.00 to \$45.00 " " for bushmen.
"	\$35.00 to \$50.00 " " for teamsters and rollers.
"	\$25.00 to \$50.00 " " for loaders.
Pulp-cutters—wood 4' long,	\$2.25 to \$3.00 per cord.
Tie-makers—12 cents to 15 cents per tie.	
Log-makers—8c. to 25c. per log.	
Carpenters—50c. to 75c. per hour.	
Blacksmiths—55c. to 65c. per hour or \$65.00 to \$90.00 per month (board in bush camps).	
Miners—machine runners and shaft-men from \$4.00 to \$6.50 per day—8 hours.	
Mine muckers—from \$3.70 to \$4.20 per day—8 hours.	
Section men—railroad work 30c. to 38c. per hour—8 hour day.	
Labourers—railroad work 25c. to 30c. per hour—10-hour day.	
Construction work—30c. to 40c. per hour—10-hour day.	
Casual jobs—30c. up to 50c. per hour.	
Cooks—wages vary from \$50.00 to \$125.00 per month according to size of crew, and board.	
Cookees—from \$35.00 to \$50.00 per month.	

It is interesting to note that employers who used the office during the first few years of its existence considered it necessary to have their own representatives make final selection of the men. With increased confidence in the ability of the staff this is no longer the common practice and in 1926, for the first time, no company or employer recruiting men through the Sudbury office used an agent to assist in the selection of jobs.

A substantial increase is shown in the figures submitted by the Timmins superintendent in reporting on his year's activity. The three main industries in the district, viz., mining, pulp and paper and lumber, have all been exceptionally busy, with the result that it was necessary to bring in 1,000 men through the Clearance System. An interesting development affecting the employment of men in the mining industry has been the addition of silicosis to the list of compensable diseases. This resulted in the inauguration of a medical examination of all applicants for mine employment. In addition, men who are already working underground, are being subjected to the same examination and as a result some are found to have a touch of the disease; these men are being refused employment underground. This adjustment, while it results in some temporary hardships is, of course, in the best interests of the workers themselves and the employment offices throughout the Province are co-operating in putting the

plan into effect by advising interested applicants regarding the necessity for the medical examination. The construction of a large paper mill at Kapuskasing and the construction of a railway line from that town to Smoky Falls which will take more than two years to complete is providing employment for several hundred men, both skilled and unskilled. Extensive additions to the plants of two other pulp and paper companies have also given employment to large numbers of men and will continue to do so for some years to come, with the result that employment is available, except during the winter season, for thousands of workers.

The following extracts are given from the report of the superintendent of the Toronto Office:—

“The year just past shows fewer applications and a decrease in the number of placements. This is due in a large measure to the fact that conditions are much better in every direction. There is more continued employment and there is an increasing demand for skilled tradesmen which it has been very difficult to supply. There are more men working to-day than there were this time last year and the forthcoming year promises to be even busier. The building trades have had a good year and there have been a few enquiries from out of town. Steamfitters and plumbers have been scarce as have also tool and die makers. Quite a number of skilled men in the automobile industry have been placed and they have had a good season. Labourers for both casual and steady jobs have been difficult to find. It was necessary to cancel quite a number of orders because they could not be filled with suitable applicants and other orders were lost because men were not available. It was not possible to satisfy the demand for domestic workers for summer resorts and hotels.

The number of workers transferred out of the Central Ontario Clearance Zone for the past year was 1,877 and for the year previous this office transferred 2,194, making a decrease of 317 from the preceding year. This decrease is regrettable but is a vast improvement over the year 1924-25 when the decrease was 712. The decrease this year is due to better times throughout the country; work has been more plentiful on the whole, therefore enabling workers to obtain employment without assistance from this office. In the construction group which applies to all outside tradesmen in connection with building and construction work such as carpenters, bricklayers, plasterers, etc., this office placed out of the zone 84 workers as compared with 75 for the preceding year, an increase of nine. This increase is not very great and a better showing would have been evident but for the scarcity of construction workers who have not been available on account of the increased activity in the city of workers in this group. There has been a large amount of building going on in Toronto and Northern Ontario during the past year and when work is available locally it is hard to secure workers to leave the city.”

The following table with regard to the birthplace of immigrants who were applicants in the Men's Section during the last two years provides some interesting information regarding their nationality.

IMMIGRANTS

Nationality	1925-26			1924-25		
	Married	Single	Total	Married	Single	Total
British.....	398	668	1,066	523	712	1,235

	464	804	1,268	588	821	1,409

The number of registrations of these immigrants totalled 10,166, as compared with a total of 16,642 for the previous year, a decrease of 6,476.

The placements in the Men's Farm Section of the Toronto office are lower than last year which may be due in part to the assisted passage scheme whereby men have been able to come from England to this country for farm work at a very low cost for transportation. Placements in such cases are made directly by the Colonization Branch of the Provincial Department of Agriculture. The Ontario Government's Scheme for bringing boys from Great Britain for the purpose of engaging in farm work after a period of training is also responsible for a reduction in the number of vacancies for young men between the ages of sixteen and eighteen years. Probably the outstanding reason, however, is the fact that a better type of farm hand has been available during the past year and the men who have been sent out have not changed their jobs as frequently, while the farmer has also apparently been better satisfied, resulting in the significant reduction in the labour turnover in this industry. A large number of men were sent to the Niagara district for the fruit picking season and as in the case of general agricultural employment the employers report that this office secured for them a better type of worker than had previously been the case.

During the fiscal year 1919 applicants registered in the Handicap Section. Compared with 1925 when 2,302 new applicants were shown in the Annual Report, the figures for this year appear considerably lower but this is explained by the fact of the cancellation and re-registration as new applicants of all persons registered in the sections prior to November 1924, when the employment activities of the Department of Soldiers' Civil Re-establishment were transferred to the Employment Service of Canada. Compared with the two previous years, a substantial increase is noted as the reports show 547 applicants for 1923 and 387

for 1924. In 1925, 10.8 per cent. of the new applicants were partially disabled civilians, whereas in 1926 the percentage increased to 20 per cent. This type of applicant includes workers injured by industrial or public accidents, those disabled by disease or surgical operations and others handicapped by old age and its attendant infirmities. Of the latter type 5.5 per cent. of the total registrations were between the ages of 60 and 85 years.

Grand total of placements for fiscal year.....	2,279
Regular placements.....	865
Casual placements.....	1,414

In addition to the aforementioned placements there were 76 regular and 47 casual orders obtained by the special scouts connected with the Handicap Section and transferred to other sections of the Employment Service. These orders required applicants with qualifications not possessed by applicants available in the Handicap Section.

"In spite of the number of placements made during the past two years the difficulties of placing serious "problems cases" suffering with chronic diseases such as tuberculosis, mental disorders and various medical disabilities, forbidden to work more than a limited number of hours per day, still remain, while applicants suffering from old age together with its attendant infirmities, present one of the most difficult of our many problems. In this regard, however, the situation would be considerably eased were the facilities of the Vetcraft Shops extended and other forms of sheltered employment created. A Federal Order-in-Council was designed to care for a number of these "problem cases" by providing sheltered employment but unfortunately, owing to lack of accommodation, many eligible for admittance are still more or less dependent on charity for their existence. The benefits derived from Order-in-Council P.C. 1839, which provides protection for the employer against the possibility of additional Workmen's Compensation risk, when employing partially disabled ex-service men, are obvious. Were the benefits contained in this order-in-council made applicable to other disabled citizens, much greater results would inevitably follow."

In the Boys' Section of the Toronto office new applicants numbered 846 for the year and 408 placements were made.

"In placing boys, it has been found more convenient to make a temporary order and to refer applicants to the employer until he is suited. This method is necessary because of the nature of boys and employers. Boys will frequently express entire satisfaction with the employer and the actual duties. An employer is apt to choose his boy on sight, if he looks the kind

he thinks he wants. Conceptions of types vary considerably and the average employer has difficulty in describing accurately or adequately the type of boy he requires. There is always a demand for the intelligent boy with good home environment which is greater at all times than the office can fill except in June and July. There is also a steady demand for boys who are sufficiently mature to be willing to sacrifice immediate wages for a future promise but, needless to say, this kind is not common. The majority of placements in the Boys' Section are of factory hands and of boys in so-called blind alley jobs. There are many reasons for this state of affairs. Perhaps 20 per cent. of the applicants desire to learn a trade, mostly mechanical, such as automobile mechanics, etc. The opportunities for meeting this desire are not at all plentiful with the result that the boy is often obliged to abandon such an ambition and enter the ranks of unskilled labour. About 15 per cent. of the applicants are boys who, in search of adventure and knowledge of life, leave home, frequently the farm, and come to the city. Some will succeed but too many are inadequately equipped to succeed in a competitive environment without the support and assistance of the home. The result of this constant migration is a large group of boys around seventeen and nineteen, who are without home training and influence and without technical training who will also gravitate into the ranks of casual labour."

"The Scouts have made during the year approximately 6,000 calls on various employers of labour throughout the city and immediate districts. They report conditions much improved. All through the year in most lines of production work has been steady, no great expansion but rather a gradual improvement. While in some lines, the earlier part of 1926 seemed quiet, yet in most cases from the output or turnover point of view it was better than the previous year. Such firms as banks, trust, loan and insurance companies report advances, also men's clothing manufacturers. Women's clothing manufacturers were very busy and it was far from possible to meet the demand for workers here. Building trades, iron trades, biscuits and confectionery, paper box manufacturers, neckwear firms, knitting firms, newspapers and printing trades all reported advance, but bindery work and publishers were only fair. While employment in these trades has shown increases and work has been steady there has not been the turnover in workmen which might have been expected and skilled help has not been too plentiful at any time. Work, too, has been found for a large number of the unskilled classes owing largely to the great amount of work carried on along the water front."

"In the Women's Houseworkers' Section, the first months of the year began with a very noticeable shortage of experienced cook-generals, which existed all through the year and still prevails. Employers are at a loss to know why there are so few seeking such positions when they can offer highest wages with every labour saving device to make their work attractive. Many of the employers tell us they have private suites for their help. Mothers' helpers are practically the only applicants wanting resident work who have applied for resident work during the month of November. January found a great number of industrial workers applying and considerable sickness in employers' homes increased the demand for casual workers. In February a few orders for cooks on boats were received and March was the start of applicants applying for summer work; this phase of the work became very active and placements were better. The demand for house-

cleaners kept the Casual Section busy during the month of March. April was a month of great activity, filling orders for summer camps, hotels, etc., and showed more immigration movement in Canada than at any other part of the year. The demand for casual workers was poor. July showed orders from employers in New York, Missouri, Illinois, Pennsylvania, etc., who spend the summer months in Canada at summer resorts and secure their help from the Houseworkers' Section. There were orders for matrons and housekeepers for colleges outside the city for help required on September 1st. August showed orders for temporary maids, the regular workers being on holidays, and teachers applying for nursery governess positions as they found themselves without schools. In September the demand from employers for cooks-general increased enormously and an excellent demand for casual workers was shown. A good number of unplaced applicants were apparent in October but many of the applicants for work asked for non-resident positions. The new arrivals who passed through this Section were of a very good type on the whole, much better than the previous year and more experienced, yet a few of the married ones were difficult to place as the majority were seeking non-resident work. Those who never worked outside their own home also proved to be a problem as in many cases, they requested to be placed where they would be treated as one of the family."

"In the Women's Clerical Section 14,149 interviews were conducted during the year, which is slightly less than last year. On the other hand, more placements were made than in the previous year, which fact would seem to indicate that more people were in positions. There are very seldom many first-class workers in any line of office work out of employment for a length of time. The reason for a long list of unplaced is that a great number lack either the capacity or the training for any particular sort of office work and drift from one thing to another."

"The Women's Industrial and Farm Section exceeded its record of last year in every particular except in the number of interviews. The vacancies and placements were both higher and reflected an improvement in business. The unfilled orders were nearly all for experienced garment workers and employers were unwilling to take unskilled workers."

"More domestics could have been placed on farms during the summer months if they had been available."

Employment conditions in Windsor during the winter of 1925-6 were better than in previous years, with the result that the municipal authorities did not find it necessary to put on any extensive programme of relief work. Building operations were slow in commencing in the spring on account of weather conditions but when the work finally started the building operations exceeded all previous records. Factories, farm and construction work provided a very large number of vacancies during the summer months, but the wet weather in the month of September and a falling off in the automobile plants resulted in many men being thrown out of employment earlier than usual. The transfer of 100 men to the Canadian Pacific Railway freight sheds at Port McNicoll made a substantial reduction in the number of the unemployed listed at the office.

The work of the Women's Section of the Windsor office is described as below by the superintendent:—

"The Women's Section has been well and widely patronized during the past year. Employers and applicants in every field of work have used the Bureau and seem to appreciate the efforts put forth to fill their needs. This year's orders and placements in this work are much in excess of last year.

There is a noticeable increase in the number of applicants from Northern Europe—Scandinavians, Danes, Dutch and Germans. These people are of a fine physique, neat and very satisfactory as cooks, laundresses and cleaners. There are very few parlour or table maids among them. They are well liked and, as soon as they master a few English words and phrases, are much in demand. Perhaps seventy per cent. of the applicants sent into domestic service by this office during the past twelve months were English, Scotch and Irish and the general satisfaction of employers and the constantly increasing demand for these applicants, speak well for their efficiency. Orders for factory work for women have been scarce due to the steadiness rather than the lack of employment and employers have reported that their orders will be placed with this office when they need additional help. Quite a number of stenographers and book-keepers were placed during the year and a special effort was made to increase the number of these placements."

Employment Agencies' Act

Fifteen licensed employment agencies are operating in Ontario under this Act; seven in Toronto, two in North Bay, two in Ottawa, three in Sudbury, and one in Fort William. Of this number three located in Toronto, confine their activities to the placement of nurses and other classes of women workers, and were responsible for the placement of 2,438, or slightly over 50 per cent. of the total number of women placed. The remaining twelve agencies placed chiefly construction men, bushmen, labourers, carpenters, farm help, domestics, char-women, camp and hotel help. A great deal of the work was of a casual nature.

The number of placements effected by these agencies during the year totalled 33,512 as compared with 27,504 in 1925, an increase of approximately 21 per cent. Of this number 28,727 were men and 4,785 women.

REVENUE STATEMENT

There was an increase in the revenue of the Steam Boiler Branch, which amounted to \$16,249.76 for the fiscal year 1926, as compared with \$15,586.03 for 1925. An increase was reported in the number of registrations of designs and in the number of new pressure vessels constructed in Ontario. There was also a great number of installations of tanks and boilers for use in garages and service stations, and of boilers installed for heating purposes for which certificates were issued by the Steam Boiler Branch.

Inspection of Factories, Shops and Office Buildings

Chief Inspector: JAMES T. BURKE.
Office, Parliament Buildings, Toronto.

There was a time when owners and employers looked with certain disfavour on those appointed by the Province to enforce the Factory, Shop and Office Building Act. Many employers could not see at the beginning that what was in the interest of their employees was in their own interest also. Gradually, however, it became clear to them that in safeguarding the life and limb of their employees they were insuring better results for themselves, for the employee who was comfortable and reasonably safe at his work could be counted on to turn out a better grade of work and more in a given time than if he were working in discomfort or in danger of any kind.

It took considerable diplomacy to deal with this class of employers. It was necessary to argue with them at length and show them how required changes could be made in their buildings at the smallest possible expense. With few exceptions the day has gone by when the visit of the factory inspector is met with growing opposition. The employer and his employees along with the general public have been enlightened and appreciate practical safeguard reforms.

It was gratifying to members of the factory inspectorate to be present at the unveiling of a trophy awarded by the Portland Cement Association to the Port Colborne plant of the Canada Cement Company, Limited, for no lost time accidents during the year 1925. This success was achieved through the exceptional co-operation of employers and employees in a plant where several hundred men are engaged in what is considered a hazardous industry, and is a splendid example of what may be done in accident prevention work by united effort. The firm is to be congratulated on this advance in safety practices. Through the kindness of L. M. McDonald, superintendent of the plant, permission has been obtained to reproduce the photograph taken on that occasion. (See page 35.)

It is often difficult to convince a business man of the value of the safety idea because the benefits of accident prevention work cannot be estimated in advance with any degree of precision and in many cases something more than indefinite presumptive evidence of its value is demanded. Every safety inspector knows that guards and automatic protective devices and modern safety methods have prevented many accidents and saved many lives in the past and that such precautions will be equally effective in the future. Where definite proofs are demanded that any certain guard or safety device will undoubtedly save an employee from serious injury or death, abundant evidence can be secured from many industrial plants where the safety equipment, had it been in its proper position, would have averted an accident.

The ramifications of the work of a factory inspector bring about daily some new feature that requires his or her attention. Just now considerable attention is being given to any additional waste in industry and it is quite logical that anything which contributes towards fatigue should be eliminated. As industrial processes change, bringing into the industrial field larger and more complete

Trophy awarded by the Portland Cement Association to the Port Colborne plant of the Canada Cement Company, Limited, for no lost time accidents during the year 1925.

machinery which means greater production and consequent vibration, if buildings and foundations have not been specially arranged, workers who are seated on a floor which is constantly vibrating from the speed and operation of a machine are expected "to get used to it." It is found that this process of "getting used to it" involves a greater intensity of nervous effort, which is in itself fatiguing. Take, for example, the employee who is sitting at a table operating a motor driven machine, which causes the work table to shake. It is necessary for her in performing her work to exert greater application and therefore greater fatigue is caused. It is also understood that fatigue is responsible for accidents and a loss of productivity. Consequently methods are being used to reduce or eliminate this vibration as one of the means of combating exhaustion.

Increased facilities for making the sanitary equipment comply with modern methods are developing steadily, but in some cases employers do not view these requirements as being essential and therefore resort to subterfuges which do not even comply with the spirit of the Act. It is therefore necessary to give such matters special attention as they may be a menace to health.

Thorough investigations were made to eliminate any traces of child labour and as usual a few cases were found during the school summer holidays. The explanation usually was that the employer thought such children could be employed in a canning factory during the holiday time or that the child was represented as being over fourteen years of age.

Reports from all districts show that bake shops are being maintained in a clean and sanitary condition. This industry is developing into one of our vanguard industries and it is remarkable how the trade is expanding as indicated by the additions to buildings as well as the introduction of the latest equipment. It is quite apparent that the less modern bake shops must eventually adopt similar constructive methods or they will find their present methods do not appeal to patrons.

The matter of hours of labour required a great deal of time. Investigations disclosed the fact that, on the receipt of spasmodic orders from merchants, manufacturers utilized all the experienced female help available but were not willing during these rush seasons to engage beginners. The result was that the working day was lengthened for females and in some cases they were employed the thirty-six nights overtime allowed by the Act in order to meet such exigencies. Considerable supervision was necessary to prevent this limit from being exceeded.

It will be noted that applications received from permits of all kinds numbered 1,140, which is 367 more than last year. This increase, together with the increase of 16,377 employees reported in the firms inspected, indicates a gradual return to normal trade conditions.

The greater volume of work accomplished by the Factory Inspection Branch is indicated in the following tables and reports. The inspections made totalled 324 more than in the preceding year.

	Year 1925	Year 1926
Total inspections	18,095	18,419
1st "	10,260	11,103
2nd " or revisits	7,835	7,316

Included in these are investigations of accidents and complaints, also inspection of buildings at Exhibition Grounds and delivery of 389 contract clothing permits under section 52.

In addition to these regular inspections there were the usual special visits, office calls and conferences incidental to inspection.

Employees in above industries, mercantile establishments and office buildings numbered 276,649.

Year	Males over 16	Males 14-16	Females over 18	Females 14-18	Children under 14 dismissed	Total
1925	188,040	541	69,352	2,315	24	260,272
1926	200,241	459	72,564	3,321	64	276,649

HOURS OF LABOUR PER WEEK

Males					Females				
45	50	54	58	60	45	50	54	58	60
93,822	47,244	26,850	4,648	20,541	49,187	15,970	5,017	463	2,989

Also 9,854 employees, male and female, working approximately 50 hours per week.

Orders issued relating to the various requirements of the Act totalled 6,883 as compared with 7,200 in the year 1925.

PERMITS

Total applications for permits, overtime and others, numbered 1,140, and were issued as follows:

Year	Regular Sec. 34	Bakeshops Sec. 70	Fruit Camps Sec. 40A	Sale of bread manufactured out of Province Sec. 69	Contract Workers Sec. 52	Total
1925	343	8	17	1	404	773
1926	479	20	27	2	612 (29 cancelled)	1,140

COMPLAINTS

One hundred and forty-eight complaints were received during the year. On investigation, 81 were upheld, 36 not upheld, 24 are pending investigation, and 7 did not come within the jurisdiction of this Branch. Some investigations covered more than one complaint. Subjects of complaints were:

Year	Heat	Elevators	Fire Protection	Child Labour	Lavatories	Sanitation	Boilers	Guards	Venti., Dust, Fumes, etc.	Overtime	Hours of Labour	Mechanical Exhaust	Miscellaneous	Viol. Stat. Eng. Act.	Viol. Min. Wage Act	Violation Adol. Act	Total
1925	20	7	6	19	5	11	5	1	24	17	7	5	7	134
1926	21	6	1	4	23	4	15	1	9	5	28	5	10	9	5	2	148

PROSECUTIONS

Proceedings were taken against two firms for violation of the Ontario Factory, Shop and Office Building Act. In both cases convictions were recorded and fines amounting to \$71 were imposed. One firm was prosecuted on three charges, namely, for child labour, for operating a factory without first obtaining a permit and under the Criminal Code for maintaining a dangerous machine on which a boy under fourteen years of age lost a hand. For this a fine of \$1,000 was imposed, to be applied towards the education, maintenance and advancement of the injured boy under the direction of the guardian. Action was also taken against another firm for refusing to comply with the inspector's orders, resulting in conviction and fine.

VIOLATIONS

Violations of the Acts, in the enforcement of which the inspectors have a responsibility, were submitted as follows:

Of the Stationary and Hoisting Engineers' Act.....	48
Of the Steam Boiler Act.....	29
Of the Adolescent School Attendance Act.....	65
Of the Minimum Wage Act.....	1,829

EXPLOSIONS

Seven explosions were reported during the past year; one gasoline, one dust two jacket heaters, one jacket kettle, one ammonia tank and one boiler, causing the death of three employees and injuring one other.

ACCIDENTS

Four thousand nine hundred and twenty-nine accidents were reported during the year 1926, 46 of which were fatal, as compared with 3,806 reported in 1925, with 35 fatal.

Fatalities were due to:

Burns.....	4	Infection of wounds.....	2
Cranes and derricks.....	2	Jammed between articles.....	2
Elevators, dumb waiter and hoist..	5	Rolls.....	2
Electricity.....	2	Belts, pulleys and shafting.....	8
Engines and cars.....	2	Saw.....	1
Explosions.....	3	Press.....	1
Falling substances.....	2	Calender.....	1
Falls.....	4	Conveyor.....	1
Falling scaffolding.....	1	Other causes.....	1
Cable.....	1	Suffocation.....	1

REPORT OF INSPECTOR J. H. AINSBOROUGH

Factory conditions in the various industries in this area were fairly satisfactory. A great many guards and safety appliances have been installed for the protection of employees and these no doubt have been the means of preventing many accidents. In the canning industry employing male and female help, conditions were very good from a safety and sanitary point of view. Overtime permits were necessary in many of the plants, due to the bad weather conditions which kept crops late. The management in all cases co-operated with the inspector to improve working conditions for the benefit of the employees. On the whole, bakeshops in this district were kept clean and sanitary and restaurants and Chinese laundries were found in very fair condition.

The inspection of boilers and pressure vessels under the Act received careful attention. When it was found no inspection had been made, an order was given for inspection and generally it was complied with promptly. The Stationary and Hoisting Engineers' Act was well observed. A few violations were found and reported to the Chief Inspector.

REPORT OF INSPECTOR R. ALBROUGH

In the last few years, paper making has become a major industry in the Northern part of the Province, new mills having been built and old ones extended. Owing to the hazardous nature of the work and the constant changing of the machinery, frequent inspections are necessary. It is pleasing to note the interest taken by the management of these plants in safety first work. During the past year it was a pleasure to examine the safety systems in the various mills, which were found to be very complete, and if strictly carried out, should substantially reduce the number of accidents. A great number of accidents can only be overcome by educational methods, which will lead all into safer habits, but will take considerable time to secure full results.

During the summer months a large number of saw-mills, creameries and cheese factories in rural districts were visited. Numerous orders were made for the safeguarding of machinery and annual inspection of boilers, etc. One must use a great deal of judgment in making these orders as it is not always practicable to apply standard guards in these plants.

The Stationary Engineers' Act is being well observed and several investigations made on complaints of alleged infringements of the Act showed in most cases that the boilers were less than 25 H.P. There seems to be a misinterpretation of the Act by some of the engineers, who think that if the safety valve on the boiler is set to release at 10 lbs. or over, regardless of the horse power, a certified engineer must be in charge. As a matter of fact the Act makes no provision for the operation of stationary boilers under 25 H.P., but provides that boilers over that capacity with the safety valve set at 10 lbs. or over must be operated by a certificated engineer.

Restaurants received a great deal of attention and were found, with few exceptions, clean and well kept. There was some difficulty in the smaller restaurants in ascertaining the number of hours worked by females, as they seem to come and go as they please between meal hours. In fact, some said they would sooner stay in the restaurant during the afternoon than walk the streets, unless they had something to go out for. In a number of these establishments employing females, no Minimum Wage Card was posted and these cases were reported to the Minimum Wage Board.

A great number of elevator interlocks are now in use in this district, which are giving satisfactory results. In some cases minor adjustments were necessary because the mechanic in charge was not familiar with the mechanism of the locks. In no case were gates leading to elevator shafts nailed up as was formerly a common occurrence. No serious accidents were reported due to the operation of elevators during the year.

REPORT OF INSPECTOR G. H. BOSTOCK

Inspections made during the past year cover practically the same ground as in previous years. In the lumbering districts few changes are noted, as the same companies and individuals are found generally in the same localities, with the exception of the portable lumber mills, which are scattered throughout the more northern parts of the country. The accidents have been kept to a low percentage of the total number of men employed, owing principally to the careful superintendence of operations by those in charge, and the more general observance of safety methods and use of guards on the exposed parts of the machinery. There have been few orders necessary among saw mills and planing mills.

The regulations of the Stationary Engineers' Board and those of the Steam Boiler Branch are in the main carried out. There have been few instances where engineers with papers of too low a grade have been employed, and there has been no difficulty in getting changes made. The same remark applies to the regulations respecting the annual inspection of uninsured boilers, by certificated engineers, although in the inspection of portable lumber outfits, there has always been a certain amount of trouble in obtaining the home address of the owners, as many of them operate at a distance from their regular mail address.

The conditions under which cheese factories and creameries are operated show considerable improvement and it is a pleasure to be able to state that the shortage of fly screens on windows and doors is being eliminated gradually, the old screens being replaced by new ones, and where there had not been any, screens have been supplied.

Machine shops and the engineering works are usually operated under expert management and are generally found to be in excellent condition, as the comparative absence of major accidents testifies. When minor accidents occur, investigation often points to the human element as being the predisposing cause, owing to a certain amount of carelessness and the dislike on the part of the worker to avail himself of safety appliances, even when freely supplied by the management. For instance, in the reports of accidents the item of a foreign body in the eye is traceable to the repugnance of an operator to take the time to put on a pair of goggles. The danger does not appear to him as serious, although he occasionally sees instances where a man has lost the sight of one or both eyes when the use of goggles would have prevented the trouble. We see also the mention in the reports of a scratched finger, or a sliver in some part of the hand, later infected. A visit to the first-aid man would probably have prevented infection, possibly saved an amputated finger or limb, or even a life. These seem small things but it is appalling the number of such cases reported and no doubt they have some bearing on the apparent increase of accidents. It is one of the duties of a factory inspector to educate those with whom he constantly comes into contact in these apparently small matters.

Garages in the country districts are still a thorn in the flesh of the conscientious factory inspector. Inspection of their air reservoirs is never thought

of until he calls at the garage. Some time is spent in arguing with the proprietor the question as to why his tank needs inspection, and in smoothing down his indignation when he eventually finds that non-compliance with the order possibly means further trouble. The old kind of garage is, however, rapidly becoming a thing of the past as garage men are realizing the fact that an automobile owner prefers to have his repairs made where he can see the work being done, and have some degree of comfort during the process. In the larger villages and small towns the garages and service stations carry a fairly well fitted up machine shop using electric or gasoline engine power, and the main fault to find is the want of adequate ventilation. Often an automobile engine is found running in a shop without any means of ventilation other than a small window situated at the farthest end of the garage, and the only light available being from that window, and one or perhaps two electric light bulbs of low intensity.

The danger of automobile exhaust has been so often remarked upon that it would almost seem superfluous to repeat the warnings, yet the newspapers are constantly reporting deaths from the deadly carbon monoxide gas present in the exhaust fumes from all automobile engines. Perhaps it may not be out of the way to point out that carbon monoxide gas is not the only danger. It is light and when hot, as in exhaust fumes, it will rise rapidly to the highest point in the room, and if fresh air is available to take its place, will make its way through any vent it can reach, so that with fresh air as a protection it is not dangerous. But there are other gases in the exhaust and we do not hear much of them, but undoubtedly, in a way they are quite as dangerous in their properties as carbon monoxide. With these gases, however, there is one good feature, they possess a powerful odour, and on coming in contact with air, they can be seen; they are heavier than air, and need an exit from the room at or near the floor level. Consequently it can easily be seen, that, in addition to an opening for the light carbon-monoxide gas, which has neither taste nor smell, and is invisible, there must also be provided an opening at about two feet from the floor level. Any garage thus protected may be considered reasonably safe. This remark applies to gasoline or petroleum spilled upon the garage floor, the fumes from which are not only dangerous from the viewpoint of fire, but also from that of health.

As in other years, investigations have been made involving work in the chemical laboratory, these including complaints of occupational diseases, the survey of factories carrying on processes which give off noxious fumes or dusts, and where ventilation is defective or absent. Visits were also made to inspect systems of ventilation where applied to processes not in common use such as in etching operations, the principle of which might be adapted in other plants where noxious fumes or gases are given off, and which are deleterious to health.

REPORT OF INSPECTOR HARRY BOURNE

It is most pleasing to note that general trade conditions in the foundries of the Province are much improved. Many of the shops which had worked short time are now operating the full schedule of hours per week with larger shop crews and there is a much better tone among both employers and employees. With the return of normal trade conditions, it should be borne in mind that the best results from a commercial and humanitarian point of view are only obtainable where healthy and safe shop conditions are provided. During the year there have been many improvements made along these lines by means of mechanical and other agencies.

One of the important features in safety is good order, or good housekeeping, in the shop. This feature can always be practised with a great saving and eliminates many possibilities of accidents. Good illumination is a great money saver and will prevent accidents. Proper heating should receive every consideration as it is conducive to good health and good general results. Proper ventilation during inclement weather is also a matter of great importance and can be taken care of by mechanical agencies if properly installed.

Considerable attention has been paid to the use of goggles for foundry employees, to be worn during cast time, as in most cases eye burns caused by splashing metal prove to be serious and quite often mean the loss of an eye. There are many styles of goggles for other industrial purposes that are not adapted for foundry use. Care should be exercised when purchasing to have proper lenses, both for strength and vision and the frames should have short eye cups to provide plenty of side vision. Steel frames are not suitable for foundry use on account of the irritation to the face from heat and grit and the webbing across the nose has a tendency to hold the metal should it fly in that direction.

Care should be taken in the construction and equipment of drying ovens which have several hazardous features. Counter weights should be boxed in, and firing pits should be covered with level gratings. Flashbacks from fire boxes where oil or gas burners are used in place of coke or coal may be guarded against by having the oil and steam or air valves placed well to one side of the fire box doors so that the operator will of necessity have to stand to one side while turning them on after placing his lighting torch in proper position. If an oil burner should go out and the oil continues to flow and is not noticed by the operator in time there is likely to be an accumulation of vapour, followed by an explosion. When possible to install a pilot light such an accident can be prevented or a wedge shaped baffle of fire brick directly in front of burner will remain hot enough for some time to relight burner and prevent explosion. Large ovens are usually equipped with flat cars or rails on a cable and snatch block should be provided in order to pull car out with over-head travelling crane, the snatch block being well anchored at such a point that the cars may be pulled out with a direct upward pull of crane. This feature eliminates the possibility of accidents from sliding flasks, core-plates or rigging.

REPORT OF INSPECTOR W. T. BRENNAGH

During the fiscal year just closed, general conditions in factories have shown improvement over the preceding year in this district. Industries have been quite busy and full time enjoyed by those employed. Considerable overtime has been resorted to in plants within the textile trades during the past few months, and in order to meet this exigency in trade, special permits were issued as required allowing females to be employed till 9 p.m. for a limited time. Many additions have been made to existing factories during the year, which is a good augury for future business.

The canning and jam factories number thirty-one, all of which have been visited in some cases two or three times during their busy season. On account of weather conditions, which have been unfavourable, these plants have been compelled to work a considerable amount of overtime, and in most cases, permits were issued for this purpose.

Safeguarding of machinery and dangerous places in industrial plants is still the most important phase of the factory inspectors' routine. It cannot be said that accidents are less frequent, for they still number many each month, but

those of a serious nature are becoming less frequent. Accidents are investigated when thought necessary. Industrial fatalities this past year have increased over the preceding year, twelve having occurred in the district. In all cases these fatal accidents were regrettable and could not be attributed to carelessness or lack of protection on the part of the employer or employee. On the last day of the fiscal year, two men were killed and three severely injured by an explosion of a "beater" in a paper mill. This particular case, being the first on record of its kind, was investigated thoroughly, and at present writing, a detailed report is being prepared as to the cause of the explosion. Freight elevators take up considerable time by way of inspection, but as practically all are now equipped with the gate interlock, accidents from this source are less frequent. Only on one occasion has a serious elevator accident occurred in the district, and that can be charged to the carelessness of the employee himself, who disregarded safety attachments. About thirteen fire escapes have been erected on factory buildings, from two to six storeys in height.

Only a few cases of child-labour have appeared and these occurred in jam factories during the strawberry packing season. Needless to say, the children were replaced by older employees.

All camps in the district where women were employed at picking fruit were visited, and eight permits issued to the owners, under the regulations governing this class of labour.

The Minimum Wage Act now seems well established and orders governing rates of pay are posted conspicuously in all parts where females are employed.

The Adolescent School Attendance Act has received considerable attention especially in the larger industrial centres. The number of applications received for permits to allow those under sixteen years of age to enter employment is generally regarded as a kind of barometer of industrial conditions.

Inspection of boilers and vessels carrying pressure has been closely observed during the year. At the height of activities on the Welland Canal construction, a large number of boilers were ordered to be inspected as required by law and reports forwarded to cover same. This also applies to sawmills, cheese factories and creameries in the outlying part of the district.

The Stationary Engineers' Act has received close attention and very few violations reported in connection therewith.

Only on one occasion was it found necessary to invoke the aid of the Courts, that being a case of disregarding orders for sanitary equipment. The owner of the premises was fined \$50 and the costs.

REPORT OF INSPECTOR H. A. CLARK

Not only the safety of workmen, but the maximum output of a plant is promoted by making the physical surroundings of the workmen as comfortable as possible with plenty of light and good air. Safety and comfort pay in every way. Statistics show that the majority of accidents occur during the months of diminishing light. Dirty windows and insufficient artificial illumination make conditions much worse than they need be. Consideration of economy often leads to the placing of too many machines in a given space. Passageways between the machines are thus reduced to a point of danger. Any undue curtailment of space interferes with the proper handling of the machine, and adds to the risk and probability of accidents, owing to the operator being exposed to contact with gears, pulleys and belts and other moving parts, for even where guards are provided in fullest measure, it is rarely possible to eliminate absolutely all danger. Space should not be held of more value than safety.

Frequently workmen, especially piece workers, will object to the use of the safeguards provided, claiming that they interfere with the quantity of the output, and so cut down their wages. By the exercise of a little ingenuity the guard may often be adapted to perform its function and yet not interfere with the speed of the work and no guard should be condemned simply because some workman at the outset objects to its use. Rather this should lead to further study of the matter and the use of a guard suited to conditions.

A continuous supply of pure air is no doubt of greater importance from the standpoint of maintenance of health, than it is from a standpoint of prevention of accident, but the two are related. Whatever lowers the vitality of the workman decreases his alertness and watchfulness to avoid accident. Impure air, gases, vapours, dust and smoke, therefore, increase the chance of accidents in addition to imperilling the health of the workman.

Power freight elevator cars should have steel frames and platforms designed with a factor of safety of at least six based on the rated load uniformly distributed, except elevators of the plunger type which are not provided with counterweight. Freight elevators suspended by cables should be provided with a car safety attached to the car frame preferably below the car. The safety should be capable of stopping and sustaining the car with rated load and should be so constructed that if applied it cannot decrease its retarding force until the car has stopped. Car safeties should be operated by speed governors, those which depend on the completion or maintenance of an electric circuit for the application of the safety should not be used. Car safeties should be applied mechanically and should be periodically inspected and tested to determine the condition of the sliding surfaces and the working parts. Tests should be made at least once a year at rated speed. All elevator gates should have mechanical gate locking devices.

REPORT OF INSPECTOR W. S. FORSTER

As far as possible, every establishment in this district which comes under the jurisdiction of the Ontario Factory, Shop and Office Building Act has been visited at least once this year, and in a number of instances a second or third visit was necessary according to the general conditions and recommendations reported. These premises, with a few exceptions, have been found to be in A-1 condition, with well-equipped sanitary workrooms and satisfied workmen.

A few instances of infringement of the regulations set forth by the Minimum Wage Board have been encountered, but were promptly taken care of through co-operation with the Board, and the posting of Minimum Wage cards on the premises is now general.

Boiler and pressure vessel inspection entails considerable work owing to the fact that much of the small equipment is "transient." This is better illustrated by stating that at one inspection the plant may be at a certain locality and when the next visit is made by the factory inspector, it may have been moved to some other place a considerable distance from the former location. The erection of fire escapes is worthy of mention. The inspector is frequently called upon to endorse these structures, and to see that each establishment is kept properly and adequately guarded in case of fire.

Child labour is decreasing. Employers realize the risk of being held responsible for under-age children being employed in their workrooms.

In addition to the calls the inspector has mapped out for himself, firm managers not infrequently call on the inspector in between his yearly visits to approve some changes they have made, or are about to make, as a safeguard to

themselves. Everywhere a spirit of good will and co-operation exists between employer and inspector, and labour conditions are fast attaining a mark of perfection.

REPORT OF INSPECTRESS ELEANOR GURNETT

During the past year, some twelve hundred inspections of all kinds were made, including the delivery of about two hundred home permits. This work has greatly increased, due no doubt to the demand for seasonal novelties, such as the strapped cap with celluloid visor made popular by Helen Wills, the tennis star. These were turned out by the thousand to meet a few weeks' demand. Factories doing this class of work were taxed to capacity and had to give thousands of them to be made in homes.

Following up advertisements that gave a residential street address and advertised for women to do knitting and crocheting at home was another phase of the work. Names and addresses of workers were taken and carefully checked up in the office to see how many had permits and where they hadn't one, to see that they made application for them. Firms giving out this kind of work see that the women apply for a permit, for they are familiar with what is required. Several wholesale furriers and small retail stores were found giving out work to be done at home and failing to inquire if the worker had a permit to do such work. Many such cases were found, the premises inspected and the men told of the infraction of the Act. Employers were warned as well as the workers.

Fire escapes and passages leading to them have been found in a much better condition this year than in the past. Machinery is usually found well guarded, just an occasional projection on a machine had to be boxed, or a pipe covered.

In one factory in a town, females were found working from 7 a.m. to 6 p.m., and many in the packing room stood all day. A few stools were in the room, but the girls could not relax. Chairs with backs were ordered and the manager said he would get them at once.

The Adolescent School Attendance Act is fairly well enforced, only a few cases being discovered where it was not observed. A boy under fourteen years of age was found working at a machine in a factory in a small town. The Superintendent said the boy had a permit from the school attendance office. The officer in turn said she did not know the Factory Act about child labour. In a village, the school attendance officer issued permits that just stated that John Doe could work in Blank's factory, no age at time of employment, no year of birth or any information. A whole afternoon was spent in getting particulars of the forty or more adolescents employed. Permits issued in a neighbouring town just carried the name of the officer—no name, no age, no address or nature of work of the adolescents.

A few infractions of overtime work were found and places that were reported as working girls beyond the legal hours were visited. Only one place was found to be working when visited and it was an over zealous foreman, anxious to get out a rush order and not aware of the fact that there are stated hours that females may be employed. Most factory heads know the Act and observe it.

Factories and shops failing to make reports to the Minimum Wage Board had to be visited and told that a report must be made. It was always "an oversight of the office" despite the fact that many letters went out from the Board. While the Minimum Wage orders are posted in practically all industries, it is surprising the number that are destroyed at cleaning times or lost when moving.

A young girl was killed in a freight elevator in a Toronto factory. This is the first fatal accident to a female that has occurred in this district in years.

REPORT OF INSPECTRESS N. HAMILTON

In reviewing the work done during the past year, it is gratifying to know that through the efforts of the Department and the co-operation of the employers, good results have been obtained for the benefit of the employees, both in the way of health and material gain. A gradual improvement is evident on each visit of inspection and is a great incentive to the inspector.

In making inspections, one has to be constantly on the alert to see that guards for machinery are not taken off, as is frequently done. Where factories are equipped with new machinery the danger from accidents is much less as most of the new machines have safety guards attached. Sanitary conditions are improving. Several new toilets were installed and others boxed in and repaired generally. The conditions in what is commonly known as "junk shops" could be vastly improved upon by having the work of rag sorting done in other than dilapidated buildings, which do not permit of operating effective mechanical exhaust systems because of the fan removing so much heat. Consequently in most cases the workers, who are usually females, inhale the impurities from the material handled.

In most places of business the Minimum Wage cards are kept posted, but are sometimes destroyed during cleanings. Some firms frame the Minimum Wage and the Factory Act cards, thus ensuring their safety.

One must pay careful attention to fire exits, as they are often neglected. The approach to the fire escape is often obstructed and the window to exits hard to open. Fire escapes are allowed to rust for want of a coat of paint, thereby weakening their strength. These conditions are always brought to the notice of the superintendent.

Some complaints have been received of girls working over the number of hours allowed according to Section 32. These complaints are generally from ice cream parlours. Their busiest time is from 9.30 p.m. when the theatres and similar resorts come out. Country stores do most of their business after 6 p.m. since the farmer does his shopping after his day's work. In some towns the shopkeepers are willing to close three nights a week, but the next town keeps open. It is therefore claimed that it is necessary to keep their shops open to retain trade. If the country stores were obliged to close three nights a week the farmer would know when to do his shopping and the storekeepers and clerks would have better regulated hours for work.

The Adolescent School Attendance Act is well looked after by the school attendance officer and one seldom finds a boy or girl under sixteen years of age at work without a permit.

A few necessary overtime permits were granted in seasonal trades.

REPORT OF INSPECTOR A. W. HOLMES

Industrial conditions have improved, the majority of plants in this district being fairly busy and a number of new factories having opened up although there has not been a great increase in factory construction.

One of the greatest sources of accidents in the past has been the freight elevator. This has been largely overcome by the installation of mechanical locks. These have been much improved in the last year and if they are given

the same amount of attention as other parts of machinery will last for years and reduce the number of accidents from this source to a minimum. Another good feature of freight hoists is the doing away with cable control and installing the push button system, whereby the operator has only to place his finger on the button to operate the car. One other feature that is being adopted is the micro-leveller whereby the elevator is brought automatically to a stop, level with the floors.

In no industry have more improvements been made during the last few years than in laundries. A few years ago any basement or old building seemed to be good enough to handle this class of work, but to-day the buildings are mostly of the latest type with good surroundings and up-to-date machinery, well protected, as the makers of this class of machinery seem to have devoted attention to making it as nearly perfect as possible. The hours and working conditions have been much improved during recent years.

The guarding of machinery is an important part of the work of factory inspection. Very little objection is raised to any suggestion along this line, due, no doubt, to a large extent to education from many sources and to the fact that the managers and superintendents are very much in sympathy with the movement. One of the biggest difficulties to be contended with is workmen removing the guard to adjust some part and neglecting to replace it in its proper position. No class of machines require more protection than those used in wood working factories, as proven by the large number of accidents that occur in these places even with guards on machines. Very few of the operators will keep them in their proper position and in one factory visited every saw guard was two inches at least from the top of the saw. In taking up this matter with the operators they claimed that they wanted a full view of the saw and that the change in the class of work came so often that they could not take time to adjust them, as they were working piece work. So much has been said and written on the subject of safety first but a reiteration of warnings and instructions are necessary.

The fire hazard exists in all factories varying according to the class of work carried on therein. More attention has been given to the erection of new buildings than formerly by insisting that all plans passed shall have at least two emergency exits. Fire escapes have been ordered on all buildings where the provisions of the Act call for them.

The sanitary conditions, ventilation and heating of factories in modern buildings are fairly satisfactory on the whole. Some fault, however, may still be found with places that were never intended to be used for manufacturing plants. The natural lighting is poor and in some places artificial light is used for the full working hours. These places are being gradually eliminated.

REPORT OF INSPECTRESS G. E. HORSELL

There has been a decided improvement in industrial conditions since last year; in most of the factories a larger number of people are employed and the general outlook is brighter.

The greater number of industries in this district have received two inspections and quite a number of stores have had frequent visits on account of employees being kept on the premises longer than the legal period of ten hours per day, which is detrimental to the health of females. The proprietors find it difficult to regulate the hours owing to public customs, especially on Saturdays.

More firms are taking advantage of Section 52 of the Factory Act and allowing garments to be made at homes after the necessary permit has been delivered

by the inspector to the applicant for work. Most of the homes visited were in fairly clean condition but it was found necessary to withhold the permit on one or two occasions where children were isolated for infectious diseases.

There is more being done for the safety of employees and employers are willing to give their attention to matters that will prevent accidents. At the Safety Congress held in Detroit in October it was stated that safety in small plants must come from outside movement and the factory inspector was indicated as being in a better position to help along these lines, having the power to regulate where others could only persuade. More than persuasion is necessary sometimes, employers often objecting to modern safety equipment being placed on their machines, fearing it will retard production and guards which have been provided by employers and managers are found cast aside. In some cases this has been done during repairs to the machine, but are promptly replaced when attention is drawn to the fact that they are placed there for the protection of life and limb. This shows how necessary it is to carry on persistent education on "Safety First." It is probably not generally known that where an employee persists in removing a safeguard from the machine which he or she operates after being warned not to do so, it is within the power of the inspector to prosecute the employee concerned. Accidents are sometimes caused by employees disregarding rules laid down for safety.

The value of good lighting is becoming more widely appreciated and a great many accidents have been prevented by ineffective lighting being remedied. Clean, light-coloured walls are helpful in this respect.

During the year a number of children have been found employed in canning factories. Employers should be very careful to advise their officials to make sure that no child under fourteen years of age is employed. The Adolescent School Attendance Act is being well observed. During school holidays it is not necessary to obtain a permit, but after the vacation all adolescents are questioned as to age and those without a permit, under the age of sixteen years, who do not intend returning to school must at once make application for certificate.

Minimum Wage Board orders are posted in practically all industries.

The writer had the pleasure of being delegated to attend the annual convention of the National Safety Congress held in Detroit, October 25th to 29th of this year and was greatly interested in the themes discussed pertaining to the safety and welfare of those employed in industry. Several very interesting papers were read on safety in textile plants and the discussion which followed emphasized the difficulty in securing adequate safeguards to protect operators of looms from the danger of flying shuttles. While it was impossible for a delegate to be present at the discussions on every subject on the agenda owing to the fact that so many meetings were held at the same hour, nevertheless, the time spent at the congress afforded an opportunity to secure stimulating ideas on matters of safety.

REPORT OF INSPECTOR R. HUNGERFORD

In submitting an annual report on factory, shop and office building inspection in this district, it is somewhat difficult to avoid repetition or similarity, as the changes taking place in industrial conditions from year to year are not sufficiently marked to permit of a report differing in its entirety from that of the previous year. There has undoubtedly existed within the past few years a pronounced feeling of timidity or uncertainty in the commercial and industrial circles of the Province. This apparent lack of confidence is rapidly passing away and a feeling of confidence in the soundness of our future is being restored.

There are many phases of factory inspection and its ramifications are so numerous that it would be difficult to attempt to offer a tangible report upon the most important duties an inspector is called upon to perform. Inspectors are often told "Why, you have the authority of the law behind you and all you have to do is to enforce it." That may sound quite feasible to the inexperienced person but to the experienced it is very different. Police methods are not always productive of the most satisfactory results. An inspector is brought into contact with many different types of men and consequently in differing cases it is necessary to employ different methods.

In this district there exist factories of almost every description from which may be gained a fairly accurate idea of the general conditions existing. From observation of accident prevention work conditions are steadily improving, indeed, there are many places in which no apparent cause for complaint can be found.

From a sanitary point of view involving the exhausting of poisonous fumes, vapours, dust, smoke, etc., a great deal has been done. While many difficult and obstinate conditions arise, they are gradually being overcome and although some of the problems are by no means easily solved, nevertheless results are being obtained.

The inspection of steam and hot water boilers, air tanks and other pressure vessels has been given strict attention. Vigilance in this respect has necessitated travelling to many remote parts of the Province. The infrequency of boiler or pressure vessel accidents throughout the Province should be sufficient proof of the close attention given to this requirement of seeing that such are inspected by qualified officials.

The factory inspector is called upon to assist with the enforcement of the Stationary Engineers' Act and in the check up of the plants within this district, little cause for complaint has been found.

The inspection of elevators has received close attention and manufacturers have been urged to organize a weekly inspection by a man chosen from the mechanical staff, who should examine the mechanism, the cables, the automatic gates, safety locks, etc., the object being to detect any existing or approaching dangers or defects arising between the regular inspections by the factory inspector. Mechanical locks have been installed on all elevator gates where necessary and workable. These locks are preventing the opening of any gate on the absence of the car and also prevent the operating of the car while any gate in the shaft is open. These have greatly enhanced the safety of persons using elevators. Care should be taken where these locks are being installed to see that there is not too much play on the guides. It is also necessary to have strong and rigid gates of the legal height and to see that the parts are well supported in order that satisfactory results may be obtained. The "push-button" type of elevator is being installed in many cases where new equipment is required.

In this district, which comprises Georgian Bay, Muskoka and many northern parts of the Province, there are a great many lumber mills. The space allotted in this issue does not allow of a detailed report thereon, nevertheless it may be stated that these are, generally speaking, in a very satisfactory condition. Safeguards are well provided; the foremen and superintendents co-operate with the inspector and there is a pronounced feeling of goodwill existing which always tends to bring about the best conditions.

In certain factories it is required that a first aid kit be kept and this requirement might be extended and at least one person in the plant appointed from the

office or works who is qualified to administer first aid. It is the old story that "a stitch in time saves nine." First aid should be given even in cases of very minor accidents, as quite frequently these are productive of serious results. In many cases a very slight injury, through lack of proper care, becomes infected and serious, even fatal results ensue.

REPORT OF INSPECTOR S. J. MALLION

Business conditions in this part of the Province have improved somewhat during the past year but there is still room for improvement. All canning factories in the district have been visited and found in splendid condition. The corn pack in some sections was not very large owing to the ravages of the deadly corn borer. Many country mills were inspected during the year and a large number of dairy plants which were found to be in good condition. Where boilers were not insured, boiler inspections were ordered and in a few cases new boilers had to be recommended.

A number of accidents occurred during the year, many of them being of a character which would not be expected. It is generally conceded by those who have made a study of the situation that seventy-five per cent. of the accidents are preventable and when one considers the large number that do happen, notwithstanding the safety devices provided for their prevention and the educational campaigns conducted with the same object, one is forced to the conclusion that there is still some undiscovered reason for this condition in our industrial life. Pre-occupation of mind is one cause to which may be attributed many bad and even fatal accidents. In one large industry, where a special study has been made of the causes of accidents, if the superintendent learns that an employee has had some domestic or other trouble that affects his mind to the extent that he is unable to concentrate properly upon his work, he is immediately relieved of his duties pending his return to a normal condition.

In modern days, with factories well heated, lighted and ventilated and with the machinery equipped with every conceivable device for safety, one would imagine that accidents should be almost entirely eliminated. A lack of co-operation on the part of the employee is responsible for a large proportion of avoidable accidents. A responsibility rests upon him or her which is too often not assumed or not realized. The inspector may do everything that is within his power and the employer may also provide every safeguard that is known, but if the employees do not co-operate honestly and conscientiously, their efforts will avail little. It is not generally the first time that the workman does a wrong thing or omits to take a necessary precaution that the accident happens. Usually it is after he has repeated the practice many times and here is where the responsibility of the foreman or superintendent comes in. He is not doing his duty to his employer nor to his fellow workmen if he does not immediately put a stop to any practice on the part of an employee which is in any way dangerous to that employee or to others. Good housekeeping in factories is essential. Passageways and stairways should be kept clear at all times. A good slogan for any shop is "A place for everything and everything in its place."

REPORT OF INSPECTRESS JEAN OGILVIE

A minimum labour turnover is one of the greatest safety devices in any factory since employees become more expert in avoiding accidents the longer they remain in a factory. Although the majority of safeguards are mechanical devices much may be done by simply painting a line on the floor, by the erection

of signs or by sounding of a bell to warn work people of danger. Accidents fall naturally into classes. It has been found through investigation in the factories that the largest percentage is due to carelessness, but carelessness is often not so much the cause of accidents as some less generally considered circumstances such as worry and ill-health. Other causes of accidents may be unsanitary conditions or poor lighting. In a factory which is not kept clean and tidy, many accidents occur from work people slipping on grease on the floor or stumbling over things lying about. Poor lighting is also a cause of many accidents, as the work people are unable to see the rubbish lying on the floor over which they fall. Accidents in the factory are more numerous in the winter than in the summer. Manufacturers in this district are beginning to realize that the installation of an efficient lighting system will, in addition to reducing the number of accidents, result in more and better work from their employees and the system will pay for itself.

The chief qualifications of mechanical safety devices are cheapness, simplicity, reliability, durability and accessibility. In designing guards simplicity should always be kept in mind and as far as possible the parts should be made to adhere to manufacturers' standards so that they can be quickly and cheaply replaced. Another thing which must be taken into consideration is the fact that guards may often have to be removed, so that easy removal and reinstatement are important considerations and if the guard interferes in any way with the working of the machine, there will be an inclination to leave it off the machine. The proper type of guards are those which keep the worker's hands out of any danger zone or push them out if left there too long. Even with guards of that type there is always a chance of a guard not acting at a critical moment. The best rule for manufacturers to follow is not to install any new tool or machine unless it has been properly guarded and inspected by the factory inspector in their district. There has been a marked improvement in this district in this respect during the past year and the co-operation of the manufacturers has been appreciated.

The health of the workers depends largely on proper lighting, cleanliness, ventilation and machines properly guarded in any factory in which they work. If the precautions suggested by the factory inspectors are consistently carried out by the manufacturers, accidents would be substantially reduced.

REPORT OF INSPECTRESS ELLEN SCOTT

Through the co-operation of the employees, employers and the Department of Labour, the general conditions existing in factories, shops and offices in respect to female and adolescent employment are fairly satisfactory.

There is room, however, for improvement in the ventilation of some factories. The modern factory has a proper ventilation system but it is found in the older buildings that the method of opening a window or door and causing a draught is still in force. A well ventilated factory unquestionably increases the efficiency and health of employees. A considerable number of home permits were granted and as the homes are scattered over a large area a great deal of extra time was required to handle this phase of the work. It is gratifying to report that no home permit was withheld on account of lack of cleanliness or disease.

A considerable number of employers are ever on the alert to adopt progressive methods to improve the health and contentment of their employees. The majority are only too glad to co-operate and act on suggestions of the Department of Labour in their efforts to better conditions amongst the female workers.

REPORT OF INSPECTOR H. STEVENSON

During the year ending October 31st, 1926, approximately thirteen hundred premises in this district have been visited and reported on as required by the Ontario Factory, Shop and Office Building Act, and where it has been found necessary, recommendations have been made for the benefit and safety of the employees. These recommendations have been carried out by the employers generally without any objections.

The guarding of machinery is a most important part in factory inspection and takes up considerable time in going through a plant. Machinery accidents are becoming fewer in number owing, no doubt, to the better guarding of the machinery, but there are still the accidents caused by thoughtlessness to contend with, which can only be eliminated by education.

During the winter months there are a great many complaints about the heating of factories, which cause the inspector considerable trouble, owing to the fact that such premises usually are rented or leased to an employer with the understanding that they be heated by the owner. The Act places responsibility upon the employer, which makes it an inconvenient matter to handle, but it can generally be straightened out when the inspector calls on the owner.

In connection with fire-escapes it has been necessary in several instances to order them repaired, brushed with a wire brush and painted, and in a few cases to order a new one erected when they have been found eaten away with rust.

Bake shops have been inspected regularly and generally are kept in good condition, but there is the exceptional case where it is necessary to recommend that they be cleaned up, or a toilet and wash-basin installed.

Probably the best safety device which has been ordered in recent years is the interlocking device on freight elevator gates. Since the installation of the locks during the past two years, there has been a very noticeable falling off in the number of elevator accidents, in fact there has not been a fatality in this district. These locks are now generally in use, but an inspector will occasionally find an elevator without them, and has to order them installed.

Section 57 of the Act regarding the inspection of steam boilers and pressure vessels has been rigidly enforced and this has taken up considerable time, more especially in small office buildings and stores, but it has been successfully carried out. In a large number of instances these vessels have been insured, but there are still a great many people who wait until the inspector calls and leaves them an unofficial form or has it mailed to them.

The Stationary Engineers' Act is generally well observed but when a plant is found operating without a certificated engineer where one is required it is reported to the Board of Stationary Engineers and a competent engineer is placed in charge.

In regard to the posting of cards issued by the Minimum Wage Board designating the minimum wage to be paid to female employees, there are a number of employers who neglect to post same and the inspector, when he calls the employer's attention to it, usually finds the card put away in a desk. He then insists on having it posted before he leaves the plant.

The Factory Inspection Branch is to be congratulated on its display of safety devices made at the Canadian National Exhibition. Every day during the Exhibition hundreds of people, employers and employees, requested to see the different guards and other devices demonstrated. It is to be hoped that in the years to come there will be more space available for this purpose so that a complete display of all kinds of guards in operation can be made.

REPORT OF INSPECTOR A. J. WRIGHT

The past year has seen a great improvement for men working at the trade of polishing and buffing. Most of the plants visited have been busy, while quite a number have been working overtime. One of the largest firms of stove manufacturers state that they have enjoyed the largest business in the last six years. Manufacturers of electrical appliances have also had a busy year and one of them has built a large addition to the present factory and has one of the finest show-rooms in America for displaying fixtures.

Many of the factories have been inspected twice in the past year and the manufacturers generally were willing to co-operate with the inspector in bringing working safety conditions to the highest standard of efficiency. Polishing and buffing rooms are unhealthy and dirty places at best for men to work in and care should be taken to see that the ventilating fan and all the pipes are kept clean and in good working order and that the rooms are cleaned at least once a day. There should also be lots of light and good ventilation. In the past few years some of the manufacturers have installed polishing machines for polishing stove tops and other work, and where they used to employ from six to eight men to do the work, one man can now look after from six to eight machines. Other firms have installed new labour saving devices for production purposes which do away with a considerable number of men.

In many factories conditions in the plating room have been much improved, the steam and acid tanks being equipped with hoods, piping and fans to carry away the steam and fumes from acids.

Protruding set screws are being removed from all shaftings where found to be dangerous. There have been few complaints in the past year and no accidents of a serious nature among men employed at this trade. There was one accident in a factory in Hamilton where an emery wheel burst and struck a man a glancing blow on the head. He was laid off for about one week. The emery wheel was examined by the employing firm and found to be defective. As a consequence the whole shipment of wheels was sent back to the firm who supplied them.

There is no child labour being employed around polishing or plating rooms at the present time.

REPORT OF J. PENDER WEST

INSPECTOR AND EXAMINER OF REPORTS AND DESIGNS

An analysis of the records of plans submitted to this Branch for approval during the past year discloses striking differences from last year's records. The number of plans submitted has been 32 per cent. less but the estimated value of the buildings represented by these plans has been 87.8 per cent. greater than last year and is substantially in excess of any of the seven years during which the records have been kept in their present form.

Other encouraging deductions can be drawn from this year's figures. The value of factory buildings as compared with shop and office buildings accounts for 70.7 per cent. of the total value, as against 42.4 per cent. last year, indicating that the manufacturing industry in the Province is making healthy progress. It may also be noted that additions to existing plants account for 20 per cent. of the total amount of building. This percentage last year was only 7.6 and the very substantial increase this year shows that the established industries of the Province are on a solid basis and are expanding satisfactorily. These increases

have not been confined to any particular industry or class of industry, but have been well distributed among the various lines of manufacture.

The great majority of the plans submitted have conformed well with the requirements of the Factory, Shop and Office Building Act and such changes as have been found necessary have been easily arranged. In this connection it may be noted that whilst the Act does not provide for the compulsory submission for approval of plans for shops or office buildings which are not more than two storeys in height, much annoyance and unnecessary expense might often be avoided if the approval of this Branch were always obtained for these buildings before the erection is commenced. It should be remembered that immediately employees start to work in the buildings, they automatically come under the jurisdiction of the inspector for the enforcement of the Act and any changes which may then be found necessary to secure conformity with the Act will of necessity be done at greater cost and inconvenience than would have been the case had the necessary changes been made in the plans before building operations had been commenced.

As in the last few years, garages have constituted a large proportion of the buildings for which plans have been submitted and it is gratifying to note that several of these plans have shown carefully designed schemes of ventilation, indicating that the dangers arising from the discharge of automobile exhaust gases in enclosed spaces are becoming more generally recognized. With the constantly increasing number of motor vehicles in use, the ill effects of these gases threaten to become a very serious danger to the community and a proposed partial remedy by means of making it compulsory that exhausts should discharge vertically, so that the gases are dispersed above the breathing line, seems to merit serious consideration.

The class of building known as "loft buildings" has its own particular difficulties in planning so as to secure conformity with the Act under widely various and frequently changing conditions. These are multi-storeyed buildings, designed to be occupied by a number of manufacturers, each tenancy forming, for the purpose of the Act, a separate factory. The number of tenants and the amount and location of floor space required by each, are unknown at the time the plans are prepared. So long as each floor is let as a whole, the planning of the exits and toilet accommodation is an easy matter; but when floors are divided among two, three or more tenants, each of whom must have access to two means of exit from the building, to separate toilets for males and females and to both freight and passenger elevators, it is not difficult to see what knotty problems arise and, so far, a really satisfactory plan for this type of building has not been evolved.

A tendency is prevalent among owners and designers of buildings to place undue reliance upon the efficiency of fireproof buildings in the prevention of fires and consequently to minimize the necessity of providing such emergency exits in these buildings as they would acknowledge being necessary in a non-fireproof building. Fireproof construction is of great value in checking the spread of fire, the destruction of property and the dangers to human life. But it is necessary to recognize the limitations of such values. Fireproof floors will check the spread of fire from floor to floor and fireproof walls will protect one portion of a building from fire in an adjoining part, if (and the "if" should be emphasized) all horizontal and vertical openings, such as doors, stairways and elevator shafts are adequately protected; but the most perfect fireproof construction will not prevent a fire occurring among the contents of the building, and with only one means of exit, the use of which may be cut off by the fire

or by the resultant smoke and gases, the danger of loss of life can be a very real one. Cases have been known, also, of the heat from the burning contents of a building becoming so intense as to weaken the structure sufficiently to cause it to collapse. The total destruction, some years ago, of the Edison plant, which was supposed to be the last word in fireproof construction, is a case in point. It may be said that no building is absolutely fireproof and that, if such a building could be constructed, the occupants might still be placed in danger from a fire in the contents. Two means of exit, placed as far apart as practicable, and each accessible to each occupant, are a vital necessity in all buildings.

DISTRICT INSPECTORS

The following is a list of the factory inspectors of the Province, showing the district in which each is responsible for the proper observance of the factory regulations as set forth in the Factory, Shop and Office Building Act:

- J. H. AINSBOROUGH, *66 Pacific Avenue, Toronto*.—Mr. Ainsborough's district is city of Toronto, east side of Don river, north and south to city limits; east G.T.R. and C.P.R. to Kingston, inclusive.
- R. ALBROUGH, *25 Grosvenor Avenue, Sault Ste. Marie*.—Mr. Albrough's district is west to the Manitoba boundary line; east, including Manitoulin Island, Sudbury and North Bay, to Quebec boundary line.
- G. H. BOSTOCK, *185 Glebeholme Boulevard, Toronto*.—Mr. Bostock's district is old C.P.R. lines east to Sharbot Lake; G.T.R. lines north, including Peterborough, but excluding North Bay; south to G.T.R., C.N.R., C.P.R. lines.
- H. BOURNE, *111 Milverton Boulevard, Toronto*.—Mr. Bourne covers all districts in the Province of Ontario for the purpose of investigating foundries.
- W. T. E. BRENNAGH, *59 Kensington Avenue, South Hamilton*.—Mr. Brennagh's district is G.T.R. main line west to London (exclusive); east to Niagara Falls; south and east of London and Port Stanley lines; north, C.P.R. and G.T.R. to Crumlin and Tavistock, but exclusive of Milton, Branchton and Ingersoll Junction.
- H. A. CLARK, *238 Duferin Street, Toronto*.—Mr. Clark's district is city of Toronto, east side of Yonge Street and west of Don river; north, including Leaside and Metropolitan line, but excluding Aurora and Newmarket; south, including a portion of Toronto Island.
- W. S. FORSTER, *336 McLeod Street, Ottawa*.—Mr. Forster's district is east of North Bay, Algonquin Park and K. & P. Railway.
- MRS. ELEANOR GURNETT, *102 Kingswood Road, Toronto*.—Mrs. Gurnett's district is west side of Yonge Street north to city limits; south to G.T.R. and C.P.R. main lines; west, inclusive of Elmira, but exclusive of Stratford, Woodstock, Simcoe and Port Dover; and south, excluding Jarvis, Cayuga, Waterdown and Dundas; north, exclusive of Bolton, Elora, Orangeville, Mount Forest and Owen Sound.
- MISS HAMILTON, *200 Princess Street, Kingston*.—Miss Hamilton's district is Kingston, K. & P. Railway, north and east to the Quebec boundary line.
- A. W. HOLMES, *39 Lakeview Avenue, Toronto*.—Mr. Holmes' district is city of Toronto, east and south of Lansdowne Avenue and Bloor Street west to Burlington; north to city limits; east, including York Street, University Avenue and Avenue Road; south, including a portion of Toronto Island.
- MRS. G. E. HORNELL, *Mimico P.O.*—Mrs. Hornell's district is south of G.T.R. and C.P.R. main lines to waterfront and east, including Bathurst Street and west; south of C.P.R. to Cooksville and G.T.R. main line, including Hamilton, Dundas, Caledonia, Waterdown, Cayuga, Jarvis and Niagara peninsula.
- R. HUNGERFORD, *382 Durie Street, Toronto*.—Mr. Hungerford's district is city of Toronto west of but including Lansdowne Avenue and Bloor Street, also West Toronto, Lambton, Milton, Branchton, but excluding Drumbo, Stratford, Gowansdown and Fordwich; north to Southampton, Bruce peninsula, Owen Sound, Collingwood, Meaford, Penetanguishene, and both C.P.R. and C.N.R. lines, including Orillia and Elmvale, but excluding Sudbury.

- S. J. MALLION, *74 St. Vincent Street, Stratford*.—Mr. Mallion's district is Fordwich, Gowanstown, Stratford, St. Mary's, London, St. Thomas and Port Stanley; south and west to border line, including Ingersoll Junction on the C.P.R., and north, including Teeswater, Kindercardine and Goderich.
- MISS OGILVIE, *118 Centre Avenue, St. Thomas*.—Miss Ogilvie's district is Port Dover, Simcoe, Woodstock, Tavistock, Listowel, Teeswater, west, south and north to Lakes Huron, Erie and River St. Clair.
- MRS. ELLEN SCOTT, *127 Walmer Road, Toronto*.—Mrs. Scott's district is east side of Yonge Street, north and south of K. & P. Railway, excluding Kingston, Renfrew and Pembroke; north and west, including North Bay, Parry Sound, Mount Forest, Durham, Orangeville, Elora, Fergus, Downsview, and above northern city limits.
- HUGH STEVENSON, *22 Hambly Avenue, Toronto*.—Mr. Stevenson's district is city of Toronto, west side of Yonge Street to York Street, but excluding York Street, University Avenue and Avenue Road, to northerly limits; south, including portion of Toronto Island.
- A. J. WRIGHT, *175 Galley Avenue, Toronto*.—Mr. Wright's district covers all districts in the Province of Ontario for the purpose of investigating polishing plants, etc.

Unemployment Relief Work

Under date of April 6th, 1926, an Order-in-Council was passed providing for the re-imbursement by the Ontario Government to municipal corporations of one-third of the excess labour costs incurred by such corporations in respect of any work wholly or partly constructed between January 1st and April 15th, 1926, solely for the purpose of providing work for the relief of unemployed persons. The following regulations covering this period were accordingly issued:

1. The term "work" to include all municipal public works undertaken by a municipal corporation during the winter 1925-26, solely for the purpose of providing employment for unemployed persons.

2. It is immaterial when the construction of the work was initiated or when the work is completed; the share to be borne by the Province relates solely to expenditure incurred between the 1st day of January, 1926, and the 15th day of April, 1926.

3. The expenditure to be shared by the Province to include only the excess cost of winter work due to inefficiency of labour and the substitution of labour for machinery, and not the difference, if any, between winter prices paid for materials and the prices in effect during the normal working season.

4. Applications for the payment of the Provincial share of expenditure incurred to be submitted to the Minister of Labour on or before the 1st day of June, 1926, accompanied by a certified statement from the municipal corporation showing the nature and amount of work done during the said period solely for purpose of providing work for unemployed persons, the actual detailed expenditure, the actual labour expenditure, and an estimate of the labour expenditure which would have been incurred had the work been carried out in the normal working season and under normal working conditions.

A second Order-in-Council was approved by His Honour the Lieutenant-Governor on September 16th, 1926, providing for a special warrant of \$55,000 for a special account against which cheques might be issued from time to time on the authorization of the Minister of Labour for the payment of accounts in connection with the expenditure incurred by municipalities for the purpose of relieving unemployment in accordance with these regulations.

Altogether seventeen municipalities participated in this scheme and claims to the extent of \$48,906.89 were submitted to the Ontario Government for payment as follows:—

St. Catharines.....	\$211 85
Kitchener.....	362 16
Hamilton.....	11,713 95

STRIKES COMMENCED PRIOR TO NOVEMBER, 1925

Locality	Occupation	Commenced	Particulars	Number of employees involved	Time loss in working days
Toronto	Hat and cap makers	June 16, 1925	For recognition of union. Information available in December indicated employment conditions no longer affected.	10	240
Owen Sound	Moulders	Jan. 19, 1925	Against reduction in wages. Information received in April indicated employment conditions no longer affected.	9	1,134
Totals..	19	1,374

STRIKES COMMENCED DURING FISCAL YEAR

Toronto	Clothing workers	November 16	For increased wages for piece work. Information received indicated strikers were replaced by December 7.	9	158
Toronto	Boot factory employees	January 13	Against changes in wages and working conditions alleged to be in violation of the agreement. Reports received in August indicated that strikers had been replaced, but there were still a number of employees out and on the strike benefit list of the union.	67	7,879
Guelph	Rubber factory employees	February 11	Against a reduction in wages. Settled by negotiations and work resumed February 13: in favour of employees.	475	950
Toronto	Embroidery workers	February 4	To secure union wages and working conditions. Settled by negotiations and work resumed February 9: in favour of employees.	90	405

STRIKES COMMENCED DURING FISCAL YEAR—*Continued*

Locality	Occupation	Commenced	Particulars	Number of employees involved	Time loss in working days
Toronto	Millinery workers	February 12	To secure a signed agreement. Settled by negotiations and work resumed April 17: in favour of employees.	32	1,372
Renfrew	Machinists	April 14	For dismissal of superintendent. Settled by negotiations and work resumed April 15. No change in conditions.	18	18
Cannifton	Paper products workers	May 13	For increased wages. Strikers replaced by other workers. Work resumed May 14.	30	15
Ottawa	Sheet metal workers	May 1	For increased wages. Settled by negotiations and work resumed June 14; compromise.	103	3,502
Ottawa	Barbers	June 3	For increased wages. Settled by negotiations and work resumed June 4; employees partially successful.	10	10
Toronto	Ladies' garment workers	June 30	Alleged lockout against enforcement of non-union conditions. Information received in August indicated that strikers had been replaced but there were still a number of employees out and on the lockout benefit list of the union.	25	2,448
Trenton	Carpenters	July 24	For increased wages and shorter hours. Strikers returned to work or secured work elsewhere by July 30.	28	84
Port Arthur	Bush workers	Sept. 16	For increased wages. Terminated.	700	26,200
Toronto	Electrical workers	Sept. 1	To increase and stabilize wages. Terminated September 3, on the signing of an agreement satisfactory to strikers.	162	405
Windsor	Musicians	Sept. 1	For increased wages and shorter hours. Terminated September 3, workers resuming under new rates and hours.	11	22
Toronto	Men's clothing workers	Sept. 25	For recognition of union. Unterminated.	60	1,560
Totals...	1,839	46,402

REPORT

OF THE

Minister of Education

FOR THE YEAR 1926

TO HIS HONOUR WM. D. ROSS, ESQ.,
Lieutenant-Governor of the Province of Ontario.

YOUR HONOUR:

I beg leave to submit the Report of the Department of Education for the year 1926, covering as it does the elementary, secondary and vocational schools, the public libraries, the training schools for teachers of all grades, the Provincial Schools for the Deaf and the Blind pupils, and such special phases of education as receive the supervision of Departmental officers. The outstanding features for the year are the evidences of vitality in every part of the system; the expansion of secondary school education; the increased attendance of pupils in all classes of schools; the ample supply of teachers now in training as well as those fully trained and available for engagement; the success of the correspondence courses and school cars to serve the needs of remote settlements; and the prospect of the first year university work being given at local centres, a reform in process of arrangement, but not yet in force.

Educational Advancement

A review of educational conditions from year to year is apt to lay stress upon the recent, and often minor, results and changes of a brief period rather than upon the general development of the school system. The growth of the Province in population and wealth naturally coincides with progress in the schools. The statistics and other data attached to this report furnish proof of that. But there are also distinctive signs that point to far-reaching effects, and the expansion of secondary education which is now proceeding encourages the hope that Ontario is soon to see a great forward movement, not confined to large cities and towns, but extending everywhere, which shall put advanced training within the reach of every boy and girl. A survey of the situation shows that many sacrifices are being made to establish continuation schools in small centres; to add to the number of high schools; to raise the status of high schools to that of collegiate institutes; to pay salaries that will command the services of the most accomplished teachers; and to provide adequate accommodations and equipment that a few years ago would have been deemed impossible. The efforts of the Department are being seconded, cheerfully and ably, by the localities. In ten years the Continuation Schools have increased from 133 to 207, and of these 153 employ the whole time of two teachers or more. Fifth classes have grown into Continuation Schools, and more than forty high schools

were formerly continuation schools. This is not a movement directed from the centre, but derives its impetus from the people themselves. I have felt strongly, since becoming Minister, that the popular desire is to make this a well-educated Province, and that no effort should be spared to give effect to so honourable an ambition. If the system of administering rural education could be modified, so as to co-ordinate effort, eliminate useless expense, and provide the required facilities for vocational training, suited to local needs, the extension of secondary schools would confer the same benefits upon rural as upon urban areas. Pending the adoption of some such scheme as township boards, the value of extended courses of training is observable chiefly where efficient high schools exist. The high schools have increased in ten years from 112 to 134, the average daily attendance of pupils has risen from 24,825 to 45,554, and there are now 1,739 teachers instead of 1,020. The background of these figures is even more impressive. The new course of study is removing the ill effects of over pressure, the simplifying of the examinations has led to pupils remaining longer at school, and the attendance in the Upper School, or highest form, of the high schools has grown to 4,737 pupils. The number of University graduates upon high school staffs likewise steadily grows. The influences thus at work have affected public schools, too, as seen in the number of those who look forward to the teaching profession and who prepare to take the course for a first class rather than a second class certificate.

University Courses in Certain Centres

It was the contemplation of these tendencies, which have been assuming more definite shape during the past four years, that convinced me of the advantage of encouraging the establishment at favourable centres of the preliminary work of the University comprised in the pass and honour courses of the first year. In the belief that co-operation by the Universities in this policy is of value, I have agreed to such enquiry as is necessary before announcing the date of the proposed change going into effect, and a committee to this end is now giving full consideration to the project in all its bearings. That the step is an inevitable consequence of the local determination to carry education as far forward as is possible, close to the homes of pupils, is clearly recognizable and all who are affected by it should work together. Meanwhile, the comments of Mr. E. G. Savage, one of His Majesty's Inspectors of Secondary Schools, upon the high school work done in Ontario will be read with attention. Mr. Savage exchanged with Mr. I. M. Levan, Senior High School Inspector of Ontario, during 1926, and the reports of both of them on their varying spheres of labour will be found among the appendixes. Mr. Savage, couching his criticisms in a frank and friendly spirit, conveys his favourable impressions of the system as a whole by pointing to the determination of the people to secure secondary education for their children, the burden of work falling upon teachers who often teach subjects in which they are not specialists, the degree of discipline and good manners among the pupils, the sometimes overcrowded classes, and the admirable spirit of equality which reigns in the class-room. In what are termed the imponderable elements that an observer finds in the conduct and constitution of our schools may be surely traced the ability to carry on advanced instruction, given the qualified teacher, the proper size of class, the needed equipment in science and languages, and the pupil's inspiration—a University training ahead of him. These factors assured, the success of Junior University work carried on locally can be made a certainty. Lacking them, it should not be attempted. Mr. Levan's observations upon the English secondary schools,

which on their present basis are of comparatively recent origin, and his examination of the conditions under which the pupils in those schools, entering young, may proceed through the advanced courses to the pass B.A. degree in three years, are equally valuable.

Elementary Schools

There are more than seven thousand elementary schools in the Province and it is satisfactory to record that the attendance has increased. This is true of both rural and urban schools, indicating the popular response to educational needs. Such factors as the growth of population and the extension and more thorough enforcement of the attendance laws must also be taken into account in this connection. But the broad outstanding fact is that probably never in the history of Ontario was the necessity of a good education so generally recognized and the pupils so ready to take advantage of the facilities provided. When we remember that the total annual expenditure upon elementary schools exceeds \$33,000,000, and that of this large sum over \$18,000,000 are required to pay the teachers, the magnitude of the system is evident. The reports of the local inspectors, confirmed by the Departmental officers, who supervise the work, are favourable to the internal conditions of the schools. The quality of the teaching, the satisfaction felt over the revised courses of study, the development of self-discipline by the pupils and their ability to think and act for themselves are healthy signs of solid progress. The co-operation of organizations outside the school, but keenly interested in its welfare, is another encouraging proof that the community, voluntarily, has awakened to the need for stimulating the efforts of school boards and teachers who cannot, alone, perform the great tasks of education. The labours of the Women's Institutes, the Junior Red Cross, the Imperial Order of Daughters of the Empire, the Mothers' Clubs, the Home and School Clubs, the Ontario Safety League, and other societies are of a practical and very helpful kind and their unselfish and enterprising efforts call for the highest praise and gratitude. Visitors who come to Ontario occasionally speak in friendly terms of the schools. It is well to have this encouragement, but it should not be forgotten that there is much to do. Our elementary schools still lack a more effective unit of administration and many of them are too costly where small attendance and the limited scope for full mental and physical activities mean standing still and not going forward. The libraries, especially in rural schools, require overhauling. The careful and constant classification of pupils and more elasticity in promoting them from grade to grade are likewise problems that press for attention. The idea that the school system, having triumphed over many obstacles, moves on by its own momentum is a fallacy which no Minister and Department can afford to countenance. Fresh opportunities present themselves as the relation of life to education broadens. The vitality of the Fifth Classes, and the increase in their number is a concrete illustration of local, usually rural, determination to have advanced courses as near the home of the pupil as possible. The subject has various phases. The qualification of the teacher to carry on the higher studies is not the least of these. It entails, inevitably, modifications and improvements in teacher-training.

Training of Teachers

A deputation of teachers were informed some months ago that the policy of a two years course of study in the Normal Schools had been decided upon and their verdict was one of emphatic approval. It has been my aim to welcome every step that makes for a highly trained and permanent teaching body

by means of the best training in professional methods, by special courses through Summer Schools, and by adequate superannuation when the energies of the teacher flag. In these directions perfection is not attained at a bound, it demands patient, constant, progressive effort. The willingness of teachers generally to improve their academic and professional standing is honourable to them and no profession exhibits greater eagerness to qualify for more difficult tasks. The two years course involves, at first, no practical change since the age of candidates and the standard of admission remain unaltered. The interim certificates will, as now, be valid for a minimum period of two years and a maximum period of four years. During this period the candidate may return for the second year course and at the close of that year the examinations, if passed, make the certificate permanent. It will be observed that the proposed reform is instituted without disturbance of the existing situation. The present holders of certificates, whether interim or permanent, are not required to take the second year of training. The regulations setting forth the changes are now being issued.

The Supply of Teachers

Any future effect which the two year course might have upon the teacher supply is not of present significance. There continues to be a surplus of teachers for both elementary and secondary schools. This is not without some effect upon salaries which, however, remain high enough to attract a considerable number of candidates to the training schools. The teaching force in the Provincial system is approximately 18,500 which includes the staffs of elementary, secondary, and vocational schools, and the attendance in the training schools during the current school year is over, 2,600, a number more than large enough to fill the annual loss occasioned by death, marriage, and removals to other occupations and to other Provinces. It may be convenient to set forth here the attendance in detail:

Normal Schools.....	2,064
College of Education (High School Assistants).....	240
English-French Model Schools.....	102
Technical Training College, Hamilton.....	204
Total.....	2,610

Where there is a surplus of teachers, the difficulty of finding places for all who have taken the courses of training is apparent. In such a situation as exists, therefore, the duty of the Department is to see that the regulation requiring the employment of fully qualified teachers is observed and this has been done. An effort has been made to trace the number of teachers who qualified for certificates in June, 1926, but were unable to find schools, and while the enquiry is necessarily imperfect in some measure, the result seems to show that about 30 per cent. of those who obtained first class certificates, and nearly 37 per cent. of those who obtained second class certificates at the date mentioned were not in the schools during the school year 1926-7. This fully justifies the discontinuance last year of the last of the model schools which for fifty years had a recognized place in the system. The holders of third class certificates are now a steadily diminishing force, their successors being the holders of first or second class certificates whose qualifications warrant the belief that the standard of instruction is higher than was possible under the old state of things.

A Remarkable Incident in England

The raising of the age of pupils, for either whole time or part time compulsory attendance, from 14 to 16, embodied in the Adolescent School Attendance Act of 1919, is one of the notable advances in education taken by Ontario when circumstances prevented other equally progressive English-speaking communities from enacting similar legislation. Ontario has had no reason to regret this step. It has resulted in a marked impetus to secondary education and has proved a salutary remedy in many cases for those pupils who had ceased to attend school without finding an occupation and who, at this critical stage of life, were liable to drift into idleness or to contract habits from which subsequent recovery was difficult. The enforcement of the law in a reasonable spirit has vindicated its practicability. As confirmatory of the wisdom of the Province in adopting the policy, it is interesting to observe the trend of events in England. The report of the consultative committee on the education of the adolescent, appointed by the Board of Education, to consider this and cognate subjects, was made public a few months ago. The committee declared: "The course of wisdom, therefore, it appears to us, would be to pass legislation fixing the age of 15 years as that up to which attendance at school will become obligatory after the lapse of five years from the date of this report,—that is, at the beginning of the school year, 1932." The English conditions rendered this a counsel of perfection and the discussion which took place on this recommendation indicated a difference of opinion, not so much upon the merits of the policy as upon its applicability even five years hence. It foreshadowed larger expenditures at a time when the burden of taxation occasioned by the war was felt to be heavy enough, while it also raised economic and social problems that are especially difficult to solve at this time. So large a proportion of educational expenditure is met from the national exchequer in England that the sum necessary to carry out the reform touched upon the whole question of taxation and became, therefore, a political issue of some magnitude. But the report of the committee is one of the most valuable in recent years, since all the chief issues arising out of the employment of children in industry were carefully enquired into. Some of these issues are peculiar to England and do not concern us in Ontario, but the general principles asserted in the report are of universal application: the benefit to the nation by forming and strengthening individual and national character; the guidance given to the pupils through the opportunities, excitements, and perils of early adolescence; the advantage of children entering industry straight from school when their minds are sharpened, their characters better fortified, and their physical condition more fitted to take up the burden of life. The evidence accumulates that in this respect the Province is pursuing the best pathway to a healthy citizenship.

Vocational Training

Equal in significance to the advances made by other branches of education is the expansion of vocational schools and courses. The desire to add fitness for an occupation in life to the individual's general equipment is shown both by adolescents and by adults. The former are served by the day vocational schools and the latter by the evening classes and special courses which are provided at various centres throughout the Province. It is needless to point out that this extension of vocational instruction does not imply disturbance of the fundamental purposes of education,—training in character, the development of mind and body, the acquisition of a measure of culture,—but is linked up with them.

The reports of the officers in charge of this work will repay careful perusal. They reveal one of the most interesting phases in the evolution of education,—recognition by the individual that academic instruction may usefully and in fact should necessarily be practically applied in order to qualify for the duties of life. At this age of material civilization, the beginnings of a vague general culture do not qualify an individual for either happiness or success in his future career and there are few high places in the world that can be filled without some special knowledge and the ability to apply it. The prediction is made, and without doubt on good grounds, that for some years to come the growth of enrolment of pupils for vocational instruction will be rapid. There is now an enrolment of 15,201 full-time pupils in the day vocational schools, and 2,743 part-time pupils. The evening vocational schools are attended by 35,226 pupils and the increase of the facilities is indicated by the fact that in five years the number of teachers employed to give this instruction, in both day and evening schools, has grown from 1,100 to 1,726. The Department does not press for the multiplication of schools, especially in smaller places, but keeps in view, as a governing factor in extension, the demand and the need of each community. A useful indication of the results of vocational training has been kindly furnished by the Principal of the Haileybury Mining School, who has found, by enquiry, that out of sixty of its graduates now at work, "some are holding very responsible positions with mining companies while over half are earning their living as skilled workers, in the field as prospectors or about the mines as millmen or mechanics." The preparation of teachers for technical instruction of all kinds is carried on at the Ontario Training College for Technical Teachers at Hamilton, and the work of the institution, is qualifying for this work a body of instructors who are bound, in due course, to give the Province an enviable reputation for the quality and thoroughness of its school instruction. In this connection the extension work of the College which conducts at outside points, where needed, courses for teacher-training required in day and evening schools is worthy of note.

The relation of vocational training to rural schools and a provision that studies suited to those intending to remain on the land shall form part of advanced courses in those schools are questions for immediate consideration. The ground work has been laid and practical steps taken by the promotion of agricultural teaching in both elementary and secondary schools. Agriculture being the chief industry of the Dominion, the export trade and the meeting of financial obligations abroad depend largely upon its prosperity, and it was assumed that the Federal grant towards agricultural education would be permanent. Since its withdrawal, however, the work has been carried on in this Province solely by Legislative grants and there has been no diminution of financial support. Substantial progress has been made and there are now 2,402 elementary and 117 secondary schools in which the teaching of agriculture figures and the schools qualify for grants. The application of the courses by means of school gardens, home gardens, and school fairs, shows a widespread desire to make the subject a reality and to create that atmosphere which imparts to the pupils a feeling that their school education is not to fit them for urban life only, but to fit them also for rural occupations. One of the purposes served by a larger administrative unit in rural school areas is to deal effectively with this matter and it is doubtful if the full effects of the present policy of teaching agriculture and extending it by short courses and advanced instruction through specially qualified teachers can be secured in any other way. I am convinced that the country girl and boy ought to have equal facilities with urban pupils for such vocational instruction as a different environment and occupational aims entail.

School Cars for Isolated Pupils

The discussion at home and abroad of the school cars for children who live along the great railway lines in Northern Ontario has roused widespread interest. The plan has worked out well, thanks in no small measure to the helpful assistance of the Canadian Pacific and Canadian National Railway officials as well as to the zeal and efficiency of the teachers. The causes that brought the device of providing schools on wheels for pupils who live in small groups across a great stretch of country were chiefly these: (a) the available pupils at one spot were too few, (b) the migratory nature of a railway population, (c) a permanent school, even for the requisite number of pupils, would be uneconomic. Thus far eighty-eight children have received the instruction they would otherwise have been denied. The keenness of the pupils has been equalled by the delight of the parents. The quickness with which children who had previously received little, or no, elementary instruction is almost incredible. The report of one teacher says: "Pupils who had not a day's schooling last fall have finished both Primers and the First Book. They can add, subtract, multiply and divide freely. They can do all forms of practical problems in time, weight, and linear measures. They can write friendly and business letters and do creditable work in oral and written composition." Many pupils were of non-English parentage, unable to speak English, and they can now speak and write it freely. The foreign-born, both parents and children, trained in an atmosphere inimical to Canadian ideas of citizenship are quickly developing into loyal and law-abiding Canadians. Two boys, living far from the railway line, journeyed forty miles to the car, set up an old tent in mid-winter, thatched it with balsam boughs and lived in it while the car was near. As to cost, it should be noted that the average capital outlay is not in excess of normal expenditures for building and equipment and that maintenance charges are quite within the average. The extension of the operations is under consideration. I wish to acknowledge the efforts of Dr. J. B. McDougall, who is in charge of this service, and the zeal of the teachers, Mr. W. H. McNally, and Mr. F. Sloman.

Correspondence Courses

These courses were begun in March, 1926, and 372 pupils are now receiving instruction by this means. The pupils range in age from 6 to 21 years and are graded from the Primer to the Fourth Book. The total cost, including salaries, postage, and supplies in connection with these courses, from March 1st, 1926 to March 1st, 1927, amounted to an average of about \$15.00 per enrolled pupil, as compared with an average cost of \$56.00 per enrolled pupil for the Public Schools of the Province (1925). The success of the Correspondence Courses, under Mr. Neil McDougall and a staff consisting of Misses M. D. Ford, M. E. Holmes, and L. V. MacBride, has been remarkable, and while the co-operation of the parents is necessary to enable the children to understand their lessons, a high degree of education is not required to do so. The conductors of the courses speak of the splendid results that are being achieved and "the faithful, painstaking, and persevering manner in which the children have done their lessons." The appreciation of the parents is general. The letter of one parent may be quoted: "I am very much thankful for what you are doing to my boy. The lesson is very good. I am not much school teacher. I am Danish woman, never went to school in Canada. I am doing the best for my boy. All those lesson do me good myself. I am very thankful."

Auxiliary Class Work

During the past five years there have been four times as many special classes for backward children established in Ontario as in all the other Canadian provinces together. The fundamental characteristic of the Ontario method is that, instead of being publicly stigmatized by an examination with high priced United States group intelligence tests, backward children are placed in an ordinary school class without stigma of any kind, with a special course of study and equipment suited to their needs and with an experienced sympathetic and understanding teacher who has taken a special course of training in the diagnosis and treatment of such children. During the last six months ten thousand copies of a pamphlet on Ontario Auxiliary Classes, published by the Canadian Council on Child Welfare, have been asked for and distributed. At the recent Vancouver meeting of the Dominion Council on Child Welfare, Dr. H. E. Young, Deputy Minister of Health for British Columbia, formerly Minister of Education, and a member of the Royal Commission on Mental Hygiene, stated in an address to the Council that as a result of careful study of the Ontario Auxiliary Class methods, he would recommend that instead of a survey which would probably cost \$100,000, the British Columbia Government conduct a survey similar to the recent confidential survey made by the Ontario Education Department with the assistance of School Inspectors and Teachers.

Other Educational Activities

There are other important phases of educational work, either conducted by or proceeding under the supervision of, the Department, and the year's progress in each case will be found in the reports that follow, such as the report of the Inspector of Public Libraries, who includes some valuable evidence of special efforts to promote reading and to encourage adult education conducted in certain libraries throughout the Province; the report of the Provincial Attendance Officer, who contributes an encouraging outline of the problems that are being solved by the localities in carrying out the requirement that children shall either be at school or at work; the report of the Director of Rural School Organization, who has briefly and impressively set forth the inequalities in school enrolments and the consequent waste of money and effort in maintaining over two thousand schools with less than twenty pupils each; the reports of the Superintendents of the School for the Deaf at Belleville and the School for the Blind at Brantford, of which, from personal visits and from examination of the work being done in both schools, I desire to speak in the highest terms and to compliment the staffs on the remarkable success of their labours. Appended also are the statistics of education in Ontario which illustrate in detail the range and extent of educational effort.

The whole respectfully submitted,

G. HOWARD FERGUSON,

Minister of Education.

APPENDIX A

REPORT OF THE CHIEF INSPECTOR OF PUBLIC AND SEPARATE SCHOOLS

Inspectoral Changes

Since the submission of my report a year ago the Provincial Inspectoral staff has suffered the loss through death of a number of its members, viz.: Michael O'Brien, William Irwin, B.A., J. H. W. McRoberts, B.A., and R. H. Cowley, M.A.

Inspector O'Brien received his appointment in 1899, and retired in 1916 to become secretary of the Catholic Educational Council of Ontario. He inspected at one time or another Roman Catholic Separate Schools in all parts of the Province and proved himself to be a broad-minded and efficient official. He died January 29th, 1926.

William Irwin, B.A., was born in Turnberry Township, Huron County. He taught Public Schools in Carrick Township, Collingwood, Blenheim, and in the High School at Listowel. He was appointed Inspector of Public Schools for North Perth in 1898, and served in that capacity with great acceptance until his death on April 18th, 1926.

Inspector J. H. W. McRoberts, B.A., was a native of London, Ontario, and obtained his academic standing at the Collegiate Institute, London, and at Queen's University. He was Supervisor of the Port Arthur Public Schools and Principal of the Model School there for many years. In September, 1925, he was appointed Inspector of Schools for Muskoka, and after a brief, but very efficient tenure of office, died suddenly on April 21st, 1926, while inspecting one of his schools.

R. H. Cowley, M.A., was born in Pontiac County, Quebec. After a number of years on the staff of the Provincial Model School and the Collegiate Institute at Ottawa he was appointed Public School Inspector of Carleton County in 1896. Here his work was distinguished by the establishment of Continuation Classes and school gardens in the Public Schools of the county. It was owing to his success in these departments that he was chosen as the first Continuation School Inspector of the Province in 1906. In 1911 he was appointed Chief Inspector of Public and Separate Schools of Ontario. This position he resigned in 1913 to accept the Chief Inspectorship of the Public Schools of the City of Toronto. He was a graduate of Queen's University. He was an outstanding administrative officer, genial and sympathetic in manner, zealous and highly efficient in the discharge of duty.

Mr. A. E. Nelson, B.A., Principal of the Kincardine High School has been appointed to succeed Inspector Irwin of North Perth. Mr. G. S. Johnson, B.A., Principal of the Bracebridge High School has succeeded Inspector McRoberts in Muskoka. Mr. Leo W. Copp, B.A., has become the first Inspector for the newly-formed Inspectoral District No. X, comprising the northern part of Temiskaming and the southern part of Cochrane district. These newly appointed Inspectors assumed their duties at the opening of the school term in September, 1926.

Inspectoral Changes in Prospect

In the County of York the County Council has already given consideration to the appointment of a fifth Inspector, and final action will be taken in the matter early in 1927.

In the Cities of Chatham and Sarnia the respective Boards of Education have already given study to the matter of having the full-time services of an Inspector, and this solution of the present unsatisfactory combined city-and-county arrangement will no doubt be made in the near future.

In each of the Counties of Simcoe, Waterloo, Wentworth and Halton (joint), Huron, Peel, Lincoln and Middlesex East, the Inspectors have too great a number of teachers under their supervision. A re-arrangement of the work in these counties with additional Inspectors appointed would be in the interests of the schools.

The average number of teachers in charge of Separate School Inspectors continues too large and an increase in the Staff of Inspectors will be necessary.

In the City of Toronto it has become difficult for the Inspectors to render efficient service because of the large number of teachers placed under the supervision of each Inspector. Inspection of teaching and close study of school problems cannot be given when the amount of work to be accomplished becomes excessive. And no assignment of additional duties to principals and staffs can offset the need for and the value of the work of the Inspector.

Visits to Inspectors

During the year 1926 the Departmental Inspectors visited 61 Inspectors, and, in nearly all cases, visited with the Inspector typical schools in the Inspectorate. An attempt has been made to increase this type of work in order that closer co-operation may be brought about between the central and the field forces.

Just as the Inspector may bring to the individual teacher and school the result of his own experience and the best gleanings from the observation of his best schools, so also the Departmental Inspector may bring to the local Inspector the interpretation of the courses, regulations and policies of the Department of Education, and also information regarding the successful school practices being carried on in the various parts of the Province.

And while local school problems must necessarily be left for the local Inspector's action without too much departmental interference, yet the local problems become easier of solution locally when frequent discussions of many problems have taken place by Inspectors with one another and with Departmental Inspectors.

Classification and Promotions

The average age at which pupils complete the Public and Separate School Courses, and secure High School Entrance standing is lower in many rural schools than in urban schools. But on the contrary the percentage of the enrolment in rural schools reaching High School Entrance standing is very often considerably lower than in the urban schools. In some urban schools over 8 per cent. of the pupils enrolled are graduated with High School Entrance standing each year. The better rural schools also reach this standard but not in so great a proportion.

Again, in some urban centres much favourable comment is made each year on the fact that 100 per cent. of the Entrance candidates in certain classes or schools have been successful; but a careful study of the classification in some of

these schools shows that the percentage of the enrolment reaching High School Entrance standing is relatively low, and that too great a number of the pupils are found in the middle and lower grades of the school. These facts lead to the conclusion that there is need for frequent surveys of the classification of pupils, not only in schools where it is known that unsatisfactory work is being done, but also in many schools where it is assumed that the work is satisfactory. The Inspector, Principal and Teacher require to use a variety of standards by which to judge the classification and the efficiency of the school in order to ensure that no faulty situation may develop. Single standards invariably lead to faulty conditions because of growing concentration to meet the single standard, and the neglect of other important considerations. The lack of elasticity in making promotions throughout the school year, the over-use of annual promotion examinations, the promoting of pupils on the pure basis of information gained without taking into account also their power and capacity to go forward, the failure to discriminate always between the bright, but poorly prepared pupil and the naturally dull and backward pupil, are all subjects which require closer study.

Supplementary Reading

An examination of school libraries, particularly in rural schools, shows that they have not as a rule been selected with a view to meeting the requirements of all the grades. Few of these books are suitable for children in the lower grades.

Investigation and practice have shown that an elementary school library should have a plentiful supply of juvenile books. It is only by providing a generous supply of this type of literature, both for seat-work and for home reading, that the library can make a real contribution to the work of the school.

As pointed out in the introduction to the List of Supplementary Reading Books prepared by the Department of Education for Elementary Schools "The pupils of the lowest classes should have good stories read to them in school and at home, in order that their curiosity and interest in books should be aroused sufficiently to urge them to read for pleasure. Then their own reading, with proper guidance, will develop a taste for what is good, and they will, without much direction, become very expressive readers. This wider reading will result in inspiring the pupils in composition, both oral and written, and in such other subjects as Literature, History and Geography."

There is no doubt that the disinclination shown by so many people towards reading for information and enjoyment may be traced back to a lack of suitable reading material during childhood's years in the Elementary School, or to the failure of teachers to take advantage of their opportunities.

The Inspectors of the Province are stressing this matter and are meeting with encouraging support from boards and teachers. Many boards are supplying sets of readers for supplementing the regular readers, as well as individual books for individual use. County councils in some instances are recognizing the importance of this movement by special grants of money; one county, for instance, gives a grant of \$5 per annum per classroom for this purpose.

Rural library grants paid to rural schools for the year 1926 were largely in excess of those paid in 1925, and additions to libraries were greater by 25 per cent. In many Inspectorates a careful attention is being paid to the selecting of books suitable for the junior classes.

No phase of school work is more important than the cultivation of good reading habits, and the pupils of senior classes in schools where the pupils have read widely and wisely from the earlier grades seldom find great difficulty with such subjects as Composition, History, Literature and Geography.

Courses of Study

The tentative Courses of Study for Public and Separate Schools, issued in 1924, was given further study and revision early in the year 1926, and has now gone forth in more permanent form. General satisfaction is being expressed by teachers and Inspectors with regard to these courses. Such features as (1) the lessening of the content of the heavier subjects; (2) the outlining of minimum and maximum courses in certain optional subjects; (3) the combining of subjects closely related; (4) the further provision for Supplementary Reading, and, (5) the enforced classroom study period, etc., have been welcomed.

Textbooks

The two Public School textbooks issued recently viz.: The Ontario Spelling Book and The Ontario Health Reader, have received very favourable comment and very little criticism. The manuals revised during the past year are proving more helpful to the teachers. It is desirable that a more intensive use of the manuals should be made by all teachers, particularly by those who are inexperienced.

A number of the Inspectors report a very general opinion among their teachers that the present texts in Canadian and British History are not satisfactory. The Minister's announcement that a new textbook will be prepared on the subject of History has received general approval.

The Railway School Car

Schools attendance in the districts, while largely similar to that in the counties as far as urban centres are concerned, is a distinct problem in the rural areas. Physical obstacles obtain everywhere in the form of long distances, lack of roads or next to impassable trails, and natural barriers, such as lakes, forests, rivers, muskegs and barren lands. Yet the average attendance is well maintained and compares not unfavourably with schools in more fully settled areas. But there are individual settlers and small groups so isolated as to admit of no school service by the regular means. For the children of such families special school devices have to be employed. A characteristic grouping is the small colony of a few homes along the right-of-way of the 3,000 miles of railway in Northern Ontario, the section gangs of four to six men, augmented by various types of nomadic settlers, such as hunters, trappers, bushmen, jobbers and small farmers. To care for these The School Railway Car has been devised, equipped for occupation by the teacher with kitchen, living room and schoolroom compartment, and to stop at scheduled points from three to six days to care for the school needs of the settlers' children. The two cars placed in service on trial are proving very successful, and it is hoped that an extension of this means of education may be made to cover the need along the railway lines at other points.

The movement has met with the thorough support and co-operation of the railway management and executive officers, which has contributed much to its success.

Correspondence Courses

The Minister of Education, early in the year, inaugurated Correspondence Courses for the benefit of isolated families, situated so far from any school that children are unable to attend. Under the existing circumstances such courses were considered to be the best means available of bringing to them the educational opportunities to which they are entitled. The courses were begun on March 1st, 1926, and from that date until the end of the year 217 pupils were

enrolled, ranging in age from six to eighteen years—a few being older. These were distributed in the various grades as follows: Primer, 100; First Book, 34; Second Book, 38; Third Book, 35; Fourth Book, 10.

These Courses are conducted by experienced educationalists in the Department of Education. Carefully prepared lesson assignments, based on the Public School Course of Study, are sent out regularly, and along with them are sent answer sheets and envelopes for the return of the answers. The answers are carefully examined, the necessary corrections and explanations made, and then they are returned to the pupils. The Courses are free, and all books and supplies are provided by the Department.

The results so far have been very gratifying. The pupils have been prompt in the return of their answers, and show constant improvement in their work, while the parents have shown a splendid spirit of co-operation. Many letters of appreciation have been received, and it is believed that the Correspondence Courses are destined to prove a great educational blessing to isolated families.

The following are quotations from some of the letters received from parents whose children are taking the Correspondence Courses:—

"I think these Correspondence Courses are just splendid, and such a boon to folk who have not a school close enough to send children to."

"I thank you for your assistance and kindness in sending the lessons this winter. They helped my son and daughter very much."

"I am very much pleased with the children's lessons. They seem to be taking a deep interest in them and are getting along nicely."

"I thank you very much for the lessons. I think my son learns just as well, if not better, than if he attended school."

"The Correspondence Courses are just what is needed. You do not know what great good these courses are to children who cannot attend school. They are more and better than we expected. They surely deserve the praise and appreciation of all concerned."

Summer Courses

The Summer Schools for teachers, conducted by the Department of Education at various centres throughout the Province for five weeks during the summer, were largely attended. The opening of a new centre for Upper and Middle School classes at Ottawa proved very acceptable, as over two hundred were in attendance. The aim of the Department in conducting these courses is to give teachers an opportunity during a part of their summer holidays to improve their academic and professional qualifications.

There were 2,293 teachers in attendance at the various Summer Courses in 1926. This was an increase over previous years. In the course in Art there were 217, in Agriculture, 257; Auxiliary Classes, 57; Oral French, 38; Commercial Subjects, 173; High School Assistant's, 12; Household Science, 55; Kindergarten-Primary, 277; Manual Training, 45; Middle School, 100; Physical Culture, 392; Vocal Music, 61; Upper School, 507; Vocational, 102.

Interchange of Teachers Within The British Empire

About thirteen years ago the first organized exchange of teachers was effected between Canada and England, but the Great War cut short the promising beginning that had been made. After the war the plan was revived, but it was not until the meeting of the Imperial Education Conference in 1923 that the Scheme for the Interchange of Teachers between the Dominions and the Mother Country was established on a permanent basis. Each part of the Empire is now

prepared to accept into its service on exchange, teachers who possess the standard qualifications required in their own country, and who are certified to be efficient. The salaries of the exchange teachers continue to be paid by the Board under which they are permanently employed, thus each teacher while overseas receives the same salary that he or she would have received at home.

Teachers who have participated in this interchange in past years are very enthusiastic over the benefits to be derived both from the educational and the imperial viewpoint. For the present school year (1926-27) there are thirty Ontario teachers in interchange with teachers from England, Scotland, Australia and New Zealand. This is the largest number of exchange teachers Ontario has had in any one year, and these are well distributed over the Province in Ottawa, Kingston, Toronto, Weston, Mount Dennis, Kitchener, Brantford, London, St. Thomas, Chatham, Windsor, Sault Ste. Marie and Port Arthur.

Supply of Teachers

The supply of teachers holding First and Second Class certificates exceeded the demand in 1926. In view of this fact the Special List of Schools (Circular 142) for 1926 was reduced so as to include only sixty-six schools as compared with 526 schools for the year 1925. Since 1913 this list has been issued each year and schools so listed have been permitted to engage teachers holding Third Class certificates without submitting applications through the local Inspector to the Department of Education for approval. After midsummer 1927 there would seem to be no further need for the Special List, since schools with weak assessment and schools in isolated areas are finding little difficulty in securing fully qualified teachers.

During the year 1926 there were only ninety teachers in the Province who taught for a term or more during the year under Temporary certificates and without previous professional training. And in many of these situations the Boards were forced to secure teachers at short notice and the temporary certificated teacher held appointment for only a short period. In other cases the Temporary certificate was made necessary because the school required a teacher able to speak two languages and the Boards were unable to secure fully qualified teachers with the necessary language qualifications.

A very encouraging situation is found in the northern part of the Province. Here a rapid advancement is being made toward a complete staff of First and Second Class teachers; and it is quite possible that this part of the Province will even eliminate teachers holding lower than Second Class certificates.

With the supply of Second and First Class teachers meeting the demand it would seem well to discontinue the issue of the Limited Third Class certificate at an early date and to give encouragement toward increasing the supply of First Class certificated teachers.

Inspectors' Conferences and School Survey

During March and April, 1926, the Inspectors of the Province met in groups for a three-days' conference in four separate meetings held in London (2), Ottawa and Toronto. The purpose of the conferences was to give the Inspectors first-hand information regarding the diagnosis and treatment of abnormal children, and also to prepare them for the work of undertaking a proposed confidential survey of the Province. There was a full attendance of Inspectors, and at the conclusion of each conference a resolution was passed expressing appreciation of the work done and a desire that future conferences of a similar character might be conducted by the Department.

The end of the year 1926 finds the survey almost completed. Through teachers and Inspectors a very careful study has been made of the retarded pupil; and very shortly the completed report, showing the number of these pupils, should be available. While heretofore only the large urban centres have been making special provisions for the education in special classes of retarded and backward pupils, it will now be possible to give exact information to smaller urban centres and rural localities; and probably in the near future special forms of training may be provided for the pupils.

School Health Supervision

The general recognition of the value of school health supervision is now apparently well established throughout the Province. Full-time School Health Supervision is now carried on in Ontario in some eighty-seven urban municipalities; in eight self-contained suburban school sections; and there are sixteen rural and urban units operating school health service. Six municipalities have established this service in 1926 and in two municipalities a physician has been added to the previously operating programme.

Fifth Classes

Fifth Classes continue to meet the requirements for junior High School education in many rural schools. The number of classes shows a steady increase from year to year. In 1926 the grants to these schools amounted to more than 25 per cent. over the previous year.

The criticism is made in certain quarters that the establishment of these classes in one-teacher schools is detrimental to the general progress of the other classes in the school. This will depend largely upon the teacher. Where the attendance in the Fifth Class is not large, as is usually the case in rural schools, a minimum of class-teaching and maximum of direction will produce satisfactory results. The pupils will thus acquire independent study habits, and the teacher will find more time for work with the junior classes.

In many cases parents do not or cannot, for financial or other reasons, send their children away from home for a Secondary School education. For all such the local Fifth Class meets a real need and should be encouraged.

Inspectors' Reports

Each year the Inspectors' Annual Reports contain many valuable comments and suggestions. The following brief quotations are made from these Annual Reports for the year 1926, and indicate conditions that are more or less general, or newer movements that are going forward successfully:—

1. "Township Boards will be especially advantageous to the districts."
2. "A larger unit of administration in our rural schools must be approved before the best results can be secured. A campaign is required to show that the present system is, in many instances, not only ineffective but wasteful and expensive."
3. "It has been said that there is no royal road to learning; nevertheless the recent Departmental Regulations have removed conditions that were burdensome without having a corresponding educational value, and have so arranged the presentation of certain subjects that unnecessary work is eliminated and the course of studies made easier without being less thorough."
4. "The agricultural representative organized and conducted the school fairs in a very efficient manner, and they are a great stimulus to vocational activity on the part of the rural population."
5. "There has been a great improvement during the past two or three years in the condition and care of the closets. While there are still forty schools with

outside closets they are well taken care of with one or two exceptions. Eighty-five classrooms have access to inside closets, of which twenty-four have chemical closets and sixty-one have flush closets. All the urban schools and the larger rural schools have inside closets."

6. "My office is in the county buildings, and this is on the market square. I am in the office on Saturdays from 10.00 to 12.00 a.m. As this is market day trustees from all over the county come in to see me and many difficulties are cleared away."

7. "Whereas in 1925 there were thirty-five teachers holding certificates lower than Second Class there are now only six such teachers, and two of these hold permanent Third Class certificates and are therefore duly qualified."

8. "The school with small attendance is still a problem that seeks solution. In . . . there are five schools with fewer than ten pupils, and two more with an enrolment of only eleven each. In the township of . . . there are four schools in operation, and the combined enrolment is forty-six. If these forty-six pupils could be brought together the work could be done, and doubtless better done, by one teacher. In the small school the per capita cost of education is very great. But this is not the only disadvantage of the small school. Healthy rivalry so essential as an incentive to better work is lacking, and so the progress of the pupil is impaired. Organized play is out of the question and so the play instinct, so valuable to the child, cannot be adequately developed."

9. "A visitor to one of our city schools would not need the eye of a professional to detect the marked change in school discipline. He would immediately notice that there is less direction from the teacher and more initiative and responsibility on the part of the pupils. He might find pupils collecting or distributing papers, books, milk bottles or supplies of any kind, at the time required, and without special permission or direction. At the hour for dismissal, he would see one member of the class take charge, with as good a result as if conducted by the teacher. When pupils enter the classroom, instead of 'sitting in position' waiting for the tap of the bell or the word of command for all to take out their books together like one piece of mechanism, it is not uncommon for each member of the class to set to work at once, without orders or loss of time. A pupil having finished one assignment of work might be seen leaving his seat and crossing the room, in order to help himself to some other means of occupation. These are the signs of the beginning of self-government towards which the teachers are guiding their classes."

10. "We are pleased to report that the teachers of the staff, with few exceptions, are rendering service to the Board of an exceptionally high order. Generally speaking, the Inspectors find that teachers with the highest grade of certificate are the most efficient. The . . . Board of Education for some years has shown a preference in making appointments, for teachers holding First Class certificates, and recently by regulation has decided after September, 1928, to appoint only such teachers to the staff. Teachers already on the staff have grasped the value, both financially and pedagogically, of a higher professional qualification, as during 1926 no fewer than fifty-two teachers, through Summer Courses and by private study, have been successful, at University or Departmental Examinations."

11. "Our teachers, as a whole, are faithful and diligent in the performance of their work. I find them interested in the welfare of the children, anxious that the children make real and rapid educational progress, anxious that their moral and physical development keep pace with their intellectual advancement, and that they become useful, happy and contented citizens. It is true that the

pupils do not all reach the status of citizenship our teachers desire, but the failures are few and not chargeable to the public schools. I am not only pleased, but proud to report that the character of the service rendered, the uprightness and honesty, of those engaged in the work is above reproach. The public demands that our teachers be outstanding examples in character, conduct and devotion to our national ideals, and it is seldom that there is disappointment."

12. "I spend a great deal of my time in the schools in teaching, believing that I can help my teachers more in this way than in any other."

13. "There are a number of settlements in which the settlers are almost exclusively Finnish. These people are poor, but industrious. Their school sections are low in assessment, some not being over \$12,000. They, however, have good schools, engaging well qualified teachers, and paying fairly good salaries. The children are clean, well-behaved and industrious, and are proving themselves in many cases even higher in proficiency than our English-speaking pupils. Quite a number of them are now in either the Continuation and Fifth Classes or in the . . . High School."

14. "I have one school with but two pupils; accommodation could easily be had at the adjacent school. The Board of this small school keeps it open because its operation entails no local sacrifice, the township and government grants exceeding the amount paid as salary to the teacher and other expenditures being quite negligible."

15. "It may be noted here that the uniform examinations in the Elementary Schools in England were abolished in 1896, thirty years ago. No perfect substitute for the examination has been found, so it is still with us. In most places its bad effects have been reduced to a minimum, by making the tests short and of an informal character. Pupils should be promoted when they have been proven ready. The information as to their readiness for promotion is secured by periodic tests, and partly from their daily record. In no case should promotion depend entirely upon the final examination. A natural time of promotion may be at the end of a term, but many individual pupils should be promoted during the term. The aim is to allow progress according to his natural development, and to minimize the defects inherent in our grade system. Progress from grade to grade is more natural where there are two grades in a room. Further, it is obvious, that the full responsibility should rest on the Principal and his staff in each school."

General Remarks

Each year shows a wider and keener interest in the schools on the part of parents, the people in general and organizations. In rural sections the co-operation of the Women's Institutes has been most valuable. The agricultural representatives, through school fair activities and in other ways, have rendered a very real service. Close co-operation between the agricultural representatives and the Inspectors has become general. The Imperial Order of the Daughters of the Empire, by the presentation of pictures to many schools and in other ways, made valuable contribution. The Junior Red Cross has extended its services during the year, and its practical health and training programme blends well with the regular programme of the schools. The helpful co-operation of the Home and School Clubs, Mothers' Clubs, the Ontario Safety League and other organizations has been greatly appreciated.

V. K. GREER,

Chief Inspector of Public and Separate Schools.

Toronto, January 31st, 1927.

APPENDIX B

REPORT OF THE DIRECTOR OF TECHNICAL EDUCATION

PROGRESS DURING THE YEAR

Day Schools

Judged by the increase in the number of full-time teachers employed, or by the number of pupils enrolled, the day vocational schools of the province have shown a healthy growth during the school year 1925-26. During the past five years the number of teachers employed in vocational work has grown from 191 to 530 and during the same period the number of pupils has grown from 2,600 to 15,201, which represents an increase of 485 per cent. The increase during the year was 3,606 pupils or 31 per cent. more than that of the previous year. This expansion in one year would be sufficient to fill seven schools, each holding 500 pupils. This has resulted in making the total enrolment in vocational day schools approximately 25 per cent. of the pupils enrolled in other secondary schools of the province; and it may be predicted that, for some years to come, the growth in vocational enrolment will be rapid.

The total number of full-time day schools open throughout the year was thirty-two, including two agricultural schools, one at Renfrew and one at Beamsville. In addition, three full-time day schools in navigation and marine engineering were in operation at Kingston, Midland and Collingwood during the months of January, February and March.

The total number of part-time pupils attending day schools increased from 1,739 in the previous year to 2,743 in 1925-26. This represents an increase of 57.7 per cent.

Evening Schools

Evening schools were carried on in fifty-eight places. During a part of the year, five villages, in addition, gave instruction in motor mechanics, by jointly employing an itinerant teacher. Counting these, the total number of evening schools was sixty-three—an increase of twenty-one per cent. The number of pupils enrolled in evening schools shows a slight decrease in each of the last two years, but the number has been in excess of 35,000 in each of these years. There was a decrease at one centre in the province of 1,798 pupils due to a change in the policy of the Board and Committee, which established a higher fee. The higher fee was apparently prohibitive.

A steady enrolment of 35,000 during each of the last three years is a clear indication of a demand for such adult education which is province-wide.

Evening schools are operating at Niagara Falls in the south, and at Timmins and Iroquois Falls, 600 miles away, in the north; at Brockville and Ottawa in the east; and at Windsor and at Fort William, 900 miles away, in the west, with well-developed schools at intermediate points. The varied nature of the evening school programme adapted to meet local needs is shown in the statistical tables in another part of this report.

It is not the intention to describe the nature of the courses offered in the evening schools nor to mention the places where classes are in operation. Improvement is shown everywhere in courses offered and in teaching. A greater

emphasis is being given to the selection of courses of vocational value, and in filling the classes with students who will find most direct benefit from attendance.

The wood-working classes at Owen Sound deal with furniture design and factory accounting. Four foremen and seven journeymen from the wood-working factories of the city are attending the classes. At Barrie, North Bay and Sudbury effective work is done in telegraphy in the evening classes to prepare students for work as station agents on the railway lines. These are cited as instances of good evening school programmes.

Statistical Information

The following tables show the progress of the vocational schools:

DAY VOCATIONAL SCHOOLS

	1920-21	1921-22	1922-23	1923-24	1924-25	1925-26

New Schools

No extensive building programme was undertaken during the year. The new school building erected in Toronto and known as the Eastern High School of Commerce was occupied in September, 1925. Although it provided accommodation for fifteen classes, so large was the initial enrolment that it was necessary to provide provisional accommodation to relieve the congestion of the class rooms. A large addition was planned for and will be available during the school year 1926-27. Proposals have been made by the Advisory Committees of the Board to erect in the west end of the city a large building to be used for instruction in technical and in commercial education. This portion of the city is at present without either type.

The Arthur Voaden Vocational School at St. Thomas was completed during the year and became available for use in September, 1926. Approximately one-half of the total secondary school enrolment of St. Thomas is found in the new school. This is a noteworthy and gratifying beginning and is another evidence that the public are accepting vocational education more readily than

was the case a few years ago, when other schools made a start. This statement is not intended to subtract from the devoted service and effective promotion work of Dr. Voaden, the Committee and the Board, prior to the official opening of the new school by the Hon. G. Howard Ferguson, Minister of Education. This opening took place on September 22, 1926.

The additional accommodation in preparation during the preceding year at Niagara Falls, London, Fort William and Weston was occupied during the year.

Port Arthur and Belleville have taken definite steps to provide day vocational education. The proposal at Belleville is to build a composite school with academic, commercial, technical and homemaking departments. The site and plans have been approved by the Minister. The proposal at Port Arthur is to put up a building for commercial, technical and homemaking education separate from their present Collegiate Institute. The site and scheme of organization have also been approved.

A new school to provide agriculture and homemaking instruction was completed at Ridgetown and opened in September, 1926, with Mr. Norman Davies, B.A., as Principal. A satisfactory beginning has been made. An account of the work will appear in next year's report.

Haileybury has under consideration a proposal to extend their mining building, and Timmins has grown to such a size that a mining and a small mechanical department could be established. The question of making further extensions to some of the technical schools recently built is receiving the consideration of Committees and Boards in at least two other places at the present time.

Technical Schools in Smaller Towns

The problem of providing technical education in the smaller cities and towns has been receiving the attention of officers of the Department. The question has been brought to their attention by school boards which are faced with the problem of enlarging their high school accommodation.

Several such places were visited during the year by officers of the Technical Branch, and the whole question was fully discussed with the Boards concerned. The provisions of the Vocational Education Act were explained. The expenditures involved and the requirements and conditions which are necessary to ensure the establishment of a successful vocational school were gone into. This new field of work in the smaller places will receive the careful consideration of the officers of this Branch.

Experience shows that care needs to be exercised so that local boards may not undertake an ambitious programme that ultimately imposes too great a financial burden upon somewhat limited resources. An undertaking to organize such work may seem possible under given conditions of energetic promotion by certain members of the local board and teaching staff. By a swift change in the personnel of one or two of these promoting bodies, the future success of the scheme may be seriously jeopardized. It has been considered wise, therefore, to make sure that the demand for technical work is soundly based upon the need and demand of the community.

Improvement in Teaching

A significant advance in shop instruction has been noted recently in many technical schools of the Province. This is due, in part, to the fact that the teachers are gaining experience in the professional side of their work, but in greater part the advance is due to the training they received in the art and practice of

teaching at the Ontario Training College for Technical Teachers at Hamilton. The improvement is shown in the general attitude of the teacher towards his work, in his organization of the subject matter into units and sequences, in the adaptation of the course to the level of the pupils' understanding, and in adjustment of the work to the rate of progress of the pupils. Attention is given to class instruction in addition to the individual instruction which is always prominent in shop work. Improvement is therefore noted in time-saving devices, in organization of work, in class management, in procedure and in the mechanics of teaching generally.

Matriculation Courses for Technical Schools

The University of Toronto has established a matriculation course for students in technical schools who are candidates for admission to the first year in the Faculty of Applied Science. It is stated in the Calendar for 1926-27 that one of the options may be arithmetic (special paper on a prescribed course), and certificates in mechanical drawing and shop work from the Principal of the school, accompanied by an approving certificate from the Provincial Director of Technical Education.

A similar option in Home Economics is under consideration for candidates seeking admission to the Department of Household Economics of the University.

No approval is given to other matriculation courses in the technical schools.

Education for Occupations

The undoubted purpose of the vocational schools is to prepare young people to enter into employment with sufficient initial training to fit them for success and increase their "earning capacity, efficiency and productive power" as is stated in the Federal Technical Educational Act.

On account of their quite recent establishment, some schools are unable as yet to furnish much concrete evidence that the purpose mentioned above is being attained. Many of the schools are in the process of turning out their first graduates. These are being accepted readily into business and industry, and as beginners are to be depended upon to prove the worth of the type of vocational education they received. In various ways employers acknowledge the value and soundness of the training given in the vocational schools. In Hamilton the apprentices in certain industries are required to attend the Hamilton Technical Institute for part-time instruction. In Windsor the Ford Motor Company accepts in its tool-making department only graduates from the Windsor-Walker-ville Technical School. In Ottawa printing apprentices are in attendance at the Technical School. In Kitchener one firm requires its apprentices to attend the evening classes of the Technical School.

In addition to this evidence of appreciation, there are also numerous individual successes. The most prominent architect in one of the smaller cities of the Province received all his early training at the Central Technical School at Toronto. The schools which have been graduating students for some years are able to supply many similar instances. The type of training given prepares young people to take their places at a lathe or bench in a machine shop, at a switchboard in a power plant, in a repair department of a garage, in an alteration or sales department of a dressmaking shop, in office work with financial companies, and in many fields where vocational training and skill are required.

Some interesting figures have been compiled from information supplied by Mr. W. H. Tuke, Principal of the Mining School at Haileybury, and Mr. James Hill, the mining instructor at that school. At my request they endeavoured to

determine the present occupation of as many of their graduates as possible. The total number of graduates from the Mining School in any one year has been small, but the proportion which entered upon mining work has been large. The information obtained has entailed considerable labour upon the part of Mr. Tuke and Mr. Hill. Its value is undoubted, and the Department's appreciation is hereby expressed.

HAILEYBURY MINING SCHOOL GRADUATES

Occupation after Graduating	No.
Prospectors.....	13
Millmen (mining).....	11
Assayers.....	7
Mine Surveyors.....	7
Assistant Foremen or Superintendents.....	8
Mine Scouts.....	4
Mine Managers.....	2
Mining Engineers.....	2
Mechanics.....	2
Field Foreman.....	1
Draftsman.....	1
Mining Instructor.....	1
Mine Broker.....	1
Scholarship at University.....	1

It is interesting to observe in the list given that, out of a total of 60 at work, some are holding very responsible positions with mining companies, while over half are earning their living as skilled workers, in the field as prospectors, or about the mines as millmen or mechanics.

D. A. CAMPBELL,
Director of Technical Education.

Toronto, February 22nd, 1927.

APPENDIX C**REPORT OF THE INSPECTORS OF
CONTINUATION SCHOOLS**

During the academic year 1925-6, the Province of Ontario was divided into two districts for the purpose of inspection; the southwestern district being in charge of Inspector G. K. Mills, the northeastern in charge of Inspector J. P. Hoag. Each school in these districts was visited at least once during the school year but many, where special reasons made it advisable, were visited two or three times.

The inspectors are glad to be able to report that the year has been one of steady progress. Teachers and pupils have been interested in their work; trustee boards and ratepayers have made sacrifices to provide more adequate and suitable accommodations and equipment. In a short period of one year it is, of course, unreasonable to expect marked or outstanding advancement in educational matters, but the inspectors believe that in the continuation schools of the Province steady improvement has been made.

Building Operations

During the school year new buildings were begun or completed in the following places: Blackstock, Capreol, Comber, Embro, Fenwick, Ilderton, Laurel, Lefroy, Little Current, Lobo, Richard's Landing, St. George (12). During the same period, additions and improvements were made to the school buildings in the following places: Caledon East, Consecon, Fordwich, Islington, Long Branch, Merlin, Orono, Swansea, Thedford (9). In addition to the above, many minor changes and improvements in buildings elsewhere have been made. It will be seen that the year has been marked by splendid progress in providing suitable school buildings.

One continuation school, Mount Elgin in Oxford County, has erected a fine barn at the rear of the school grounds to provide shelter for horses, carriages and automobiles of the many pupils who drive to the school from the surrounding country. Mount Elgin is the second school in the Province to provide such accommodation, Mount Brydges of Middlesex County having made such provision previously.

New Continuation and High Schools

During the year 1926, the continuation schools at Blenheim, Cochrane, Fairbank, Islington and Winona were superseded by high schools established in the same villages or in the township in which the village is situated. Arrangements have been made, however, for the schools at Islington and Winona to carry on as continuation schools until July 1st, 1927.

During the year, new continuation schools were established at Fitzroy Harbour, Forester's Falls, Hornepayne, Coldstream in Lobo Township (re-opened), Sandwich, Severn Bridge, Sioux Lookout, Swansea and Thedford (9).

The facts stated in the two paragraphs above indicate clearly the natural evolution of our secondary schools. First a continuation school is established, usually in a village or rural centre where a Fifth Class has been in operation. Next, the continuation school proves its usefulness by developing to the point

where a high school becomes necessary and is established. More than forty high schools are now in operation in villages or districts which were first served by continuation schools, and probably one-half the existing continuation schools were formerly fifth classes.

The Proposed Township School Board

During the past ten years the increase in the number of continuation schools and in the number of teachers of the staffs has been great. The following table will show at a glance the result:

Number of schools employing—	1916	1926
Four teachers.....	0	5
Three teachers.....	3	29
Two teachers.....	96	119
One-and-a-half teachers.....	12	24
One teacher.....	22	30
	133	207
Total schools.....	133	207
Total teachers.....	247	423
Percentage of increase in number of schools.....		55.5
“ “ “ teachers.....		71.2

When it is taken into account that during the same period of ten years more than thirty continuation schools have been changed to high schools, the growth is indeed remarkable and is an indication that rural and small urban districts are anxious to provide opportunities for secondary education for the youth of their communities.

But while great progress has been made in the past, it appears that much less progress can be made in the future unless there is some change in the method of rural school control and organization. Co-operation among rural districts is necessary if secondary school opportunities are to be provided for the rural districts situated at considerable distances from existing high and continuation schools. Co-operation will enable trustees to provide instruction in various vocational and industrial subjects suited to rural communities. As the inspectors have pointed out in previous reports, it is improbable that voluntary co-operation will meet the situation and it is impossible for individual school sections to provide properly trained teachers to carry on the wide courses necessary to meet the tendencies in education of to-day.

The Township School Board will, we believe, provide the machinery necessary to carry secondary school advantages to the more remote rural districts and yet enable the pupils of such districts to live at home under rural conditions, and in a rural atmosphere. In addition, therefore, to the clear and important advantages of the Township Board in affording means for improvement of primary schools in rural communities, it would seem that a very great improvement in secondary and vocational instruction will also be provided through the organization of such boards.

Effects of Recent Amendments to the High and Continuation Schools Act

In the revised High Schools Act, section 33, and the revised Continuation Schools Act, section 7, it is provided that county councils may by by-law provide for the payment of fifty per cent. of the cost of education of resident county pupils, the remaining fifty per cent. being paid by the municipality from which the pupils come and by the trustees of the district maintaining the school. Five counties, Oxford, Brant, Peel, Welland, and York have adopted this scheme.

The inspectors feel it their duty to point out that in continuation schools maintained by single school sections there is a possibility that the continuation school may be carried on at a profit to the school section. This is due to the fact that the teachers of continuation schools in the townships rank as public school teachers when claim is made on the township or townships for a share in the uniform township levy toward payment of salaries. If a large proportion of the students in attendance at a continuation school reside outside the district maintaining the school, the trustees may be able to maintain the school without direct cost to the ratepayers of the district.

Some Notes on School Topics

While they believe that progress has been and is being made in the continuation schools of the Province, the inspectors wish to offer a few suggestions for the benefit of teachers and others interested.

One of the greatest benefits any course of school training can offer the pupil is training in how to use a book. Throughout life every educated citizen must rely to a considerable extent on printed books, the storehouses of information and wisdom of the ages. It is, therefore, important to train pupils in how to use books, reference books, ordinary text books and books on special subjects. Unfortunately, it is often found that pupils enter secondary school without knowing how to use a dictionary for the purpose of finding the pronunciation or meaning of words. Teachers should train pupils in the use of the dictionary and should try to have the pupils form the habit of using it. Occasionally, also, pupils should be given some topic to "look up" in the school encyclopaedia.

Another aid in the use of books should be the incidental teaching of how the text books in use are organized, the purpose of the "Table of Contents," of "The Preface or Introduction," of "The Index," and of chapter headings or sub-divisions. Almost any text book will provide material for such incidental teaching, but the Canadian history may be taken as an illustration. Too often the inspectors find teachers preparing and giving pupils elaborate notes on topics from Canadian history. The reason given is that the information is not all in one place in the book. If the pupils are trained to use the "Index," they will, with far more interest and with much greater benefit to themselves, collect and organize the information required.

Writing is not a subject of instruction in the secondary schools but is taught incidentally. In all schools where teachers accept exercises carelessly written, poor writing is the result. Where teachers refuse to accept illegible or slovenly work, good writing is the result. Pupils of secondary schools do not need further instruction in writing, they do need to be held to firm standards of neatness and legibility in all written work.

French is taught in all the continuation schools of the Province though it is an optional subject. Nearly all pupils of the Lower School classes take French. The greatest difficulty found is in teaching French orally as a living language. The teachers who do best work are those who have taken the Conversational French course provided by the Department of Education. Almost always when a teacher's work in French is bright, interesting and conversational, the inspectors find that the teacher has taken advantage of the opportunity of attending the French conversational course.

The New Inspector of Continuation Schools

It would not be fitting to close this report without referring to the appointment of Major J. P. Cowles, B.A., as Inspector of Continuation Schools. Inspector Cowles has had an extended and successful experience in teaching in the schools of his native Province. He has taught in rural, ungraded schools, in graded schools and in high schools and collegiate institutes.

It is interesting to note that although there are now three inspectors, each inspector has charge of more schools and teachers than had either of the two inspectors in 1916.

G. K. MILLS,
J. P. HOAG,
Continuation School Inspectors.

Toronto, December 31st, 1926.

APPENDIX D

REPORT OF THE HIGH SCHOOL INSPECTORS

During the academic year 1925-26, as in previous years, the Province was divided into three Inspectoral districts, over each of which a High School Inspector was placed for purposes of supervision and inspection. Under this plan all the High Schools and Collegiate Institutes in the Provincial system have been duly inspected and reported on.

In previous Reports we have been able to state from year to year that the schools were in good condition and were carrying on their work in a thoroughly satisfactory manner. In this Report, we have no reason to depart from this statement. The year has been one of progress—progress in every line of endeavour. The High School system is expanding from year to year. New Schools are coming in: Continuation Schools are growing into High Schools, and High Schools are growing into Collegiate Institutes. The attendance continues to increase, entailing in some cases the erection of new buildings, in others the extension of existing buildings. With the erection of new buildings, sanitary conditions within the schools are improved, special attention being given to improving the lighting, heating, and ventilation. Stability is gradually increasing in the personnel of the staffs, and the proportion of University graduates among the teachers is steadily increasing.

This progress is so gradual that it is difficult to appreciate the improvement that is made in single years. But if we compare the present state of the High Schools with their condition as it was ten years ago, we shall have no difficulty in seeing how substantial and encouraging is the growth of each succeeding year. For the purpose of such a comparison, we submit statistics of the schools for the years 1915-16 and 1925-26.

Number of High Schools.....	1915-16 112	1925-26 134
Number of Collegiate Institutes.....	48	52
Number of pupils enrolled.....	38,426	53,512
Average daily attendance of pupils.....	24,825	45,554
Number of teachers.....	1,020	1,739
Average annual salary :		
(a) Principals.....	\$1,813	\$3,047
(b) Assistants.....	\$1,359	\$2,295
(c) All teachers.....	\$1,430	\$2,376
Highest salary paid.....	\$3,500	\$5,000
Amount expended for:		
(a) Teachers' salaries.....	\$1,472,673	\$3,986,032
(b) School houses (sites and buildings).....	\$448,989	\$1,464,036
(c) All other purposes.....	\$549,312	\$2,439,438
Total amount expended on High Schools and Collegiate Institutes.....	\$2,470,974	\$7,889,506

Much as this table shows of the advance that has been made, it does not show all. During the same period, there has been an unprecedented activity in building operations. New buildings have been erected for nineteen Collegiate Institutes and twenty-six High Schools; and in twenty-one Collegiate Institutes and seventeen High Schools the accommodations have been enlarged and improved. Most of the new buildings provide facilities for carrying on the work of the schools that are distinctly superior to those of former days.

Within the same period, the age of compulsory school attendance has been raised from the age of 14 to 16 years, a legal provision which gives to numerous boys and girls educational opportunities they would not have had under former conditions, and which will ultimately raise materially the level of general intelligence in this Province.

Within the period under consideration, a new Course of Study has been provided for the High Schools, and new Regulations adopted to remove the evils of overpressure from which both teachers and pupils had been suffering. Despite certain defects, which will be remedied at the next revision, this Course of Study has been productive of great good. Its effects have been far-reaching, and have been felt not only in the High Schools but in the Public Schools as well. It has kept pupils longer at school and by simplifying the examination system has encouraged many who would under the former system quit school, to remain until they have obtained the Matriculation Certificate or the certificate for admission to the Normal Schools. It has also greatly increased the attendance in the Upper School classes. In 1915-16 the enrolment of Upper School pupils was 2,974; in 1925-26 it was 4,737. It has affected the Public Schools by encouraging those who contemplate entering the teaching profession not to rest content with obtaining standing for a Second Class Certificate but to remain at school until they have completed the standing for a First Class Certificate. In 1916 the Department issued 366 First Class certificates; in 1926 it issued 584.

The High School system now consists of 135 High Schools and 56 Collegiate Institutes, a total of 191 Schools. During the year under review, a second Collegiate—the Adam Beck Collegiate Institute—was opened in London to serve the population of the eastern part of the city; and the new High School established by the Township of York at Vaughan Road was brought into operation.

New High School districts have been established at Cobalt, Cochrane, and in the Townships of Etobicoke, Saltfleet and York.

The High Schools at Cornwall, Oshawa, and Pembroke have been raised to the rank of Collegiate Institutes.

New buildings have been constructed and are now occupied in London, Pembroke and the Township of York; others are in process of construction, but not yet ready for occupation at Belleville, Clinton, and Cobalt. A new building is being erected at Port Perry to replace the one destroyed by fire last Spring. Extensions to existing buildings have been completed at Perth, Port Colborne, Scarboro and St. Mary's, and are in process of construction at Brampton, Port Hope and Stratford.

The year was marked by a very unusual and notable experiment. In the autumn of 1925 arrangements were made between the Minister of Education for Ontario and the President of the Board of Education for England for an exchange of Secondary School Inspectors for the first half of 1926. Such an exchange, it was thought, would not only be of benefit to both educational systems, but would tend to strengthen the bonds of Empire. Under this arrangement, the Senior High School Inspector, Mr. I. M. Levan, left for England early in January. An account of his work in England is given in an appendix to this Report. Mr. Levan's place in Ontario was taken by Mr. E. G. Savage, a graduate of Cambridge University, and one of His Majesty's Secondary School Inspectors.

When it was known that Mr. Savage was coming to us, an itinerary was arranged for him which would give him an opportunity to visit all parts of the Province and to see all types of High Schools. The following are the schools assigned to him for inspection.

COLLEGIATE INSTITUTES.—Barrie, Chatham, Guelph, Lindsay, Niagara Falls, North Bay, Orillia, Ottawa (Lisgar and Glebe), Sault Ste. Marie, Seaforth, St. Catharines, Toronto (Jarvis and Parkdale), Vankleek Hill.

HIGH SCHOOLS.—Alexandria, Beamsville, Burlington, Caledonia, Cayuga, Chesley, Glencoe, Haileybury, Hanover, Hawkesbury, Kingsville, Leamington, Mitchell, New Liskeard, Niagara Falls South, Omemee, Parry Sound, Plantagenet, Sudbury, Thessalon, Timmins.

Mr. Savage visited all these schools, and in them all he received a very hearty welcome. His sunny disposition, his strong personality, his ripe scholarship, and his keen power of observation left a deep impression on all those with whom he came in contact; and his criticisms and suggestions were of a constructive nature and were helpful to the teachers. When he returned to England in June, after the completion of his task in Ontario, there was a general opinion that the experiment had been a complete success, and a wish that it might at some time be repeated. An account of Mr. Savage's observations on the Ontario High Schools will be found in an appendix to this Report.

It seems but fitting that this Report should conclude with a brief reference to the new colleague who joined us last August. Mr. Husband has had a long and successful career as Principal of the Collegiate Institute at Brockville. He brings to his new duties a sympathetic understanding of the class-room problems of the teacher and an appreciation of the difficulties that beset the Principal in organization and administration. To his colleagues he brings valued assistance at a time of great need.

R. W. ANGLIN,

I. M. LEVAN,

G. F. ROGERS,

High School Inspectors.

Toronto, January 1st, 1927.

REPORT OF A VISIT TO ENGLAND AS EXCHANGE INSPECTOR

In the autumn of 1925 an arrangement for an interchange of High School Inspectors was concluded between the Minister of Education for Ontario and the President of the Board of Education for England. As I happened at this time to be the Senior High School Inspector, the opportunity to represent Ontario in this exchange was offered to me and gladly accepted.

I reached London early in January, 1926, and reported at Whitehall to the Board of Education. Here I was received by the President of the Board, who welcomed me warmly to the service of the Board, and placed me under the direction of the Chief Inspector of Secondary Schools, Mr. W. C. Fletcher, C.B.

As the secondary schools had not yet opened after the Christmas holidays, it was arranged that I should spend a few days with Mr. J. A. Shawyer, one of the Board's Elementary School Inspectors, in seeing some of the elementary schools in London. With Mr. Shawyer I visited St. George's Girls School, Westminster Bridge School, Brownhill Road School, Brownhill Road Central School, and St. Mary's Newgate School, and the Royal Navy Hospital School at Greenwich. I found these schools interesting, but, as they shed little light on the problems with which I was chiefly concerned, it is not necessary that I should deal with them in this Report.

The secondary schools had now opened, and from this time forward I was engaged for a portion of each week in visiting them. These visits were of several kinds. Sometimes they were visits to specially chosen schools in the company of the local District Inspector. In this way I spent four days with Mr. E. W. E. Kempson, District Inspector for Essex, in visiting West Ham Municipal Secondary School for Boys, Walthamstow Secondary School for Boys, East Ham Secondary School (a mixed school), and Leytonstone High School for Girls. In this way, also, I spent three days with Dr. F. Spencer, one of the Staff Inspectors in charge of a small district in London, visiting Dame Alice Owen Secondary School for Boys at Finsbury Park, the County of Middlesex Secondary School at Hendon (a mixed school), and Godolpin and Lattymer School for Girls at Hammersmith. These schools were all interesting and each had an individuality that would have repaid further investigation. Had hopes of repeating my visit at a later time, but this hope was doomed to disappointment.

At other times I made visits of three, four, or five days' duration in the company of a panel of from five to eight Inspectors engaged in what is termed a Full Inspection. In this way I visited the following schools: the Grammar School at Glossop in Derbyshire (a mixed school), King Edward the Sixth Grammar School at Norwich in Norfolk (a boys' school), Wellington College, Tonbridge Boys' School, a Public School at Tonbridge, Kent, Diss Secondary School, Diss, Norfolk, and the Paddington and Maida Vale Secondary School for Girls, in London.

I also had the pleasure of accompanying two of the Staff Inspectors, Dr. Spencer and Miss Shearson, in a special inspection of the teaching of French at the Cheltenham Ladies' College, Gloucester. This inspection was undertaken at the request of the Head Mistress who desired to have expert advice in the matter of reorganizing the department of French in the College.

This work carried me through to the end of March when the schools were closed for the Easter holidays, and I was now looking forward to work of a different kind during the next term. But just then I was taken down with an illness which sent me to a Nursing Home for a month, and brought my work to an

abrupt and disappointing termination; for, on being discharged from the Nursing Home I was forbidden by my physician to undertake any kind of work for three months. This made it necessary for me to return to Ontario with my task half finished.

Origin and Growth of the English Secondary School System

The present system of state-controlled and state-aided schools in England is of recent origin. Secondary education, it is true, has been carried on for centuries. The great Public Schools, such as Eton, Rugby, Harrow and Winchester, are known wherever the English language is spoken. There were, besides, many smaller schools, maintained by endowment or by the guilds, or by private munificence, in addition to a vast number which were established by individuals and supported by fees alone. But these were not welded into a unified and homogeneous system. Many of them had fallen on evil times and were not able to keep up a high standard of efficiency. In 1899 the Board of Education Act was passed, by which a department of government, called the Board of Education, was established and charged with the superintendence of matters relating to education. This was followed in 1902 by the Education Act, providing for the establishment of local education authorities throughout the country, who were authorized, after consultation with the Board of Education, to supply, or aid the supply of, education other than elementary, and to promote the general co-ordination of all forms of education. The present system of Secondary Education had its origin in the Education Act of 1902.

It was optional for any of the existing secondary schools to enter the national system; but the local authorities soon became interested, and the liberal grants offered by the Board proved attractive. Under the operation of the Education Act, therefore, great changes were brought about. Many of the existing Grammar Schools were put on their feet financially, schools were better distributed, better provision was made for the education of girls, buildings were improved and new buildings erected, and the efficiency of the schools was raised to a reasonable standard.

The system steadily grew. During the five years between 1914 and 1919 there was as in Ontario, unprecedented increase in the growth so that the average size of the schools on the grant list jumped by over 40 per cent. The following tables may be found interesting as showing the extent of the growth:

(a) Schools:	1904-5	1914-5	1924-5
For Boys.....	292	403	471
For Girls.....	99	359	462
For Boys and Girls.....	184	285	348
Total.....	575	1,047	1,281

(b) Pupils:			
Boys.....	61,179	105,096	188,268
Girls.....	33,519	93,788	171,176
Total.....	94,698	198,884	359,444

(c) Teachers in 1923-24:			Percentage of Graduate Teachers.		
Number of Teachers.			Percentage of Graduate Teachers.		
Men	Women	Total	Men	Women	Total
8,866	9,792	18,658	76.8%	59.1%	67.5%

(d) Teachers' Salaries:	1914	1924	
(I) Head Teachers:			
Men.....	£450	£767	
Women.....	£324	£595	
(II) Assistant Teachers:			
Men.....	£174	£390	
Women.....	£126	£308	
(III) All Teachers:			
Men.....	£208	£424	
Women.....	£139	£321	
(IV) Average cost per pupils in 1924.....			£27

Age of Admission, Curriculum, etc.

The problem of keeping children at the schools for at least a four years' course soon became a matter of great importance. By degrees it was appreciated that late entry was a great source of inefficiency. The solution was found in a rule fixing the age for scholarships and free places, with the result that 54 per cent. of the pupils now enter between the ages of eleven and twelve. It is now generally recognized that if the work of a secondary school is to be effectively organized, pupils should not ordinarily be admitted after their twelfth birthday. So essential is this considered to be that the local authorities are relieved of any obligation to admit fee-paying or free-placing pupils who have passed their twelfth birthday by the beginning of the school year in which they seek admission.

The curriculum provides for instruction in English Language and Literature, at least one language other than English, Geography, History, Mathematics, Science and Drawing. The curriculum must make such provision as the Board can accept for organized games, physical exercises, manual instruction and singing. In school for girls, the curriculum must include provision for practical instruction in domestic subjects, such as Needlework, Cookery, Laundry Work, Housekeeping, and Household Hygiene: and an approved course in a continuation of these subjects may, for girls over fifteen years of age, be substituted partially or wholly for Science and for Mathematics other than Arithmetic. By special permission of the Board, Languages other than English may be omitted from the curriculum, provided that the Board are satisfied that the instruction in English provides special and adequate linguistic and literary training, and that the teaching staff are qualified to give such instruction. Religious instruction, but not of a denominational character, is given in all the schools.

It is interesting to observe that no school is recognized for the payment of grants under the Regulations unless (1) the pupils normally remain at least four years at school, and (2) the school life of the pupils normally extends at least to the age of sixteen. Hence, it is not an infrequent practice for the School authorities, in order to secure a satisfactory school life, to bind the parent by a legal agreement to keep his child at school until he reaches the age of sixteen.

For most pupils the secondary school course terminates on passing the First Examination at the age of sixteen, when they leave the school to enter a university or a learned profession or business life. About ten years ago a new departure of far-reaching importance was taken when Advanced Courses were organized for schools which were capable of taking up Sixth Form work. These courses were organized on the principle of specializing for two years in a group of allied subjects. To prevent the evils of overspecialization it was provided that the whole of the pupils' time should not be given to the group, but that other subjects should be added to be taken more lightly. Under this scheme the following courses are now approved by the Board:

- A. Science and Mathematics.
- B. Classics.
- C. Modern Studies.
- D. Classical with Modern Studies.
- E. Geography.
- F. Such combinations of subjects as may be approved by the Board.

These courses lead to the Second Examination, taken at the age of eighteen. The Second Examination certificate also entitles the holder to obtain the degree of B.A. by the Pass course in three years, but it is customary, I understand, for such candidates to take their B.A. degree in one of the honour courses, which they are qualified to pursue with great success by reason of their special preparation.

Outlines of the content of these courses are laid down by the Board, to be elaborated into definite syllabi by the schools providing them. No school is permitted to establish an Advanced Course unless the Board approves of the syllabus, the number of pupils entering, the qualifications of the staff, and the character of the equipment. On the other hand, the Board deals liberally with the schools establishing such courses, paying a grant of £400 for each course established, with a maximum limit of £1,000. The Advanced Courses have been highly successful and are deservedly held in high esteem. They are of great value not only to the comparatively few pupils who take them, but because of their reactions on the whole school, teachers and pupils alike.

Organization

A Regulation of the Board provides that classes should not contain more than thirty pupils and must not contain more than thirty-five. That this rule is generally enforced is shown in the fact that on the 1st October, 1923, while 3,044 classes were over the normal limit of 30, only 79 of these were over 35. The largest class I saw consisted of 32 pupils; most of the classes consisted of not more than 20 or 25, and there were many with not more than 15 or 20. The school day is usually divided into seven periods of 40 or 45 minutes each. All time-tables must be sent to the Board for approval at the beginning of the school year, and no alteration of an approved time-table may be made without the consent of the Board. While considerable latitude is permitted in the apportionment of time, the following time-table, which was in operation in a mixed school I visited, may be taken as representative of the general practice:

	Number of Periods per Week			
	1st year	2nd year	3rd year	4th year
Religious Instruction	1	1	1	1
English	5	4	3	4
Geography	3	2	2	7
History	1	2	2	3
Latin	0	4	5	7
French	5	5	5	6
Arithmetic	2	2	2	1
Algebra	2	2	2	2
Geometry	3	3	2	3
Trigonometry	0	0	2	1
Chemistry	0	3	4	5
Physics	0	3	4	7
Botany	0	0	4	0
Art	2	2	2	0
Music and singing	1	1	1	0
Physical Exercises	1	1	1	1
Games	1	1	1	1

In the same school two Advanced Courses were provided, Modern Studies and Science and Mathematics, and in these the apportionment of time was as follows:

	Modern Studies		Science and Mathematics	
	1st year	2nd year	1st year	2nd year
English	5	5	1	1
History	8	8	0	0
Latin	1	1	0	0
French	8	8	5	5
German	6	6	0	0
Mathematics	5	0	8	8
Chemistry	0	0	8	8
Physics	0	0	11	11
Botany	5	5	0	11
Physical Exercises	1	1	1	1
Games	1	1	1	1

Inspection

The Secondary School Inspectors have all been recruited from the ranks of experienced teachers. The regular staff consists of 43 members, of whom nine are women. Besides, there are Inspectors of Art, Music, Physical Exercises, and Domestic subjects, whose work is not confined to the secondary schools alone, but embraces all kinds of schools. The regular staff comprises a Chief Inspector, Divisional Inspectors, District Inspectors and Staff Inspectors. For purposes of inspection the country is divided into five divisions with a Divisional Inspector in charge of each. These divisions are subdivided into 23 districts, each containing from 30 to 50 schools, and each in charge of a District Inspector. There are also eight Assistant Inspectors, who are attached to, but not in control of, the Districts. In addition, there are six Staff Inspectors.

The Chief Inspector has general oversight of all the work of inspection, and also takes some part in Full Inspection.

The Divisional Inspectors have supervision over all the districts in their division, and, in addition, have charge of a District.

The District Inspectors carry on their work in much the same way as our Public School Inspectors. They reside in their district and work from their own homes, wandering about their district at will, helping schools and teachers in every way they can, by their own advice and by calling in at times the help of a colleague, seeing that the public gets good value for its money, and reporting infractions of the Regulations to the Board. They are not required to make a report on their schools either annually or at any other specified interval.

The Staff Inspectors as a rule have but small districts, and their function is to deal with the teaching of a subject throughout the whole country. This often involves committee work and the authorship of official pamphlets. They frequently assist the District Inspector in reorganizing or improving the teaching of their special subject within his District.

In addition to the inspection shown above as the work of the District Inspector, there is an inspection of a more formal character known as a full inspection. The Board conducts every year a number of full inspections which are so arranged that every school gets one every ten years. During a full inspection a panel of from two or three to eight or nine Inspectors, according to the size of the school, stay at the school for three, four or five days and look into every department of its work, its attendance, its finances, its premises and equipment, its staff, its curriculum and organization, and the quality of the teaching in every subject of the curriculum, and its general school activities and

corporate life. During the inspection there are many opportunities for informal conferences with the head master and his staff, and, as with us, direction and guidance is given to the teachers wherever it is needed. At the end there is a formal and frank conference with the governors, and a report is issued. A full inspection arises either when a school applies for recognition as an efficient school but without desiring grant, or for recognition and grant, or when the District Inspector thinks it needs one, having regard generally to the ten-year interval.

There are also supplementary inspections, which are of rather recent institution. These are not very formal and are confined to a few subjects. If the head master asks the District Inspector, or if the latter himself has any reason to think that the school needs help in a special subject, he puts it on the list and one or two Inspectors specially interested in the subject concerned pay a visit. A record of the visit, giving an account of the state of affairs, and the advice given to the head master, is sent to the Board, and a copy may be sent to the school.

The Accommodations

The necessity of practising the strictest economy has made it impossible to enlarge or replace the older buildings, and for this reason many of the buildings compare unfavourably with those erected in recent years in Ontario. But in this matter, as in so many others, the English have a knack of getting along under privations. If more class-room is needed, an old army hut can be set up and equipped to serve the purpose. If there is no assembly hall, it is still possible to gather all the pupils together in one of the larger classrooms or in a corridor for morning prayers. If a classroom is very small, it will still hold a small class. The lighting is generally not so good as with us. Mechanical ventilation is unknown; open windows keep up a constant supply of fresh air in winter as well as in summer. Classrooms are warmed to a temperature of 58 degrees with small coal grates; if the temperature rises above 58 degrees, the English school-boy complains of the heat. A painted board with a surface of 18 or 20 square feet, stood on an easel at the front of the room, provides all the blackboard space that is needed. But well-equipped science laboratories are to be found in nearly all the schools, and there are few schools without a gymnasium. All schools have good playing fields (one school I visited in London had a playing field two miles away from the school), and games are provided for in the time-table and are played throughout the year.

Teachers and Teaching

Coeducation is not favourably regarded in England. In the larger centres separate schools are provided for the sexes; in the smaller centres considerations of economy alone have led to the establishment of mixed schools. Boys' schools have male teachers, girls' schools female, and mixed schools have both. The schools are more liberally staffed than with us, so that the principal has some time for supervision and the teachers some time for the correction of exercises or laboratory preparation. Classes are smaller. Text books are not prescribed; each school is free to choose its own. In most schools, the salaries are those of the Burnham scale. This scale is having the effect of satisfying the teachers and producing a high degree of stability on the staffs as well as attracting to the schools university graduates of high standing and thus improving the quality of the teaching. Professional training is provided by the Board and by the universities but is not made compulsory on those who seek to enter the profession. As there is not sufficient school accommodation to supply the demand

for secondary education, only the brightest scholars are admitted, and admission is regarded as a privilege which may be lost if misused; hence an earnestness of purpose on the part of pupils and great regularity of attendance.

As most of my observation was done when the schools were undergoing a full inspection, I had little opportunity to observe the teaching of mathematics or science. My attention was confined almost wholly to the classes in English, History, French and Latin. Up to the first examination (matriculation), the methods employed are in general the same as ours and the quality of the teaching is as various. The prescription of work in languages covers a wider range and embraces texts of a more difficult character, more especially in the higher forms. Much attention has been given to the improvement of the teaching of French with the result that the reformed method is now practised in most of the schools by teachers who, by residence and study in France, have acquired a good speaking knowledge of the language.

The work done in the advanced classes is worthy of the highest praise. It is really university work brought down into the secondary schools, to the great advantage of these schools and perhaps also to the universities. The classes are small, the pupils are ambitious, the teachers are specially qualified and ample equipment is provided. These classes, wherever they have been established, have been highly stimulating to the whole school.

Conclusion

I cannot conclude this report without a brief reference to the unremitting efforts of the Board to support secondary education and place it on a thoroughly sound foundation. It bears fifty per cent. of the cost of secondary education throughout the country, both for maintenance and permanent improvements. By investigations, conducted by its own officers as well as by royal commissions, it has determined the position of each subject on the curriculum, and made recommendations for the improvement of the teaching. And by its popular summer courses it is succeeding in filling the teachers with enthusiasm for their work and is improving the quality of their teaching. And it must not be forgotten that the system has been brought to its present state of efficiency in the comparatively short space of twenty-five years.

I. M. LEVAN.

IMPRESSIONS OF ONTARIO HIGH SCHOOLS

The following comments on the Ontario High Schools will be found to be of special interest, coming, as they do, from a trained observer who had a unique opportunity to form opinions on the subject he discusses. They are from the pen of Mr. E. G. Savage, one of His Majesty's Inspectors of Secondary Schools in England, who, as the representative of the British Government in an exchange of High School Inspectors, spent the first six months of 1926 in visiting High Schools and Collegiate Institutes in various parts of this Province.

The Englishman visiting Ontario High Schools, comes fore-armed with the knowledge that Ontario has in force an Act of Parliament which compels all children up to the age of sixteen to attend as full time pupils at a school of some sort. But even with this knowledge, he still feels surprised to discover what it means in practice. Your distances, even in the most settled parts of Southern Ontario, are still too great to permit of the establishment of a few large schools

to serve a wide area, but this has not prevented the area being served by the establishment of numerous small schools. The very existence of so many small schools, by far the larger portion of the cost of which is borne by the locality, is in itself a very striking demonstration of the determination of the people as a whole to secure for their children the advantages of secondary education. The scattered nature of the population and the necessity for the establishment of many small schools raised problems for the teacher which are non-existent in more densely populated areas, of which due account must always be taken in assessing the value of their work. It means for example, that in a small four or five teacher school, it is not possible to have teachers who are Specialists in all the subjects found in the curriculum. Some one or more of them must inevitably be teaching a subject which is not his or her first choice. Further, the presence in the High School of all of those who have passed the Entrance test means that except in the large centres of population where Vocational Schools are to be found, the classes contain a fairly large proportion of pupils who have not a very lively interest in the academic subjects of the curriculum and whose presence in the class is a decided hindrance to others of a different type. These two factors the writer has always in mind whenever he feels inclined to criticise the standard of work in any subject. When he does criticize, it is because he believes that, unless he has gained an entirely false impression from the many friends he made in Ontario, teachers as a whole would prefer candour to insincerity. While he admires the spirit which has resulted in the generous provision of secondary school facilities which Ontario has provided for its sons and daughters, he is also impressed with the difficulties which arise from the very large number of schools, and the danger there is that the presence of so many may set up a lower standard of achievement than might and should be exacted of the abler pupils.

The discipline of the schools is not easy to describe for in the vast majority of cases it is of that type which is not easily seen: that is to say, it is based on friendly relations between teacher and taught. As a whole, the pupils, stout, upstanding fellows as they are, especially in the rural areas, have not an unduly inflated idea of their own importance, speak with pleasing frankness to their elders, but yet with decent respect they generally show by their demeanour and behaviour that they are the offspring of good sound stock who appreciate the difference between freedom and license. The admixture in the schools of those who will enter the professions and those who will become farmers and artisans, the free mingling of the sons of the wealthy and well known with those of the poor and the obscure, is another healthy feature of Ontario schools which arouses something not unlike envy in at least one English visitor.

Perhaps in all these imponderable elements lie the chief elements of strength in the schools.

Teachers

One of the very pleasant and most abiding impressions of the teachers is their very loyal attachment to the connection with the Motherland. Many of them came to learn much about Great Britain during the War and all of them showed, not only by many kindnesses to the writer, but also by their willingness to listen to him, real interest in English affairs and especially in matters connected with education.

In some areas, however, and curiously enough the wealthy and densely populated areas are amongst the worst offenders, it seems as though the enthusiasm for education on the part of the local authority has been satisfied by the

erection of fine buildings. The requirements of the Department that there should be one teacher for every thirty children is not unduly high: indeed it is almost as low as could possibly be expected, and it is with no little surprise that one finds cases where this allowance is not reached. The result is that many teachers, indeed the majority, must teach for every period of the week and this applies in many cases to Principals as well. No teacher can shoulder this burden and teach with the vigour and freshness which is required. A Principal who is in this position is obviously quite unable to appraise the value of the work of his staff, let alone to act as the leader of the team and to improve their methods. Upon Science teachers in such a position, the burden assumes big proportions, for in addition to the actual work of teaching and directing the practical work of his pupils, the Science teacher needs to spend much time in the preparation of his apparatus and experiments if he is to make his subject a live one. The lightening of the load of the teachers of Science and the provision of assistants to help in the laboratory is one of the features which, in the mind of the writer, would do a great deal to improve the quality of the work in this subject.

It is particularly unfortunate when the number of teachers on the staff of a school is so small as to necessitate the existence of large classes at the top of the school. Here are to be found the intellectual elite of the school working for the "Honour Matriculation" and the future candidates for Honours at the Universities. They are necessarily not a homogeneous collection, but are of different aptitudes and abilities. Sometimes they are of different training in as much as some will have come in from other schools where this type of work is not done. Yet all too often—and by no means in the poorer areas only—there may be found a class which is far too large, with all of these mixed elements studying under the one teacher. In at least one case, the writer recollects a class of nearly fifty, which on sound educational lines should have been divided into two separate classes for the teaching of Mathematics. In such cases, it may be suggested that the local authority is not living up to the ideals of its constituents and is following a policy of false economy.

Methods

Having criticized the conditions under which many teachers work, a few outstanding points may be mentioned in connection with the methods of the class-room. In Science it is too often the case that the work is not of a sufficiently practical character. Sometimes this may be due to the unduly heavy teaching load imposed on the Science teacher as described above. At others it may be due to the lack of provision of a really adequate supply of apparatus. This is especially the case in Physics. But on other occasions, more especially in the case of women teachers, than in the case of men, it appears to be due to a lack of appreciation on the part of the teacher concerned, of the infinite possibilities which the subject has. Too often it is the examination bogey which frightens them into the belief that the best method is to "cover the book." In such cases, the work in the note-books is a mixture of which an ingredient is a digest of the matter taken laboriously from the text-books, and the other is a "record" of "experiments" which have not indeed been carried out but the necessary apparatus for which has been seen and an account written of the way in which phenomena might occur if the experiment had actually been done. Such cases are not general, and usually do not occur in big towns and well known schools, but they are too common to be disregarded. It cannot be too strongly emphasized that the fruits of work in Science are to be found nowhere but in actual experience, by the actual conduct of experiments (either by the teacher or by the class

according to the nature of the work) and that a pupil should be able at an examination to stand the challenge to quote the experimental authority for his belief in the theories which is usually quite well able to enunciate.

In Mathematics, there appears to be a tendency for the different subsections to be kept in water-tight compartments, possibly owing to the fact that they are not taught concurrently. Whether as a result of this or not, or as the result of a too eager anticipation of the requirements of the examination, pupils as a whole do not appear to gain Mathematical power so readily as is desirable. It would be a sound plan if teachers would more generally open their periods (as some do) with a brisk five minutes exercise in the solution of problems, either mentally or on paper, which should not, of necessity, be confined to any particular set section of the subject. In skilled hands this proves most effective in producing an alertness of mind which is perhaps more necessary in Mathematics than in any other subject, and its value as a method of revision and in unifying the work is very obvious.

In the Languages, Latin and French, the rate of progress, considering the age of the pupils, is slow. The writer desires to avoid comparisons but in this case it must be said that progress is slower than under any other system with which he is acquainted. The many periods during which accidence and syntax alone are studied is so long drawn out that pupils lose interest in the subjects (the expression commonly used is that they "find them hard" but it means much the same thing). It is suggested that in both cases reading of real texts should be begun much sooner and that less time should be spent on laboriously working through exercises in which it is very difficult to find any real interest. They become a succession of tests of the ability to juggle with case endings and verb forms but if these are not constantly encountered in the live words of a real author, they become obliterated in the memory and no real appreciation of their use is retained by the time actual reading is begun.

In this connection, the subject of home work may be briefly discussed. Corresponding to the daily lesson which is a common allowance, it appears to be the practice for teachers to set a daily task to be done at home. It, therefore, not infrequently happens that a pupil may have tasks to do at home in four or even as many as eight subjects. Whilst the latter may be rare, the writer met many cases of six and seven subjects being taken home in which tasks had to be done. This seems excessive and has several attendant evils. In the first place the amount set, being determined by experience, tends to become a mere snippet in each subject, and the pupil, if conscientious, has an evening's work of kaleidoscopic variety, which militates against anything serious being done in any one subject. Secondly, since every lesson concerns a prepared task it happens, more especially in the language teaching of country districts, that too much of the lesson is occupied in hearing or correcting the home work.

Often it results that too little time is then left out of a forty minute period or less in which first ground may be broken. Perhaps it is on this account that parents and others are beginning to complain of the burden of home work. With the cry sometimes heard that it should be abolished, the writer has no sympathy, but he feels that its lack of organization and regulation may well give grounds for the belief that it is excessive. What is needed perhaps is not abolition but regulation. If for example, the number of subjects to be studied at home on any night were limited to four and designed to require from one-and-a-half hours to two hours according to the age of the pupil, it should result in more substantial work being set in each subject and a teacher might reasonably expect the work to be thoroughly mastered. Instead of a snippet in each of five nights for each

subject, it would result in more substantial work being done in say two nights a week in each subject. It is the number of subjects which bewilders the child and leads to a feeling of over pressure rather than the amount actually demanded. What has worked well in one country may not work equally well in another but it may be said that the home work time (varying from half-an-hour or so at the age of eleven to two-and-a-half hours at sixteen and eighteen) is planned out for every night in this way in all English schools.

The position of Music in the schools is a disappointing one. Whilst the Programme of Studies published by the Department envisages the possibility of a school establishing a course of serious work in Music, there is no record of any school doing so in the Annual Report of the Department. More than this, in very few schools that the writer visited did he hear any. At Ottawa the two Collegiate Institutes (or the two sections of the one Collegiate Institute) have some very cheerful singing and a very delightful orchestra at the morning assembly. At Sault Ste. Marie, there are regularly organized classes out of school hours, the expense of which does not fall on the public. These children gave at short notice a really finished performance which appeared to give them as much pleasure as it certainly gave the visitor. Toronto schools have some lessons in singing but only for girls. The writer knows from experience at Hart House and elsewhere that Canadians are not naturally unmusical. It seems a pity that High Schools should not devote at least a small portion of their time (say an hour a week) to the development of this, the aesthetic side, of their pupils: and would it not add to the cheerfulness of school life if each morning there was some singing at the morning assembly? They have stout hearts—why not lift them up to the Lord?

If what has been said appears to be unduly critical, the writer asks that readers will bear in mind that his sole object is to write candidly and sincerely. He would add that there is very much indeed that he saw in Canada which he much appreciates. The catalogue of this would be too long but he would conclude by referring to the work in Physical Training. It is indeed a good thing to see how very large a proportion of the High School teachers are qualified to take this work. In the Mother Country this is almost entirely handled by Specialists who teach nothing else (and are qualified as a rule for nothing else.) It is our hope that ultimately class teachers may take this work. In Ontario this is already the case. Furthermore, it may be said that if the writer had to recommend a school to which a teacher of Physical Training should go to see really good English folk dancing, he would point to a school in Northern Ontario,—Sudbury.

E. G. SAVAGE.

APPENDIX E

REPORT OF THE DIRECTOR OF RURAL SCHOOL ORGANIZATION

Attendance and Costs

In previous reports, I have commented upon the large number of one-teacher schools with a low average attendance and upon the consequent waste of money and effort in maintaining them. The attendance returns for 1925 are even more unsatisfactory than those for 1924 and 1923. The number of schools with a low average attendance seems unfortunately to be steadily increasing. In 1925, approximately one school in every five had an attendance of five or less, two in every five an average of fifteen or less, and three in every five an average of twenty or less. Upwards of 3,000 one-teacher schools—more than 63 per cent. of the total number—are working below their capacity.

Obviously the cost of maintenance per pupil of average attendance must continue to mount higher with the decreasing number of pupils. In 190 schools with an average of five or less the cost per pupil per year is \$301.35, or nearly four times the average cost per pupil in all the rural schools. The cost in 927 schools with an attendance of ten or less is \$161.92 or more than twice the average for the Province. It cost considerably more than a million dollars to educate less than seven thousand children in schools with fewer than ten pupils each.

The following tables give summaries of the statistics of attendance and costs of the one-teacher schools:

I.—Average Attendance in One-Teacher Schools

No. of Schools with Average of	Counties	Districts	Total	Percentage
1.....	6	2	8	.16
2 or less.....	22	6	28	.56
3 “.....	48	21	69	1.37

IV.—COMPARATIVE STATISTICS OF COST OF MAINTENANCE OF SMALL SCHOOLS

FROM 1922 to 1925

Total Cost per Pupil of Average Attendance

	In Schools Average 1—5	In Schools Average 6—10	In Schools Average 1—10	In All Rural Schools
1922	\$247 32	\$138 99	\$151 02	\$80 26
1923	248 33	144 91	156 00	87 36
1924	243 08	141 32	151 92	80 38
1925	301 35	144 91	161 92	78 10

Need of Change in Rural School Organization

In successive reports for several years, I have emphasized the necessity of some change in the organization of the rural schools in order to obviate the waste that is apparent from such statistics as have been quoted above. But the elimination of waste is not the most important end to be secured. Rural communities require increased facilities to bring them up to the same plane of educational opportunity as urban communities. They need a broader Elementary School programme, including Agriculture, Household Science and Manual Training. They need greater Secondary School opportunities in both full-time and part-time courses that will give in addition to a good general education specialized training for agricultural pursuits.

This elimination of waste and this institution of broader facilities in rural education cannot be secured under the section scheme of administration. Some scheme that affords a wider opportunity for co-operative effort is required. The plan of organization proposed by the Bill to Establish Township Boards of Trustees, which has been before the Legislature for two sessions, would seem to meet the necessities of the situation in a satisfactory way.

Popular Attitude Towards the Township Boards' Bill

The Minister has issued two circular letters to the public dealing exhaustively with rural school problems and outlining his plan of solving them. These letters have been widely circulated and read. Quite naturally, the first reaction of rural school supporters to the township boards' proposal was one of almost universal opposition. But as the proposal has been more closely studied and better understood, the original antagonism to the idea has greatly lessened. It is quite probable that, when rural school supporters realize that local autonomy with regard to schools is just as secure under the proposed scheme as it is under the existing organization, serious opposition will disappear. And, when the possibilities of the proposed plan in the direction of increased facilities for education become apparent, popular support will probably become as strong and as universal as was the original opposition. In any event, the submission of the scheme in a tentative way for the consideration of the public has done much to stimulate thought and study in a field that has been overlooked for many years.

The Consolidated Schools

Twenty-eight consolidated schools are now in operation. In 1926, one new school was built and occupied at Quibell in Kenora District. The statistics of the consolidated schools will be found on pages 256-260 of this Report.

W. J. KARR,

Director of Rural School Organization.

Toronto, January 29th, 1927.

APPENDIX F

REPORT OF THE INSPECTOR OF MANUAL TRAINING
AND HOUSEHOLD SCIENCE

General Situation

Manual Training and Household Science have made satisfactory progress in the Schools of the Province during the past year. The tendency to close centres owing to financial stringency and the desire for economy that has existed for several years past has now almost entirely disappeared.

New centres are being opened and those only previously partially used are being more fully utilized. Four new centres for Manual Training and Household Science have been opened in Toronto; two partially used centres are now being occupied the whole school time; two half-time centres in Brantford are now being utilized to the fullest extent and the introduction of Manual Training and Household Science is being seriously considered in several places where instruction in these subjects has not previously been given.

In towns with a small population it is not possible to employ the whole time of a Manual Training or Household Science teacher, but much might be done by the smaller towns and villages co-operating in this matter and employing teachers between them. It should not be difficult to form a group of three or four towns within easy reach of each other, each having its own Manual Training and Household Science centres and equipments and each paying its share of the special teachers' salaries, according to the time spent in each place by the teacher. Now that radial and bus lines are being rapidly extended throughout the Province the possibility of such co-operative action is becoming greater and the will to co-operate is practically all that is now necessary. The attention of the local inspector is directed to this matter. Such actions would not only result in the introduction of Manual Training and Household Science, but would also promote a better feeling among the different communities and lead to combined action in other fields of civic betterment. In still smaller communities a travelling shop might work to advantage.

The work being done in both subjects is gradually improving in quality and quantity as the lower grades of the school are entering the Manual Training and Household Science centres with greater knowledge and skill due to the development of the more elementary work. The rotary or self-contained school where all the constructive work is under the charge of one teacher and correlated throughout the school shows this growth in the most marked degree.

Teachers are utilizing to a fuller extent the various aids offered by the manufactures of textiles and food products by the provisions of charts, illustrations, specimens of raw materials, processes of manufactures and completed articles. Various government bulletins relating to foods and industries are now to be found in many of the schools and are proving of great service.

Training of Teachers

Certificates in Manual Training and Household Science qualifying to teach in the various types of schools now granted by the Department are of three kinds: (1) Elementary, (2) Ordinary, (3) Specialist. The "Elementary"

certificates are obtained by attendance at two Summer Schools. Teachers must hold a Second Class certificate before being allowed to attend these courses. The holder of the Elementary certificate is qualified to teach these subjects in Rural Schools. The "Ordinary" certificate is obtainable by taking a one year course, in the case of Manual Training at the Industrial Training College in Hamilton, and in the case of Household Science at the College of Education. During the year the Regulations have been modified so that the holders of the Elementary certificate may enter these courses in January instead of the previous September. In this way the cost of the training to the individual teacher is considerably lessened. The Syllabus of each course has been modified so that the Elementary course now forms an introduction to the Ordinary course and the two courses do not overlap. The Elementary course has now been restricted to such work as can be carried on satisfactorily in the rural school. The Ordinary certificate qualifies the holder to teach these subjects in Public, Separate or High Schools.

The Specialist Certificate in Household Science is obtained through a four-year course at the University of Toronto followed by attendance at the College of Education.

During the year changes were made in the Regulations regarding Specialist certificates in Manual Training. This certificate had previously been granted to the holders of the Ordinary certificate who spent one year's work in an approved shop. This proved unsatisfactory as the work varied so much in character and it was difficult to evaluate its character. Accordingly two summer courses were established at the Industrial Training College, Hamilton. These courses continue for five weeks and the students work at least eight hours each day. The instructors are experts in various trades. The first course was attended by eighteen teachers all holders of the Ordinary certificate. This course was strikingly successful. Many of those attending (including some of those who strongly objected) have expressed to me their gratification at the instruction received and the benefit derived.

Summer Courses

Holiday courses in Manual Training have been held in this Province continuously for 26 years the first being attended by eight teachers and was held at Brockville under the Macdonald Manual Training Fund.

During the past summer vacation the usual courses were held for the purpose of qualifying for the Elementary certificate. Both courses (Manual Training and Household Science) were given under the direction of the Principal of the Industrial Training College and were well attended. The Manual Training course was held here for the first time and now all the Training of Manual Instructors is being done under College auspices. This will tend to greater efficiency, closer correlation and better organization. A summer course in Household Science was also held in Ottawa.

The Saturday Classes in Manual Training and Household Science held in Hamilton at the Normal School for many years owing very largely to the enthusiasm of Inspector J. B. Robinson have for this year at least been discontinued. There are in Wentworth County 52 Rural Schools teaching Household Science and 48 teaching Manual Training. This means that the demand for rural school teachers in Wentworth County qualified to teach these subjects is very nearly met and owing to this fact the number of teachers wishing to attend was not sufficient to warrant classes being formed.

The Rural School

Surely the country child has a right to as good educational opportunity as a child attending the best city school. A different environment renders necessary certain differences in organization and method but equal opportunity should be provided. The rural school has its own problems and those problems are essentially different from those presented by a town or city school. Our rural schools train a large part of the population and they should boldly grapple with the fact that the majority of those educated in them will continue to live in the country either from choice or necessity and it may be from choice if the right methods be adopted in their education.

It is gratifying to be still able to report continued progress in the introduction of Manual Training and Household Science into the Rural School. There are now 685 Rural Public Schools and 41 Rural Separate Schools teaching Household Science and serving at least one hot dish at the noon lunch and 103 Rural Schools teaching Manual Training. The outstanding inspectorates in this report are for Household Science: Bruce East (20), Northumberland and Durham (20), Lanark West (24), Lincoln (24), Peterborough East (31), Wellington South (34), Wentworth (52); for Manual Training: Wentworth (48), Middlesex East (11). I am pleased to note a tendency for Rural School Trustees in advertising for a teacher to state the fact that the successful applicant will be required to teach Household Science and serve the Hot Lunch.

The impression that it is not possible in Household Science to give any instruction that is of value without the provision of separate rooms, elaborate equipment and specially trained teachers is rapidly disappearing. Where conditions exist that make those features possible, of course the best work can be done, but even where they cannot be realized much may be done towards giving definite useful instruction in the cardinal principles of home making which should be learned by every girl, and the elementary use of tools which should be learned by every boy. There is certainly not a single Rural School where some practical work in sewing and some valuable lessons in the care of the home may not be given. As for working it is doubtful if there is a single school so small and so helpless that it is unable to use the hot noon day lunch as a method of approach to this branch of the subject.

Various types of simple equipment have been designed to fit the limited space of the one room school and recipes and methods worked out to meet the peculiar requirements of Rural Schools. These are outlined in the Manual "Household Science for Rural Schools." The same is done for Manual Training in the Manual issued by the Department.

During the past year in answer to a circular letter requesting particulars regarding the introduction of Household Science and methods of serving the school lunch, I have received about 200 replies. These letters are most interesting and in many cases present a vivid picture of rural school conditions and difficulties and after reading them one is impressed with the whole-hearted unselfish enthusiasm the rural school teachers of this Province are carrying on their work often under the greatest difficulties. The greatest possibilities of work of this character which has a particular usefulness for the country child cannot be achieved until the township is substituted for the section as the unit of rural school administration.

ALBERT H. LEAKE,
Inspector of Manual Training and Household Science.

Toronto, December, 1926.

APPENDIX G
REPORT OF THE INSPECTOR
OF
ELEMENTARY AGRICULTURAL CLASSES
PUBLIC AND SEPARATE SCHOOLS

The tables given in this report represent the situation respecting Elementary Agricultural education at the close of the year 1926. A comparison of these tables with those of former years will show that gratifying progress has been made, so far as numbers are concerned. Steady progress is being made, not only in the number of schools undertaking this type of work, but also in the quality of the work done.

The results of the efforts put forth to develop Agricultural education in the elementary schools are becoming more and more apparent in the improved condition of the grounds and gardens. This improvement stimulates an interest on the part of parents and others in their schools and in educational matters generally. Trustees, parents and other ratepayers are taking a greater interest in education than ever before, and this is partly due to the influence of agricultural education in the schools.

The following facts and figures show the situation at the present time:

The number of public and separate schools qualifying for grants each year, commencing in 1903, is given in the following table:

Year	No. of Schools	Year	No. of Schools	With School Gardens	With Home Gardens
1903.....	4	1914.....	264	208	56
1904.....	7	1915.....	407	222	185
1905.....	6	1916.....	585	324	261
1906.....	8	1917.....	989	466	523
1907.....	2	1918.....	1,020	588	432
1908.....	14	1919.....	1,408	618	790
1909.....	16	1920.....	1,648	702	946
1910.....	17	1921.....	1,804	690	1,114
1911.....	33	1922.....	2,047	796	1,251
1912.....	101	1923.....	2,288	843	1,445

School Fairs

School Fairs are becoming more and more an established part of rural school education. These Fairs are managed jointly by the Agricultural Representative of the County and the Inspector and teachers of the schools concerned.

High Schools

The secondary schools which maintain classes in Agriculture are given in the table. Each of these sixty-nine schools was visited at least once during the year.

In the following table, "x" indicates that Agriculture was carried on during the term specified and "o" indicates that the work has either not yet been introduced or has been temporarily dropped.

Courses are provided at the Ontario Agricultural College covering two summers of five weeks each. These courses were introduced in 1913, and the following list gives the number of teachers who have so far qualified each year for an intermediate certificate in Agriculture:

1914, 12; 1915, 10; 1916, 15; 1917, 15; 1918, 9; 1919, 21; 1920, 25; 1921, 24; 1922, 33; 1923, 20; 1924, 15; 1925, 12; 1926, 32.

Below are the names of those teachers who qualified in 1926:

Aitchison, Jessie B.	McCamus, L. D.
Bird, J. Norman.	McEachran, Mary.
Cavell, H. E.	McVicar, Archibald.
Christopher, W. H.	Millar, Dorothy E.
Curtis, C. H.	Mole, W. H.
Dundass, Clara.	Morgan, J. C.
Fydell, M. R.	Mustard, Chas. A.
Fydell, W. A.	Nelson, A. E.

Normal Schools

Teachers-in-training for First and Second Class certificates receive some instruction in methods in Agriculture in the Normal Schools, and some practice-teaching in this subject in the Model Schools or other affiliated schools. The accommodation for laboratory work is very limited in all of the Normal Schools, partly because of the increased attendance as compared with the attendance at the time the buildings were erected. In these schools the teachers of Agriculture are exceedingly capable, and splendid results are apparent even with the limited accommodation and equipment.

Summer Courses

The attendance at these courses is increasing year by year, and the character of the work given by the Ontario Agricultural College and the Kemptville Agricultural School is very effective. Teachers seem to need this experience to round out their academic qualifications in order that they may prove efficient as teachers of rural schools.

The following table shows the attendance at the Summer Sessions in Agriculture since 1911:

Attendance at the Ontario Agricultural College Summer Courses in Agriculture

Year	Elementary				Intermediate					Inspectors		Farm Me- chanics	Total	
	I		II		I		II		III	Parts				
	Men	Women	Men	Women	Men	Women	Men	Women	Men	I	II

To show that the teaching of Agriculture is appreciated by the trustees and others, a few statements are here given. These are taken from the Annual Report sent to the Department of Education.

S.S. No. 1, Nichol.

The garden was a decided success. Enough vegetables were grown to provide for the school lunch until Christmas. The pupils came during vacation and looked after the plots.

MYRTLE STAIT, Teacher.

S.S. No. 9, Bastard.

We are very much pleased with the work carried on in Agriculture and believe it is the best thing we can have to encourage pupils to take an interest in and perhaps make a life work of the basic industry of our country.

Trustees { JESSE BROWN.
R. C. HOSKIN.
C. G. MYERS.

S.S. No. 3, Binbrook.

I think the Agriculture work in connection with the school is a splendid thing for the children and consider it is time well spent.

Trustee A. HILLGATHER.

S.S. No. 5, Caradoc.

S.S. No. 5, Caradoc, has a fine school garden, well laid out in plots and well attended to. The teacher and pupils deserve credit for the interest they have shown in Agriculture.

STANLEY E. TROTT, Sec'y-Treas.

J. B. DANDENO,

Inspector of Elementary Agricultural Classes

Toronto, December, 1926.

APPENDIX H

REPORT OF THE INSPECTOR OF PUBLIC LIBRARIES

Following is a report of the Public Libraries Branch for the year 1926, and the statistics, etc., of the public libraries of the Province for 1925; also a statement of the grants paid in 1926 to public libraries.

Summary of Progress

1. Ontario has 505 public libraries on the 1926 list, an increase of nine over 1925.
2. The recorded patronage of public libraries shows an increase of 943,233 books borrowed, bringing the total circulation to 10,179,374 for 1925.
3. One-third of the population (largely rural) is still without local public library service. Slight progress was made in reducing the number of bookless communities by the establishment of nine new libraries, and by carefully placing 354 travelling library stations.
4. Expenditure for books by public libraries was increased by \$15,000 in one year and is still inadequate to meet the needs of the large patronage of the libraries.
5. Two new public libraries were erected, one was enlarged and remodelled, and several buildings were either purchased or leased for the improvement of library accommodation.
6. The Ontario Library School trained thirty students for the library field.
7. The *Ontario Library Review* was published quarterly as usual.
8. The Inspector of Public Libraries was appointed on the permanent Adult Education Board of the American Library Association after having served on the Commission on the Library and Adult Education during the years of investigation. He was also appointed a member of the advisory committee on professional training for librarianship.
9. Several of our libraries have been giving attention to adult education by co-operating with other adult education agencies and by introducing independent programmes.
10. The travelling library service has reached the maximum of its possibilities with its present organization and equipment.
11. Toronto was chosen as the 1927 meeting place for the American Library Association. Dr. George H. Locke, Chief Librarian of the Toronto Public Library, was elected president of that international organization in October, 1926.

Ten Years Ago and Now

Public libraries and many other forms of public service may show a certain degree of advancement from year to year that may mean little or may mean much, whereas a background of five, ten or twenty years may bring out in a striking manner the trend of an institution's development. The following pairs of statements are presented in order to bring out comparisons and contrasts:

TEN YEARS AGO

Ontario had 395 public libraries.
 Circulation (1915) was 4,947,282.
 Total expenditure by public libraries,
 \$553,915.
 Expended for year's purchase of books,
 \$67,000.
 Legislative grants (1916) \$31,233.
 Population with public library service,
 1,530,538.
 Travelling library stations, 115.
 Very few trained librarians and assistants.

Had no regular library school.

Not more than four or five trained children's librarians.

No regular means of disseminating library information and a laquate advice on book-selection.

Now

Has 505 public libraries.
 Circulation (1925) was 10,179,374.
 Total expenditure (1925) \$1,094,954.

Book Expenditure (1925) \$201,516.

Grants (1925) \$47,885.
 Now 1,834,199 people served.

Travelling library stations, 354.

Ontario has now 375 trained librarians with academic standing of matriculation to university graduation.

Has a library school established on a permanent basis.

Fifty library assistants have specialized in work with boys and girls.

The *Ontario Library Review* is issued quarterly for the purpose of informing librarians and trustees. A book-selection guide gives an annotated list of approved books suitable for public library purchase. A copy reaches every librarian, library assistant, and library trustee in the Province.

Adult Education and Ontario Public Libraries

Library service in the interest of adult education is a subject that has been attracting the attention of librarians and leaders in the adult education field for the last few years. References have been made in former reports and in departmental publications to my work as a member of an international commission on adult education. The aims and objects of the investigation have been outlined in those documents. The enquiry has been completed and the report of the commission issued, and I feel that I should present a brief statement on the public libraries of Ontario in their relation to adult education. I will comment on the problem as a whole, and make reference to some of the interesting experiments that were tried in our libraries in the year 1926, and point out a few necessary conditions that should be created in order to make possible the working of a satisfactory adult education programme by the public libraries of Ontario.

Experience on both sides of the Atlantic has convinced all who have studied adult education conditions of the need for emphasizing that all who wish to promote even a single type of adult education agency, should become familiar with the principal types of agencies offering educational service to adults and to older boys and girls out of school. We have lost no opportunity for advising our librarians and library trustees to make use of the reports on the adult education enquiry in Great Britain and of the report that was issued in the interest of the libraries of Canada and the United States. The last mentioned document contains a chapter which I prepared in the interest of Canadian libraries. This chapter was reprinted in the *Ontario Library Review*, November, 1926, and distributed freely to the libraries throughout the Dominion. I am convinced that librarians and trustees who are responsible for local library service will never formulate a satisfactory library programme in the interest of adult education without becoming informed to some extent on the subject of adult education as a whole.

All public libraries should give attention to two forms of adult education library service: (1) assisting in meeting the book needs of local students who are receiving instruction from other adult education agencies; (2) giving direct service to those who wish to engage in serious study. This means that a library should have a programme for co-operative work and one for independent work. **A**

local board with its librarian must needs study local adult education agencies, the kind of work they are doing and the way they are doing it, in order to discover the library's place in supplying the book needs of teaching agencies and of self-organized groups.

Direct service is a subject that presents several considerations: (a) The extent to which the library can go in advising and supplying the book needs of individuals; (b) the possibility of enlisting the goodwill of local specialists to assist in elaborate advisory work; (c) the extent to which the library might reasonably expect to benefit from printed information on advisory work and from co-operation with other public libraries in relation to advice and book exchange; (d) the extent to which the local library could develop its work with the assistance of a central bureau capable of giving information and advice and possibly loans of books that come outside the range of the library's collection; (e) the developing of the right kind of talent for assisting serious students.

Several of our libraries are giving attention to adult education service and some interesting experiments are being made; a few of the more notable examples are worthy of mention here.

Toronto—Intensive experiments have been made in the public library. Dr. Locke's policy has been to select items in his programme and make an intensive application of them. The Beaches district was selected for developing certain services with the object of reaching the whole community. Steps were taken by the librarian, Miss Jessie Rorke, to make the library a community centre for persons interested in literature, art and the drama, and for promoting interest in systematic reading. Well attended monthly meetings are reported, at which specialists gave lectures on literary subjects. Canadian literature received special attention. Exhibits and lectures contributed to the interest in art. Lectures and readings by library patrons were a feature in the interest of the drama. Two plays were given in the library during the year, and three plays each month were acted without stage equipment. Nine courses of systematic reading were prepared and placed before the patrons of the library. All of them were used and there was a large demand for advice on the selection of books on business subjects, psychology and literature. Toward the close of the year a business girl's club was organized at the library.

Miss Annie Millar, of the Western Branch, has developed special services for boys and girls of high school age. A room was equipped as a reading room for high school students and young people of the same age who had left school. The chief librarian is especially pleased with the results which have been attained in encouraging good habits in reading and study. The success of this work at the Western Branch is responsible for the introduction of high school sections in other branches in the Toronto library system.

Reading courses and co-operation with a business concern were assigned to the College Street Branch. The use of courses of related reading was promoted in an aggressive manner in order to discover the feasibility of giving extensive service in this line. The experiment in co-operation was tried with the Bell Telephone Company, and the results were very pleasing to both the library and the company. The first co-operative undertaking was wholly in the interest of the study of telephony. A library assistant and a representative of the company prepared the necessary advisory documents which enabled employees of the Bell Telephone Company to study any one or more of the several phases of the subject of telephony. The second extensive trial was on a subject of more general interest and with less of the vocational aspect.

Ottawa—A considerable amount of serious work in the interest of adult education has been carried on in this city for a long time. The librarian, Mr. W. J. Sykes, reminds us that all well directed library service is adult education. I think we will all agree with his statement. In addition to the well directed work which has been in vogue in this library for many years, Mr. Sykes has not only developed some new adult education services in an independent way and in co-operation with other institutions, but his work in preparing reading courses has been of value to Ontario public libraries at large. This library placed a note in the Ottawa newspapers to the effect that the librarian would be in his office certain evenings to discuss with and advise persons wishing to pursue definite lines of study. There was a response to this invitation and, while the librarian expected a larger number of visitors in quest of assistance, we take the view that the work was quite worth while, on the ground that every aimless reader who becomes a serious student, has not only gained a great deal himself, but he becomes a greater asset to the community.

In preparing reading courses in literature, a branch of study in which he is a specialist, and in writing on the subject of reading courses for publication in the *Ontario Library Review*, Mr. Sykes has performed a good service for the Department of Education and for our library field as a whole. Amongst other adult education services rendered by this library may be noted co-operation with the technical schools of Ottawa; preparation and distribution of selected lists of books, notably in history and science; and co-operation with university extension classes. The Workmen's Education Association, and other adult education groups, have used public library rooms for classes for several years, and the librarian has frequently served as an instructor in English and history.

London—The librarian, Mr. Richard E. Crouch, was engaged in university extension work before he was appointed librarian at London; therefore, he possesses an intimate knowledge of part-time education as given by universities to extension, extra-mural and summer-school students, workmen's education groups, etc. This library has been working in close co-operation with the University of Western Ontario. Mr. Crouch is strongly of the opinion that a city library should have amongst the assistants on its staff a few trained librarians with specialized knowledge of the literature in those branches of learning in which adult students are most interested. His plans call for a system of private study on the part of certain members of his staff. The assistants who will direct their attention toward becoming specialists in readers' advisory work have chosen branches of study in which they have already had a certain amount of academic training. As an example of what is to be done, I cite the proposal concerning the social sciences. Mr. Crouch is himself a specialist in this department; he will direct a systematic study and enquiry on the part of an assistant that will add to her ability to assist and inform readers who need advice on books pertaining to sociology. The same idea will be carried out for history, art, natural science, and literature.

While this phase of the London programme is receiving attention there will be a further development in the library's co-operation with workers' education, university extension, evening classes, etc., as well as special services to individuals wishing to follow particular lines of study.

North Bay—The report from the public library as presented by Miss Jean Davidson, librarian, shows that a definite, well planned programme was made and put into effect. I quote the following from the report:

1. A survey of adult education agencies in North Bay was made: Normal School; Collegiate Institute; St. Joseph's Academy; business college; evening industrial classes; classes for prospectors under the authority of the Department of Mines; Women's Canadian Club; I.O.D.E.; Lion's Club; Rotary Club; Horticultural Society; Agricultural Society; university extension classes; engineering classes.

2. Co-operation has been arranged with the following: University extension groups; Stationary and Hoisting Engineers in supplying books required by candidates for examination, and free use of library rooms for examination purposes; the I.O.D.E.; the city schools.

3. Readers' advisory work in assisting individuals in the selection of books for serious study, and especially in arranging courses of related reading has been further developed. The use of standard reading courses was encouraged as well as courses that were prepared locally.

4. Special service was given to serious students living outside North Bay, notably to teachers taking extra-mural university work and to persons needing material for the preparation of addresses.

Windsor and Walkerville—The public libraries in these two places are doing considerable work together in the interest of adult education. These libraries have been carrying on an aggressive campaign for systematic reading and home study, and have received a great deal of encouragement from institutions engaged in adult education. They have enlisted enthusiastic allies in Canadian, Rotary and other clubs. A number of standard reading courses, particularly some of Canadian origin have been used to good effect. An especially commendable policy has been adopted for reaching young people. Contacts have been made with the teachers of the several schools. The two librarians are strongly of the opinion that, if the library habit is formed by boys and girls, they will be likely to extend their education in after school days. Miss Agnes Lancefield, of Windsor, and Miss Annie I. Hume, of Walkerville, have submitted informal reports to the Department. The nature of the work launched by their libraries is such that very little can be reported until time has played some part. Seed sown in adult education rarely bears visible fruit in a short period.

Kitchener—Miss B. Mabel Dunham, librarian of the public library, in her report makes reference to an interesting adult education service for the benefit of foreigners who are unable to speak English. This is given in co-operation with teachers of evening classes and to individuals who call at the library. A careful study has been made of books in easy English for the purpose of forming a special library to assist new Canadians in gaining a knowledge of the English language.

Letters have been sent to boys and girls about to leave school pointing out the opportunities that are at their service in the library for extending the education gained in school. A special room has been equipped for boys and girls of high school age.

Contacts have been made with clubs such as the Rotary, Kiwanis, etc. The latter organization's work in the interest of adolescent boys has given the library opportunities for co-operation. The Rotary Club is assisting the library in promoting interest in books pertaining to Confederation; many other organizations will be enlisted to help the library in drawing attention to Canadian historical works during the year of the diamond jubilee of Confederation.

Considerable publicity work of a direct character was carried on during 1926, a large part of which was vocational. An example of the latter type of

work was the compilation of a reading course on the rubber industry. The lists were taken to the rubber factories and the companies inserted a copy in each of the pay envelopes. Other brief, carefully selected lists were prepared by the librarian on the following: Wireless and Radio, Business, What to read about Canada, Electricity, Travels in Canada, Books for the housekeeper, Standard biographies, Great and near great fiction, and the World of missions. The latest compilation by the staff was a selected list of Canadian books for boys which was issued under the following headings: Pioneer Life, Historical Stories, Indian and other Legends, Everyday Stories, Animal Stories, Poetry, Out-of-door Life, Stories of Adventure, Nature Books, Biography, Description and Travel, and History.

Peterborough—A considerable amount of co-operative work has been reported by Mr. F. M. DeLaFosse, librarian. Work is being accomplished with the Shakespearean Society, the Fortnightly Club, the Women's Art Association and the Canadian Electric Company; this latter service for the purpose of assisting employees in vocational study. Work was begun with several service clubs and similar organizations largely for the purpose of interesting the members in encouraging good reading habits on the part of boys and girls.

The library has given service to students in the country in the neighbourhood of Peterborough.

A considerable amount of publicity work in the interest of adult education has been carried on through the newspapers and by means of addresses to societies and church organizations.

Stratford and Woodstock—These two libraries are interested in launching programmes in the interest of adult education. Both have reported co-operation with university extension classes. Woodstock gives free use of a library lecture room for university and other adult education classes.

Owen Sound—Miss Mary Flarity, librarian, reports progress:

1. The library is serving a number of persons who are taking extra-mural courses in universities, amongst them are a few teachers who are studying for bachelor of arts degrees.

2. Study groups are receiving special service.

3. A number of standard reading courses have been offered to the public, and there has been an encouraging response. Courses received from the Public Libraries Branch have been used to good advantage, and courses have been prepared locally.

Miss Flarity refers to the need of more co-operative work amongst Ontario public libraries and the need for advice and help from the Department of Education.

Preston and Norwich—A town and a village deserve the following comment: Miss Florence Cameron, librarian of the Preston Public Library, has given considerable attention to the adult education opportunities that lie before her library. Selected courses from the standard series issued by the Adult Education Commission have been used to good advantage. A course of study in Canadian history supplied by the Public Libraries Branch and four reading courses in English literature prepared by Mr. Sykes of Ottawa were offered to and used by the public. Co-operative work has been arranged with the Preston Technical School.

Mrs. M. J. Addison, librarian at the village of Norwich, applied to the Public Libraries Branch for information on standard reading courses. We

hope to gain knowledge of the possibilities of library service to adult students amongst the rural and village libraries of the Province through progressive librarians like Mrs. Addison.

Leadership Needed in Adult Education Work

Like people engaged in other kinds of work, librarians and library trustees are not all blessed with the power of initiative or with progressive tendencies. Coupled with this inevitable condition, a large proportion of our libraries are in small communities where the library's income is very meagre and the librarian is a part-time worker. Central leadership is probably more needed in the library field than in the educational institutions that can afford a trained worker in every community. The progressive library here and there can render a fair quality of adult education service, but the great majority of our communities, including not only rural districts, but towns and cities will fail to give reasonably adequate service to serious students if left to their own unaided resources. The investigations of the Commission have shown that the best equipped library needs central assistance and the advice of specialists as well as the benefit of co-operative undertakings.

My Canadian chapter in the Report of the Commission refers to provincial leadership. Attention is drawn to the British report on the investigation into adult education which was made on behalf of the British government. There a statement is made to the effect that an adult education scheme is a "permanent national necessity," and that plans for the development of an adult education scheme should provide for a solid foundation in the belief that adult educational opportunities ought to have a place in educational programmes for the future.

The considerations for a Canadian programme which I prepared in the light of the two years of investigation include a number of recommendations to local public library boards. Item number 4 contains the essential features of a satisfactory provincial programme. Ontario has already provided some of the necessary conditions for the development of satisfactory adult education work. We have a first-class library law in the Public Libraries Act. It contains all the features required to enable library boards to give adequate service to their communities, and it gives the Minister of Education wide powers for the encouragement of public libraries including service to libraries in their advisory work. We have surveyed our adult education field. We have a Public Libraries Branch; Travelling Libraries and the Ontario Library School, and in a small way other kinds of service that would contribute materially to the development of adult education if there were a more vigorous application of them. The outstanding needs for this work in our public library are as follows: (a) The strengthening of the Public Libraries Branch to provide larger and better advisory service, (b) an extension of our professional training school, (c) provision for central book service to assist average and smaller libraries and isolated students; Ontario is notably weak in this respect.

Travelling Libraries. Library School

Travelling libraries are giving the maximum service that our present conditions will permit. We can expect very little increase in this work without making larger provision in the form of more extensive accommodation and more personal service. All applications were filled during 1926. Present

conditions simply mean that it would be unwise to popularize further the travelling library service.

The Ontario Library School is doing good work considering the length of the course, the first week in September to the third week in December. The Province is now ready for an academic year course, and I believe it would be wise to establish a summer course that would serve librarians of small public libraries and teachers who wish to gain knowledge of modern librarianship.

Statistics

I present on pages 261-269 a statement of the statistics of the Public libraries of the Province.

W. O. CARSON,
Inspector of Public Libraries.

Toronto, February 9th, 1927.

APPENDIX I

REPORT OF THE

INSPECTOR OF AUXILIARY CLASSES

The number of Auxiliary Classes for abnormal children in Ontario and their distribution is as follows:

Training Classes—Belleville, 1; Brantford, 1; Brockville, 1; Chatham, 1; Cobourg, 1; Galt, 1; Guelph, 2; Hamilton, 9; Kitchener, 2; Leamington, 1; London, 7; Midland, 1; Ottawa, 4; Oshawa, 1; Owen Sound, 1; Peterborough, 1; Parry Sound, 1; St. Catharines, 2; Startford, 1; Toronto, 51; Walkerville, 1; Welland, 1; Windsor, 4; York County, 2; Windsor Separate School, 1.

Sight-saving—Hamilton, 1; London, 1; Toronto, 3.

Orthopedic—Toronto, 2 classes; Ottawa, 1 class; Toronto, 4 visiting teachers.

Hospital—Toronto, 4; London, 1.

Open Air and Forest Schools—Toronto Separate Schools, 2; Toronto Public Schools 3 and 2 forest schools.

Preventorium—Hamilton, 1; London, 1; Toronto, 2.

Lip-reading—Toronto, 1; Visiting teachers, Toronto 2; Hamilton, 1.

Institutional—Toronto, 4.

Promotion—Hamilton, 2; London, 2; Ottawa, 6.

Special Industrial—Toronto, 20.

This makes a total of 165, being an increase of 16 during the year.

Auxiliary Class surveys have been conducted in the following places: Cobourg, Birchcliffe (York County), Bowmanville, New Toronto, Parry Sound, Rawlinson (York County), Southampton, Waterloo, Whitby, Weston, Toronto and Ottawa.

With better knowledge of the situation and longer experience the character of the work in all types of classes is becoming steadily more efficient.

Orthopedic Classes

In 1925 the Auxiliary Class Regulations were amended to provide a grant of fifty per cent. of the cost of transportation of a child to an orthopedic class. Under this amendment in 1926 Toronto established two classes and Ottawa one class for crippled children. The children are carried in and out of the bus and, in the classroom, are provided with chairs and other equipment suited to their respective needs. They remain at school for lunch. There have been no accidents; there has been a full attendance and the results are most gratifying, far outweighing the extra trouble and cost involved.

Advancement Classes

The average age for pupils to pass the high school entrance examination is above 13 years. This examination is sometimes passed by a child of only ten years. A standardized intelligence examination test usually reveals that this child has an I.Q. or Intelligence Quotient of at least $\frac{1}{10}$, i.e., of at least 130 per cent. Speaking generally, in the schools the children having an I.Q. above 130 per cent. would constitute nearly one per cent.

The Auxiliary Class Regulations for Ontario since 1914 have provided for the establishment of "advancement" classes for children of this type. The proposal is to place 32 of these children in a class under a teacher with special aptitude and preparation for this work, and give them in addition to the ordinary school course of study (or a modified equivalent) a certain amount of cultural training to prepare them for leadership in after life and at the same time allow them to go forward in their regular work at their natural speed without hindrance.

Perhaps the greatest advantage of such procedure is that it would relieve the normal children from discouragement and would narrow the span of mentality of the ordinary school class by about 25 per cent. It would allow the gifted children to cover all the course of study and be promoted when they should be, instead of skipping grades as is often the case, or being held back by slower pupils. It would afford an opportunity to give better attention to their physical health, thus saving the most gifted for public service. It would also afford an opportunity to discover in what ways their special gifts might be developed. It would prevent them from forming habits of laziness and from a conceit likely to be engendered in the pupil who is always the brightest in the class.

There are also children (not necessarily of very high I.Q.) who by nature are fitted to become renowned in some special field of activity, social, mechanical, musical, etc., who require to be selected by other special tests and trained in a way best to develop their natural bent.

From time immemorial, gifted teachers have discovered gifted pupils in their schools or classes and have given them extra attention, often after school hours or at their own homes.

It would be interesting to know how many of those who have reached and maintained positions of eminence in the realms of literature, art and science in the educational, political, social and economic worlds have attributed their successful achievement to the fact that during school life they came under the spell of a gifted teacher of strong personality who with prophetic insight discovered that the child possessed unusual aptitudes and powers and while taking him carefully over the beaten tracks of the historic school curriculum allowed him to tread them rapidly at his natural speed and then instead of asking him to sit down and wait for his slower comrades led him far afield to more strenuous individual effort, wider horizons and more complex problems.

It would also be of value in preparing courses of study if we knew what forms of special assistance they had found to be of most worth.

Classes for gifted children have been conducted elsewhere for a number of years. For example, in the United States, after some ten years' experience, there are now 45 cities with classes for specially gifted children; Cleveland alone has 16 classes.

The course has been enriched by the addition of such subjects as supplementary reading, French and group activities of various kinds. In Ontario for at least half a century gifted pupils in many schools, particularly rural schools, have been promoted when ready to go forward. In many others they have been allowed to skip grades. Recently a number of city schools have graded their pupils into three ability groups, high, medium and low.

The chief difficulties to be overcome in the establishment of special classes for gifted children are the provision for the extra cost involved, the selection of a satisfactory course of study and the securing of a teacher born and trained for this special work. Great care should be exercised to have a well informed

sentiment in favour of the innovation on the part of local school board and staff and to avoid anything which would attract public attention or emphasize the difference between these and other pupils.

A Confidential Provincial Survey of Institutional and Special Class Children

It can be demonstrated that in any area of dense population where all the children of an auxiliary class can walk to the school the advantages of special training can be secured at practically the same cost as would be incurred by leaving the child in the ordinary school grade. During the past six years Ontario, beginning with its largest cities, has rapidly established classes in cities and towns until the point has been reached where nearly all areas where transportation is unnecessary are being provided for or will be in the near future.

In the case of villages and rural districts where transportation is necessary there must also be co-operation of several school boards in order to establish a class.

We are therefore now faced with the question what can and should be done for the abnormal children who would require transportation to an auxiliary class and who reside in different school areas. Their number and needs are probably quite as great as of those who are now being provided for. On educational, economic and social grounds it is desirable, that as a first step in the solution of the problem, the number and location of all Ontario children under 21 years of age who should be placed in special classes or in an institution, be found.

The inspectors and teachers of the Province not only have much of this information already available but are so situated that in their work they can make a further study of the situation without serious inconvenience and without additional cost.

They are by natural aptitude, training and experience specially fitted to undertake such investigation. The survey can be carried on privately without attracting public attention and can easily be repeated. When classes are subsequently established they automatically become an organic part of the school system similar to a regular class.

It was therefore decided to make a general confidential survey of the Province with the assistance of inspectors and teachers. As a preliminary the inspectors of the province held four conferences at London, Ottawa and Toronto (2), and devoted three days to the study of intelligence tests, auxiliary classes and institutions for the care of children. The lecturers were the Chief Inspector of Public and Separate Schools, the Auxiliary Class Inspectors, the Director of Child Welfare and the Professor of Educational Psychology of the University of Toronto. The plan of procedure of the survey was carefully worked out at these conferences and at the conclusion of each conference a unanimous vote was passed suggesting that it would be well if similar conferences could subsequently be held.

The Auxiliary Class Inspector visited the Normal Schools and addressed the students on the subject of abnormal children. The inspectors at teachers' conventions or at other meetings, discussed the proposed survey with the teachers. Blank forms were sent out to the inspectors to be filled in by the teachers. A summarized report of each inspectorate was subsequently sent by the inspectors to the Department.

Inspectors and teachers everywhere have undertaken the work with an energy and enthusiasm worthy of the highest commendation. An interest in child study has been aroused which, apart from survey results, will be of inestim-

able value. Teachers are understanding their pupils better than before, and, knowing their individual needs, are becoming better prepared to render each child more adequate assistance in the development of all that makes for efficient citizenship.

The reports indicate that the inspectors and teachers have exercised great care in collecting information and that the findings are sufficiently accurate to form a working basis for future procedure.

The total number of cases reported for special classes is 8,213 and the total for institutions 1,036.

The report suggests many interesting questions. For example, what can and should be done for the 2,464 special class children who are reported from Rural Schools? Could Normal School students be trained to more accurate diagnosis and more satisfactory treatment of the abnormal child who continues to attend his home rural school? Would it be possible to have him receive individual lessons at his own home given by a visiting teacher from the neighbourhood, e.g., the teacher of the school or a qualified parent? Could lessons be given him by a specially trained visiting teacher appointed for the township or district? Could a special class be organized in a village and cases from surrounding rural districts be brought in on Monday morning and returned to their homes on Friday night? Similarly of the 454 institutional cases reported from rural and 582 from urban districts, how many can be properly cared for at their own homes without cost to the country and what provision should be made for the remainder?

S. B. SINCLAIR.

Toronto, March 1st, 1927.

APPENDIX J

REPORT OF THE PROVINCIAL SCHOOL ATTENDANCE OFFICER

Attendance is the fundamental factor in the educational fabric. We must have schools and curricula, teachers and supervisors, organizers and executive agencies, but it is for the child that the entire structure, both physical and human, exists. The school with the teacher in place is the unit of the system and it is for the administrative body to see that it is distributed as widely as the need. But, grant this postulate, and it still remains that even the 100-per-cent. teacher fails altogether to function for the absent child and less than half for a shifting 50 per cent. attendance. The child *present* is the key to service and efficiency.

Further, it is for him that the state has made its vast and growing investment in education; for him it has built up its elaborate organization, province-wide in scope, founded on principles that are the product of centuries of study and experience, systematized to the last degree and manned by the most skilled and best-trained teachers and directors it can supply. Would it not be a travesty if, with the stage full set, the child for whom all existed should prove elusive and evade its grasp? On his presence depends not only his own ultimate success in life, but, as well, the security and progress of the state itself, which is devoting its means and energy to this end. Should it not, therefore, aim to bring the last child within the range and play of the educational forces which it so generously provides?

On the ground of ethics and of social justice every child is entitled to an education commensurate with his capacity and his needs. To make this possible the state has thrown down the barriers, both social and financial, of race and class and creed as far as conditions will allow. It has made easy the way of access through free institutions where each parent pays only in proportion to his power. It is fast bringing its programme up to the measure of its ideal that no child be denied. It might well be conceived that, under these conditions, there would be but few children who would not find their way to school. The natural influences operating upon them,—parental care, the sense of need, the force of custom and the social urge might be deemed sufficient. But there are limitations, both physical and human, that all the forces available cannot altogether surmount,—personal handicaps of the child, isolation of home, climatic and geographical conditions, and, not least, the failure, too often, of parental responsibility to function as it should.

Just here the Attendance Act, as a wisely devised measure of support, comes into play. Taking due cognizance of all insurmountable limitations, it is designed to remove obstacles and to supplement and strengthen all positive forces that surround the child, and thereby to convert the needful and possible, in the way of school attendance, into the real.

The Attendance Act

The Act does nothing more than crystallize the general will of the intelligent citizenship of the province in relation to the school rights of the child and give it working form. The simple machinery that has grown up under it is in the way of a practical guarantee that the growing child shall have a chance. "Every child between eight and fourteen years of age shall attend school, etc.," is not in

essence an arbitrary encroachment upon parental liberty; it is the child's own declaration of rights, worded from the standpoint of the state—a sort of magna charta of his claims upon home and community and state. It is the legal instrument whereby the inarticulate voice of the helpless child finds expression, calling in due time to the protective forces about him to forefend disaster from him in the days to come. Prior to this formulation of his rights in law, he might, in his innocence, and with his parents' connivance, follow his own whims, and become the sport of chance or the prey of ulterior forces to his own undoing. The words of the compulsory clauses of the Act simply record in terms of time the minimum which the child needs of mental and moral equipment to fit him for the battle of life.

Attendance in Relation to General Population

What actual service has the Act rendered in this direction? Since the reconstructing of the original Compulsory Education Act in its present form, a

Fig. 1

Figure 1. A-A Increase in total enrolment of all Public and Separate Schools, 1910-1925.
 B-B Increase in total enrolment in Urban Schools.
 C-C Increase in provincial population reduced to a common base with A-A.

new impulse has been given to the movement for larger and more regular attendance. The facts are graphically presented in the preceding diagram:

This figure furnishes an illuminating study. There is an increase in total school enrolment of 154,881 from 1910 to 1925. The urban increase accounts for 148,373 of this number, leaving only 6,477 for rural increase during the period. Otherwise expressed, whereas in 1910 the rural and urban school populations were almost on a par, by 1925 they stood 39 per cent. to 61 per cent. of the total, respectively, a gain of 22 per cent. for urban areas. It is evident that the city-ward movement is going on apace of both the local rural population and the newcomer to the province.

Equally instructive is the relation between the growth in general population and that of school enrolment. From 1910 to 1915 the school failed slightly to hold its ground with advancing population. During the war years, when immigration ebbed and a heavy draught was made on adult population, the school caught up with its task. In 1920-1925 it forged ahead and far outstripped the increase in general population, showing that the school was not only caring for the full quota of increase, but was garnering in many who had hitherto eluded the claims of the school upon them.

Enrolment and Average Attendance

Urban centres, by reason of their compactness and the accessibility of schools and homes, present a minimum of difficulty for the child, and admit of close co-operation of attendance staffs with teachers and parents where action is required. But rural areas, by way of comparison, present quite a different problem, to their disadvantage. In rural sections climatic and geographical conditions count against the child and obstacles meet him which cost both time and courage to surmount. In the districts and less settled parts of the counties these material handicaps reach a maximum and the school rating must suffer by comparison with that of urban areas and the better settled counties.

Each class of school shows a steady and appreciable increase in average attendance, the district schools leading in the uniformity and range of improvement. The spread between the classes in 1910 is gradually narrowing, the rural schools rising in efficiency and approximating the higher grading of the urban schools. A stationary condition is registered during the war years. The sudden drop in 1918 is due to the fatal wave of influenza which swept the province in that year, the district schools suffering less than the county schools because of the isolation of the territory. The rapid rise in 1920-1925 is due partly to recuperation from the war, but more especially to the efficient application of the Attendance Acts, which came into operation during that period.

A truer index of the character of attendance is the relation between actual and possible aggregate. The latter figure simply eliminates impossible attendance from the calculation and considers only the time a child can and should attend. The upper series of graphs indicate the average percentages on this basis for district rural, county rural, and urban schools. The data for this calculation was not available before the year 1921. It will be noted that the spread between the three classes is still further narrowed. A striking fact is that district schools have surpassed the county schools in the attendance average for 1925. On the whole the conditions are commendable.

The following diagram shows the percentage average by years of each of the aforesaid classes of schools from 1910 to 1925 inclusive:—

Figure 2. A-A Percentage of average to total enrolment—District Rural Schools.
 B-B Percentage of average to total enrolment—County Rural Schools.
 C-C Percentage of average to total enrolment—Urban Schools.
 a-a, b-b, and c-c Percentages of above classes of schools, based on relation of actual to possible attendance.

Attendance of Adolescents

The care of the adolescent is pressing more and more insistently upon the school. The psychologist first taught the lesson but his warning was scientific and doctrinaire and fell upon dull ears. Then the social worker and the criminologist brought home the lesson by placing partly at the door of education the responsibility for anti-social and criminal tendencies which threatened the comfort and security of the individual, the home, and the state. It is only now that we are responding. The Adolescent School Attendance Act is, in part, the answer. What, then, are we actually doing for the adolescent child in terms of retaining him under the salutary influence of the school till self-dependence and

self-control take their rightful place in his being? The following diagrams indicate the place he now holds in the regular school system:

Figure 3 (a) Total enrolment of pupils 14 years, 15 years, and 16 and 17 years of age in Public and Separate Schools.

Figure 3 (b) Total enrolment in Secondary Schools, (High, Continuation, Day-Vocational, and Fifth Classes).

The columns are so arranged as to avoid overlapping, that is to say, the columns of figure 3 (b) follow in succession the corresponding columns of figure 3 (a) and include those adolescents who have passed into secondary schools, and who are, therefore, omitted from the corresponding columns of figure 3 (a).

The following table will indicate more specifically the facts for the year 1925:—

	Aged 14 years	Aged 15 years	Aged 16 and 17 years	Totals
Public and Separate Schools.....	35,505	18,375	7,444	61,324
Secondary Schools.....	17,660	20,341	24,000	62,001
Totals.....	53,165	38,716	32,044	123,925

The following facts emerge:

- (1) the comparative equality in the total number of adolescents in Primary and Secondary Schools;
- (2) double the number of adolescents 14 years of age remain in Primary Schools, even after High School Entrance graduates are transferred, equalization taking place only at the fifteen year age;
- (3) adolescents constitute a very large percentage of the total school enrolment, viz., 12 per cent. of the Primary Schools and 74 per cent. of the Secondary Schools;
- (4) few of the adolescents are eluding the grasp of the system up to at least 15 years of age.

In view of the large number of adolescents in primary schools, a question may naturally obtrude itself. They are pyramiding between the Senior III and Senior IV grades. Are they getting the type of work best suited to them at present and of which they can make the most when their school career closes? If not, what reasonable provision can be made for those who are stalled before reaching High School grade?

Part-Time Education

Part-time education is designed to bridge the gap between the school and the vocation, the world of learning and the world of labour, for all those who are compelled to step out of school at an immature age into the working world. Home needs or the claims of honour and self-respect may demand the youth's personal earnings for his own support or that of others. He should be tided over this transitional stage with reliable counsel, definite guidance, and vocational instruction closely co-ordinated with his peculiar type of occupational employment till he passes this critical period of his career. Essentially he must be fitted for self-dependent and intelligent citizenship. The school, the home and the employer must, in the interest of the youth and of the state, join hands to this end. The organization of such a system is a matter of thought and time but it is gradually being realized. The numbers under such instruction have risen from 575 in 1921 to 2,743 in 1925 and new centres of population are being added to the list yearly which make adequate provision for this purpose.

The Unschooled Child

Caring for attendance in a province so diversified in surface conditions and settlement as is Ontario, signifies much more than merely devising ways and means of bringing the maximum number of children for the maximum time possible to the schools established at pre-determined points in certain prescribed areas. Under statutory requirement, land holdings may be recorded and census-taking of residents completed to the last child, and yet hundreds, if not thousands, of children of school age fall outside the census-taker's ken and compass. This is especially true in the districts. The vanguard of the forward march of settlement is far out on the frontiers, staking grounds for the homes of future generations. A complete system of child-accounting will not omit from its lists these needy ones. This we are endeavouring to do by providing educational facilities that cannot always fall within the conventional system. Home correspondence has been organized for isolated families whose location denies them all possible contact with schools and teachers, and it is now a boon to over three hundred children so situated. Another typical grouping of families, similarly unprovided for, is at intervals along our thousands of miles of railways in Northern Ontario. Here the right-of-way railway "gang" repeated every six miles, is the nucleus, often augmented by bushmen, jobbers, trappers, small farmers and others who prefer the wilderness to life on the travelled ways. This

situation has been met by the unique device of the travelling railway school car, equipped fully and comfortably with teacher's living room, kitchen and school compartment, the railways co-operating generously in the service. The system has fully demonstrated its value and is bringing social and educational betterment to many homes and children who would otherwise be wholly unprovided for.

March 1st, 1927.

J. B. MACDOUGALL,
Provincial School Attendance Officer.

APPENDIX K

REPORT OF THE DIRECTOR OF PROFESSIONAL TRAINING

A noteworthy feature in connection with the professional training of teachers during the year 1926 has been the discontinuance, after a duration of nearly fifty years, of Model Schools for the training of Third Class Teachers. It was in the year 1877 that such schools were established in this province, and, in spite of their limitations, they undoubtedly served a useful purpose by proclaiming the need of some degree of professional training for all teachers and by demonstrating to trustees and parents the value of such training. A survey of the progress made since the above date in both the academic and the professional training of our Public and Separate School teachers will explain why, after existing for nearly fifty years, the above-mentioned schools have now ceased to function. In the year 1877 the number of teachers and the class of certificates in the elementary schools of the province were: First Class, 250; Second Class, 1,304; Third Class, 3,926. In the year 1925 the numbers were: First Class, 1,810; Second Class, 11,900; Third Class, 846. These statistics not only show the great advance made in the standing of the elementary teachers of Ontario since the time when Model Schools were established, but indicate that the time has arrived for a forward step in the training of these teachers.

The Ontario College of Education

The total registration for the scholastic year 1926-27 is 474 as against 442 for the year 1925-26. The steady growth in the registration of extra-mural students is a happy response to the Department's effort to grant "credits" in one training school for courses taken in another training school, and thus to consolidate the training school system of Ontario. The registration in the High School Assistants' course has decreased from 273 to 240. It is interesting to note, also, that this reduction in the number of High School teachers-in-training from 273 to 240 is accompanied by an absolute increase in the number of women teachers-in-training from 166 to 171.

The registration in the graduate courses continues to increase. It is now 43 per cent. of the total registration of the College of Education. In the session just closed, twenty-two B.Paed. degrees were granted, and two D.Paed. degrees. The two approved theses, one a study of the early schools of Norfolk County, and the other a study of the mentality of the Hebrew children in a Public School in Toronto, were real contributions to human knowledge.

The academic standing of the students registered in the High School Assistants' course may be indicated thus:

B.A. or M.A.....	230
B.A. Sc.....	1
B.S. A.....	5
B. Com.....	4

Of these degrees, one was conferred by a university in the British Isles, one by a university in Quebec, and three by universities in the Western provinces.

The registration of teachers-in-training in the various courses is as follows:

The One Year Household Science Course.....	8
The High School Assistants' Course (69 men and 171 women)	240
(a) Intra-mural (64 men and 160 women).....	224
(b) Extra-mural (3 men and 1 woman).....	4
(c) July, 1926 (2 men and 10 women).....	12

The registration in the various specialist courses is as follows:

(a) Registration in Specialist Courses (intra-mural):	
Classics.....	7
English and French.....	12
English and German.....	1
English and History.....	20
French and German.....	12
French and Spanish.....	6
Household Science.....	4
Mathematics and Physics.....	7
Science.....	6
Agriculture.....	5
(b) Registration in Specialist Courses (extra-mural):	
Classics.....	1
English and French.....	5
English and History.....	8
French and Spanish.....	2
Household Science.....	1
Mathematics and Physics.....	1
Science.....	4
Agriculture.....	1
Registration in the First Class Public School Course.....	26
Registration in the Elementary Art Course.....	59
Registration in the Elementary Physical Education Course...	152

Registration in course for degrees in pedagogy:

(a) Registration in Summer Session, 1926.....	66
(b) Registration in Winter Session, 1926-27.....	40
(c) Degrees granted, June, 1926.....	24

The Provincial Normal Schools

The following table gives in detail the attendance in the various courses of the seven Provincial Normal Schools for the present session:

FIRST CLASS COURSE			
	Male	Female	Total
Hamilton.....	26	82	108
London.....	23	93	116
Ottawa.....	22	95	117
Peterborough.....	12	36	48
Stratford.....	26	46	72
Toronto.....	67	199	266
Total.....	176	551	727
SECOND CLASS COURSE			
	Male	Female	Total
Hamilton.....	19	134	153
London.....	13	123	136
North Bay.....	42	243	285
Ottawa.....	27	193	220
Peterborough.....	20	119	139
Stratford.....	13	101	114
Toronto.....	36	218	254
Toronto K.P.....	...	36	36
Total.....	170	1,167	1,337
	170	1,167	1,337
	176	551	727
Grand Total.....	346	1,718	2,064

A forward step in connection with the courses at the Provincial Normal Schools during the past year was the establishment of special Spring Courses whereby First Class candidates might also qualify for certificates in Elementary Art or in Elementary Physical Culture. The following was the enrolment at the various Normal Schools in these special courses:

School	Course	No. of Candidates
Hamilton.....	Art	35
London.....	Art	74
Toronto.....	Art	132
Ottawa.....	Physical Culture	72
Stratford.....	Physical Culture	49
Total.....		362

Spring courses in Household Science and in Manual Training were also conducted at the Hamilton Normal School, for which the enrolment was as follows:

Course	Part I	Part II	Total
Household Science.....	13	12	25
Manual Training.....	2	20	22
Total.....	15	32	47

The cause of education in general and the Normal Schools of the province in particular, suffered a severe loss through the death, in May last, of Mr. F. F. Macpherson, B.A., principal of the Hamilton Normal School. The late Mr. Macpherson entered upon the work of teacher training in the year 1897 as a lecturer on the staff of the Ontario Normal College, Hamilton, in which capacity he served until the close of that institution in 1907. In the year 1908 he was appointed as English master on the staff of the new Normal School at Hamilton, and was promoted to the principalship in September, 1919. Although his labours in his chosen field have now ended, his influence will live on in the hearts and minds of those whose good fortune it was to receive instruction at his hands.

The following appointments were made to the staffs of the Normal Schools during the year:

David Whyte, B.A., B.Paed. Science Master at the Toronto Normal School, appointed principal of the Hamilton Normal School, in place of F. F. Macpherson, B.A., deceased.

Wm. F. Marshall, appointed instructor in writing at the London Normal School, in place of J. W. Westervelt, Jr., resigned.

Gaston Louvray, appointed instructor in French at the Ottawa Normal Model School, in place of A. Potvin, resigned.

Miss Cherry Grant, appointed librarian at the Ottawa Normal School in place of Miss E. Laura Argue, resigned.

Miss Eunice L. Borden, B.A., appointed assistant librarian at the Toronto Normal School, in place of Miss Cherry Grant, transferred to Ottawa.

The following, who had been serving as temporary masters on certain of the Normal School staffs, were regularly appointed to the staffs concerned in September:

A. M. Patterson, M.A., B.Paed., to the Toronto Normal School.

Thornton Mustard, B.A., to the Toronto Normal School.

Miss Florence F. Halliday, B.A., to the Toronto Normal School.

Miss M. N. G. Irving, B.A., to the Hamilton Normal School.

Miss Mildred Hallett, B.A., to the Ottawa Normal School.

Miss E. J. Johnston, B.A., to the North Bay Normal School.

A list of the staffs of the Normal and Normal Model Schools is given in the register of Schools and Teachers for the Province of Ontario.

The English-French Training Schools

The following tables give the enrolment of students at the various English-French Training Schools for the regular and the summer courses:

REGULAR COURSE—SESSION 1926-27

EMBRUN

	Male	Female	Total
Academic Course.....	18	85	103

SANDWICH

	Male	Female	Total
Junior Academic Course.....	1	11	12
Senior Academic Course.....	2	10	12
Professional Course.....	2	15	17
	5	36	41

STURGEON FALLS

	Male	Female	Total
Junior Academic Course.....	8	36	44
Senior Academic.....	10	38	48
Professional Course.....	3	51	54
	21	125	146

VANKLEEK HILL

	Male	Female	Total
Professional Course.....	5	26	31

Total: Academic Course — Male 39; Female 180; Total 219.

Professional Course—Male 10; Female 92; Total 102.

GRAND TOTAL: Male 49; Female 272; Total 321.

SUMMER COURSE—1926

School	First Professional	Second Professional	Academic	Total
Ottawa.....	19	38	..	57
Sturgeon Falls.....	2	34	17	53
Vankleek Hill.....	..	22	..	22
	21	94	17	132

Owing to the fact that arrangements could not be made to provide the necessary practice teaching in connection with the course, the Ottawa English-French training school was closed at the end of the 1925-26 session.

The following appointments were made to the staffs of the English-French training schools in September last:

Mr. Robert Gauthier, B.A., appointed assistant at the Vankleek Hill training school in place of Miss Marie Pierre, resigned.

Miss Camille M. Blanchard, B.A., appointed an additional assistant at the Embrun training school.

A list of the staffs of the English-French Training Schools is given in the register of Schools and Teachers for the Province of Ontario.

The Kindergarten-Primary Summer Courses

In addition to the thirty-six students in training at the Toronto Normal School for the kindergarten-primary certificate, Public and Separate School teachers attended the summer courses for this certificate as follows:

School	Part I	Part II	Total
London.....	36	20	56
Ottawa.....	48	16	64
Toronto.....	98	62	160
Total.....	182	98	280

In addition to the special professional spring and summer courses mentioned in the foregoing, special professional courses for teachers were held at various centres in the province during the summer of 1926, at which the enrolment was as follows:

Course	Enrolment
Art.....	217
Agriculture.....	257
Auxiliary Classes.....	57
Oral French.....	36
Household Science.....	55
Manual Training.....	45
Physical Culture.....	392
Vocal Music.....	61
Vocational Certificates.....	102
Total.....	1,222

Teachers' Institutes

Annual conventions were held by the ninety-seven Teachers' Institutes of the province. Practically all the county conventions were visited by departmental lecturers chosen from the staffs of the Provincial Normal Schools and the College of Education.

Toronto, December 31, 1926.

S. A. MORGAN,
Director of Professional Training.

APPENDIX L

SUMMARY OF STATISTICS OF ELEMENTARY AND
SECONDARY SCHOOLS

I.—ELEMENTARY SCHOOLS

a. Public Schools

Number of Public Schools in 1925.....		6,389
Increase for the year.....	28	
Number of enrolled pupils of all ages in the Public Schools during the year (exclusive of Continuation and Night School pupils).....		518,696
Increase for the year.....	3,570	
Average daily attendance of pupils.....		371,694
Increase for the year.....	6,038	
Percentage of aggregate to possible aggregate attendance, i.e., per- centage of actual to possible attendance.....		88.65
Increase for the year.....	.97	
Number of persons employed as teachers in the Public Schools: men, 1,899; women, 11,646; total.....		13,545
Increase for the year.....	186	
Number of teachers who attended Normal School.....		11,872
Increase for the year.....	383	
Number of teachers who attended Normal College or Faculty or College of Education.....		938
Decrease for the year.....	205	
Number of teachers with a University degree.....		178
Increase for the year.....	16	
Average annual salary for male teachers.....		\$1,645
Decrease for the year.....	\$39	
Average annual salary for female teachers.....		\$1,142
Increase for the year.....	\$4	
Average experience of male teachers.....		11.05 year
Average experience of female teachers.....		8.9 years
Amount expended for teachers' salaries.....		\$16,898,259
Amount expended for public school houses (sites and buildings).....		\$3,295,807
Amount expended for all other purposes.....		\$8,720,792
Total amount expended for Public Schools.....		\$28,914,858
Decrease for the year.....	\$526,481	
Cost per pupil (enrolled attendance).....		\$55.74
Decrease for the year.....	\$1.41	

b. Roman Catholic Separate Schools

Number of Roman Catholic Separate Schools in 1925.....		716
Increase for the year.....	8	
Number of enrolled pupils for all ages.....		95,300
Increase for the year.....	1,776	
Average daily attendance of pupils.....		70,948
Increase for the year.....	2,732	
Percentage of aggregate to possible aggregate attendance, i.e., per- centage of actual to possible attendance.....		89.82
Increase for the year.....	.76	
Number of teachers.....		2,188
Increase for the year.....	39	
Amount expended for teachers' salaries.....		\$1,670,852
Amount expended for school houses (sites and buildings).....		\$747,089
Amount expended for all other purposes.....		\$1,966,019
Total amount expended on R.C. Separate Schools.....		\$4,383,960
Increase for the year.....	\$815,234	
Cost per pupil (enrolled attendance).....		\$46.00
Increase for the year.....	\$7.85	

c. Protestant Separate Schools

Number of Protestant Separate Schools (included with Public Schools, a), in 1925.		5
Number of enrolled pupils.		407
Decrease for the year.	28	
Average daily attendance of pupils.		298
Decrease for the year.	2	

d. Night Elementary Schools

Number of Night Schools in 1925-6.		20
Decrease for the year.	4	
Number of pupils enrolled.		1,832
Decrease for the year.	298	
Number of teachers engaged.		59
Decrease for the year.	5	

II.—SECONDARY SCHOOLS**a. High Schools and Collegiate Institutes**

Number of High Schools (including 52 Collegiate Institutes), 1925-26		186
Number of pupils enrolled in High Schools.		53,512
Increase for the year.	1,396	
Average daily attendance of pupils.		45,554
Increase for the year.	718	
Percentage of average attendance to total enrolment.		85.13
Number of teachers in High Schools.		1,739
Increase for the year.	82	
Average annual salary, Principals.		\$3,047
Increase for the year.	\$27	
Average annual salary, Assistants.		\$2,295
Increase for the year.	\$17	
Average annual salary, all Teachers.		\$2,376
Increase for the year.	\$16	
Highest salary paid.		\$5,000
Amount expended for teachers' salaries, 1925.		\$3,986,032
Amount expended for school houses (sites and buildings).		\$1,464,036
Amount expended for all other purposes.		\$2,439,438
Total amount expended on High Schools, 1925.		\$7,889,506
Increase for the year.	\$70,406	
Cost per pupil, enrolled attendance.		\$147.43
Decrease for the year.	\$2.60	

b. Night High Schools

Number of Night High Schools in 1925-26.		18
Number of pupils enrolled.		3,547
Increase for the year.	547	
Number of teachers engaged.		138
Increase for the year.	20	

III.—CONTINUATION SCHOOLS

Number of Continuation Schools, 1925-26.		201
Increase for the year.	3	
Number of pupils in attendance.		9,944
Decrease for the year.	601	
Average daily attendance of pupils.		8,159
Decrease for the year.	613	
Percentage of average attendance to total enrolment.		82.05
Decrease for the year.	1.14	
Number of teachers.		408
Increase for the year.	12	
Average annual salary, Principals.		\$1,770
Decrease for the year.	\$33	
Average annual salary, Assistants.		\$1,332
Decrease for the year.	\$63	

III.—CONTINUATION SCHOOLS—Continued

Highest salary paid.....		\$3,550
Increase for the year.....	\$150	
Amount expended on teachers' salaries, 1925.....		\$595,629
Amount expended for school houses (sites and buildings).....		\$207,378
Amount expended for all other purposes.....		\$298,847
Total amount expended on Continuation Schools, 1925.....		\$1,101,854
Increase for the year.....	\$5,570	
Cost per pupil, enrolled attendance.....		\$110.81
Increase for the year.....	\$6.85	

IV.—VOCATIONAL SCHOOLS

Number of Day Vocational Schools, 1925-26.....		35
Increase for the year.....	7	
Number of full time pupils enrolled.....		15,201
Increase for the year.....	3,606	
Average daily attendance of full time pupils.....		11,689
Increase for the year.....	2,426	
Number of part time pupils in Day Schools.....		2,743
Increase for the year.....	1,004	
Number of special pupils in Day Schools.....		1,705
Decrease for the year.....	170	
Number of full time teachers engaged in Day Schools.....		530
Increase for the year.....	114	
Number of part time or occasional teachers engaged in Day Schools.....		147
Increase for the year.....	39	
Number of Evening Vocational Schools, 1925-26.....		58
Increase for the year.....	6	
Number of pupils enrolled.....		35,226
Decrease for the year.....	449	
Number of teachers engaged.....		1,196
Increase for the year.....	14	
Amount expended on teachers' salaries, (day and evening schools, 1925.....		\$1,525,532
Amount expended on school houses (sites and buildings).....		\$320,000
Amount expended for all other purposes.....		\$1,519,903
Total amount expended on Day and Evening Vocational Schools, 1925.....		\$3,365,435
Increase for the year.....	\$260,200	

V.—GENERAL

Elementary and Secondary Schools

Pupils enrolled in Elementary Schools, 1925.....	613,996
Pupils enrolled in Night Elementary Schools, 1925-26.....	1,832

Comparative School Statistics, 1867-1925

I. PUBLIC AND SEPARATE SCHOOLS

These elementary school tables, 1, 2, 3, and 5, for the purpose of comparison with previous years in which the Separate Schools were included with Public Schools, include Roman Catholic and Protestant Separate Schools. Table 4 refers to Public Schools only. The tables A, B, C, D, and E give the statistics of the Public Schools, including Protestant Separate Schools; the statistics of the R. C. Separate Schools are given in Tables F and G; those of the Protestant Separate Schools appear in Table U; and the Night Schools in Table V.

1. School Attendance

Year	Total Number of Enrolled Pupils	Boys	Girls	Average Daily Attendance	Percentage of Average Attendance to Total Number Enrolled	Percentage of Aggregate to Possible Aggregate, i.e., Percentage of Actual to Possible Attendance
1867.....	401,643	213,019	188,624	163,974	40.82
1872.....	454,662	238,848	215,814	188,701	41.50
1877.....	490,860	261,070	229,790	217,184	44.25
1882.....	471,512	246,966	224,546	214,176	45.42
1887.....	493,212	259,083	234,129	245,152	49.71
1892.....	485,670	253,091	232,579	253,830	52.26
1897.....	482,777	251,677	231,100	273,544	56.66
1902.....	454,088	232,880	221,208	261,480	57.58
1907.....	448,218	229,794	218,424	266,503	59.45
1912.....	467,022	239,187	227,835	291,210	62.35
1917.....	527,664	266,255	261,409	342,571	64.92
1922.....	601,485	306,225	295,260	425,018	70.66	86.80
1924.....	608,650	309,731	298,919	433,872	71.28	87.89
1925.....	613,996	312,943	301,053	442,642	72.09	88.83

In all these elementary schools the total possible aggregate attendance for the year 1925 was 96,482,876, and the actual aggregate was 85,707,254, or 88.83 per cent. of the possible. In arriving at the possible aggregate, no deductions are made for illness, and all the school days for the year of a pupil once enrolled as well as all the school days of a child of compulsory school age (unless exempted by law) are counted, so long as they are residents of the school section, or until entered in a secondary school. Moreover, duplications of enrolment in the elementary schools owing to removals from one school section to another during the year, and as between elementary and secondary schools, do not enter into this calculation; neither does the fact that a pupil once on the roll (if only for a few days) is counted in the enrolment of the year; all of which enlarges the enrolment and keeps the percentage of average attendance to total enrolment low—72.09 for 1925. The percentage of actual to possible aggregate attendance (88.83), as given above, represents the true situation as to the regularity of the attendance in our elementary schools.

2. Classification of Pupils

Year	Kindergarten	Kindergarten-Primary	1st Reader, Part I, or Primer	1st Reader, Part II, or 1st Book	2nd Book	3rd Book	4th Book	5th Classes, or Beyond 4th Book
1867.....				* 79,365	98,184	83,211	68,896	71,987
1872.....				*160,828	100,245	96,481	67,440	29,668
1877.....				*153,630	108,678	135,824	72,871	19,857
1882.....				*165,834	106,229	117,352	71,740	10,357
1887.....			115,657	76,704	100,533	108,096	81,984	10,238
1892.....			114,932	73,015	96,074	99,345	88,934	13,370
1897.....			110,567	70,808	91,330	99,682	89,314	21,076
1902.....			107,441	69,062	85,732	90,630	83,738	17,485
1907.....			112,552	60,194	84,622	89,371	85,752	15,727

†Exclusive of Continuation School Teachers.

The men engaged in teaching in these schools in 1925 formed 13.04 per cent. of the whole number. In 1924 they formed 12.54 per cent.

The number of teachers and the class of certificates, in the Public Schools alone, in each County and District of the Province, will be found in Table C of this Appendix.

The following table classifies the teachers and certificates as to rural and urban schools:

	Teachers			Certificates		
	Total	Male	Female	1st Class	2nd Class	3rd Class
Rural Schools, 1904.....	5,974	1,469	4,505	152	1,944	3,107
Rural Schools, 1907.....	6,038	1,201	4,837	180	1,542	3,079
*Rural Schools, 1912.....	6,143	894	5,249	165	3,002	1,463
*Rural Schools, 1917.....	6,455	655	5,800	343	4,232	1,129
*Rural Schools, 1922.....	7,034	777	6,257	257	5,180	909
*Rural Schools, 1924.....	7,270	854	6,416	419	5,704	916
*Rural Schools, 1925.....	7,388	937	6,451	599	6,038	621
Urban (cities, towns and incorporated villages) Schools, 1904.....	3,580	606	2,974	483	2,248	289
Urban, 1907.....	4,132	582	3,550	535	2,345	373
*Urban, 1912.....	4,985	617	4,368	509	3,417	341
*Urban, 1917.....	6,307	662	5,645	763	4,552	188
*Urban, 1922.....	7,838	963	6,875	1,016	5,645	281
*Urban, 1924.....	8,238	1,092	7,146	1,113	5,956	250
*Urban, 1925.....	8,345	1,114	7,231	1,211	5,952	225

In the rural schools in 1925 the men formed 12.68 per cent., and in the urban schools, 13.35 per cent. of the number of teachers employed in each case.

*Exclusive of Continuation School Teachers.

4. Teachers' Salaries and Experience

Teachers' Salaries

Year	Highest salary paid	Average salary, male teachers, province	Average salary, female teachers, province	Average salary, male teachers, cities	Average salary, female teachers, cities	Average salary, male teachers, towns	Average salary, female teachers, towns	Average salary, male teachers, incorporated villages	Average salary, female teachers, incorporated villages	*Average salary, male teachers, rural schools	*Average salary, female teachers, rural schools	Average salary, male teachers, all urban schools	Average salary, female teachers, all urban schools

* Incorporated villages included from 1867 to 1902, inclusive.

In Table C the average salaries for 1925 of the Public School teachers of the various Counties and Districts are given separately, and summarized for the cities, towns and villages. This table also states the salaries paid to teachers according to the grade of certificate held, and illustrates to what extent the teacher with the higher certificate commands the higher salary. The average salaries for the Province are as follows:

	Male					Female				
	1912	1917	1922	1924	1925	1912	1917	1922	1924	1925
First Class Certificates...	\$1,340	\$1,548	\$2,290	\$2,296	\$2,144	\$634	\$728	\$1,226	\$1,212	\$1,208
Second Class Certificates.	757	916	1,434	1,444	1,420	587	673	1,137	1,146	1,135
Third Class and District Certificates.....	524	562	911	895	917	458	507	855	835	821

Teachers' Experience

The length of service or experience of the teachers engaged in the Public Schools is also shown in Table C, where the numbers who have taught from less than one year up to forty years and over are given for each year.

The average experience in the Public Schools at the end of 1925 was as follows:

Male teachers, 11.05 years.

Female teachers, 8.9 years.

All teachers, 9.25 years.

Rural teachers (male and female), 5.08 years.

Urban teachers (male and female), 13.4 years.

5. Receipts and Expenditures

Year	Receipts				Expenditures				
	Legislative grants	Municipal school grants and assessments	Clergy reserve funds, balances and other sources	Total receipts	Teachers' salaries	Sites and building school houses	Libraries, maps, apparatus, prizes, etc.	Rent, repairs, fuel and other expenses	Total expenditure

†Including all expenditure except for teachers' salaries.

In 1925 an increase of 1,776 in the enrolment and an increase of \$815,234 in the expenditure are noticed in the above tables. The expenditure per pupil of enrolled attendance increased from \$38.16 to \$46.00. The total value of equipment decreased from \$272,570 to \$235,246. All other school property increased in value from \$13,231,077 to \$14,386,560.

Detailed statistics in reference to these schools will be found in Tables F and G

III. PROTESTANT SEPARATE SCHOOLS

The following is a complete list of the Protestant Separate Schools of the Province:—No. 1 Grattan, No. 2 Hagarty, L'Original and Penetanguishene (two schools).

They were attended by 407 pupils in 1925. The whole amount expended for their maintenance and permanent improvements was \$17,759.96. Ten teachers held Second Class certificates, and one held a Third Class certificate.

More complete statistics for these schools will be found in Table U.

IV. CONTINUATION SCHOOLS

The following table gives statistics of the "Continuation Classes, Grade A," up to and including 1907. Thereafter they are known as "Continuation Schools." Formerly the statistics of these schools were included with the statistics of the Public and Separate Schools, consequently certain items for the years 1897-1907 cannot be given.

Year	Schools	One-teacher schools	Two-teacher schools	Three-teacher schools	Number of teachers	Number of Pupils	Percentage of average attendance to total enrolment	Total value of Equipment
1897.....	27	20	7	34	1,275	\$
1902.....	59	46	12	1	73	1,856
1907.....	91	65	24	2	119	3,993	26,345
1912.....	138	54	73	11	226	6,094	61.97	75,556
1917-18.....	137	36	99	2	241	5,104	73.15	93,228

TIONAL SCHOOLS

VARIOUS BRANCHES OF INSTRUCTION, ETC.

Number of Pupils in English Literature	1,743
Reading	1,719
Composition and Spelling	2,978
Grammar	2,267
History and Civics	303
English for non-English Speaking Persons	1,354
Geography	213
Civil Service	26
Arithmetic	2,668
Algebra	779
Geometry	347
Trigonometry	112
Shop Mathematics	691
Surveying	46
General Physics	36
Electricity, Theory	833
Electricity, Applied	813
Applied Mechanics	53
General Chemistry	407
Chemistry of the Trades and Industries	231
Metallurgy and Assaying	32
Mineralogy and Geology	76
Mechanical Drawing	829
Machine Drawing and Design	201
Architectural Drawing	468
Sheet Metal Drawing	90
Machine Shop Work	909
Forge Work	142
Oxy-Acetylene Welding	251
Sheet Metal Work	54
General Wood Working	798
Cabinet Making and Joinery	441
Carpentry and Building Construction	224
Pattern-making	22
Bricklaying	57
Painting and Decorating	68
Plumbing	237
Steam and Gas Engines, and Power Plants	515
Marine Engineering	15
Textile Working	18
Pulp and Paper Making	99
Printing and Bookbinding	294
Photography, Photo-engraving and Lithography	28
Automobile Mechanics	2,177
Telegraphy	114
Elementary Drawing	377
Colour Study	547
Lettering	332
Show Card Writing	602
Industrial Design	145
Illustrating	167
Drawing and Painting from Antique	207
Drawing and Painting from Still Life	193
Drawing and Painting from Life	126
Modelling	62
Wood Carving	134
Basketry	566
Pottery	105
Metal Work and Jewellery	39
History of Art	253

Cooking	3,160
Housekeeping	16
Home Economics	780
Home Nursing	696

Nine new libraries were added during 1926.

Four were added to the list of Free Public Libraries: Bridgeburg, Meaford, Niagara Falls Branch, and Toronto, Gerrard Branch.

Seven Association libraries were added during the year. These are: Apple Hill, Blind River, Cobalt, Cottam, Harrowsmith, Middleville and Wellington.

Bridgeburg and Meaford were formerly Association Public Libraries, and have been transferred to the list of Free Public Libraries.

Apple Hill, Harrowsmith and Wellington were formerly closed Association Public Libraries.

APPENDIX T

**REPORT OF THE PRINCIPAL OF THE ONTARIO
TRAINING COLLEGE FOR TECHNICAL
TEACHERS FOR 1926**

The work of the Training College has been carried for the year 1926 along the lines set forth in the 1925 report. No important changes have been made in the courses of study or the arrangements for practice teaching.

Qualifications for Admission

Experience has shown that it may become necessary to make a more careful determination of the qualifications of the applicants for admission. The general education of the applicant has been determined by an entrance examination in English and in mathematics. A candidate who could submit evidence of having taken two years of High School work has been exempted from this examination.

Applicants are required to have had satisfactory training and experience in the trade concerned. The statements of the applicant in regard to his training and experience in the trade have been accepted at more or less face value. It has been found that mere statements of the length of time the applicant has worked at the trade do not furnish a sufficient guarantee of his skill and attainments. Efforts to confirm such statements by correspondence with employers, and by examination of testimonials and credentials have not helped very much in determining the validity of the applicant's claims.

As it is most important that teachers of practical subjects in technical schools should be skilled workers, thoroughly proficient in the trade concerned and acquainted with its recent developments, it is necessary that only such persons as have these qualifications should be admitted to the Training College. The method of determining these qualifications heretofore used has not been entirely satisfactory. In future an applicant for admission will be required to show his attainments as a skilled worker in the trade concerned by passing an examination in the fundamental principles, operations, processes and skills of the trade. The examination will be oral and written and will include a performance test.

Domestic Arts Teachers

The problem of furnishing an adequate supply of domestic arts teachers, *i.e.*, teachers of millinery and of dressmaking, has not been satisfactorily solved. Teachers recruited from the trades have not in some cases the general education desirable in a teacher, and in other cases the skill and broad trade training which their years of experience would seem to indicate. On the other hand, teachers recruited from the teaching profession, more particularly from among the domestic science teachers, who take short intensive courses in domestic arts, have not the speed and all-round skill which the trade demands and which the teacher in a technical school should have if she is to hold the respect of her students and of her fellow-workers in the trade. It was expected that domestic science teachers who took the special summer courses in millinery or in dressmaking would obtain a certain amount of trade experience and so qualify for a

certificate to teach these subjects. It appears, however, that they take these special courses primarily as improvement courses for domestic science teaching.

It is proposed as a possible solution of the problem to offer a one year's course in practical work in domestic arts similar to that now given in domestic science in the College of Education. The course would be open to certificated teachers holding at least a Second Class Certificate.

In some of the smaller technical schools the need for a millinery or a dress-making teacher is not sufficiently great to justify the employment of a full-time teacher. Teachers legally qualified to teach academic work who hold also a certificate in domestic art would find ready employment in the smaller schools.

Extension Teacher-training Classes

As pointed out in the 1925 report, the Training College carries on not only classes for the training of day school teachers, but carries on also extension teacher-training classes for the instruction of evening class teachers. The majority of such teachers are employed in the day time and cannot be expected to give up their regular employment to take a course at the Training College. For their benefit, short, intensive courses in the methods of teaching are conducted by the staff of the Training College at convenient centres.

Extension classes were conducted in London and Guelph during the months of January, February and March, and in Kitchener during October, November and December, 1926. Evening class teachers from St. Thomas attended the London class.

While the courses were planned and conducted for the benefit of evening class teachers without any professional training in the methods of teaching, a number of certificated teachers in the vocational schools availed themselves of the opportunity to take a refresher course.

In London, sixteen teachers without professional training formed the nucleus of the class. The lowest attendance was twenty-one; the highest, thirty-one; and the average, twenty-five. In Guelph, there were twenty persons without professional training. The lowest attendance was sixteen, the highest, thirty; and the average, twenty-one. In Kitchener, the attendance was remarkably good, averaging twelve out of a possible thirteen.

One evening each week the whole group met together for instruction in the mechanics of teaching, under such topics as kinds of lesson, steps in presentation, questioning, use of blackboard, class organization, making of lesson plans, trade analysis and methods of organizing a course of study. Practice teaching was done by the teachers-in-training, and written criticisms made by members of the class. On other evenings the members of the Training College staff met with the teachers in their classes to give advice and help. On convenient occasions during the day-time, they met with individual teachers to discuss lesson plans, organization of subject matter.

In London, where certain members of the staff have been assigned to the work of vocational guidance, several periods were given to a discussion with these teachers of the principles and methods of vocational guidance.

Manual Training Courses

Summer courses for the Elementary Certificate in Manual Training have been carried on for some time as an independent activity. These courses have been placed under the management and control of the Training College.

For some years no provision was made for a course leading to the Ordinary Certificate in Manual Training. In the summer of 1925, arrangements were

made for offering such a course in the Training College. The arrangements provide for a course of one year in practical shop work and practice teaching in manual training. The course is open to (a) holders of Second Class Professional Certificates who can give some evidence of skill in the use of the common woodworking tools; and (b) skilled mechanics. The first session of the course opened in September, 1925, with a class of four students with Second Class certificates. The class beginning in September, 1926, has an enrolment of six.

In 1926 the requirements for a Specialist Certificate in Manual Training were changed. Under the new provisions, teachers holding Permanent Ordinary Manual Training Certificates may obtain Specialist standing by two summer courses at the Ontario Training College. Each summer course is of five weeks duration, of eight hours a day, totalling 400 clock hours of practical shop work. The courses cover advanced work in wood-finishing, applied design, woodturning, cabinet-making and art metal work. The first session was given in the summer of 1926 with an enrolment of twenty-three.

Enrolment

The enrolment in the Training College courses for 1926 was as follows:

RESIDENT COURSES

	Men	Women	Total
Spring Session.....	25	8	33
Summer Session.....	94	89	183
Autumn Session.....	10	1	11
Total.....	129	98	227

EXTENSION COURSES

Winter Session.....	61
Autumn Session.....	13
Total.....	74

F. P. GAVIN,
Principal.

Hamilton, February 15th, 1927.

APPENDIX U

ONTARIO SCHOOL FOR THE BLIND

ANNUAL REPORT OF THE SUPERINTENDENT

Attendance

The average attendance for the session which ended June, 1926, was 138. School opened in September, 1925, with 135 in attendance. Before the end of the school term in June, 1926, seven new pupils entered, making a total attendance of 142, of whom eighty-five were boys and fifty-seven girls. The number of pupils registered for the twelve months of the official year, from October 31st, 1925, to the same date in 1926 was 154, just three less than in the preceding year. The total registration at the opening of the school in September, 1926, was 120.

At the opening of the school in September, 1926, twenty-seven pupils had not returned, of whom twenty-three were boys and four girls. Of these, ten graduated; five had too much sight and returned to public school; three were physically unfit; two remained home to work; two remained out on account of temporary ill health, and five did not return from the west on account of the indifference of their parents.

Staff

The only change in the staff during the present year was owing to the death of Miss Cooper, who had filled the position of Household Science Teacher for a period of nineteen years. Her death at the school in May, after a very brief illness, was deeply regretted, as her years of faithful unselfish service had endeared her to the pupils and teachers. The position has been filled by the appointment of Miss Jean Clark, of Ottawa, a graduate of the MacDonald Institute at Guelph, and of the Normal School, Ottawa.

Concerts

One of the features of the concerts held during the year that has attracted much attention was the ease and grace with which the pupils took part in plays. The seniors presented a comedy translated from the German, and if there was any doubt in the minds of the visitors about the blind taking their places on the stage and playing well the parts allotted to them it was dispelled by the successful presentation of this comedy. The work of the boys in gymnastics was a variation in the programme which showed something of the variety of training received by our pupils.

Gymnasium

It is a pleasure to be able to report a marked improvement in the boys and girls as a result of their physical training in the gymnasium. The Physical Director has given for the past few years a well defined course of instruction to the boys which has had such beneficial results that the girls of the school have also been placed under his charge. The necessary gymnasium outfits have been provided and the girls are entering into the competitive exercises of their new course with considerable interest and enthusiasm.

Improvements in Main Building

Battleship linoleum was laid in all the main corridors during the summer vacation with a resulting improvement in appearance and a considerable deadening in the sounds which were so clearly heard owing to the wooden floors.

The girls' washroom and lavatories were completely overhauled and provision made also for teachers and maids on the second floor. Many of the sitting rooms, class rooms and hall-ways were decorated to conform with the work begun in the previous year, and the completed work is very attractive. Suitable furniture was added to the boys' and girls' club rooms and additional facilities provided for games of different kinds.

Pipe Organ

The organ, which has given good service for a number of years, has been overhauled and put in excellent condition. It was decided that the pitch should be changed from concert to international, so that it may be at all times in tune with our pianos. The work was done according to specifications submitted by Dr. Ham and the completed work is to be inspected and approved by him.

Distinguished Visitors

A résumé of the newspapers every morning keeps our pupils in close touch with public affairs, and they gave, during the term, an enthusiastic welcome to an interesting and interested visitor in the person of Rt. Hon. Arthur Meighen, late Premier of Canada. Mr. Meighen visited every department of the school and evinced deep interest in all that he saw. His brief address to the pupils was closely followed and keenly appreciated. They were equally elated a few weeks later when the school was honoured by a visit from the present Premier of Ontario, under whose Department of Education the school is administered. His personal interest in their work and welfare and his sympathetic address in the Assembly Hall pleased them more than a little. The Hon. J. S. Martin, of Port Dover, Minister of Agriculture, spent an intimate and friendly evening with the senior choral class, entering with interest and zest into their musical efforts, listening to and contributing to their impromptu programme.

Social Evening

Several very enjoyable social evenings were spent during the past year by the boys and the girls, each inviting and entertaining in their turn, guests from the city. These evenings were spent in games, cards and dancing, the school orchestra supplying the music. One cannot over-estimate the value to these young people of opportunities such as this, for their education should include the privilege of social contact with others, and the refining influences which such contact may bring.

The students are grateful to many organizations in the city for the opportunity of attending concerts of different kinds, for the numerous oratorios and musical entertainments they are permitted to attend.

Pictures

The school is indebted to the Imperial Order of the Daughters of the Empire in co-operation with the Department of Education, for a series of beautiful framed pictures, seventeen in number. These pictures adorn the walls of the corridors and main sitting rooms and add much to their attractiveness.

Convention in Nashville

The twenty-eighth Biennial Convention of the American Association of Instructors of the Blind was held this year in Nashville, Tennessee, from Monday evening, June 21st to June 25th.

The delegates present represented residential schools for the blind in the United States and Canada, the public school classes, and libraries maintaining departments for the blind. In addition, Japan and Spain were represented by visitors.

The subjects discussed at this convention covered a wide range, dealing the first day with "Vocational Direction," "Summer Schools in connection with our Regular Schools for the Blind," and "Training Pupils in Habits of Industry." Much attention was given to the subject of Music, the papers being "Incentives to better accomplishments in Music among the Blind," and "How can the vocational value of Music be increased?" A demonstration clinic in Binet tests was conducted by Dr. Hayes of Mount Holyoke College, illustrating the methods to be followed by teachers in their classes. Interesting talks were given on games suitable for the blind and the development of play initiative. Methods of developing the imagination of blind children were presented with much interesting discussion, and the question of whether blind pupils should be encouraged to go to college was the theme of one most interesting paper. Side-lights were given on English schools for the blind and upon the education of the blind in Japan.

A survey was given by Edward E. Allen, of the Perkins Institute, of the work for the blind in the United States from its beginning until now.

The afternoon of Thursday was devoted to an excursion to the Hermitage, home of President Andrew Johnson, and to other points of interest in and about Nashville. In the evening two papers which attracted much interest were "The Ideal Superintendent of a School for the Blind from the standpoint of Teachers and Pupils," and "The Ideal Teacher from the standpoint of the Superintendent."

Little idea can be gained from such a brief account of the convention proceedings, but the papers and discussions which followed were all worth while. The proceedings have been printed and distributed to the different schools for reference, and teachers interested in the education of the blind will find embodied in them a very useful contribution to the literature of this particular field of special education.

Scholarships

Certain pupils in the school have shown remarkable talent for music, and Dr. Ham, who is the inspector of musical instruction, has felt strongly that the generous work of the Government should be supplemented by the establishment of scholarships to benefit specially gifted students and to give them the opportunity of studying with some of our eminent Canadian teachers, and with this object in view he has used his influence in securing scholarships at the Toronto Conservatory of Music.

One of these pupils, named Stanley Macbeth, of Toronto, has attracted a great deal of attention, and interviewers from Toronto newspapers and elsewhere have paid tribute to his genius. He has an instinctive musical gift of a most extraordinary nature, and while he does not know the first thing about the basic principles of harmony, form, or structure, he instinctively obeys all of these laws. He is an undoubted genius whose most remarkable gift is in his power of improvisation. Stanley Macbeth leaves after the Christmas vacation

to take up violin study with Dr. Luigi Von Kunits at the Conservatory of Music.

The other of the scholarships has been presented by St. Dunstan's Chapter, I.O.D.E. of Toronto, and has been awarded to Miss Kathryn Sells, of London, who will go to Toronto for one year to continue her study of the piano at the Conservatory.

Field Day Sports

The annual Field Day Sports were held in May and as usual attracted an interested group of spectators. The zest with which the blind boys and girls entered upon the various contests requiring strength and speed is quite remarkable, and the results compare most favourably with similar competitive contests in schools for the seeing. When the pupils have been shut in for the greater part of the school year in a gymnasium with apparatus work and drills, it is a rare treat for them to get out in the open in the athletic field and to participate in the different events. The running races are made possible by means of parallel wires along which run rings attached to ropes held in the runners' hands. The pupils can thus run confidently without fear of getting off the track.

Brantford, December, 1926.

W. B. RACE,
Superintendent.

PHYSICIAN'S REPORT

I beg to forward my report for the year ending October 31st, 1926, as physician to the School for the Blind.

The year in our hospital was rather a strenuous one, and involved taking care of more serious cases than usual.

I regret to report the death of Miss Cooper, a much loved and highly respected officer of some years standing. She passed on May 29th, 1926.

The list of cases is as follows:

Pneumonia.....	8 cases
Appendectomy.....	1 case
Erysipelas.....	1 case
Mastoid.....	1 case
Middle ear infection.....	9 cases
Influenza.....	94 cases

I am glad to report that the year was free from other contagious diseases. The hospital has been efficiently supervised by Miss Wright, R.N.

Respectfully submitted,
J. A. MARQUIS.

Brantford, December, 1926.

DENTIST'S REPORT

I have the honour to submit the following report for the year ending October 31st, 1926:

During the term an examination has been made of all the pupils. Eighteen boys and sixteen girls required no attention. One hundred and twenty-five

fillings were inserted for the boys and seventy-five for the girls. Fifty teeth were extracted—mostly deciduous ones.

During the eight years I have had charge of the dental work of the school every operation that I wished to do has been completed with no trouble. Needless to say this has given me great satisfaction, and I fully realize it could not have been accomplished but for the fine spirit among the pupils and the sympathetic co-operation of those in charge.

Respectfully submitted,

Brantford, December 18th, 1926.

J. R. WILL.

OCULIST'S REPORT

I have the honour to report the results of the examination of the pupils' eyes for the year 1926:

Condition of Sight

	Male	Female	Total
1. Without perception of sight in either eye.....	1	1	2
2. Perception of light in one, none in the other....		1	1
3. Perception of light in both eyes.....	1		1
4. Limited objective vision in one eye.....		2	2
5. Limited objective vision in both eyes.....	3	3	6
	5	7	12

This table refers to the sight of the new pupils just entering the school and examined for the first time. With the exception of one, the sight of all is very bad; two are in total darkness, and two others can only distinguish light from darkness, while the rest have sight enough to go about freely. The one exception referred to has sight enough that, with some difficulty, he might continue to get his education at public school, but because of the nature of the disease in his eyes it would be highly inadvisable.

The degree of sight possessed by a pupil is not the only consideration when passing on the eligibility of a pupil for admission to the school, but as far as possible we must look into the future, and if we find a child with sight already considerably reduced from a disease which observation and statistics teach us is likely to progress to approximately total blindness, we consider that child should have the advantages of the special methods of teaching followed at the school as early in life as possible.

On the other hand, it is sometimes necessary to point out to parents the inadvisability of placing their child in a School for the Blind even though his sight may be sufficiently reduced to make it difficult for him to obtain his education at a public school. It is obvious that all entering the School for the Blind must be taught by the same methods; and a graduate is looked upon as a blind person, and it probably handicaps him later in life in obtaining employment, in competition with a person with equally poor sight but not regarded as a blind person.

And this makes it evident why all sufficiently large centres of population should have so-called sight-saving classes where some special facilities and special attention may be given these children who can see the black-board with difficulty even from the front seats in the ordinary public schools.

To return to the consideration of the pupil with more sight than the rest of this class. He has a congenital condition, found also in other members of the family, which is almost sure, in a few years, to produce total blindness, and

medical science, as yet, cannot check it. One other pupil with a similar condition in the eyes who was examined twice in less than a year illustrated what we may expect in the above case. This child on first examination could count fingers with the right eye at a distance of twenty feet, left eye three feet. On second examination in less than a year this was reduced to right eye, seven feet; left eye, the ability to distinguish light from darkness.

Hence, knowledge, experience, and good judgment are necessary in passing on the eligibility of a pupil to the School.

Diseases Causing Blindness

	Male	Female	Total
Congenital cataract.....	1	3	4
Optic Atrophy.....	2	1	3
Retinitis Pigmentosa.....	2	..	2
Ophthalmia Neonatorum.....	..	1	1
Myopia.....	..	1	1
Undetermined.....	..	1	1
	5	7	12

Congenital cataract is the cause of blindness in one-third of this year's class. Some of these cataracts have been operated on in an effort to improve sight but proved of no benefit, while the rest show that operation would be hopeless because, as is so often found in these cases, the cataract is only a part of the trouble, the real cause of blindness being deeper in the eye behind the cataract and not amenable to treatment.

The cause of the blindness in two of the pupils, while not classed as such, is probably primarily due to congenital syphilis.

We are pleased to find only one blind from Ophthalmia Neonatorum.

The one referred to as undetermined is actually blind because of a peculiar opacity of the corneal, giving the appearance of "ground glass," and opaque lenses, from the history probably not congenital. Also from the fact that the eyes are totally blind there must be disease of the deeper parts which cannot be seen. And yet from the history and the present appearance it is not possible to say what disease was the original cause.

A good clinical history accompanying the application form is of great value when sending these children to the school, as it enables more intelligent watching of the eyes while here, as well as making more accurate diagnosis of conditions possible.

It is remarkable that this year there are no "accident" cases. This term covers loss of sight from penetrating wounds of the eye, injuries to the head, firearms, fire-works, explosions, and all the multiplicity of occurrences contributing so much to blindness that might be prevented by the exercise of reasonable care. In fact, all but the one blind from Ophthalmia Neonatorum and the two probably originating from congenital syphilis are due to diseases over which with our present knowledge there seems to be but little control.

A number of the pupils who had been examined on previous occasions were re-examined and their present condition compared with that previously recorded. The usual variations were found, but none remarkable. Some suggestions were made for their improvement in accordance with their increasing years and experience.

A few acute conditions of the eyes required attention during the term, but none of a very prolonged or serious nature.

Respectfully submitted,

Brantford, Ont., November 30th, 1926.

B. C. BELL.

REPORT ON MUSICAL INSTRUCTION

I have the honour to submit herewith my report on the musical work accomplished by the students of the Ontario School for the Blind, Brantford, for the academic year 1925-1926.

The examinations in practical knowledge were conducted on June 7th and 8th, and the theoretical work on June 9th.

The practical subjects included are as follows: Piano, Organ, Violin, Singing, Piano and Harmonium tuning.

The theoretical examination included Elementary and Primary Rudiments, Junior Harmony, Counterpoint and History and Intermediate Counterpoint.

Piano.—The piano playing, especially in the earlier grades was very good, and full of promise. In a few cases, however, the touch and technique were not entirely satisfactory. I suggest that more attention should be given to these important points. The Musical Director, Mr. Lord, Miss Smyth and Miss Howell are to be complimented on the general efficiency of this part of the work.

The results of the various classes are:—

Introductory—Four passed with 1st Class Honours; two with 2nd Class Honours; two passed.

Elementary Class—One gained 1st Class Honours; and three Second Class Honours.

In the higher Primary Division three gained 2nd Class Honours; three passed; one failed.

In the lower Primary, one received 2nd Class Honours; and four passed.

Junior (Higher)—One gained 1st Class Honours and two passed.

Junior (Lower)—Two passed and one failed.

Intermediate Class.—One gained 1st Class Honours; one passed, two failed.

Three advanced students in the Progressive Stage performed most satisfactorily. Their rendering of several classical works displayed considerable interpretive power.

Violin—There is a decided forward movement in the violin playing as compared with previous years. The bowing, tone and technique were good. Mrs. Lord is responsible for this class, and her work as a teacher is excellent.

The results were as follows:—

Elementary "School" Examination—One passed.

Junior "School" Examination—One gained honours, and one passed.

In Organ-playing the one candidate played with authority and distinction; with systematic study he should become a first rate performer.

The School Choral Class under the direction of the able Musical Director, Mr. Lord, performed several numbers with good effect. The shading, tone quality and enunciation of the senior class was especially good in Part Songs by Elgar and Boughton. The Juniors sang their well chosen little two Part Songs with sweetness and with evident enjoyment.

At the Morning Prayer Service, conducted by the Principal, Mr. Race, the singing of the National Anthem and the Hymn was most effective.

Piano and Harmonium Tuning—This department continues to flourish under the tuition of Mr. Ansell. Some of the students are not only first class tuners, but are able to do minor repairs in a business-like efficient manner.

All the pianos of the school used for lessons and practice are tuned, regulated and repaired by this department.

The following are the results in the Theory of Music:—

Elementary—Four with 1st Class Honours and three with 2nd Class Honours.

Primary—Two with 1st Class Honours, one with 2nd Class Honours, three passed, one failed.

Junior—One with 1st Class Honours, five with 2nd Class Honours, six passed, two failed.

Intermediate Counterpoint—Two with 2nd Class Honours, one passed, one failed.

A carefully graded course of study in Musical History and "Musical Form" would be of great advantage to the pupils in the more advanced classes.

In conclusion I would like to offer my hearty congratulations to the Principal and to all the Music Staff on the really excellent work done during the past and academic year.

Respectfully submitted,

(Sgd.) ALBERT HAM,
Mus. Doc., F.R.C.O.

LITERARY EXAMINER'S REPORT

I inspected the literary work of the Ontario School for the Blind on June 3rd, 9th and 10th, and beg to report as follows:—

The staff is as follows:—

Mr. Cole	Fifth and Fourth classes.
Miss Burns	Fifth and Fourth classes.
Mr. Langan	Senior and Junior Third.
Miss Moffit	Junior Third and Second.
Miss Maguire	Junior Second and First.
Miss Draper	First and Primary.
Miss Paterson	Kindergarten-Primary.
Mr. Donkin	Manual Training.
Mrs. Strowger	Knitting.

The Household Science department was without a teacher, owing to the rather sudden death of Miss Cooper, who for many years did efficient work in this department.

The course of study coincides very closely with that laid down by the Department of Education for Public Schools. The organization of the school has been greatly improved since my last visit. The classes line up and move from room to room, in a very systematic and orderly manner. I note also, that more attention is being given to supplementary reading and to current events. I feel that the staff should be congratulated upon the wide range of reading that the pupils have done.

Mr. Cole's class:—

I found these pupils very efficient in arithmetic, and to have a very comprehensive knowledge of geography. Their appreciation of literature was good. They delight in this work. The class has done a good deal of formal grammar and understand sentence construction well.

These pupils have covered a rather extensive course in physics, and have an intelligent comprehension of this subject.

Miss Burns' class:—

The pupils of this class, I found to spell well, and to read with considerable expression. The class had made some progress in French, and were familiar with leading events of British and Canadian History. The subject of history interests these pupils very much, and they have a good knowledge of current events. I was rather disappointed with the progress in algebra and geometry. The class had a very limited knowledge of algebra, and practically no knowledge of geometry.

Mr. Langan's class:—

There are a few pupils in this class, who have recently come to the school, and as a result, are somewhat behind those that have been in attendance all year. I found Mr. Langan interested in his work, and, with the exception noted above, his class to have made very satisfactory progress in arithmetic, reading, literature, spelling, grammar, composition, history and geography. The pupils in this class, as well as those in the others, are being taught to do more thinking and less memory work.

Miss Moffit's class:—

Miss Moffit is doing careful and effective teaching to which the pupils respond eagerly. I found the pupils in this class to have covered the work laid down in the course of study in arithmetic, literature, reading, spelling, writing, history, geography and composition. I was particularly pleased with the progress made in literature and composition.

Miss Maguire's class:—

This is a bright interesting class, and has made definite progress in arithmetic, spelling, reading, writing, composition, geography and history. I am well satisfied with the advancement in this class. It is such as to indicate that the teaching is well done.

Miss Draper's class:—

I found Miss Draper very much interested in her work, and the pupils making definite progress. She succeeds in keeping the pupils interested in their work.

Miss Paterson's class:—

This is the junior class in the school, and the pupils are of various ages, and have entered at different times. These conditions necessitate a lot of individual teaching. Miss Paterson is interested in the work, and securing good results.

NOTES.

1. I found Mr. Donkin's boys doing considerable work of a practical nature. The willow work has been largely discontinued, it being replaced by reed and fibre work. During my visit, a very fine display of work, done by the boys, was being offered for sale.

2. I was particularly pleased with the improved physique of the boys, secured by Captain Clegg, in the physical department. If I might offer a sug-

gestion, it would be that the girls receive a physical training, similar to that given to the boys.

3. The organization and discipline of the school continues to improve.

4. Mention should be made of the amount of supplementary reading done by the pupils, and of the interest that the teachers take, in reading to the pupils, and keeping them informed on current events.

5. Pupils are doing more thinking, and less memory work.

E. E. C. KILMER,
Literary Examiner.

Brantford, June 12th, 1926.

APPENDIX V

ONTARIO SCHOOL FOR THE DEAF

ANNUAL REPORT OF THE SUPERINTENDENT

The Attendance

The average attendance of the Ontario School for the Deaf for the session of 1925-26 was 288, an increase of two over that of the previous session. The average attendance in the session 1905-6 was 214. This shows an increase in twenty years of seventy-four, or a little more than 33 per cent. If this represented an increase in deafness in the Province, it would be somewhat alarming, but vital statistics do not show any such increment. The increased attendance is largely due to a better realization, on the part of the parents of deaf children, of the necessity and importance of having them educated, and a greater appreciation of the facilities provided by the Department for the liberal education and industrial training of these afflicted children. Added to this is the greater interest being taken in the welfare of defective children by social service organizations, and the assistance given by them in inducing indifferent parents to send their children to school. The officers of the Children's Aid Societies, and the Provincial Nurses, have been of great assistance to us in this respect. All of these considerations and inducements, together with various methods we ourselves employ to discover and get into touch with all those with defective hearing of school age, have resulted in bringing into school practically all the deaf children of the Province who are capable of being educated, thus ensuring that the School shall fulfil to the utmost the purpose for which it was established and is so liberally maintained.

Health of the Pupils

As usual the health of the pupils, with the exception of a few who contracted contagious diseases, was exceedingly good. These cases were all of a mild character and the most serious consequences of these outbreaks is the loss of time from the regular classroom work, due to the necessity of strict quarantine. Every effort possible is made to keep the school free from these diseases, but with pupils coming from all parts of the Province and all kinds of homes, with numerous parcels of clothing coming from these homes, and with the many visitors, including parents and other friends of the pupils from all parts of Ontario, it is impossible to prevent occasional outbreaks of contagious disease. The members of the staff are always on the alert for any suspicious symptoms, and this, together with early diagnosis and strict quarantine, usually suffice to limit the outbreak to a small proportion of the pupils. In view of the large number of children in residence, we can thankfully congratulate ourselves on the rarity and quick suppression of all such outbreaks, and on our general immunity from serious cases of illness.

The Work of the Session

The training and education of our pupils is, of course, the sole purpose of this school, and the character and quality of the work in the classrooms and shops is the standard by which the record of the session is to be judged. In

this paramount regard the term was a very satisfactory one in practically every respect, though of course there are always degrees of excellence and proficiency. Perhaps the most noteworthy feature was the very gratifying success of two of the pupils in the High School Entrance Examinations. Both boys formerly attended public schools, but had become totally deaf. In most subjects their standing was not higher than the junior third grade when they entered the school in the fall of 1924, and in June, 1926, they passed the test, taking 91 and 84 per cent. respectively, the former being very near the head of the list of candidates in this Inspectorate. So excellent were their papers that the Inspector and Chairman of the Examining Board, H. J. Clarke, B.A., asked to be allowed to retain their papers to show as models of neatness, accuracy and proficiency. Mr. Clarke, who is also our official examiner, expresses his estimate of these boys' work in his report, appended hereto. One of these boys is now attending the Toronto Technical School, where he is making very satisfactory progress. Of course such results as these were not secured except by hard and earnest efforts on the part of their teachers, who remained after regular school hours every day for several months prior to the examination, to give them special instruction. In addition to this, they were given a thorough course in lip-reading by a lady teacher, who devoted to this task an hour after school three days a week for the whole of the previous session. I mention these instances of extra after-hour work, not as being exceptional cases, but as typical of the spirit of the school as a whole. The officers, teachers and other members of the staff, except in rare instances, do not confine themselves to their obligatory duties, but voluntarily spend a great amount of extra time and labour, and even expense, to advance the welfare of our pupils and provide them not only with the best possible education and training, and sympathetic care and attention, but also with all kinds of amusements and good times generally. No child could be better looked after in its own home, and few as well, as every child is here, no pains or trouble being spared to promote their physical, mental and moral well being. Not many parents realize the intense interest and self-sacrificing devotion of the members of the staff, and all parents should greatly appreciate all that is being done for their children here, and should give us every possible co-operation and encouragement in our work. It would perhaps not be too much to say that more is being done for the pupils here and at our sister school in Brantford than for any other classes of children in the Province.

There are some parents, I am glad to say, who do seem to realize this, and have expressed in warmest terms their appreciation of what is being done for their children, and extracts from two or three of the many letters received might not be out of place. One parent writes: "Most people like to hear if their efforts are appreciated, therefore, I wish to thank you for your splendid work for the afflicted ones at your Institution. My daughter speaks most highly of the progress of her son, and of his liking for all around him, which simply means that you, Sir, are to be congratulated and I wish you may long be spared to carry on this splendid work, for it must be most gratifying to you and your associates to see such splendid progress being made." Another parent writes: "On the return of my son to school, I should like to take the opportunity of expressing my appreciation for the excellent progress which was made by him during the year which closed in June last. His progress during that period was most marked. We are often prepared to take good things without comment, and to register protest when matters do not go as we think they should. A little encouragement tends to make the task easier, and I am accordingly writing to express my appreciation. If a similar rate of progress is registered during the

coming year, I shall be more than pleased." Another writes: "I wish to thank you for the good care my daughter received while at school for the past term. She arrived home in first class physical condition, and so well instructed, in fact far in excess of our expectations." During our Christmas festivities, Dr. McMillen, of Sarnia, speaking at the request and on behalf of the more than one hundred parents present from all parts of the Province, expressed himself as follows, as reported in our school paper, "The Canadian": "On behalf of the parents and other visitors present, he would like to extend heartiest greetings to all, and to express to Dr. Coughlin and his staff their appreciation, not only of what they did to give the pupils a happy Christmas, but of the splendid work they were doing for the education and development of the pupils. He had visited the school on several previous occasions and so was able to see for himself the good work done, and the progress that is being made. All the parents of deaf children owe a great deal to Dr. Coughlin for his able and progressive administration and to his very efficient staff for their excellent work. He could assure Dr. Coughlin that they fully approved of the methods employed here, and were well satisfied with the results obtained, and that he had the full confidence of the parents, and, he was glad to say, of the government also, as well as of the public generally, in his administration."

Our Teacher Training Course

Our Teacher Training Course is fulfilling our most sanguine expectations, and the results so far are very evident in the superior work being done in the classrooms, and this year's new training class gives promise of even better results to come. We have been somewhat unfortunate in that three of our teachers, as soon as they had finished the training course, failed to recognize their moral obligation to remain and give their Province the benefit of the training they had received at the public expense and without cost to themselves, even drawing a generous salary during all the time. They "wanted a change" or "wanted to see the world," so secured positions in other schools, where, we might say, the results of our training course are meeting with hearty commendation. The new regulations relative to teachers in training, made out at the suggestion of the Minister of Education, and now in effect, will have a tendency to prevent, or at least greatly discourage, similar unfair and unpatriotic actions in future.

I might remark that our teacher training course extends over a period of three years for teachers who have charge of classes, and the fact that while they are carrying on their lecture, study and observation work, they are teaching a class under daily expert supervision and direction, and thus are able to apply, or have illustrated in actual classroom work, the technical knowledge they are acquiring, very greatly enhances the value of the course. But a teacher who has no class, but devotes all her time to this work, can cover the whole course in one year. Last year we had two such teachers, one from British Columbia and one from Manitoba, taking this one-year course. One of them is on our staff this year and is doing excellent work; the other was unable to accept my offer of a position and in the following letter expresses her appreciation of the course: "At the present time I do not see that I shall be able to apply for a position for next term in the O. S. D. Chiefly for family reasons, I hope to be able to remain in Manitoba. At the same time, I realize that even a year's practical work under the supervision possible in your school would be most helpful and I regret that I cannot avail myself of the opportunity. Looking at your experiment of the one-year training course from my own standpoint,

it would appear to be a success and I am most thankful that I happened to make inquiries regarding such training last autumn. In extent it seemed to equal similar courses offered in the United States and for which the tuition fees were high. The fact that the training was Canadian is, in itself, an advantage, and I am convinced that in no other training school could greater interest have been taken in our welfare than was evinced by yourself, the supervising teachers, and those who conducted observation lessons for the benefit of Miss Armitage and myself. The efforts of all were appreciated, and especially of Miss Ford and Miss Deannard, who unstintingly gave us the benefit of their time and extensive knowledge. I thank you for a most helpful year."

Visit of Prince Edward Teachers' Institute

On October 15th, by the kind permission of the Minister of Education, and to the great pleasure of our staff, the Prince Edward County teachers, to the number of over ninety, spent one day of their Institute at this School, devoting the whole day to visiting the classrooms and shops and gaining as full an insight as possible into our work. Such visits as these, apart from their propaganda results, are, I think, of real benefit to both the visitors and ourselves, for such contacts and interchange of ideas cannot fail to give an enlarged outlook on the great work in which we are all engaged, and awakening fresh inspiration and renewed enthusiasm in each and every one. This visit was greatly enjoyed by all at the School, and we hope for similar visits from other neighbouring Teachers' Institutes in future. The following letter, which I subsequently received from Mr. F. P. Smith, Public School Inspector for Prince Edward County, gives the impression our School made upon the visitors: "Ever since our Institute visited your school I have been trying to think of words which would express our appreciation of the way we were all used when we were guests of the School for the Deaf. The work which you are doing, in my opinion, cannot be excelled anywhere on this continent. Each child appeared to be happy and content. You are taking children with a handicap which would discourage most of us, and are making of them citizens, not a burden on society, but self-sustaining members of it. We were all particularly impressed by the work of the teachers in the Oral Department. In fact, I would not have believed possible that such results could be obtained. There seemed to be such a close feeling between pupil and teacher that not only were the children given a new outlook upon life, but were sent out with a sympathetic feeling for mankind. Not only were we struck with the intellectual side of the school, but we were equally impressed with the vocational side. We cannot speak too highly of the work of this Department. To all of us it was a revelation of what could be done."

The Expenditure

The expenditure has not changed materially in the last few years, and the per capita cost of maintenance has become stabilized at about \$400 a year, that for this year being \$391.69.

All departments have been conducted as economically as possible consistent with efficiency, and the farm and garden, while not primarily designed for the production of revenue, has to be credited with fairly good financial returns for the year.

The report of the Literary Examiner, H. J. Clarke, B.A., and that of Dr. Boyce, the Attending Physician, are hereto appended.

Before concluding this report I wish to thank you, Sir, and the Deputy Minister, Dr. Colquhoun, for the constant courtesy and assistance given me in the management of the school throughout the year.

Belleville, November 1st, 1926.

C. B. COUGHLIN,
Superintendent.

Officers of the School

C. B. Coughlin, M.D.	Superintendent.
J. W. Scandrett	Acting Bursar.

J. Spanner	Printer and Instructor in Printing.
J. Rutherford	Carpenter and Instructor in Carpentry.
A. Morrice	Shoemaker and Instructor in Shoemaking.
J. N. Boyd	Baker.

Literary Examiner's Report

My inspection occupied three weeks, one week in December and two weeks in the month of March. I visited each class twice with an interval of approximately three months between the visits, which gave me the opportunity of judging from personal knowledge, the progress in the several classes. In almost every case I found that the progress had been such that the work prescribed for the grade in question would be completed by the close of the session in June. In the case of one or two classes, who were behind in the work covered, it was possible to account for the deficiency by the fact that illness had interfered more or less seriously with the attendance.

With one or two exceptions, that we have already discussed, I found the work well done, and the classes proficient in the work covered. As in former years, I found certain classes to be outstanding in their work. It would probably not be wise to particularize as to the classes referred to in this connection, but I may say that it is a great pleasure to be able to report that the number of these superior classes is increasing, and I am looking forward with confidence to the day when the ordinary class will be the exception. After a thorough inspection, backed up by an experience of nineteen years as your official examiner, it is my opinion that taken as a whole you have a strong and well balanced staff of instructors.

This year two of your senior boys successfully passed the test for Junior High School Entrance. The Board of Entrance Examiners, of which I am Secretary, were highly pleased at the excellence of the papers submitted by

these students. Their work was of a very high order and reflects great credit on the School, and particularly on those directly concerned in their preparation. I most heartily congratulate the boys upon their success, and am personally delighted that these students were able to vindicate your opinion of their capabilities.

If I might be permitted to offer a suggestion, I would say that possibly the work prescribed in a grade where the teacher is undergoing training in methods of instructing the deaf, is somewhat too heavy to be properly covered. What I mean is this. This teacher-training takes considerable time, but is absolutely essential, and while the present curriculum which has been drafted after a great deal of careful thought, on the part of yourself and your more experienced teachers, is quite satisfactory where the teacher is trained and therefore supposedly efficient, it is just a question whether or not there is too much where the teacher is being trained. I consider your outline courses to be excellent and quite reasonable with experienced teachers of the deaf, and perhaps I am speaking without sufficient knowledge on this point.

Another idea that has occurred to me refers particularly to the Senior Department, and perhaps it is not workable at all. It is this: You now use the rotary system to a certain extent in the three higher classes, where the teacher takes the subject or subjects that he is specially qualified to take. Would it be possible to extend this system somewhat to advantage?

In conclusion, I wish to thank you and your staff for the many kindnesses shown me while in the discharge of my official duties. I also wish to say how much I appreciate the absolute frankness of everyone concerned, which made my duties much simpler than they would otherwise have been. There was absolutely no indication that anyone was seeking to hide anything, but on the contrary, I was freely given access to any information that I desired. I appreciate this very much. Wishing you and your staff continued success.

H. J. CLARKE,
Public School Inspector,
South Hastings, Belleville and Trenton.

December 31st, 1926.

Physician's Report

The session was especially eventful, owing to epidemics of scarlet fever and influenza.

Scarlet fever broke out January 25th, 1926, children who had been in contact were subjected to the Dick test for immunity, active cases were entirely quarantined, and to further advance prophylactic measures, all the children of the school received three inoculations of active scarlet fever antitoxin. The results were highly satisfactory, as we had in all but twenty cases, and none severe—one only being complicated with rheumatism.

An epidemic of influenza, beginning in November, lasted until late in December. It was generally of a mild type, the average duration of the case being from three to five days, four cases only being complicated with pneumonia, but all recovered. Besides the abovementioned, we had four cases of appendicitis, one operated on at Belleville General Hospital, all recovered. Four cases of acute pneumonia—a number of injuries generally minor in character, one fracture.

We had about the average number of ear, throat and nose trouble, and these cases require more or less constant attention to keep them in condition for school.

On the aggregate, I am pleased to report, that, with the above exceptions, the general health of the School has been very good. Now, as at all times, it is the infectious diseases that we fear and endeavour to avoid.

Much credit is due our Nurse, Miss Allison, for the thorough and painstaking character of her work and the interest taken in the general welfare of the children.

W. W. BOYCE,
Physician.

UNIVERSITY OF TORONTO

REPORT

OF THE

BOARD OF GOVERNORS

FOR THE

YEAR ENDING 30th JUNE

1926

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO

TORONTO

Printed and Published by the Printer to the King's Most Excellent Majesty
1927

UNIVERSITY OF TORONTO

REPORT OF THE BOARD OF GOVERNORS

FOR THE YEAR ENDING 30TH JUNE, 1926

To His Honour the Lieutenant-Governor in Council:

The Governors of the University of Toronto have the honour to submit their twentieth annual report, with which are incorporated the President's report upon the academic work of the University and its Colleges for the Session 1925-26, and the reports of various departments. There are also appended the usual detailed statements of the receipts and expenditures of the Board for the fiscal year, which have been duly audited by Mr. G. T. Clarkson, whose certificate is attached.

During the year rapid progress was made with the construction of the new Hygiene and Public Health Building to which reference was made in the last report, there having been expended thereon to 30th June, \$190,206; and the building is expected to be ready for occupation in the near future.

Under the arrangements made possible by the passing of the Act 16 Geo. V, Cap. 69, whereby an annuity of \$13,480 is guaranteed to the University for twenty years, the present value of which is \$168,000, two properties on St. George Street were purchased for \$60,346. One of these has since been occupied by the Department of Social Service and the other will probably be utilized as a students' residence. Following the close of the year under review two other properties were secured at reasonable prices, one of which has been converted into a residence for men students of University College.

Upon the creation of the Faculty of Dentistry at July 1st, 1925, the Royal College of Dental Surgeons transferred to the University assets to the estimated value of \$475,000 in the form of site, buildings and equipment, subject to a liability of \$50,000 to be paid at a future date. The University accounts consequently now include, for the first time, the maintenance of that Faculty.

The ordinary revenue of the year was \$1,219,722, which includes Dentistry receipts of \$101,695. The deduction of \$26,908 for interest written to Scholarship and other trust funds left a net revenue of \$1,192,814, to which was added the Special Legislative Grant of \$987,945, making a total available income of \$2,180,759.

The expenditure under the appropriations for salaries and maintenance (including Dentistry \$126,014, but exclusive of the Ontario College of Education which is supported by a separate vote) was \$2,128,842. Omitting dentistry

for the purpose of comparison with the preceding year, in which the similar expenditure was \$1,976,415, it will be found that the expenditure of 1925-26 exceeds that of 1924-25 by \$26,413 only, a very moderate increase in view of the magnitude of the services carried on by the Provincial University.

The surplus of receipts over expenditures was \$51,917, which has been carried forward in the Special Contingent Fund to meet the needs of the present or future years.

All of which is respectfully submitted.

H. J. CODY,
Chairman.

Toronto, 29th November, 1926.

PRESIDENT'S REPORT

1925-1926

To the Governors of the University of Toronto:

GENTLEMEN:—

I beg to submit the following report on the academic work of the University and University College during the twelve months ended June 30th, 1926.

The total staff of the University and University College numbered 672, of whom 85 were professors, 63 associate professors, 62 assistant professors, 123 lecturers, associates (in medicine) and instructors in the College of Education, 2 directors, 1 director of field work, 336 demonstrators, fellows and instructors with sessional appointments. They were distributed as follows:

	Professors.	Associate Professors.	Assistant Professors.	Associates.	Lecturers.	Directors.	Director Field Work.	Other Sessional Appointments
University (Faculty of Arts).....	26	20	20	..	24	64
University College.....	10	11	7	..	10	7
Faculty of Medicine.....	22*	10	19	21	10†	166‡
Faculty of Applied Science.....	12	7	11	..	13**	39
Faculty of Household Science.....	..	2	1	..	2	5

Military Studies.....	1

*One also in University.

†Two also in Ontario College of Education.

‡One also in Faculty of Dentistry.

**Two also in University.

In Victoria College there were:

Professors.....	15
Associate Professors.....	2
Lecturers.....	7
Special Instructors.....	1

In Trinity College there were:

Professors.....	12
Lecturers.....	8

In St. Michael's College there were:

Professors.....	13
Lecturers.....	9

With regret I report that the following members of the staff have died during the past academic year.

In October, 1925, Dr. James Mavor, Emeritus Professor of Political Economy, passed away suddenly at his brother's house in Glasgow. Professor Mavor had held this chair in the University for thirty-one years, and was one of its best known figures. He was a man of extraordinary versatility with a very wide range of acquaintance in many lands, and his opinions he held firmly and expressed with decision. His work, both as an economist and as a literary man, was widely known in Britain and on this continent. He will always be remembered with kindness by the older members of this staff.

With startling suddenness, Dr. William Robert Lang was called away in November. Preceding the War he had been for fourteen years Professor of Chemistry in the Faculty of Arts and since the War, Director of Military Studies. He threw himself with enthusiasm into the organization and direction of this new department, and was also Officer Commanding the C.O.T.C. The combined work of these departments he brought in a short time to a high degree of proficiency. He is deeply regretted by his colleagues and students.

In September, 1925, Dr. Patrick Walter Hughes McKeown, Associate Professor of Surgery and Chief Clinician in Surgery in St. Michael's Hospital, passed away after a protracted illness. For years he had served his Hospital and the Faculty of Medicine with devotion and his death has removed one who is affectionately remembered by his colleagues.

Dr. Richard Gand McLaughlin, Professor of Dental Jurisprudence and Ethics in the recently created Faculty of Dentistry, died in December, 1925. He was a man efficient in his profession and in his teaching, intent on good works, and will long be regretted by a large circle of friends.

Miss Louise Isabel Livingstone, after a painful illness which lasted throughout most of the winter, died in May, 1926. For ten years she had been in charge of the Residence for the women of University College known as Queen's Hall, and her memory is cherished with gratitude by those who year after year had been under her kindly supervision.

At the close of the session, Professor W. J. Alexander having reached the age of seventy, retired from active duty in University College in which for thirty-seven years he had held the Chair of English. During these years he taught at some time nearly every student who passed through the College and by universal admission he was one of the most respected teachers of his time.

The following resigned:

Marcel Moraud, L. ès L., Paris, Associate Professor, French; Owen William Ellis, M.Sc., Birmingham, Assistant Professor, Metallurgical Engineering; Miss Lois Katharine Stewart, B.S., Kansas, M.S., Wisconsin, Assistant Professor, Household Science; John Lighton Synge, M.A., Dublin, Assistant Professor, Mathematics; Harvey Clare, M.D., C.M., Associate, Psychiatry; A. Melbourne Patience, B.A.Sc., Lecturer, Electrical Engineering; Stewart Gordon Bennett, B.A.Sc., Secretary, Faculty of Applied Science and Engineering, Lecturer, Commercial Engineering.

Leave of absence was granted to the following:

Charles Ryle Fay, M.A., Cambridge, D.Sc., London, Professor, Economic History, on sick leave for the spring term; George McKinnon Wrong, M.A., LL.D., McGill, Professor, History, for the spring term; Miss Annie Lewis Laird, M.S., Drex., Associate Professor, Household Science, for the spring term; Ellis Thomson, B.A.Sc., Assistant Professor, Mineralogy; Miss Gladys Ingelson

Wookey, M.A., Lecturer, English, on sick leave; Miss Jessie Gertrude Wright, Ph.D., Lecturer, Botany, to exchange with Miss E. R. L. Reed of the University of Western Australia; Miss Agnes Christine McGregor, Director Field Work, Social Service, on sick leave.

In April, Professor Oskar Klotz, head of the Department of Pathology, was granted leave of absence until the first of November at the request of the International Health Board in order to investigate pathological problems concerning the origin of yellow fever on the West Coast of Africa. The results of this very important commission will probably be of great value in regard to the localization of this dread disease and it is hoped its extirpation.

The following new appointments and promotions were made during the year:

In the Faculty of Arts—Appointments: William John Webber, B.A., Cambridge, Assistant Professor, Mathematics; George William Brown, M.A., Ph.D., Chicago, Lecturer, History; Miss Freda Cooper Cole, M.A., Lecturer, French; Michel Poirier, L. ès L., Lecturer, French; Miss Norma Henrietta Carswell Ford, B.A., Ph.D., Lecturer, Zoology; A. J. Glazebrook, Special Lecturer, Banking and Finance; Andrew Robertson Gordon, M.A., Lecturer, Chemistry; J. F. Macdonald, M.A., Lecturer, English; Thomas Forsyth, McIlwraith, M.A., Cambridge, Lecturer, Anthropology; Robert Edward Kingsdown Pemberton, M.A., Oxon., Lecturer, Classics; E. J. Urwick, Special Lecturer, Political Economy.

Promotions—John Satterly, M.A., Cambridge, D.Sc., London, from an associate-professorship to a professorship in Physics; Emilio Goggio, A.B., M.A., Ph.D., Harvard, from an assistant-professorship to an associate-professorship in Italian and Spanish; William Paul McClure Kennedy, M.A., Dublin, Oxford, Litt.D., Dublin, from an assistant-professorship to an associate-professorship in History; Linnaeus Joslyn Rogers, B.A.Sc., M.A., from an assistant-professorship to an associate-professorship in Chemistry; Fulton Henry Anderson, B.A., Dalhousie, M.A., Ph.D., from a lectureship to an assistant-professorship in Philosophy; Edward Horne Craigie, B.A., Ph.D., from a lectureship to an assistant-professorship in Comparative Anatomy and Neurology; Geoffrey Elwood Holt, M.A., Mus. Bac., from a lectureship to an assistant-professorship in German; Norris Edward Sheppard, M.A., from a lectureship to an assistant-professorship in Mechanics.

In the Faculty of Medicine—Appointments: Henry Arthur Cates, M.B., Assistant Professor, Anatomy; Peter Joseph Moloney, M.A., Ph.D., Assistant Professor, Hygiene; J. E. Bates, B.A., McMaster, M.B., Lecturer, Pathology; George Herbert William Lucas, Ph.D., Lecturer, Pathology; John Gerald Fitzgerald, M.D., Director, School of Hygiene; Robert Davies Defries, M.D., D.P.H., Associate Director, School of Hygiene.

Promotions—Hardolph Wasteneys, Ph.D., Colorado, from an associate-professorship to a professorship in Biochemistry; Nicholas D'Arcy Frawley, M.B., from an associateship to an assistant-professorship in Obstetrics and Gynaecology; George Hunter, M.A., B.Sc., Glasgow, from a lectureship to an assistant-professorship in Pathological Chemistry.

In the Faculty of Applied Science—Appointments: James Arthur Newcombe, B.Sc., London, Assistant Professor, Metallurgical Engineering; William Bowie Dunbar, B.A.Sc., Lecturer, Engineering Drawing; William Gourlay McIntosh, B.A.Sc., Lecturer, Mechanical Engineering; Robert J. Montgomery, Cer. E., Ohio, Lecturer, Ceramics; A. Melbourne Patience, B.A.Sc., Lecturer, Electrical Engineering.

In the Faculty of Household Science—Appointments: Miss Charlotte Frances Valentine, M.A., Lecturer, Household Science.

In the Faculty of Music—Appointments: Ernest Campbell MacMillan, B.A., Mus. Doc., Oxford, Lecturer, Church Music.

In the Faculty of Dentistry—Appointments: Entire Faculty.

In the Department of Military Studies—Appointments: Brigadier-General George Strachan Cartwright, Director of Military Studies.

The total number of students registered in the University in 1925-1926 was 5,480, distributed as follows:

	Men	Women	Total

Exclusive of the Faculty of Dentistry this total is larger than that of the preceding year by three hundred students, the increase being chiefly in the Faculty of Arts and the Ontario College of Education.

In addition to the students in regular courses at least 2,225 persons have been receiving instruction provided by the University through its evening classes held in Toronto, Hamilton, and other cities and towns of the Province.

During the past session the School of the Royal College of Dental Surgeons became the Faculty of Dentistry in the University, thereby adding 346 students to the roll of the University, and bringing new demands and new opportunity for meeting the needs of the people of the Province. It is hoped that the University will be able, as it has done in so many other instances, so to develop teaching and research in this Faculty that the profession of dentistry in Canada will more than maintain the high position that it now occupies.

The Reception Hospital for the observation of mental diseases, erected at the expense of the city and maintained by the Government of the Province, was opened for teaching purposes at the beginning of the session. The Director of the Hospital, Dr. C. B. Farrar, was also appointed Professor of Psychiatry in the University. It is hoped that under him the opportunities now made available will prove to be of high advantage to the students of the University and in the understanding and restraint of mental diseases.

The University was fortunate in being able to supply the place of the late lamented Colonel Lang by Brigadier-General G. S. Cartwright, who already for some years had been a voluntary instructor in the department, and was able to carry on the work with the least possible interruption.

We are also indebted to Mr. E. J. Urwick, formerly Professor in King's College, London, for having so willingly undertaken lectures in Economic History for which, owing to the illness of Professor Fay, it was necessary to provide during the second term.

The University continues to be under an indebtedness to gentlemen in various branches of business who have delivered lectures to the students in commerce on phases of business with which they have been specially familiar. Especial mention should be made of the services rendered by Messrs. Macaulay, Hume Cronyn, Herdegan, Marvin, Ratcliffe, Pritchard, J. A. Tory and S. R. Parsons.

The figures in this report with regard to the attendance give all the information that is necessary, but I may merely draw attention to the fact that the attendance in the Ontario College of Education has been unusually large and that the supply of high school teachers in Ontario, like that of the public school teachers, now exceeds the demand. In the new course provided in the Faculty of Household Science there has been a larger attendance than was anticipated. It is also noteworthy that more students from other countries than Canada are coming to the University each year, and especially is this manifested in the Department of Nursing in which last session several students from Europe, chiefly supported by the Rockefeller Foundation, received their training. I would call attention to the new arrangement of the course in Nursing which is outlined in the Report of the Director.

On January 19th the new Forestry Buildings were opened, and a hope long cherished has been fully realized. Also on January 20th the foundation stone of the School of Hygiene was laid. The erection of this building has been made possible through the gift of the Rockefeller Foundation, and when completed it will be one of the most adequate for its purpose to be found in any university. To make way for the erection of this building the Department of Social Service

was transferred to a residence on St. George Street, which without very large expense accommodates the department even better than did its former home.

The presentation of a portrait of the Honourable Robert Baldwin was the occasion of a very interesting gathering in Baldwin House on December 16th. The portrait, made from the most authentic likenesses, is the gift of his descendants, and is a valuable acquisition to the University which owes so much to this statesman.

Most significant also of the great change that has come about in the higher education of this Province is the fact that in October, 1925, there was the formal opening of the beautiful new building of Trinity University and College on the grounds of the University, and that the Senate of the University held a special Convocation at which honorary degrees were conferred in recognition of this event. The success of university federation in Toronto is an accomplishment of which all those who had a share in bringing it about may be justly proud.

One of the many distinguished visitors at the University during the past session, after studying carefully the faculties at work, expressed in public his admiration for the spirit of the University particularly as shown in the unity that pervades its multiplicity. He found here a federation in which various units were reconciled while retaining their individuality and receiving support from the Province; also a great variety of faculties and departments brought together in close relationship so that throughout them all there is a strong feeling of being organically connected with a larger whole. Among the students he found this manifested in Hart House, where the men of the various faculties come together in one building affording them almost every variety of social, athletic and spiritual opportunity. Indeed the unique value to the University of Hart House is now widely recognized not only on this continent but in Britain as well. If the observation as to our unity in multiplicity be correct, as I believe it to be, the future of the University is well assured, for one of its main purposes is to afford the support and stimulus that come to all professors and students from the realization that they are members of one body, and that by each member performing its function the health and work of the body will be developed.

Other visitors have been impressed also with the goodwill that exists between the University and the city. My observation would lead me to believe that this has been increasing and that the city is well disposed towards the University whose name it bears.

I wish in this report to draw special attention to the great growth in the spirit of research that has been manifested in the past five or six years. The University is alive with a new life and from every part of it there comes the desire to have a share in the advancement of knowledge, and in the deeper understanding of the forces both in the human and natural world, which must always be under investigation by any great university. A survey of the work of the period will be found in the appendix.

Hart House has been such a factor in the life of the men students in this University that the lack of any building in which the common life of the women of the university may be promoted is all the more felt. The facilities for physical training are quite inadequate, and there are no rooms in which the women of all colleges and faculties can meet together for general university purposes. During the past year plans for a new building have been drawn up, and again I wish to express the strong hope that it will not be long before these plans are carried into effect.

In an annual survey it is only right that mention should be made of the special needs of the University. Of all the departments, Botany is that which

has been waiting longest for better equipment. For many years the great need of a Botanic Garden for this University and Province has been emphasized. In the neighbourhood of Toronto a suitable site may be obtained in which the national botanical treasures might be displayed and their economic possibilities set forth. Recently the Director of the Royal Botanic Gardens at Kew has visited the city, and once again it has been brought to our attention that such a garden is a necessity for the study of native vegetation, the preservation of native flora, and the promotion in the Dominion of economic developments similar to what has been so effectively done for years by Kew Gardens.

Another need that for years has remained unmet is the provision of an observatory with a modern telescope worthy of this Province and of the University. It is probable that the city could be induced to co-operate with the University in both these enterprises, and in both there is a field for private benefaction.

It will be necessary soon to enlarge the library. It is now nearly twenty years since the last addition was made, and the space on the shelves is almost filled. The use of the library, as I have mentioned in my former reports, has been greatly increased of late years, and the growth of graduate work makes far greater demands upon it. It has a larger collection of scientific and foreign periodicals than any other in Canada, and though it offers average opportunities for work, the money spent upon it has not enabled the librarian to overtake the demands made upon him for books for the different departments. Both accommodation and contents must be added to.

During the session the following special lectures were delivered:

A course of twelve lectures on "Some Manners and Customs of Peoples of the World," by Sir Bertram Windle, F.R.S., Special Lecturer in Ethnology in the University of Toronto; two lectures on "Roman Aqueducts" and "Roman Roads," by Dr. Thomas Ashby, Director of the British School of Archaeology at Rome; two lectures by Dr. Gilbert Bagnani of Rome on "Life in Ancient Rome Under the Empire," and "Pagans and Christians in the Light of Recent Discoveries"; three lectures on "Matthew Arnold," by Professor G. G. Sedgewick of the English Department of the University of British Columbia; five lectures with readings from his own poems by Bliss Carman, the Canadian poet; a lecture on "The League of Nations and the Schools," by Dr. Maxwell Garnett, Secretary of the League of Nations Union of Great Britain; three lectures on "Plant Population and Juxtaposition as Leading to Conjoint Life," "Size as a Factor in Stellar Morphology," and "Natural Classification of Ferns," by Professor F. O. Bower of the University of Glasgow.

The triennial delivery of the Marfleet lectures took place last November, when a series of three lectures was delivered by the Honourable John Bassett Moore of the Permanent Court of International Justice at the Hague. Judge Moore, who is one of the leading authorities in the United States on International Law, took as his subject "Judicial Power: Its Possibilities and Limitations." These lectures will shortly be published.

Dr. F. A. Mouré, University organist, again gave a series of organ recitals in Convocation Hall to large audiences.

Three special convocations were held in September, for the purpose of conferring honorary degrees upon the Right Honourable Baron Buckmaster; in October, in connection with the formal opening of the new Trinity College Building, when honorary degrees were conferred upon the Lord Bishop of Toronto, Miss Mabel Cartwright and C. S. MacInnes, Esq.; in March, when the honorary degree of Doctor of Laws was conferred upon Field Marshal Viscount Allenby.

During the past year the University has received the following benefactions:

From the Rockefeller Foundation, payment on account of grant for construction of new Hygiene Building, \$300,000; second payment on account of School of Hygiene, \$12,500; Eaton Endowment (annual payment), \$25,000; Laura Spelman Rockefeller Memorial for Child Research, \$12,000; John Honor bequest, \$7,106; Margaret W. Baptie bequest, \$4,000; Dr. D. C. Balfour, Lectureship in Surgery, \$4,000; Graduate Fellowships: Colonel R. W. Leonard, \$500; Imperial Oil Company, \$500; Sir Edward Kemp, \$500; The Robert Simpson Company (for 1926-1927), \$500; Canadian Pacific Railway (for 1926-1927), \$1,500; Canadian National Clay Products Association for Ceramics, \$3,000; Ontario Women's Liberal Association, for Sir Wilfrid Laurier Memorial Scholarship, \$2,100; E. R. Peacock, Esq., and Sir Joseph Flavelle, for Flavelle-Peacock Lectureship, \$1,250 each; Federation of Jewish Philanthropies, for Rabbi Brickner Scholarship in Social Service, \$1,050; David Fasken Trust, \$1,000; Mrs. F. F. Dalley, Sr., for Physiology Research, \$600; Robert Bruce Scholarship, \$460; Sir Henry Thornton, for Sesquicentennial Exposition, \$360; Boiler Inspection and Insurance Company, Scholarship in Mechanical Engineering, \$150; T. Eaton Company, Limited, for Sir John C. Eaton Memorial Scholarship, University Schools, \$120; the late Mrs. Herbert Barton, for Jardine Memorial Prize, \$100; McCaul Scholarship in Classics: G. A. H. Fraser, Esq., \$25; Principal M. Hutton, \$25; A. M. Stewart, Esq., K.C., \$25; Toronto Bankers' Educational Association, Prize in Physics, \$50; Dr. R. A. Reeve Prize, \$50; University College Alumnae, for Prize in English, \$10.

All of which is respectfully submitted.

ROBT. A. FALCONER,
President.

October 28th, 1926.

A SURVEY OF RESEARCH IN THE UNIVERSITY OF TORONTO

1920 - 1926

A survey of the past six years of the life of the University indicates that the greatest development has lain in the movement for research, especially in the scientific departments, and that in this the University is fulfilling one of its most important functions. The new movement may be said to have begun with the creation in 1912, through gifts from citizens, of a Medical Research Fund amounting to nearly \$50,000 and the erection of the Connaught Anti-toxin Laboratories through the generosity of Colonel A. E. Gooderham. In 1915-17, a special fund of \$15,000 was established by the Government for the investigation of problems connected with the functional re-education of returned soldiers; also of problems in Engineering and Applied Chemistry, prior to which time teaching had constituted almost the entire work of this faculty. The greatest forward step was taken in 1920 when \$60,000 was placed in the annual estimates by the Government for scientific research. This has been continued and augmented until now it amounts to \$80,000. In addition the Government has set aside annually \$10,000 for the maintenance of research by Drs. Banting and Best. Also in the summer of 1925, the Banting Research Foundation, amounting to nearly \$600,000, was created, chiefly through the efforts of the Chancellor, Sir William Mulock, and some Toronto gentlemen, the proceeds to be devoted to medical research in this and other Universities of Canada. Grants have also been made by the Carnegie Corporation in aid of investigations in the Departments of Physics and Physiology. In view of the expenditure of such large amounts of money the question is often asked as to results, and naturally so, though it cannot be too strongly emphasized that perhaps the most important is the creation of a new spirit which is only to be felt. One professor writes that "since the inception of the research fund the spirit and attitude of the departmental staff have been revolutionized." This I believe would be agreed to by the heads of most of the departments. Further, the discovery of a piece of scientific information, which may as often as not have been an unexpected side-issue, may not at present seem to be of special value, but may at any time lead to greater discovery. It is, however, possible to point to tangible results, valuable professionally and in their application to industry.

The first great contribution to the life of Canada made possible by this fund has been the large number of young men and women who have been trained in research methods and have been prepared for a life of scientific research. The Secretary of the School of Engineering Research writes that in engineering ninety-nine graduates have been in the employ of the School as Research Assistants and these positions are now being looked upon as a reward for exceptional laboratory ability and high scholarship. Another writes that in every year of the six at least twenty-four young men received training in methods of chemical research and this is the most important result of the policy of the University; and a third writes, "to my mind the real value of the research fund is to train young men for service in Canada." In addition to the trained body of research workers upon whom the Dominion and the Province may draw for

the development of their resources and the advancement of science within our borders, there have been advances made in pure science of the highest importance. It is difficult to know when a discovery in pure science passes over the border into applied science, so obvious is it that a practical application often is the outcome of a purely scientific method and spirit. Who can estimate what Drs. Banting and Best have done for the world? And yet they were moved by a pure scientific spirit of discovery. If there had not been a physiological laboratory presided over by such a leader of scientific method as Dr. Macleod, in which they had the co-operation of other men of scientific mind and training the present results would not have been what they are. Though it is therefore, almost impossible to distinguish the line where the purely scientific departments pass over into the applied, I shall first refer to the former as ordinarily defined.

In Botany studies have been made of parasitic fungi and rusts of conifers with a view to the eradication of their "intermediate hosts"; of the diseases of spruces, balsams, larch and jack-pine to which are due high losses in logging. Studies have been made of defective pulpwood and of the red stain of jack-pine which affects greatly the value of railroad ties. These studies will prove to be of use to the Ontario Forestry Branch and to those engaged in the lumber industry. For several years also work has been done on poisonous plants which has already been recognized as of great practical value to medical men, veterinarians and stockmen.

In Zoology there have been developed co-operative investigations in relation to agriculture, animal breeding and fisheries, and "the amount of work accomplished during the last five years is easily the equivalent of that accomplished during the whole previous history of the department"; "it is certain that any one of the enterprises as, for example, the work of the Fisheries Research Laboratory, would justify the entire expenditure made for research purposes." The proper administration of fisheries, now worth in this Province alone annually \$3,000,000, depends upon intimate knowledge of the biological conditions of the water, demands thorough-going examination by experts as to food enemies, growth, time of sex maturity, and other factors. Most valuable work has been done in Lake Nipigon which has received recognition abroad. But it is only in its beginning and much larger funds should be made available.

In Zymology, which is the science of fermentation, for some years there has been a close study of a fundamental problem as to the oxidization of glucose and other sugars, which has an important bearing on several phases of scientific and industrial activity, since acetone, butyl and ethyl alcohol and lactic acids are its products. In fact so important is it that Dr. Speakman of this department was at special request granted leave of absence to diagnose and correct processes in an important industrial plant, and investigations are being conducted which may have great value for this branch of Canadian industry; other results may be of value to the fish industry.

In Chemistry there have been investigations as to a method of preparing certain types of organic compounds, of use not only in scientific laboratories but in chemical manufactures. Two distinct chemicals have been found present in beer-wort and in a hundred fruit juices, leaf and root extracts, animals, etc., which must be added to the artificial media if results are to be obtained comparable to those of nature. These are not identical with any known vitamins, but both are absolutely indispensable to the reproduction of certain races of yeast, and it is being attempted to isolate these physiologically important substances and study their chemical constitution, in the hope of opening up a new group of organic compounds of great theoretical and practical importance.

Other investigations have dealt with conditions that are the source of much trouble in the equipment of the electrical furnace, and others have been conducted in order to secure reliable data on concentration changes during voltage measurements. Others again as to causes of the blue colour of the skies and the blue path of an intense light beam through a liquid or gas, and it has been found that this light scattering is a definite measurable property of all pure substances.

Coming to Biochemistry it is difficult for any but an expert to have much conception of the problems, but Professor Hunter has been investigating the proteins and the ferments or enzymes, which as constituents of protoplasm are responsible above all others for and necessary to the existence of life. He has thrown light upon the general chemical constitution of proteins, and in the investigation of enzymes he has arrived at results which may prove of fundamental importance showing how digestive enzymes may synthesize proteins from the products of digestion; similarly glycogen can be synthesized. His method has been of value in studying the course of gastric digestion and his results have been recognized by experts as "valuable contributions."

The grants for Geological Research have been spent on most successful expeditions to Alberta in the search for fossil dinosaurs, and five new genera and two new species have been discovered and described. These have attracted wide attention, and their actual cash value many times exceeds what was spent on them. The geology and palaeontology of the Credit River area and of a section of Georgian Bay has also been carefully investigated. Professor Coleman has continued to conduct investigations of glacial geology in the Rockies, Gaspé, Labrador and Newfoundland, and Professor Moore of the economic geology of Northern Ontario.

In Mineralogy continued investigation has shown that in Ontario there are rock formations containing pitch-blende among the oldest known on the earth's surface. One new mineral has been discovered which seems to constitute the most hopeful source of radium in Canada, and attention has been called to occurrence of two other Ontario minerals, not previously known to science. There are other results also which may be later applied in the study of deposits of economic minerals.

As far back as the War the Psychological Department devoted much attention to problems of the physical and mental re-education of convalescent soldiers, and later enquiries have grown out of that. Study of muscle action led to knowledge of stereoscopic vision and characteristic eye movements in reading. Modifications in methods of teaching reading have been suggested and the results have become part of the standard tests for aviation pilots. Further study has been made of motor functions, educational maladjustment and behaviour problems.

An investigation into the fur trade led to the publication by the Department of Political Economy of a variety of theses dealing with many aspects of the trade, and these have elicited widespread and most favourable appreciation expressed in letters and otherwise from those concerned in this department of trade and industry.

The special research carried on in the Department of Physics during the past five or six years that has commanded the attention and won the approval of the scientific world has been chiefly in the domain of low temperature, spectroscopy, magnetism and colloidal solutions.

In the field of Low Temperature Research the first accomplishment was the liquefaction of helium. As this had only been done in one other laboratory in

the world, namely, in Holland, it at once placed our laboratory in a unique position among the laboratories of the British Empire and of America.

The second accomplishment in this field had to do with the spectrum obtainable from nitrogen solidified by liquid hydrogen or liquid helium, and Vegard's theory has been overthrown by the demonstration that none of the features of the spectrum of solid nitrogen are found to characterize the spectrum of the aurora. This result has also led on to other researches that have had a successful issue in the field of spectroscopy.

In connection with investigations on the structure of atoms it has become of importance to ascertain if possible the exact form and structure of the molecules of hydrogen and helium, two of the simplest of the elements. By investigating the spectrum of these gases at the low temperature obtainable with liquid hydrogen and liquid helium their spectra have been so simplified that the road is almost directly open to the general solution of the problem of the structure of these molecules.

By low temperatures, gases such as oxygen, nitrogen, chlorine and bromine have been solidified, and as a consequence the crystal form of these simple elements when solidified has been determined, a result that is helping to a clearer conception of the molecular form of these and other substances.

A year ago a most notable discovery was made in the field of spectroscopy, namely, that of the origin of the famous green line in the spectrum of the aurora. It has been shown to have its origin in oxygen and not in nitrogen as was thought by Vegard. Physicists have been endeavouring for sixty years to obtain in laboratory experiments the green spectral line that is the chief characteristic of the auroral spectrum. This line has been obtained with oxygen under certain conditions, and especially strong when oxygen mixed with one or other of the rare gases, helium, neon, or argon, was used.

This research has stimulated much research work in the world because of the fact that it has opened the way to our learning something of the constitution and state of the upper atmosphere in regions as high as 400 miles.

In the study of colloidal solutions such advances have been made that Professor Burton is looked upon as a leading authority on this subject.

In order that the Department of Astronomy might share in the expeditions that were made to Australia and Mexico grants of money were assigned to Professor Chant. By the former expedition, which was made for the purpose of observing the transit of Venus, most valuable data were obtained in confirmation of the recent Einstein theory.

In Physiology researches have been conducted on carbohydrate physiology, including and leading up to and following the discovery of insulin, which discovery alone has more than justified all the expenditure. There have been other researches such as those of Dr. Fidler dealing with the respiratory exchange of simple forms of animal life; others again on the control of respiration, the function of the nervous system, and ductless glands.

In Anatomy the development of the roof of the fourth ventricle of the brain has been investigated, and while the study is not yet quite complete, it points to the necessity of a decided modification of current views as to the structure of this part of the brain. The matter is of considerable practical importance.

Other investigations have been made as to the deposition of calcium salts in animal tissues with a view to discover the conditions governing the formation of bone and of the calcification which may occur in various tissues, such as cartilage, the walls of the arteries, etc.; others again as to pathological conditions of the central nervous system.

They can be placed to the account of the School of Engineering Research improvements in processes, in design and in engineering practice as well as investigations into underlying facts and principles. These have been embodied in six bulletins which contain seventy-seven research papers for which there has been a wide demand from engineers and scientific workers in many countries. They cover a large range of subjects: on methods of computing the flexural strength of reinforced concrete fixtures in electrical distributing systems; wind-stressing in reinforced concrete chimneys; economic proportions of conduits; effect of movement of crowds on structural members of large buildings; metallurgical difficulties in cyaniding gold ores with small amounts of copper; electrolytic methods of refining nickel; chemical problems in engineering concerning materials for furnaces; the causes of change of colour in pigments; wood distillation and the constitution of cellulose, which as pulp and paper is produced in Ontario in enormous quantities. It is hoped that as a result much waste in manufacture may be eliminated. Investigations into the constitution of rubber and the nature of the change occurring in its vulcanization have received attention in the rubber journals of England and France. A new theory of the mechanism of catalysis has been propounded which may lead to practical results in industrial processes.

Professor Haultain's work on the problem of the paths of balls in rock crushing mills has shed so much light on the subject that the exhibition of his films has been asked for in all the important mining centres of the United States, and the explanation has now been accepted.

In the Hydraulics and Thermodynamics Laboratory, Professor Augus has been studying the effect of water on the dam, from which he has deduced results as to the shape of canals which were embodied in the design of the Chippewa Canal and the intake at Niagara Falls. Other researches have dealt with the best methods of constructing buildings to save coal.

The investigations conducted by Professor Parkin in the new wind-tunnel have received strong commendation and have led to the development in Canada of a series of types of aircraft adapted to Canadian conditions and requirements. He has demonstrated that a properly designed tail leads to stability and control, and these improvements will be made use of in design of machines for exploration, forest patrol and general commercial service.

In electrical engineering, Professors Rosebrugh and Price have carried out both theoretical and practical researches dealing with the calculations as to transmission lines and groups of lines; the theoretical results by the former were presented to the Mathematical Congress that met at Toronto two years ago. On the practical side the work has chiefly been on electrical current transformers and a new method of constructing a seconds pendulum for electric clocks.

Work has been done under Professor Anderson on illumination and especially as to the action of automobile headlights.

By the Department of Architecture a record has been made of fine old houses of Ontario which were erected in the eighteenth and nineteenth century, many of which are now in a bad shape of repair but are of great architectural merit, and the design of which will be of value in the history of Canadian architecture.

Experiments have been conducted under the direction of the Committee on Experimental Research in the Faculty of Medicine covering almost every department of medical activity. In all over forty persons have been engaged in research during these years, and there is a record of over sixty researches, some of them of great importance for practical problems in medicine and surgery.

In 1917 the Connaught Laboratories and University Farm were acquired by the University through the generosity of Colonel A. E. Gooderham. The laboratories were provided primarily for the purpose of supporting research into problems of Hygiene, Preventive Medicine and Public Health, especially to provide means whereby "the incidence of and mortality from communicable diseases may be lessened."

In that year (1917) an undertaking was given by the Prime Minister of Ontario that a sum of \$3,750 would be voted annually by the Legislature of the Province of Ontario for the support of this research work. In 1919, this undertaking was implemented and the Research Division of the Connaught Laboratories was established. Financial support for the work of this Division has been provided by the income on the Connaught Laboratories Research Fund, the annual grant referred to above, substantial contributions annually from the income of the operating divisions of the Connaught Laboratories, and finally by a grant from the Government of Canada provided through the Department of Soldiers' Civil Re-establishment. This latter grant is made to meet the cost of laboratory work undertaken for Chest Clinic at the Christie Street Hospital, Toronto.

In a general way research undertakings of two sorts have been undertaken. First, those which have been carried on in the Connaught Laboratories and Department of Hygiene and Preventive Medicine by members of the staff of those laboratories, and secondly, co-operative investigations where the personnel of these laboratories have joined with their colleagues in other departments in programmes of research. These conjoint efforts have been liberally supported by Connaught Laboratories funds. In addition, a demonstration was financed by the Connaught Laboratories to assist in the organization and development of the Students' Health Service of the University.

Since 1920 investigations have been undertaken in the Research Division of the Connaught Laboratories and in the Chest Clinic, Christie Street Hospital; a demonstration which led to the organization of the University Health Service; co-operation with the Department of Physiology in providing for research work in applied physiology (certain problems in ventilation) and in early insulin investigations; with the Departments of Physiology and Zymology in conducting an investigation into the question of the possible therapeutic value of tissue extracts (chiefly liver extracts) in the treatment of essential hypertension; recently in association with the Department of Pathology and Bacteriology in conducting research into certain aspects of the problem of human and bovine tuberculosis in conjunction with the National Research Council of Canada.

Within the Research Division of the Connaught Laboratories, a large number of investigations in the fields of bacteriology, immunology, immunochemistry, infection and immunity, applied physiology, and biochemistry have been carried on. The subjects of tuberculosis, diphtheria, scarlet fever, vaccinia, among a great many, have received especial consideration. During the past six years two volumes of studies comprising fifty-nine papers have been published.

REPORT OF THE PRINCIPAL OF UNIVERSITY COLLEGE

PROFESSOR MAURICE HUTTON

The session of 1925-1926 has been passed under the disadvantage involved in the resignation of Professor John Macnaughton—a tower of strength in himself to University College, with his unequalled combination of scholarship, eloquence, breadth of view and popularity—and in our inability to find a successor adequate to fill his chair.

The disadvantage passes away with the session; and in Professor Gilbert Norwood, formerly Fellow of St. John's College, Cambridge, and Professor of Classics in University College, South Wales, and well-known classical author, we have reason to hope that even John Macnaughton's absence will not be irremediable—*il n'y a pas d'homme necessaire*—not even John Macnaughton.

Meanwhile the College Department of Latin has functioned fairly well with the assistance of the staff in Greek and with the addition of Mr. Pemberton, a first-rate Oxford man, whose sources have been placed at our disposal by the kindness of the Provost of Trinity College.

Professor J. H. Cameron, Head of the French Department, will be away on leave of absence after the end of this session; no department is more congested, and the withdrawal of Professor Cameron will involve new appointments, one or, better, two in French.

In spite of the withdrawal from University College of the Administration, the pressure on its lecture rooms continues very severe and embarrassing; large classes in Mathematics and Political Science—not college subjects—have still to be provided for by University College.

The suggestion from the Premier and Minister of Education that the first year should be handed back to the schools of the Province and that the University course should be thereby shortened by one year at least, has not—in the form which it has hitherto taken—recommended itself to this any more than to the other colleges: but University College is heartily in agreement with the Minister that the courses in the secondary schools of the Province should be lengthened by two or three years; not, however, at the end of the school course when the pupils would be in all cases too senior to profit by school-room methods and in many cases too advanced to find adequate teaching, but at the beginning. It has long been the glaring blot upon our secondary schools that they get their entrance pupils two or three or even four years too late. What can the average boy or girl be expected to make of foreign languages, ancient or modern, if they cannot begin them at the natural age for beginning foreign languages (as well as native languages) childhood, from the age of eight or nine years to twelve? At present the majority are nearer fourteen, and never recover the handicap of a start so conspicuously belated; no civilized country except Canada expects to make language scholars out of children who are caught so late; possibly Ontario has not expected it either, at any rate it has witnessed, hitherto without protest or counter-effort, the disappearance of Greek even from some institutes (including the vast majority of those in Toronto itself), and the steady lessening of the supply of good students in Latin in proportion to the need of them: the number of specialists in Classics is at the present moment quite inadequate to

the number of secondary schools which should be manned by them; as a result, Latin is actually taught in some of these schools to-day to candidates for honour matriculation, by teachers who have never taken more than a pass course in Latin themselves, the condition would be ludicrous if it were not lamentable.

Any shifting of first year work (especially first year honour work) back to the schools would reduce the honour graduation standards of this college *pari passu*; any such reduction would remove at once the one conspicuous advantage which the University of Toronto possesses over every other university of this continent, the proficiency reached by its honour students at the date of graduation, and the advantage they possess over other graduates in the graduate universities of this continent, in the competition for scholarships, fellowships and, eventually, professorships.

It is not by accident that Toronto graduates fill so many chairs in the new universities of Canada and the United States; it is the direct result of the high standard of our honour students at graduation; that standard has been in its turn the direct result of four years in honours in University College and the sister colleges of this University. For example, in classics we have seen, during this session, three honour graduates of this college teaching classics in a sister university in virtue and in virtue alone of our four-year honour course, against which other universities of Canada could not compete.

The points I have been trying to make are in no case my own only or even my college's alone, they rather show that University College in this matter of the first year in the secondary schools is in entire agreement with the staff of Victoria College and of Trinity.

AUDITOR'S REPORT

To the Governors of the University of Toronto:

GENTLEMEN:—

I have verified the attached Balance Sheet of the University, dated 30th June, 1926, and Schedules 1 to 10, and report that all the transactions of the year upon Revenue and Capital Accounts have been duly audited and found correct.

Yours faithfully,

J. MARSHALL,

Toronto, 27th October, 1926.

Auditor.

FINANCIAL STATEMENT

Balance Sheet, 30th June, 1926

SCHEDULE 1

GENERAL ENDOWMENTS FUND

Additions for 1925-26:

Convocation Hall advance:

Restoration from proceeds of wild lands sales, twentieth instalment..... \$589 00

Annuity debentures:

Portion of 1925-26 instalments reducing principal:

Seventeenth instalment, issue of July, 1909.. \$9,854 48
 Fifteenth instalment, issue of January, 1911.. 2,371 00
 Fifteenth instalment, issue of January, 1911.. 5,471 00
 Eleventh instalment, issue of April, 1915..... 1,595 33
 Second instalment, issue of July, 1924..... 3,957 30

23,249 11

Royal College of Dental Surgeons:

Estimated value of site, buildings and equipment transferred to the University upon the creation of the Faculty of Dentistry, subject to a liability of \$50,000.00 to be paid at a future date (16 George V, Cap. 68)..... 475,000 00

Properties purchased:			
Land and building, No. 45 St. George Street	\$30,079 67		
Expenditure upon improvements to fit up for Social Service Department	9,000 00		
			\$39,079 67
Land and building, No. 81 St. George Street			30,267 00
Building, No. 6 Queen's Park, further payment upon purchase . .			426 50
Building, No. 100 Queen's Park, eighth of ten instalments paid on purchase			720 00
Building, No. 184 College Street, last of ten instalments paid on purchase			500 00
Building, No. 86 Queen's Park, fifth instalment paid on purchase	\$5,000 00		
Expenditure upon improvements	5,767 62		
			10,767 62
Library proper:			
Additions for year, less depreciation (Schedule 7)			17,628 16
Increased valuation of leases upon renewal at higher figures:			
Lot 58, University Park	\$4,800 00		
Scott Street Property	8,000 00		
Yonge Street Property	35,000 00		
			47,800 00
			<u>\$646,027 06</u>

Central Power Plant:		
Repayment from Revenue for 1925-26.....	\$20,208 00	
Women's Residences:		
Furniture written off by application of credit from sales of Wild Lands set apart for Women's Residences.....	928 05	
Social Service building, 8 Queen's Park, demolished.....	7,500 00	
		28,636 05
Return of 30th June, 1926.....		\$8,307,239 84

SCHEDULE 8

Unproductive Lands.

Vacant land in Port Hope.....	\$8,045 00	
Endowment lands unsold in various townships.....	152 00	
U.C.C. block on King Street.....	50,253 79	
		\$58,450 79
		Transactions, 1925-26.
Port Hope lots, balance of purchase money due by R. H. Black written back to this account upon cancellation of sale and execution of Quit-Claim.....	\$1,150 00	
Local Improvement taxes, U.C.C. block.....	58 77	
		\$1,208 77
Return of 30th June, 1925.....	57,242 02	
		\$58,450 79

SCHEDULE 9
Leased Properties.

Land leased to City of Toronto.....	\$120,000 00	
Park lots leased.....	320,421 40	
Toronto business properties.....	304,400 00	
Caradoc Farm.....	2,700 00	
	\$747,521 40	
House and land, 47 St. George Street.....	\$10,172 95	
Building, No. 719 Spadina Avenue.....	4,000 00	
Building, No. 721 Spadina Avenue.....	4,023 51	
Building, No. 6 Queen's Park.....	6,311 75	
	24,508 21	
Rentals and City of Toronto payment accrued.....	\$9,765 79	
Less paid in advance.....	60 00	
	9,705 79	
Rentals and Insurance premiums past due.....		792 11
(York Street property).....		
		\$782,527 51
Return of 30th June, 1925.....	\$772,692 96	
Further payment upon purchase of No. 6 Queen's Park.....	426 50	
Increase in capitalized values of the following prop- erties upon renewal of leases at higher figures:		
Lot 58, University Park.....	4,800 00	
Scott Street property.....	8,000 00	
Yonge Street property (to figure of valuator).....	35,000 00	
	\$820,919 46	
<i>Contra.</i>		
Valuation attached to Lots 28, 31, 32 and 33, Univer- sity Park, written off upon conveyance of the same to the Ontario Government.....	\$37,900 00	
Decrease in rentals outstanding.....	491 95	
	38,391 95	
Return of 30th June, 1926.....		\$782,527 51

SCHEDULE 10
Investments, Cash and Accounts Receivable

Municipal and other debentures.....	\$43,642 87	
Interest accrued.....	461 53	
	\$44,104 40	
Loans secured by mortgages on real property.....	\$6,834 90	
Interest accrued.....	44 94	
	6,879 84	
Unpaid purchase money upon land sales.....	\$10,000 00	
Interest accrued.....	140 02	
	10,140 02	
Dominion and Province of Ontario Bonds.....	\$1,672,381 20	
Interest accrued.....	3,419 66	
	1,675,800 86	
Dominion Government Railway Bonds (guaranteed).....	\$129,766 28	
Interest Accrued.....	2,897 61	
	132,663 89	
Dominion Power and Transmission Co., shares.....		2,000 00

APPENDIX II.

Revenue Expenditures—1925-1926

	Appropriation	Supplementary	Unused	Total
I. Administration:				
1. Salaries.....	\$82,295 00		\$575 00	\$81,720 00
2. Pensions and Retiring Allowances.....	13,350 00		2,671 21	10,678 79
3. President's Office.....	750 00		66 03	683 97
4. Bursar's Office.....	5,000 00		220 75	4,779 25
5. Registrar's Office.....	7,000 00		344 40	6,655 54
6. Superintendent's Office.....	3,150 00	\$816 18		3,966 18
7. Convocation Hall and Simcoe Hall.....	14,550 00		2,644 34	11,905 66
8. President's House.....	6,600 00		59 50	6,540 44
	\$132,695 00	\$816 18	\$6,581 35	\$126,929 83
II. Library and University Studies:				
9. Salaries.....	\$39,000 00	\$35 50		\$39,035 50
10. Library Building and Department.....	39,905 00		\$562 29	39,342 71
11. University Studies.....	3,000 00			3,000 00
	\$81,905 00	\$35 50	\$562 29	\$81,378 21
III. 12. Royal Ontario Museum.....				
	\$37,500 00		\$45 63	\$37,454 37
IV. Athletics, Physical Training, Military Studies, etc.:				
13. Athletics and Physical Training—Men.....	\$26,300 00		\$1,186 97	\$25,113 03
14. Athletics and Physical Training—Women.....	5,550 00	\$125 47		5,675 47
15. Health Service—Men.....	6,350 00		4 82	6,345 18
16. Health Service—Women.....	4,050 00		173 99	3,876 01
17. Military Studies.....	8,285 00	420 49		8,705 49
	\$50,535 00	\$545 96	\$1,365 78	\$49,715 18
V. Faculty of Arts:				
18. Salaries.....	\$528,160 00		\$3,654 60	\$524,505 40
19. Biological Building and Department.....	10,625 00		1,283 68	9,341 32
20. Botanical Building and Department.....	15,900 00		922 48	14,977 52
21. Chemical Building and Department.....	11,175 00		1,393 37	9,781 63
22. Physics Building and Department.....	15,700 00		833 98	14,866 02
23. Astronomy.....	650 00		76 43	573 57
24. Geological Department.....	1,300 00		33 62	1,266 38
25. Mineralogical Department.....	1,200 00		38 51	1,161 49
26. Philosophy & Psychology.....	5,530 00		999 50	4,530 50
27. Mathematical Department.....	650 00		614 16	35 84
28. Mechanics.....	400 00		184 28	215 72
29. Political Economy and History.....	5,450 00		1,215 49	4,234 51
30. Ethnology and Anthropology.....	150 00	\$40 61		190 61
31. Italian and Spanish.....	50 00		9 55	40 45
32. History of Industrial Art.....	50 00	46 60		96 60
33. University College Building.....	13,700 00		2,194 32	11,505 68
34. University College Departments.....	430 00		195 35	234 65
35. University College General Expenses.....	1,520 00		249 43	1,270 57
36. Trinity College Service.....				
	\$612,640 00	\$87 21	\$13,898 75	\$598,828 46
